September 14, 1945

Dear Sir,

On the evening of September 4th around 10:30 P.M. I saw what appeared to be two satellites in orbit over Conway, New Hampshire. These two objects were traveling slowly (as a satellite would) from West to East and were followed by a third some 45 minutes later.

On the evening of Sept 9th I saw something traveling from horizon to horizon at a terrific rate of speed (approx. 4 sec.) and it was the most beautiful blue-green I've ever seen. (over Walpole, Mass.)

I knew it wasn't my imagination as my husband saw these also.

Would you please explain same?

Sincerely

Mrs. [REDACTED]
