Mc Dill Air Force Base
Tampa, Florida

Dear Sirr

Writing with the hope that you can supply me with some information that I am curious about.

The object that I am interested in is a photo or a description of a lighted weather balloon in operation and how they operate at night.

As an ex-service man(1945-1953) and negative U.F.O. fan, there is an other item that I am curious about.

If you have two Jets flying a parallel course, why is it that one Jet has the usual navigation lights, and the other Jet has only one light? Is this single light a reflection(2 O'clock) or is the light an un-related object to the Jet?

The reason for the questions are the diagram on the attached sheet of what I have seen in the sky April 27, 1964. (7:45-8:15)

Cordially,
[REDACTED]
