7. LENGTH OF OBSERVATION 3 seconds		8. NUMBER OF OBJECTS one		9. COURSE Falling	
10. BRIEF SUMMARY OF SIGHTING Observer looking South. Obj had vertical descent. Tracked through 150 deg (?). Initial observation at 30 deg elev. Lost sight of obj at haze level. 3 second observation. Daylight observation. Size about 1/2 size of 707 fuselage. NOT a point of light. Large enough to determine rectangular shape. No evidence of fire or smoke trail. Not picked up on local radar.		11. COMMENTS Observed falling obj without fire or trail during daylight hours. Obj disappeared into or view blocked by haze layer. Degrees of arc not included (?). an omission of smoke or trail. Color not stated. Sighting too brief for good identification by pilot. Case regarded as insufficient data.

Dear Sir:

Enclosed you will find a copy of UFO sighting reported to the Smithsonian Astrophysical Observatory through one of our Moonwatch affiliates.

Captain Thompson made his original report to H.E. Roth of the Denver Moonwatch team, and the report was subsequently forwarded to this office. We have taken no action other than acknowledging the report, preferring to leave any investigation to your organization.

Sincerely

James C. Cornell Jr.
