

PROJECT 10073 RECORD

1. DATE - TIME GROUP 29 Aug 65 30/0215Z	2. LOCATION Northeast Harbor, Maine
3. SOURCE Civilian	10. CONCLUSION Astro(ARCTURUS)
4. NUMBER OF OBJECTS One XXXXXXXXXX	ARCTURUS at 285 Deg AZ and 5-10 Deg elev.
5. LENGTH OF OBSERVATION 15 Minutes	11. BRIEF SUMMARY AND ANALYSIS Observers spotted a white and red light which was flashing. Object appeared to hover in the SW for awhile and then it would rapidly move out to sea away from the observers and then reappear and hover in the same place.
6. TYPE OF OBSERVATION Ground-Visual	
7. COURSE Stationary, Away	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No XX	
2 Witnesses

UFO Sighting Reported by Nun

RINGWOOD, N. J., March 11 (UPI).—The Mother Superior at Mount St. Francis Convent in this Passaic county town told police she spotted an unidentified flying object that appeared "like a kite on fire" early Friday near the convent grounds.

Mother Superior Veronic said the "unusually bright" object was flying above the nearby abandoned Ringwood Mines. Police searched the area but could find nothing.

A rash of other unidentified flying objects were reported two months ago at the nearby Wanaque Reservoir.

UFO Sighting Reported by Nun

RINGWOOD, N. J., March 11 (UPI).—The Mother Superior at Mount St. Francis Convent in this Passaic county town told police she spotted an unidentified flying object that appeared "like a kite on fire" early Friday near the convent grounds.

Mother Superior Veronic said the "unusually bright" object was flying above the nearby abandoned Ringwood Mines. Police searched the area but could find nothing.

A rash of other unidentified flying objects were reported two months ago at the nearby Wanaque Reservoir.

4.
However, after careful reading of the
sightings of U.F.O.s by responsible
citizens in the Exeter, New Hampshire
area, as publicised by a bona fide
journalist Mr. [REDACTED]
"Incident at Exeter" - Sept. 2nd 1966.
I thought better of our early sighting

Also it might interest you to know
that one or two nights later several
of our employees at the Astor Inn,
in Northeast Harbor, (Maine) reported
observing "One U.F.O." hovering over
approximately the "same spot" -
in mid air over the Jackson Cancer
Experimental Laboratories south west
of Bar Harbor, Maine... and later
veering, yawning or wobbly steering
itself slowly away from the area
and showing the same red & white
flickering lights, but emitting
absolutely no noise or sound, at
1200 feet. attested to by Miss Ann Dobson.

Incidentally, the Jackson Cancer Experi-
mental Laboratories near Bar Harbor,
Maine, utilized all forms of high
powered electrical, electronic and
radiation equipment in the labora-
tory's experiments, etc.

Question. Between August 27 and Sept 3
1966, was there any abnormal or
unusual Dow Air Force Base Radar
Defense Detection Pick ups of "Boogies"
or unidentified flying objects???

31

Naturally, at 1200 to 1500 feet, on a almost starless night, we could not pin point this unidentified object in the sky. But because of its hovering ability, plus emitting no noise of any kind, plus its "startling" capability to zoom off out to sea - at an incredible rate of speed from a motionless position. (Each time, the Red and White lights of the air craft flickered off and on five or six times before veering off from its hovering target positions.)

Obviously we did not feel concerned enough about this incident to report it to the Dow Air Force Base in Bangor or to any local authorities. As both myself and my Lady Companion, Miss Irene Clarke are (or would like to think we are) responsible adults - and not given to jumping to any hasty conclusions... However, the behavior (flight pattern) of this V.F.O. or whatever it was we agreed that night upset us a little. But, even so, we both chalked it up to being a new U.S. Air Force Experimental Air craft assigned to the Strategic Air Command Base at Dow Field. As no report of this sighting was ever reported or put on file by us. After all, responsible adults are not given to filing such V.F.O. Reports.

Unidentified Flying Object

On a very clear night last Summer at Northeast Harbor, Maine where I am employed as a Night Auditor at the Asticou Inn a summer resort owned by the Asti Kim Corp. of Northeast Harbor (Maine), I observed a Unidentified Flying Object hovering over the proximity of the Jackson Cancer Experimental Laboratories below Bear Harbor.

It was August 29th 1966.
at approximately 9:15 to 9:30 p.m.
at the Boat Dock in Northeast Harbor that I and Mrs. Irene Clarke, a Secretary at the Cabot Institute Stock Brokerage Consultants of Boston (Mass.) — suddenly spotted what first appeared to be an "observation Balloon" moving very slowly; but emitting a Red then white light flickering on and off "in some regulated sequence" — very slowly moving from the direction of Bangor (Maine) apparently with the air currents at approximately 1500 feet high — between Northeast Harbor and Bear Harbor, Maine.

As I said I immediately identified it as some kind of "observation Balloon as it emitted" "No Sound."

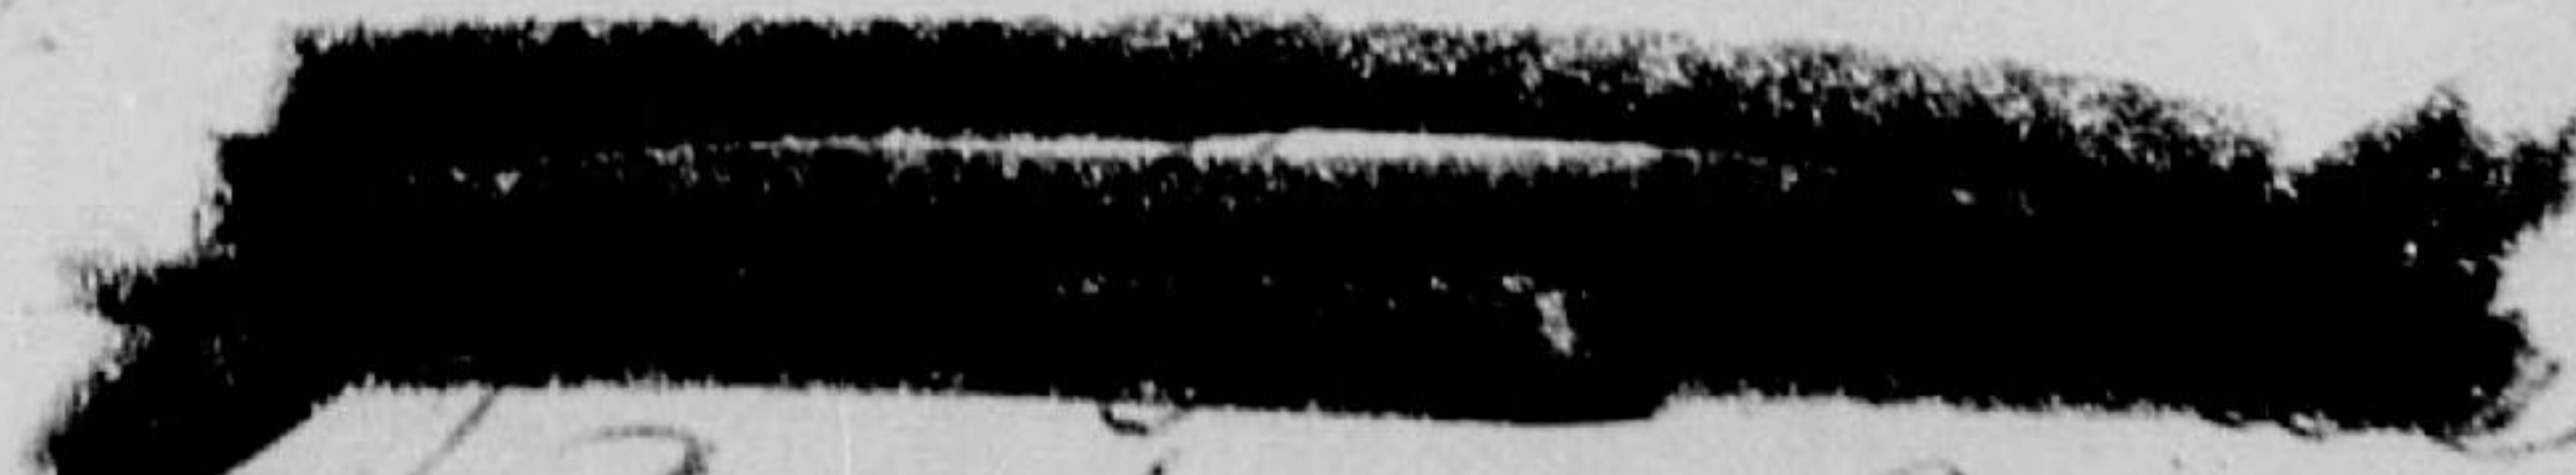

21

We got out of the automobile we were
 sitting in to observe it better —
 When suddenly "it stopped!"
 Yes, it actually halted in mid air
 and remained stationary —
 just apparently hovering over
 what we later determined was
 the proximity of the Jackson
 Cancer Experimental Laboratories
 located in the out skirts of Bar
 Harbor, at 1200 to 1500 feet in
 the air. It just "sat there"...
 or hovered motionless, except
 for a Red Light that flicked on
 (and remained on) until abruptly
 five to six minutes later, the
 V.F.C. suddenly sped off at a
 breath neck rate of speed out
 to sea only to return a few
 minutes later to hover motion-
 less over the same spot (the
 Jackson Labs.) and take off a
 second time at accelerated speed
 of between 900 and 1200 miles
 per hour "out to sea again."
 The Third Time it returned to
 hover over "that exact same spot"
 the Jackson Laboratories, it sudden-
 ly veered off towards Bangor
 by the Mainland, leaving Mount
 Desert Island at a slower rate of
 speed; in fact almost as slow
 in a veering, yawing sort of
 wobbly pattern of flight, emitting
 "No Sound" and flashing only Red
 and white lights at take off.

My own Leyman's theories... for what they are worth estimate these numerous U.F.O. sightings; particularly in the New England area of last year. strongly suggest "alien Space craft" being pulled or attracted to strong pin points of intensified electrical and electronic utility, power sources radar stations, defense bases, experimental laboratories, etc. also, hide-out areas... principally located in isolated, sparsely inhabited areas of our country. but strategically located near our Big Cities and Air Defense Bases (see Enclosure) also, ironically enough in isolated areas, sparsely inhabited, but adjacent to huge man made water reservoirs and or abandoned or unused Mines. The U.S. Air Force Intelligence Services has information (classified) on several reported cases of possible attempts by these "alien beings" to test and try emerging into our atmosphere. But, as far as we can determine, all attempts thus far have met with failure.

In summation I can only sum up my own personal experience of last August 29, and attested to by a companion witness.

Sincerely yours,

Leadway Inn
Dover, Delaware

REPLY TO
ATTN OF: DCOI

17 March 1966

SUBJECT: UFO Report

TO: AFOS (FTD)
Wright-Patterson AFB, Ohio 45433

Attached as inclosure #1 is a letter received 16 March, 1966, from Mr. [REDACTED], Treadway Inn, Dover, Delaware. Since the letter relates to a supposed sighting that occurred 6 months ago, the letter is being forwarded with no local action being accomplished.
