Neither of the two enclosures have been released to the press or submitted for publication. I have removed addresses and locations from the August 18, 1965 report. If you desire any more information of this report you can contact me.

Two weeks ago I sat down with the Old Testament and put the Prophet Ezekiel's writting into todays technical knowledge and terms. You may not agree, but it does make interesting reading. For me it does not distract in the least the message that God was delivering to EZekiel.

Very truly yours,

Aug 65

A clipping from Portsmouth, Virginia, tells of a young man who saw a UFO the size of a small plane cross the road about a half mile ahead of him at 5:30 one morning, while driving along U.S. Highway 58. His car engine cut out, as did the engines of several other cars in the area, but it re-started without difficulty 30 seconds later. The young man, named Steve L. Anderson, reported the incident to Langley Air Force Base....

Cigars over Littleover?

Our first reaction to this report was that it was about a high-flying jet with just a wisp of vapour trail, but according to the *Derby Evening Telegraph* of August 18, Castle Donington Airport said there were no aircraft in the district. Mr. E. C. Reynolds of Littleover, and four passengers in his car, all watched—"A long cigar shaped thing like a thin cloud', travelling from West to East. A small black object at the front occasionally gave out a brilliant light.

"No sooner had it gone out of sight than another appeared on the western horizon and followed a similar course."

Date of sighting: August 17.

Roker Foursome

The *Sunderland Echo* of August 18 carries the story of sightings by Mr. and Mrs. Jamieson at about 9.45 p.m. on the evening of August 17, as they were walking along the seafront—

Mrs. Jamieson said that she saw an orange disc like a large star, moving inland from the sea. 'It was travelling in a north westerly direction. It disappeared, then a second disc appeared, moving in the same direction. Then a third disc appeared going the other way.' She added, and this may have been the first disc returning.

"Mr. Jamieson went on: 'The fourth disc we saw was revolving at a tremendous pace. It could not possibly have been a star, and its movement suggested that it was some sort of machine.'"

Mr. [redacted]
Lawton, Oklahoma 73505

August 10, 1965

On Thursday, July 22, 1965 between the hours of 2000 and 2100 I was sitting on our front porch at [redacted] gazing in the general direction of [redacted] which is located about five miles to the North East of my vantage point. The field of view from our front porch is from the East to West-North-West. The object that I observed came into view from the South East and traveled in a North West direction. The object was at an altitude comparable to commercial aircraft coming into and leaving the [redacted] Airport, and its speed was a little faster than the commercial aircraft. My time of observation could not have exceeded ten seconds, and could have been shorter. I was observing the object broadside and its path was parallel to the earth and perfectly level. There was no sound accompanying its flight, and no other distractions were observed at the time.

My first impression was that of three separate objects, but as I have had time to review what I saw, I have concluded that there was only one large object involved. The nose, or leading part of the object appeared to be as bright as molten metal, or silvery in color. I only saw part of the leading end as there seemed to be smoke or vapor coming out and obscuring the rest of the object from view. At times this vapor or smoke would be blown aside so as to give a momentary view of other parts of the object that were as bright as the lead part. This would occur first fairly close to the lead end of the object, then farther back toward the rear end. This was what at first led me to believe that there were three round objects, but aside from the lead end of the object there was nothing that I saw that would indicate that there was

There was no vapor trail or smoke trail following the object, only the vapor or smoke that surrounded the object.

The sky was dull as at dusk and the sun had either set or was behind clouds. The object appeared to be between two and one-half to three miles away from my point of observation, and in the general direction of

My first thought was that I was observing the reentry of some rocket tankage in the 30 to 40 foot length, but the altitude and speed were much too low and slow and the direction of travel ruled out tankage. The radio and television reports were that a meteor had gone over the area, but years ago I observed a meteor or fireball streak across the sky from East to West and it was red in color, high speed and nothing like the object that I observed on July 22.

My best guess as to what I saw is that it was oblong in shape, perhaps cigar shaped, but at no time did I observe or have complete view of the object due to the smoke or vapor that surrounded it, except as I have explained above.

The following is a brief with illustrations:

1. Direction of flight South East to North West
2. Path of flight on the celestial sphere, from 2 o'clock to 10 o'clock
3. Time: Between 2000 and 2100 hours
4. Date: Thursday 22 July 1965
5. Atmosphere: Dull, sun had set or was behind clouds
6. Flight Pattern: Level
7. Observation Time: 10 seconds or less
8. Distractions: No sound of motors or engines
9. No vapor trail or smoke except around object
10. Color: White hot or silvery in color

12. Was not a rocket overshoot or tankage, it was to low, too slow and in the wrong direction from impact points.

13. Illustration of object:

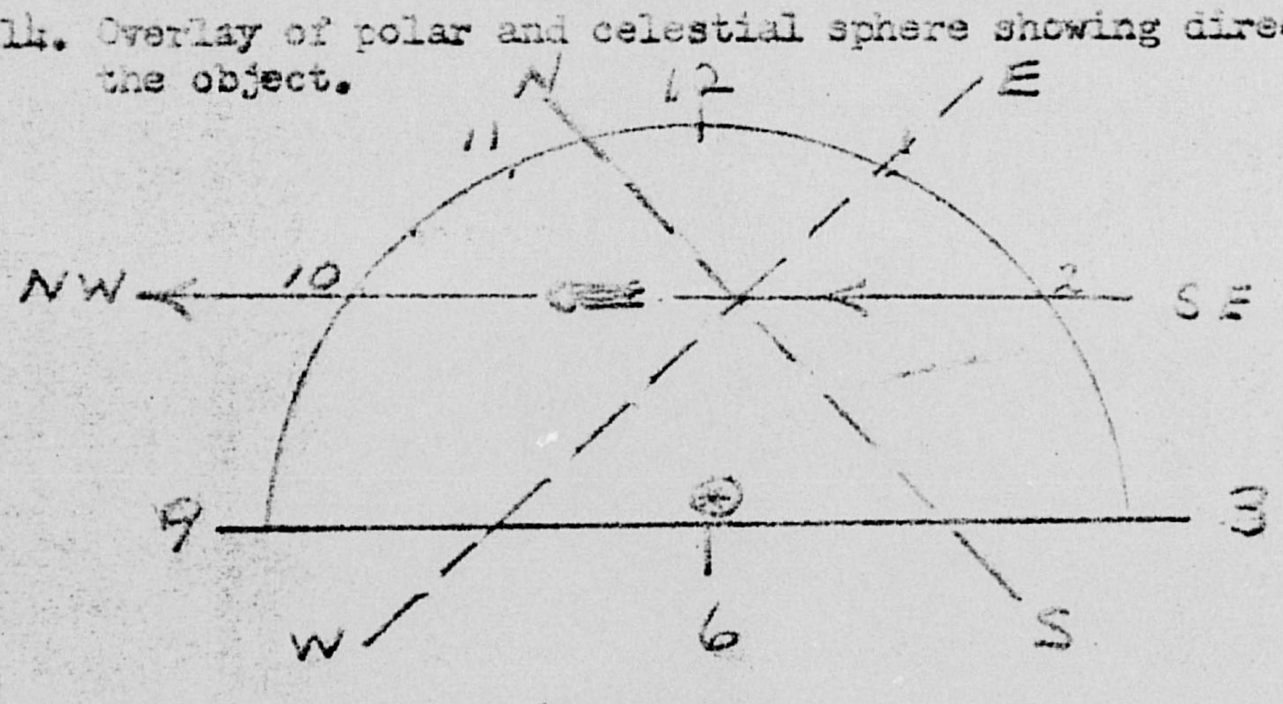
A. The nose seemed to have height, was white hot or silvery in color and did not fade out.

B. Smoke or vapor seemed to come from the nose section and obscured the rest of the object. Smoke or vapor could have come from other sections also.

C. Smoke or vapor as observed.

D. Bright patches seen as smoke or vapor appeared to have been blown aside, then would disappear. The locations show their relative distance from each other and from the nose of the object.

14. Overlay of polar and celestial sphere showing direction of the object.



15. Never before have I observed any natural phenomenon that came close to what I observed on July 22, 1965.

ST OHIO

AF Plans Low Flights In Area

A lot of Lockheed C-130 Hercules troop carrying planes are going to be flying low over central Ohio for nine days beginning Aug. 18.

The turboprop transports, from Lockbourne Air Force base near Columbus, will be practicing navigation at low levels and making air drops, assault landings and takeoffs at Clinton County AFB, near Wilmington.

Col. George W. Kinney, commander of the 317th Troop Carrier wing, said the increased number of flights are being conducted to meet semiannual crew training requirements.

HE SAID that it is not a result of recent developments in Southeast Asia, but added that this type of tactical flying could be used in Vietnam and actually was employed during the recent Dominican Republic airlift.

The 317th has been flying some low level missions in the area for some months.

THE INCREASED low altitude flights will be conducted between 9 a.m. and 10 p.m. daily 300 to 500 feet above the ground during the day and 1,000 feet at night.

Large scale maneuvers—15 to 20 planes flying one third of a mile apart—will be flown between 3 and 10 p.m. Other times, the activity will consist of not more than three planes.

The flights will be over or near 28 communities, including Columbus, Circleville, Newark, Mount Vernon, Lancaster, Zanesville, Mount Gilead, Delaware, Marion, Marysville, Urbana, Springfield, Washington Court House, Wilmington and Xenia.

October 13, 1965

Lieutenant Quintanilla, Jr., Major USAF
Chief, Project Blue Book
Wright-Patterson AFB, Ohio

Dear Mr. Quintanilla,

Thank you for your explanation of the swirls made in the wheat field in Veblen Township, here in Marshall County.

"Dust Devils", or miniature whirlwinds seemed a likly explanation to me (and others too), until I actually saw the field. After seeing the coloration of the ground (as hard as a desk to) in these areas as compared to the outside of the area where it is normally soft, I felt that just a wind could not have been responsible. All circles were direct. When the wheat was combined, the combine tires rode deep tread marks up to these circles, but no tread marks were visible on those circles. I would estimate a combine to weigh around 4 ton.

Two law enforcement officers attached slight relation [illegible] there seems also.

Enclosed are three photos of these areas. The aerial view shows 9 areas in the bottom of the picture clearly. Between the arrows there are two rows of them counting the circles (5 - 4 in each row). They are not all visible in this photo, and are not as clear as the 3 shots.

[illegible] these areas I'm afraid we will never know. It is interesting to speculate though. Many theories have been presented.

I wish to thank you for your interest and consideration.

Sincerely,

Richard F. Durland

Britton, South Dakota

Dear Mr Durland,

Your letter of 31 August 1965 was forwarded by the Air National Guard Commander at Fargo, North Dakota.

Consultation with the meteorologist leads me to believe that the following is a plausible explanation:

"Dust devils" are described by the meteorologist as short duration miniature dry storms which may swirl in clockwise or counter clockwise direction. North Dakota summers frequently have these strong small whirlwinds. This phenomenon could plausibly account for the 27 six to seven foot diameter swirls made in the wheat fields of Veblem Township this past August. A clear, calm, hot dry summer afternoon over a flat field is conducive to producing intense whirlwinds of 5-10 foot diameter. The whirlwind is a result of rapidly rising parcels of air that have become lighter by being heated at the field level. Although they have been most frequently observed picking up dust, they probably occur as frequently without dust.

The temporary deformation of the wheat along the rapid wind path might contribute to later compaction of the soil. The wheat in the center of the whirlwind would be affected as would that in the peripherial area.

Thank you for your observations.

Sincerely,

HQ

Commanding Officer
U. S. Air Force Base
Fargo, North Dakota

Dear Sir:

Several people in this county, and especially in the Nottheastern part of this County are quite concerned about the areas described in the enclosed clipping.

No logical explanation can describe the numerous areas found in this field.

If you could be of any help in shedding some light on this matter, I would greatly appreciate it. Perhaps there is some department or agency of the Air Force that would be interested in investigating it further.

Sincerely,

Richard F. Durland

C.C. Willard Hill

8/19/65

The

VOLUME 82 BRITTON, MA

The ground area shown above has a number of people wondering! Willard Hill, Veblen township farmer at right, called County Agent Dick Durland, left, last week to check an unusual situation in his wheat field. After Durland arrived he was shown a number of areas in the wheat field like the foreground in the picture. The round areas, varying from six to seven feet in diameter, have the wheat all twisted in a clockwise direction. Yet the wheat stem has not been cut and the roots are still in the ground. The ground in these circular areas has been packed so the soil is much harder then the ground elsewhere in the field. However, the center of the circular area is not as hard as the balance.

Hill said he has discovered about 27 similar areas in his field which is located less than a quarter mile from the farm buildings. The large number was discovered by Hill's father, Danny Hill, when he cut the field last week Wednesday. Since then a number of people have come out to look at the circular areas but no one has been able to give a plausable explanation of what caused them, Hill said.

Hill recalled that about a month ago Chip, his white terrier, made quite a commotion one night. The development of the grain in the circular areas indicates that's about how long ago they were made.

Speculation has run wild since they were discovered and thoughts have ranged from whirlwinds to whirlpools to interplanetary visitors. An effort is being made to contact someone who might be able to explain what caused the mystery. —Journal photo.

with the Ralph Sommers family for a longer visit.

Mr. and Mrs. Ralph Grode and family, Andover, Mrs. M. J. Samson and Mr. and Mrs. John M. Keintz were visitors Sunday at the Ray Jaspers home.

Mr. and Mrs. Luvern Steiner accompanied by Mr. and Mrs. Frank Steiner left Friday for Freeport, Minn. where the latter visited relatives and Mr. and Mrs. Luvern Steiner drove to St. Paul where they were guests of Mr. and Mrs. Math Pitzl several days.

Mr. and Mrs. Archie Brewer and family, Rapid City, are visiting her parents, Mr. and Mrs. Steve Samson at the present time.

Mr. and Mrs. John Sundstrom entertained guests at dinner recently including Mark Gerbur, New York, Mr. and Mrs. Delmar Opitz and family and Donna and Vickie Waletich.

Mrs. Herman Carlson, Britton was a guest Friday evening at the Cornelius Keintz home.

Sr. M. Lisetta has been visiting the Sisters of Notre Dame in Eden several days going from here to Grand Forks, N. D.

Mrs. Cornelius Keintz was among the 39 members of the S. D. Homemakers Extension club members attending the National Extension Homemakers Council at Purdue University, West Lafayette, Indiana, this past week. She returned home Saturday evening.

Mr. and Mrs. Mike Wegleitner are the parents of a son born Monday at the Day County hospital in Webster.

Henry Streier, New York, is visiting at the home of his brother, Mr. and Mrs. John Streier and his sister, Mr. and Mrs. Adolph Schuster.

Mr. and Mrs. Archie Brewer and family visited her parents, Mr. and Mrs. Steve Samson several days, returning to their home in Rapid City Thursday.

Mr. and Mrs. Joe Wegleitner, Britton, are visiting at the home of their son and family, the Mike Wegleitners.

Pamela and Evelyn Opitz were Sunday overnight guests of Vickie and Donna Waletich.

Mr. and Mrs. Fred Gottsleiben and family, Watertown visited at the home of Mr. and Mrs. Steve Samson, Thursday.

Jerry Keintz who has been visiting the past two weeks visiting at the home of his sister, Mr. and Mrs. Stanley Plant, Cedar Lake, Indiana, returned home. He was accompanied by Galen and Gary Plant who will visit their grandparents several weeks.

Members of St. Ann's Band met at the home of Mrs. Kathrine Waletich Tuesday afternoon with nine members present. Prizes were awarded to Mrs. George Waletich and Mrs. Joe Schuster. The September meeting will be held at the home of Mrs. John M. Keintz.

Mr. and Mrs. Ed Schlekewy returned to their home in Texas, this past week, after visiting relatives in this area several days.

Mr. and Mrs. Don Quarve and family, St. Cloud, Minn. and Mr. and Mrs. David Waletich and family, Milbank, were week end visitors at the Hubert Opitz home.

The Eugene Kettler family, Watertown, visited his brother, Mr. and Mrs. Roman Kettler over the week end.

Mr. and Mrs. Don Quarve left for the west coast where they will spend several weeks vacationing.

Bobby Schlekewy is visiting his parents, the Robert Schlekewys.

Family Sees UFO Over Belleville

BELLEVILLE — Four members of a Belleville family yesterday reported seeing an unidentified flying object in the sky over their home Thursday night.

W. B. Wilson, a professional engineer, his wife, and daughters, Judy, 9, and Becky, 15, said the object appeared to be a satellite.

"Earlier in the evening, Judy had started talking about satellites and we had discussed the scrubbed-out Gemini flight," said Wilson.

"We went out in the backyard and sure enough there was a satellite visible. It appeared to be in a polar orbit moving north to south. We watched it for about a minute and suddenly there appeared another satellite which seemed to have split off from the one moving north.

"It was moving in the opposite direction, and after the first satellite moved out of sight we watched the other one which seemed to hover in the sky and was visible for about 10 or 15 minutes. My wife had been called and we all stood and watched it.

"Later, about midnight, my daughter Becky saw the object or satellite that had hovered in the sky in the exact spot we had watched it.

"Being an engineer, I have often taken such reports rather lightly. But this I saw and I wasn't the only one. I don't know whether the second object was a satellite or not, but right now I'm calling it an unidentified flying object."

U.F.O. Investigators Release: NO CASE (INFORMATION ONLY) 19 August 1965
Mt Airy, North Carolina

"SIGHTINGS" [redacted] AND LANDING NEAR MOUNT AIRY, NORTH CAROLINA

On the heels of recent sightings of "Unidentified Flying Objects" statewide, nationwide and worldwide in recent months have come reports of sightings and landings of 'flying saucers' near Mount Airy, North Carolina. The investigations lasted a total of nine hours.

And on hand during his vacation from Easton, Pa. was a Mount Airy native, [redacted], a Professional Y.M.C.A. Secretary in Pennsylvania and also a serious civilian UFO investigator and researcher for over the past 18 years.

Both of the sightings [redacted] investigated, occured on the outskirts of Mount Airy, in the early morning, under perfect weather conditions and with similar cigar-shaped unknown flying objects. Other UFOs had been observed in those same two areas in recent months also.

The first sighting was reported by salesman, [redacted] 40, of F. Ross Co. and a resident of [redacted] in Mount Airy. Parrish encounter came on July 21, when he reported he watched a reddish-orange cigar-shaped object hovering above a smokestack for 2½ minutes at the Flat Rock section of the Mount Airy Granite Quarry. He watched the object, which seemed to be hovering around 150 to 200 feet above a 60 foot chimney at the quarry through one of his house windows. The mystery object, which was fat in the middle and tapered at both ends like a "football" was estimated to be hovering about 2 miles away from his home at around 250 feet above the quarry at Arlington, under cloud cover with stars shining. When the "saucer" finally moved it went like it was climbing a series of steps up vertically and then disappeared in the distant eastern sky.

The landing report occurred early on Thursday morning, August 12 at 3:00 a.m. and was reported by housewife, Mrs. [redacted], who was visiting her mother, Mrs. [redacted] on the Pipers Gap Road area near Mount Airy. [redacted] on vacations from [redacted] Street S., Arlington 2, Virginia. The Pipers Gap Road runs from Mount Airy to Lexington and the landing incident occured about 5 miles North of Mount Airy beyond Count, N.C. The landing area had a radiation count, but it did not show an above normal background radiation count. It was checked by Geiger Counter by Captain Jim Loflon of the Mount Airy Emergency Squad and by Fawcett. However this check came eleven days after the incident and heavy rains recently may have erased such evidence.

Mrs. Columbus, whose husband Tom is an accountant in Washington, D.C., was awakened suddenly by a sharp noise in the backyard of the Richburn home. It terrified her so badly that

for a moment she was unable to walk or talk as she tried in vain to wake up Mrs. [redacted] in another room in the house. The object was turning and blazing like a large child's top and had a steady humming sound. Mrs. [redacted] said she could feel the vibrations of the air currents against the side and top of the house.

As she lifted the shade of the window up she was just in time to see a cigar-shaped object having a revolving yellow light also above the front yard telephone pole and wires to the left of the house and towards the Piper Cap Road to the North. The strange flying object during its maneuvers, moved to the right and to the left and up and down from the South behind the house to the North, then to the northwest and back again towards the West. At this point Mrs. Schumaker said she could distinctly hear the rustling of the oak tree leaves overhead and left of the home. Then she lost sight of the object behind the nearby trees.

She finally managed to get back to bed, but slept little that before dawn. Mrs. [redacted] told of fantasy her daughter was almost scared to death and also that she told Mrs. [redacted] that the incident should be reported to authorities, but they decided not to.

The next morning Mrs. [redacted], Mrs. [redacted] and other family members discovered a perfect 12 foot circle area surrounded by a six inch ring around its circumference, which was impressed on the ground about 35 feet behind the house and around 70 feet from the telephone pole and wires in the front yard.

In the tracks of the circle the grass remained higher and was left untrodden. Green oak leaves were scattered to the left of the house all over the ground and many of the trees in this area showed twisted leaves on their limbs, as if done by a revolving force of some kind(the spinning object).

The object evidently landed straight down for about 1½ minutes and then took off towards the North, then the northeast and moved finally back to the West before disappearing in the distance behind the tall oak trees to the left of the home.

[redacted] after investigating both of these recent About Sky sightings stated that he felt, because of the evidence collected and because of the reliability of both of the eye-witnesses and similar descriptions that the encounters were bonafide UFO sightings.

Nearly nine such landings had already been reported worldwide in the past 16 months from scattered locations in France, Argentina, Peru, New Jersey, Canada, Australia, Florida, New Mexico, New York, Pennsylvania, Washington State, Virginia and elsewhere, and because of these reports Mr Peter "Debunker" did not sound convincing at all.

Dec 65

Mount Airy, North Carolina
19 Aug 65

SAUCER LANDING IN NORTH CAROLINA: Through researcher George Fawcett we learn of a landing that occurred near Mount Airy, N.C., on August 19th. Mrs. T. E. Schumaker and her family were visiting her mother, Mrs. W. H. Blackburn, at the latter's home. At about 3 a.m., Mrs. Schumaker was awakened by a loud noise behind the house, similar to the noise a car makes when spinning its wheels. She realized, however, that it was a much louder humming sound than a car could make, and that there was no way that a car could get behind the house. The lady was so frightened that it took her some time to get to the window. When she did, she saw a cigar-shaped white object rising at an angle, at some distance away. The object made several maneuvers and then disappeared behind the trees beyond the driveway.

The next morning, a six-inch band of depressed grass was found, forming a perfect circle 12 feet in diameter. Along the driveway the ground was strewn with fresh green leaves from a line of oak trees. The family was fearful of ridicule and reluctant to tell anyone, but the story gradually leaked out. Twelve days after the incident, a reporter from the Winston-Salem (N. C.) Journal investigated, and found that remnants of the mysterious circle still remained. A geiger counter reading was taken still later by Mr. Fawcett, but it showed nothing unusual.

They See Flying Saucers —Or Something, by Jingo!

By Dick Creed
Assistant State Editor

MOUNT AIRY — People around Mount Airy are seeing —and in one case hearing — strange things.

George D. Fawcett, a Mount Airy native and self-acclaimed expert on unidentified flying objects, believes these people are seeing space ships, or flying saucers.

The things they are reporting seeing and hearing, he said last week, are remarkably similar to things reported recently all over the country.

Fawcett, a YMCA secretary in Easton, Pa., has been vacationing in his home town. He found himself spending much of his vacation investigating flying saucer reports. He's been doing it for 19 years, since before his Army days.

He has 28 scrapbooks, 400 photographs and 5 filing cabinets full of stuff dealing with flying saucers.

Now he can add three new cases to his scrapbook:

Case No. 1

On Aug. 19, Mrs. T. E. Schumaker, 48, of Arlington, Va., was visiting her mother, Mrs. W. H. Blackburn on the Pipers Gap Road seven miles northwest of Mount Airy.

Mrs. Schumaker was sleeping on a couch in the front room with her mother. Her husband and her 19-year-old son were sleeping in another room.

At about 3 a.m., Mrs. Schumaker said, she was awakened by a loud noise. In a telephone interview from her home in Arlington, here's what she said happened:

She heard more than she saw. She was confused and frightened when she awoke. She first thought she was hearing a car stuck behind the house, spinning its wheels.

When she was fully aroused, she realized that the noise was too loud to be a car. "It was humming like a top, except much louder. I was scared because it was so loud."

Then she suddenly remembered that there was no way for a car to get behind the house. Her mother lives alone, and she had barricaded the driveway.

"I could hear the whirring noise of air and the air currents hitting the house. I could hear the air in a pine tree near the window.

"I thought about what I should do. I rose and started to call my husband, but I couldn't speak. I couldn't move. I was frightened, but I don't think I was that frightened. I think it did something to me that prevented me from moving."

She was finally able to reach the window, and pull back a drawn shade.

The back of the house is to the south. The window she looked out is at the northwest corner.

At some distance, rising at an angle from south to north she saw a cigar-shaped object "the color of stars."

She said it appeared to be about a foot long in comparison with the stars, which look like points of light. She said she couldn't tell how big it really was because she didn't know how far away it was. It was standing on end, at a 90-degree angle with the earth.

Changed Movements

"It moved to the right, then to the left, then back, then up. Then it moved down and to the left and disappeared behind the trees along the driveway."

Mrs. Schumaker's mother slept through it all. When Mrs. Schumaker finally awakened her, the thing was gone. The mother and daughter lay in the darkness talking about it, afraid to turn on the light. They decided to wait until dawn to tell Mrs. Schumaker's husband and son.

Was she dreaming? "No, sir! I was as awake as I've ever been."

The next morning she told her husband about it. He laughed.

Grass Depressed

But he stopped laughing when they went into the yard.

In back of the house was a six-inch band of depressed grass. The band made a perfect circle, exactly 12 feet across.

Along the driveway, running north - south, the ground was strewn with fresh green leaves from a line of oak trees. The leaves on the trees were disheveled, their pale undersides turned up.

The Schumakers told one neighbor about it. "We were afraid to tell anybody else. They'd think I needed to be committed."

GEORGE D. FAWCETT
. . . he's a believer . . .

MRS. T. E. SCHUMAKER
. . . she saw one . . .

The story spread. Fawcett heard about it and investigated. He had Mrs. Schumaker fill out a questionnaire. He will send the information to two organizations: The National Investigations Committee on Aerial Phenomena, a civilian and military agency; and Project Bluebook, a military agency which investigates such reports.

Remnants of Circle

Last week, 12 days after Mrs. Schumaker's experience, the Journal investigated. The grass in the backyard had grown considerably, but remnants of the circle remained.

Fawcett, using a Geiger counter borrowed from the Mount Airy Rescue Squad, checked a sample of earth from the circle. The radioactivity was normal.

A footnote to case No. 1: The day before Mrs. Schumaker's experience, a man in Thomasville reported seeing a metallic object shaped like a cigar with purple lights. It was about 200 feet off the ground, he said, and made sounds like a sewing machine. He said the object was 75 to 100 feet long, 8 to 12 feet wide and about 10 feet high. After hovering about a minute, the object took off at terrific speed and was gone in 10 seconds.

Mrs. Schumaker estimated that a minute and a half elapsed from the time she awoke until the object she saw flew out of sight.

Case No. 2

John Parries of 215 E. Lebanon Street, a salesman for F. Rees Clothing Co. in Mount Airy, was in the upstairs bathroom at his house at about 4:15 a.m. July 31.

His house overlooks the Mt. Airy Granite Quarry. He looked out the window and, over the quarry, "I saw it hanging there like a bell."

It was bright orange and looked like a football or a fat cigar. It was smaller than the moon but three or four times larger than a star. It had some appendages on top, but he couldn't see them very clearly.

"I thought it was a big star until it moved. When it started moving, I watched it closely. I couldn't believe what I saw.

Goes Step-Like

"It didn't move straight up, but looked like it was going up steps." (He said it moved vertically, then horizontally, then vertically again, over and over.)

"I wanted to go get my wife and show her, but I was too fascinated by what I saw. It was very luminous. It looked to be about two and a half miles away."

When he finally got his wife to the window, it was disappearing upward.

At the store that morning, Parries told some friends about it.

"Yes, they l a u g h e d and ribbed me at first. But since then they've read about other people seeing these things, and they don't laugh as much anymore."

Case No. 3

Bobby Puckett, 14, of Mount Airy, Rt. 1, the Buck Shoals Road, has been reading about space and flying saucers for a long time. On many a night he has spent hours gazing at the sky.

Bobby kept telling his parents, Mr. and Mrs. Frank Abernathy, and his five brothers and sisters he was seeing strange things in the sky. They laughed at him until . .

. . . Last Tuesday night Mrs. Abernathy was away from home until after dark. When she came home Bobby was sitting in the middle of the road, looking at the sky. He saw her and shouted, "Mom! Mom! I saw a flying saucer."

Mrs. Abernathy said she chuckled at him and started to go into the house. But he begged her to look. He pointed out something that looked like a star.

"It was moving toward Winston - Salem," said Mrs. Abernathy, "but suddenly it began to move to the right, toward the river. Then it circled another star, and they moved off in opposite directions."

Bobby ran into the house to get his 16-year-old sister, who was doing her homework. "Diane, Diane, come out. There's a flying saucer," he said.

For the next two hours, Mrs. Abernathy said, she, her six children and two neighbor children were awed by what was going on in the sky.

Mrs. Abernathy said the activity seemed to center around one big star that was red at first and then "tinted off into a bright amber color. It wasn't exactly round, more of an oval."

"Another Star"

"It was moving from Winston-Salem toward the river," she said. "Another star came from Hillsville, circled that star, and then they both went in opposite directions."

Diane said that at one time a star was moving across the sky when a jet plane passed. "All of a sudden the star plunged down, like it was trying to get out of the way. Then it stopped and moved across the sky again," she said.

Shooting stars, perhaps? "No," said Mrs. Abernathy. "Oh, we saw some shooting stars that night, like you'll see any night if you look long enough. But I'll guarantee those things moving around up there weren't shooting stars."

How about lights on airplanes? Diane doesn't think so, and here's why:

Late in the night, she said, about six stars came into view at the same time. The one that seemed to be the center of the group was bigger and brighter. "It had a sort of reddish color," she said, "then it would change from red to orange. Sometimes two of the other stars seemed to have long glowing tails. They stayed in view about two hours. They would move around in different directions, over and under each other. They would separate, then they would come back together."

The next night, Wednesday, they watched again. But all they saw, said Mrs. Abernathy, was a single star, moving across the sky. It could have been an artificial satellite.

Only Bobby called the things they saw the night before "flying saucers."

Both Mrs. Abernathy and Diane kept calling them stars. But they have both marveled at what they saw. As Diane said:

"It gave me the weirdest feeling."

Shoreham Cylinder

The *Brighton and Hove Argus* tells of a sighting, on August 19, by Mr. P. Harris of Middle Road, Shoreham—"Last Thursday evening at 9.45, I observed a huge, shiny, cylindrical object hanging over the moon at an angle of 45 degrees. It was accompanied by four smaller, disc-shaped craft, two of which were lighted on top. The smaller objects moved north one by one and disappeared. The larger craft was stationary for about 10 minutes before it too moved slowly northwards and vanished."

Mexico City, Mexico
19 August, 1965

MEXICAN SAUCER FLAP CONTINUES: We now have further information on the saucer landing at Mexico City's National Polytechnic Institute, described at the top of Page 23 of our December issue. A France Press wire service story dated August 24th gives the date of the landing as August 19th. The original source of the story is apparently "El Grafico," a Mexico City newspaper, and the witnesses were two students at the Institute. They claim that the flying saucer left behind a message engraved in a strange metal tablet, which was submitted to the Institute's technical laboratories for analysis. We unfortunately have no word as to the results of this analysis.

The students also state that the landing took place at 8:30 a.m., and involved a large luminous vehicle, with a cabin in its upper part, and with a gigantic tripod landing apparatus in its rear section. There was also a "radiator" of some sort, which burned all the rocks and foliage in the vicinity. Two creatures, slightly under 3 feet tall, got out of the machine. They had something resembling gas masks on their faces. Before the eyes of the terrified students, they left the metal plate on the ground, and then climbed back into their machine and flew away. When the spot was examined by scientists, drops of a strange fuel were found, in addition to the evidence of burning.

A France Press bulletin dated August 25th tells of a night-time sighting of a dozen UFOs in the state of Tijuana, Mexico. A group of hunters saw a formation of saucers at close range, and made signals to them with their lanterns; whereupon one of the craft left the formation and came down, almost to earth. The signals had been made in jest, and when they seemed to be answered, the carload of hunters panicked, abandoning their vehicle and other equipment, and fled.

Portsmouth, Virginia
20 Aug 65

On about August 20th, a few days before the above incident, two Coast Guardsmen in Portsmouth saw a dull, silver-colored cylinder stop by a 340-foot-high tower, used for Station WYAH-TV. The object appeared to be 50 feet long and 8 feet high. After hovering for about 30 seconds, it sped off and disappeared within a few seconds. The TV station noticed no interference with its transmission at the time of the sighting....

Strange Object Seen in Sky

7-21-65

FRAMINGHAM, Mass. (UPI) —About 20 residents in the Boston suburb of Wayland reported seeing a round, silver-white unidentified flying object last night, a Framingham radio station said.

Station WKOX said three separate groups of residents had called to say they had seen the round object moving through the sky and hovering over the community.

They said the object, traveling from South to North, appeared to pause and hover for about 20 minutes, then danced from side to side before setting off again toward the North.

It was the second sighting of an unidentified flying object in Massachusetts in two days.

Residents of the coastal town of Hingham, 20 miles from Wayland, said they watched a circular luminous object with four arms for nearly an hour Monday night as it hovered over the area. It finally drifted westward and disappeared.

Both objects described were similar to others reported in the Antarctic and in southwest Europe in recent weeks. At least five persons said they observed the Hingham phenomenon.

Glanmire, Co., Ireland

REPUBLIC OF IRELAND

Many sightings

Mr. T. J. Burke, of Glanmire, Co. Cork, writes of large numbers of night sightings, too numerous to mention. He does detail two daylight cases, one of great interest.

At 12.15 p.m. on August 21, Patrick Reardon of Glanmire, together with his wife and family saw a silvery, circular object move in a southerly direction. It was in view for about five minutes. As this device moved farther away, they could see 'round' extensions underneath.

On the same day, at about 3 30 p.m., an auto-cyclist who does not want his name revealed, was at the side of the road between Youghal and Cork, at a place known as Bury's Bridge. He was repairing a broken chain when a strange object suddenly appeared about 15 ft. from him, hovering about five feet off the road. Its shape was like a child's spinning top, inverted, diameter about 6 ft., and height the same, and the top section appeared to be rotating. Colour was grey, and appearance metallic (iron). After a few seconds only, it shot off at great speed towards the north east. Mr. Burke confirms that the witness is a man of integrity and sobriety. He was very shocked by his experience, and did not remember any illumination of the object.

There are apparently only two answers:

1. This is a fraudulent story, involving the District Commandant, the two constables and their superiors. Such an explanation is incredible.

2. A UFO did land on the road, and it did blast off as the police reported. If so, this is a powerful new link in the chain of evidence proving UFOs are real.

Saucer-Type Object 'Seen'

9-18-65

JOHANNESBURG, South Africa (AP) — South African police and scientists investigated yesterday a report that a flying saucer-type object had landed on a main highway near Pretoria, the country's administrative capital.

Two patrolling police officers reported seeing the flaming "saucer," about 30 feet in diameter, shortly after midnight. One of them, Koos de Klerk, said the shiny copper-colored object resembled a giant spinning top.

The two men claimed that as they approached the object, it took off silently at great speed with flames shooting out of its underside.

Scientists who examined the spot where the officers said they saw the object are reported to have found a six-foot wide section of the tarred road had been badly burned. Grass on either side of the highway also was reported slightly scorched.

Los Angeles Herald-Examiner D-7
Sunday, Oct. 10, 1965 CC

Flying saucers have got out of hand in Mexico News media throughout the country are being flooded with phone calls from persons seeing objects in the sky.

Thousands gather at night at parks and monuments to observe the saucers.

At the Mexico City Airport, the head of the control tower reported he has seen them.

UFO INVESTIGATOR

Police See UFO Blast Off from Highway

On the night of Sept. 16, 1965, Pretoria (South Africa) police had a close-range encounter with a flying disc which landed on a highway. The UFO took off with a blast of flame, leaving the macadam road ablaze.

The District Commandant of Pretoria North, Lt. Col. J. B. Brits, admitted the government's serious concern. In an interview with the newspaper "Die Vaterland" he said the event was considered "as being of a highly secret nature and an inquiry is being conducted in top circles."

Since the burned road had been seen by hundreds in the area, it was impossible to deny the incident. The two police witnesses were belately silenced, but their report was already on record.

The officers involved were Constables John Lockem and Koos de Klerk. Just after midnight on Sept. 16, they were patrolling the Pretoria-Bronkhorstspruit highway in a police van when their headlights picked up a round, gleaming object. As they got closer they saw it was disc-shaped, about 30 feet in diameter. Its copper-colored surface reflected clearly in the van's headlights, and it also had a luminous glow.

About ten seconds after Lockem and de Klerk spotted the UFO, it suddenly lifted from the road. The policemen could see tongues of flame coming from two tubes or channels underneath.

UFO Seen on Highway near Pretoria, South Africa
SEPTEMBER 16, 1965

"Its lift-off was quicker than anything I have ever seen," Lockem reported later.

Flames from the tar and gravel (macadam) road shot up three feet after the UFO departed, blazing long after it was out of sight.

Before the two officers were silenced, Constable Lockem drew a sketch of the UFO with the aid of a "die Vaterland" staff artist. A newspaper print of the sketch is shown above.

"I have always regarded reports of flying saucers as a lot of nonsense," Constable Lockem said. "After this I shall be the first to say that such things are possible."

Before a careful check of the take-off area, a suggestion was made -- implying the police were deluded or lying -- that a prankster had poured petrol on the road and ignited it. The idea was quickly rejected when it was found part of the road was caved in, evidently from a heavy weight, and gravel had separated from the tar in a severely burned area about six feet in diameter. An experienced road builder of the Provincial Administration denied that burning petrol could have caused such severe damage.

24 Aug 65
Barrow-in-Furness, England

Barrow-in-Furness

Finally, we read in the *Yorkshire Post* of August 28 that three times in one week, residents of the Newbarns district of Barrow-in-Furness, Lancs., claim to have witnessed the passage of strange sky objects at virtually the same time each night.

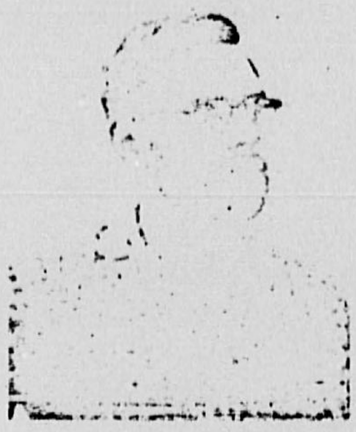
A Mr. R. Scott, of Bridgegate Avenue, saw, late on the evening of Tuesday, August 24, objects "like two balls of white which kept **coming together and separating** as they flew along . . . from time to time they would emit red trails. These things were quite high up and were not making any noise. I watched them for a few minutes before they disappeared." The objects were moving in a northerly direction. Similar sightings were made on the preceding Saturday and Sunday evenings.

According to the report, neither Air Ministry nor astronomers can supply an explanation.

C.B.

STATION NOTES

Under the silken direction of David "Fourth Growth" LeConte of FLORIDA, *The News* is preparing an article on "The Cultivation of Beards in Under-developed Areas." We solicit padded pictures and pronouncements from such beautiful bushmen as Peter "Starving Saint" Brand, "Honest Abe" Jeffery, "Laser-razored" Maestre, Dick "Timber-line" Powell, Walt "Prairie Net" Munn and all other past, present and future fringe benefitters — and their wives.



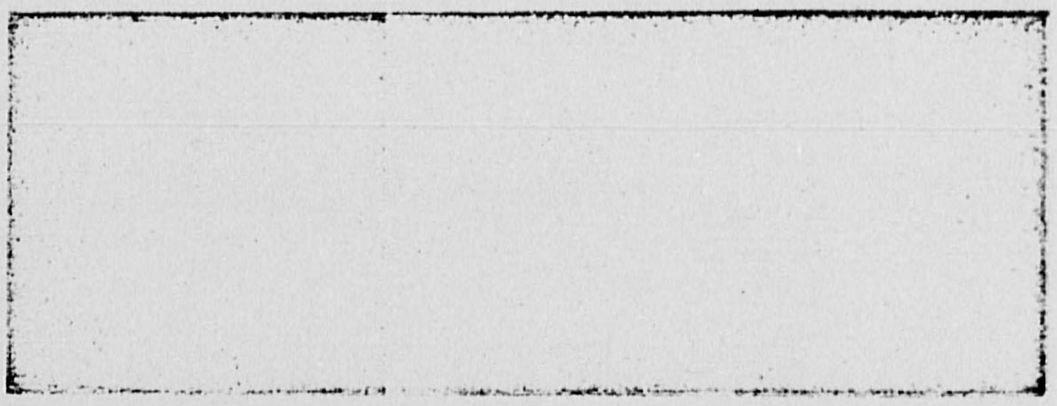
HAWAII — A dozen scientists, most of them Russian, from the research ship *Vityaz* visited SC-12 for a half-hour July 1. According to the *Honolulu Advertiser* they "enjoyed inspecting all the gadgetry and were enthralled with a clock . . . that measures time to the millionth of a second," but "once, when one Soviet questioned the Smithsonian's Don Hodges for a long time, Gnevishev (group leader; center, pointing, in picture) produced a small plastic whistle and blew it. The questioning stopped." Actually, the whistle-blowing incident was a joke, distorted by the accompanying reporter. There was no significant language problem, as at least one member of the group was fluent in English and I understand a bit of Russian. I believe this was the first Russian group ever to visit a B-N station. — DON HODGES

CURAÇAO — And then the rains came! Water rushed in from the road and at its worst was up against the reduction bldg. and within 2 inches of going into trailer; it flowed around

the station to the east before running off in a *river* to the south. Picture, taken 2 hours after maximum rise, shows Peter Janmaat at the dikes! — HARRY ALBERS

That *grandi awacero*, which is Papiamento (the *lingua franca* of Curaçao) for "great rain," came Aug. 24. And was it during that rain that John Kellberg's boat sank in St. Anna Baai?? And has that boat been salvaged?? We would like to know . . .

MEN IN SPACE — THE HISTORIC PICTURES!



Here shown for the first time is the remarkable sequence of all B-N photographs of astronauts aloft — manned space vehicles in flight — to date.

1 — the Mercury capsule "Faith 7," skipper Gordon Cooper, photographed by South Africa May 16, 1963, five revolutions before splash-down. Zig-zaggedness of images was caused by hand-swinging of the camera by observers Duane Gingerich and Roy Smith — a fast-moving faint object is hard to find and follow.

2 — "Gemini 4," astronauts White and McDivitt, launched last June 3, caught by South Africa — Bob Citron, Bastian Van't Sant — June 6.

3 — "Gemini 5," astronauts Cooper and Conrad, launched Aug. 21, photographed by Australia — Fred Warren, Dennis Cockerill — Aug. 28.

And here shown (4) is another, equally remarkable, picture — the first photograph ever taken of the re-entry break-up of a manned space vehicle's launching rocket. (This photograph is printed black-on-white for greater clarity).

Object: booster casing of the Titan second-stage rocket of "Gemini 5," torn into at least 47 pieces by atmospheric friction. Some of those pieces may have fallen into the Indian Ocean.

Time: Aug. 24 — 3 days, 50 revolutions, after launch.

Camera: South Africa — Van't Sant and Werner Kirchhoff, who said, ". . . sighted at the predicted time, first as a red glow just outside the earth's atmosphere . . . we have been trying for years to get photographs of space objects and this is just fantastic!"

Fantastic indeed! Bravo, Baker-Nunns all — for all stations, whether geographically able to photograph or not, share in every station's achievements.
