22 Jul 65 — At approximately 2030 - 2100 hours this date many calls were received from individuals also News Media concerning observations of UFO's. The general description, cigar shaped with red exhaust. The Weather Bureau, FAA, Allegheny Observatory and Bulhl Planatarium were contacted. The Observatory and Planatarium concluded that the objects sighted were Meteor Showers. News Media publicized same. As of this date, the News Media has given much publicity to UFO's.

25 Jul 65 — Several reports received from residents of the Pittsburgh area. General description, oval shaped orange disc's traveling in various directions.

27 Jul 65 — Several reports received from local residents. Orange sphere sighted 2130 - 2200 hours. Sphere rotated back and forth, stopped, then rotated and disappeared over the horizon, no flame, no noise, also reports of cigar shaped objects, same type reported 22 Jul 65.

1 Aug 65 — Several reports received. Silver sphere object sighted. One report stated silver shaped saucer, small oval windows seen 1630 hours. Further questioning revealed report unreliable.

3 Aug 65 — Report received of high pitched whine heard 0335 hours. However, individual saw nothing.

4 Aug 65 — Report received of red haze in the sky 2140 hours, object sighted football in shape, no sound, about size of north star, disappeared over horizon.

7 Aug 65 — Report received, red object sighted revolving as it traveled. Object brighter in the center, moving at a fast rate of speed.

11 Aug 65 — Report received, round shaped bright orange object moving at a fast rate of speed, made a whistling sound, came down low and flew over residence. Also another report of flying saucer type object moving at a fast rate of speed. Further investigation revealed report unreliable.

SUMMARY: The inspecting officer has observed nothing to date. All reports are checked and most reports to our knowledge are unreliable and possible hoaxes. Publicity recently given UFO's we feel has stimulated telephone reports and because of the number of reports, forms have been reproduced for collecting initial information, which is checked further by the Information Officer at a later date. No releases by this organization concerning UFO'shave been made to the news media. SAFOI has been contacted and the current report on Project Blue Book has been received. Names, addresses and phone numbers of observers reporting UFO's are kept on file. The FAA, Weather Bureau, other military installations in the area, Allegheny Observatory, Pulhl Planatarium have been informed to contact this organization when UFO's are sighted.

FLYING SAUCER FROM MARS DISCOVERED

An on-the-spot Institute investigation recently verified the existence of a "Flying Saucer From Mars," which has accounted for many UFO sightings in the Pittsburgh area. The object is a Citabria Champion advertising plane flown by Fred Eiler, Culmerville Airport, and bears the above quoted inscription with the qualification "Pa." in small letters after "Mars." Mr. Eiler owns AAA Sky Adds, Inc.

The wingspan of the Citabria ("airbatic" spelled backwards) is 36-1/2 feet. It usually flies at an altitude of about 1,000 feet, around 70 mph, and can stay aloft over five hours. Mounted below the wings is a framework of wires to which are soldered 7 rows of 36 GM51 bulbs, the size of a flashlight bulb. A heavy tape with holes punched in it to spell out a message, funs through a machine inside the plane which makes the bulbs light up in a certain sequence, to make the message move across the lights. An air siren mounted below the plane is sometimes used to attract attention.

In a strong headwind, at an airspeed of 30 mph, the Citabria can appear to be standing still. Seen on edge, its lights, moving from one side to another, can give the appearance of a flattish object with a row of lights around the rim. The engine of the plane is inaudible at a distance from which the moving lights can be easily seen; thus, many people report seeing a silent, disc-shaped object with a rotating rim covered by equally-spaced lights. When the plane is flying directly toward or away from the observer, especially in a misty atmosphere, its appearance can be quite eerie. It can, as several reports have stated, definitely "not resemble any conventional aircraft"!
