Between the hours of 6:30 to 10:15 P.M. The object appeared at different intervals in the area. It was viewed momentarily from different angles when it sped up, slowed and disappeared. Several days after word lights were seen speeding across the sky and hovering on the horizon. There were however, no lights near as distinct as the ones seen on January 4.

January 7, 1966

Utica 3, New York

Dear Sir,

On the night of January 4, 1966, several sightings were made of a UAC. in the Utica area. I thought at first it was a limited sighting, only in the Eastern half of the city. However, on further investigation, it was learned that many people throughout the area had seen this object. We have formed many opinions as to what it was, but we will leave the answer to you.

From the hour of 6:30 to 10:15 P.M. it moved over the city. It was starlike in appearance when viewed with the naked eye, except it was yellow and moved like no star could possibly move.

Through field glasses it was observed to have a red glow beneath it which glowed

a dull red. At times it "beamed" and this
was confirmed when it was viewed from several
angles ~~to~~ at the same time.

A dozen or more people saw this
occurrence and would greatly appreciate it
if you could give us a logical explanation
as to what this object was.

Yours truly,
