35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

My friend + I while traveling west saw the light which I thought was the moon, he disagreed and as we moved the object was no longer in sight for a couple of minutes then it reappeared and as we traveled west it was to the north about 90° from the first sighting and at 600 yds. We stopped the car and watched the object move about 50 yds. I started the car up again and went about 100 ft and decided to take a good look. The object seemed to stand still or just drift a few feet. I started the car up and started west again. As we went down a hill the object disappeared and when it reappeared it was almost in the same position as when we originally saw it.
