35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was not aware that the Morning light which I spotted at 10:02 p.m. March 30, was of interest to the Air Force, until I happened to see an account in the paper about a UFO near Lewiston. The time the women reported seeing the object. I rang a bell and after checking with my wife to verify the day & time I called to PAFB on Sat, Apr 3.

The object or light had appeared strange to me because I heard no sound in its direction. There were several planes in the area but none close enough to be confused with this lighted object.

I saw no shape, just the light moving in a Southeasterly direction for a few seconds then disappearing quickly. That was what made me curious?

COMMENTS: Multiple reports of sighting from this witness. She has little concept of speed size duration or other aspects of reporting. Azimuth and elevation indicate an object high in West at 0245. Mars is at 25 deg elevation 240 deg azimuth. Likely this object is the cause of the observation although motion indicated by witness tends to rule out an astro body. Duration in accord with [illegible]. Case regarded as MARS observation.

We read that letter on the paper about the Lewisburg, O sighting, thinks he saw same thing as she did and thought his information might help us. Last night 8 Mar I about 9:30 pm he saw a white light in sky, was facing East. First thought it was a/c, it appeared light, about 60° appeared like moving slow, but for its alt it was probably moving faster than it looked. Of traveling compass, flight was, SSE, appeared on prior flight, Antares last was brighter, passed with vicinity of Antares more southerly than Spica, faded away. Did not appear to change direction or speed. Motion quite similar to satellite except it was yellow-orange instead of white.
