U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

1 Sept (Z)
Day Month Year

2. Time of day:

01/0245 Z
Hour Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address

City or Town

State or Country

5. How long was object in sight? (Total Duration)

Hours Minutes Seconds

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined?

5.2 Was object in sight continuously? Yes ☒ No ☐

6. What was the condition of the sky?

DAY NIGHT
a. Bright a. Bright
b. Cloudy b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other ring of light

13. Did the object:

(Circle One for each question)

- | | | | |
|---|-----|----|------------|
| a. Appear to stand still at any time? | Yes | No | Don't know |
| b. Suddenly speed up and rush away at any time? | Yes | No | Don't know |
| c. Break up into parts or explode? | Yes | No | Don't know |
| d. Give off smoke? | Yes | No | Don't know |
| e. Change brightness? | Yes | No | Don't know |
| f. Change shape? | Yes | No | Don't know |
| g. Flash or flicker? | Yes | No | Don't know |
| h. Disappear and reappear? | Yes | No | Don't know |

14. Did the object disappear while you were watching it? If so, how?

yes

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound *none*

b. Color *red, white, blue, & green*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

round, barrel size

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object?

(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other _____

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

- | | | | | | |
|-----------------|-----|----|----------------|-----|----|
| a. Eyeglasses | Yes | No | e. Binoculars | Yes | No |
| b. Sun glasses | Yes | No | f. Telescope | Yes | No |
| c. Windshield | Yes | No | g. Theodolite | Yes | No |
| d. Window glass | Yes | No | h. Other _____ | | |

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

*Traveled W then E then N then out of sight
altitude approx. 2,000 ft.*

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? (Circle One) Yes No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME

Last Name

First Name

Middle Name

ADDRESS

Street

City

Zone

State

TELEPHONE NUMBER

AGE

SEX

Indicate any additional information about yourself, including any special experience, which might be pertinent.

Info. received thru AFCEP

33. When and to whom did you report that you had seen the object?

Day

Month

Year

PROJECT 10073 RECORD

1. DATE - TIME GROUP 31 August 65 01/0500Z	2. LOCATION Cheyenne, Wyoming
3. SOURCE Eight Civilians	10. CONCLUSION INSUFFICIENT DATA FOR EVALUATION
4. NUMBER OF OBJECTS Three	
5. LENGTH OF OBSERVATION 35 - 40 Minutes	11. BRIEF SUMMARY AND ANALYSIS Eight young civilains of star-gazing group with 50/100 Power Telescope observed object low on horizon in the North moving slowly West. Three objects colse together. Red, white and blue lights. Duration rules out A/C. Motion rules out balloon and Satellite. Sighting consistant with Astro Observation, however there are no major Astro Bodies in that portion of the sky at the reported time of observation. Data on time motion sequence as well as manner of disappearance not completed. Regarded as Insufficient data.
6. TYPE OF OBSERVATION Ground-Visual (TX)	
7. COURSE West	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No	

(2) Object again appeared in same location but on the next five successive observations flew a straight course and disappeared to the East. At first, object became three white objects, but as it moved Eastward the two rear whites disappeared and there were now six red, green, and white lights as shown on plot.

d. Object sighted and observed through binoculars by Staff Sergeant and two neighbors, at 1930 local time. Object, oblong, about the size of a saucer, moved with an up and down motion, white in color with a flashing light. Local weather balloons are launched at 10AM and 10PM, so this object is eliminated as a weather balloon. Object was also observed on 31 August and 3 September. See plot number 4.

e. Object was observed to the North of Cheyenne by group of eight young civilians, whose hobby is stargazing with a 50/100 telescope. Object appeared low on horizon, moving slowly Westward, disappearing somewhat higher above horizon. There were three objects, size of a dime, close together with red, white, and blue lights. See plot number 4.

f. Object first sighted by personnel at Golf, who informed two members of the Target Alignment Team at a nearby Launch Site. The latter observed the object with a theodolite and identified it as Jupiter, due to observation of the three moons of that planet.

3. The members of the Target Alignment Team and Geodetic Survey personnel seem to be fairly well trained in astronomy and can present a very accurate description of objects and movements.

4. The weather in all sightings was clear with occasional clouds.

5. Report was compiled by Major Elva D. Brown, Intelligence Staff Officer, with 19 years of military experience.

6. Attached are four plots showing locations of observers and directions of movement.

7. Request information as to whether this or the previous report may be released to the public.

REPLY TO
ATTN OF: 90DCOP

20 SEP 1965

SUBJECT: Unidentified Flying Objects (UFO)

TO: AFSC (FTD)

1. Reference AFR 200-2, as amended. The following described unidentified flying objects are an addition to our report of 6 August 1965.

2. Description of Objects: The reported objects are plotted on the attached maps with descriptions as referenced in subparagraphs below:

26 Aug
a. Reported by civilian guard at Sioux Army Depot to Golf Launch Control facility, where Air Force personnel observed with binoculars. The first sighting began at 2145 local time, and the second sighting at 2220 local time. The latter sighting consisted of two objects moving approximately one mile apart. Objects were the size of the North Star, pale yellow to white, and moving rapidly about 30 degrees above the horizon. See plot number 1.

26 Aug
b. Reported from Hotel Launch facility and observed by nine military personnel with the aid of binoculars. See plot number 2.

(1) The first sighting was of an object the size of a star which appeared to the Southeast and traveled Westward, disappearing to the Southwest. Object was at 20,000 feet, very fast, and reappeared at four 25 minute intervals on the same course.

(2) The second sightings were to the North of the observation point. Object was slightly less than the size of a pea but appeared slightly larger with each successive sighting. Resembled a luminous glow, white to yellowish in front, semi-circular in shape, and the last two sightings appeared to have a trailing white glow. On four occasions, there was a roaring jet-like noise at some distance behind. Notice some similarity to following report on same night by another group.

26 Aug
c. Objects reported by three airmen of a Geodetic Survey Team, who observed them with the aid of a theodolite (equivalent to a 40 power telescope). See plot number 3.

(1) Object appeared to be twice the size of a pinhead, appeared in the middle of the Big Dipper and moved on course as indicated. When seen through the theodolite, object became three white objects grouped as shown on plot.

Peace is our Profession
