FORM
FTD SEP 63 0-329 (TDE) Previous editions of this form may be used.

34. Date you completed this questionnaire: 7 (Day) April (Month) 1966 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was walking to the ~~shoo~~ store when I looked ~~at~~ up and saw a bluish - white object in the sky. So I watched it as I walked to the store and it just hovered. I observed it from 104 ~~st~~ ~~stret~~ and Summit to 116 st and Summit ~~Stret~~.

The postal address because it closes building was on Summit Stret, Because I was on the corner of 104 st and Summit Stret.

The one about the ~~[redacted]~~ star brightness does it mean a star on any night or a star that night. Because if it mean on a night of observation the answer would have been no because the clouds owned the stars.

Sincerely Yours

[redacted]

P.S I would like additional facts about ~~[redacted]~~ any U F O's and any other ones if possible.

Thank You

[redacted]

If you have any additional
information would you please send it to.

Toledo, Ohio 43608

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

25 (Day) March (Month) 1966 (Year)

2. Time of day: 9 pm. (Hour) 9:15 to 9:20 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): (a) Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
(b) Standard

4. Where were you when you saw the object?

4611 Summit (Nearest Postal Address) | Toledo (City or Town) | Lucas (State or County)

5. How long was object in sight? (Total Duration) _____ Hours 5 Minutes _____ Seconds

a. Certain
(b) Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? FIGURED it Out

5.2 Was object in sight continuously? Yes ✓ No _____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. Bright
b. Cloudy	(b) Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FTD FORM OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

14. Did the object disappear while you were watching it? If so, how?

No the object did not disappear while I was watching it

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: ____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: ____

17. Tell in a few words the following things about the object:

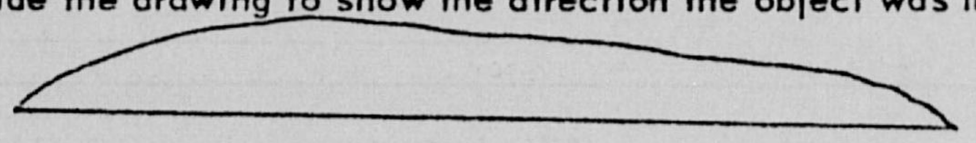
a. Sound There was no sound to it

b. Color bluish white

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

The covered part was about 1/6 of the object was covered.
The covered part would have been about 1/4 of the object would have been covered.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



Object was not moving it hovered.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

(a) None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
(c) No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
(d.) Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

(a) Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
(b.) Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

small flash light

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
(c.) Sharply outlined
d. Don't remember

e. Other _____

13. Did the object: *(Circle One for each question)*

a. Appear to stand still at any time?	(Yes)	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	(No)	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	Yes	(No)	Don't know
f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker?	Yes	(No)	Don't know
h. Disappear and reappear?	Yes	(No)	Don't know

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 1/2 mile

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
(b.) In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

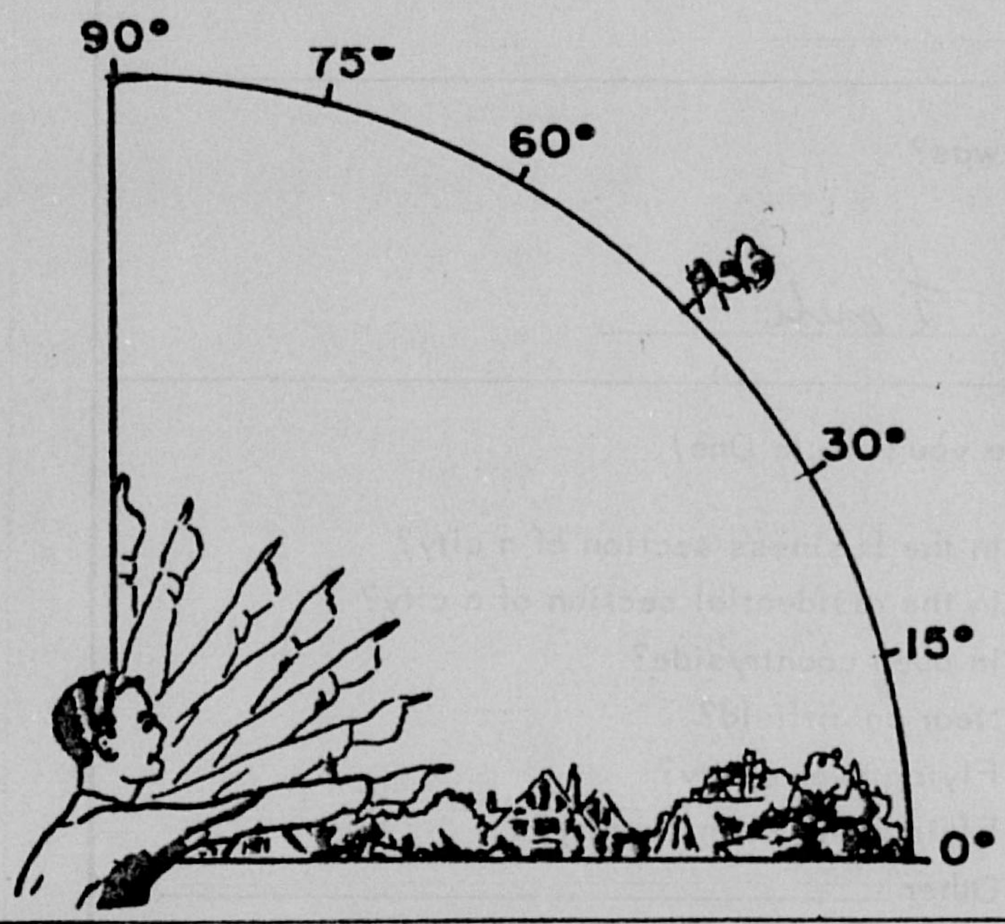
25. Did you observe the object through any of the following?

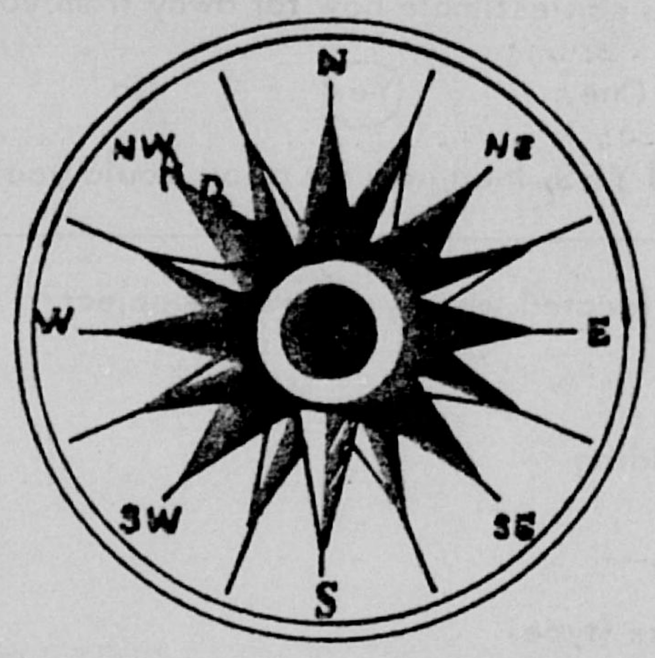
a. Eyeglasses Yes (No)
b. Sun glasses Yes (No)
c. Windshield Yes (No)
d. Window glass Yes (No)
e. Binoculars Yes (No)
f. Telescope Yes (No)
g. Theodolite Yes (No)
h. Other _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

The common object would be like a world war one helmet.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

hovered

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

Reference your recent unidentified observation of 25 March 1966. The information which we have received is not sufficient for evaluation. Request you complete the attached FTD Form 164 and return it in the envelope provided.

We wish to thank you for reporting your observation to the Air Force.

Sincerely,

for HECTOR QUINTANILLA, Jr, Major, USAF
Chief, Project Blue Book

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO.!

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes (No)

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) _____ (Middle Name)

ADDRESS [redacted] (Street) TOLEDO (City) 11 (Zone) OHIO (State)

TELEPHONE NUMBER [redacted] AGE 15 SEX M

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

26 (Day) MARCH (Month) 1966 (Year)

I reported it to the W.S.A.F. in Dayton, OHIO

DEAR SIRS,

I WOULD LIKE TO REQUEST A COPY SHEET ON FILLING OUT ON THE SIGHTING OF U.F.O(S). IF MY REPORT SEEMS INCOMPLETE, PLEASE SEND A TYPED SHEET ON UFO'S TO FILL OUT. I WOULD BE VERY HAPPY IF YOU would send ME ANY INFORMATION ON UFO's, (IF AVAILABLE AT THIS TIME).

AM ANTICIPATING YOUR ANSWER

PLEASE SEND TO -

Arcturus (At 2030 EST 52° Az - 23° El

14. Did the object disappear while you were watching it? If so, how?
yes, when an airplane seemed to be chasing this object.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: ___

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: ___

17. Tell in a few words the following things about the object:

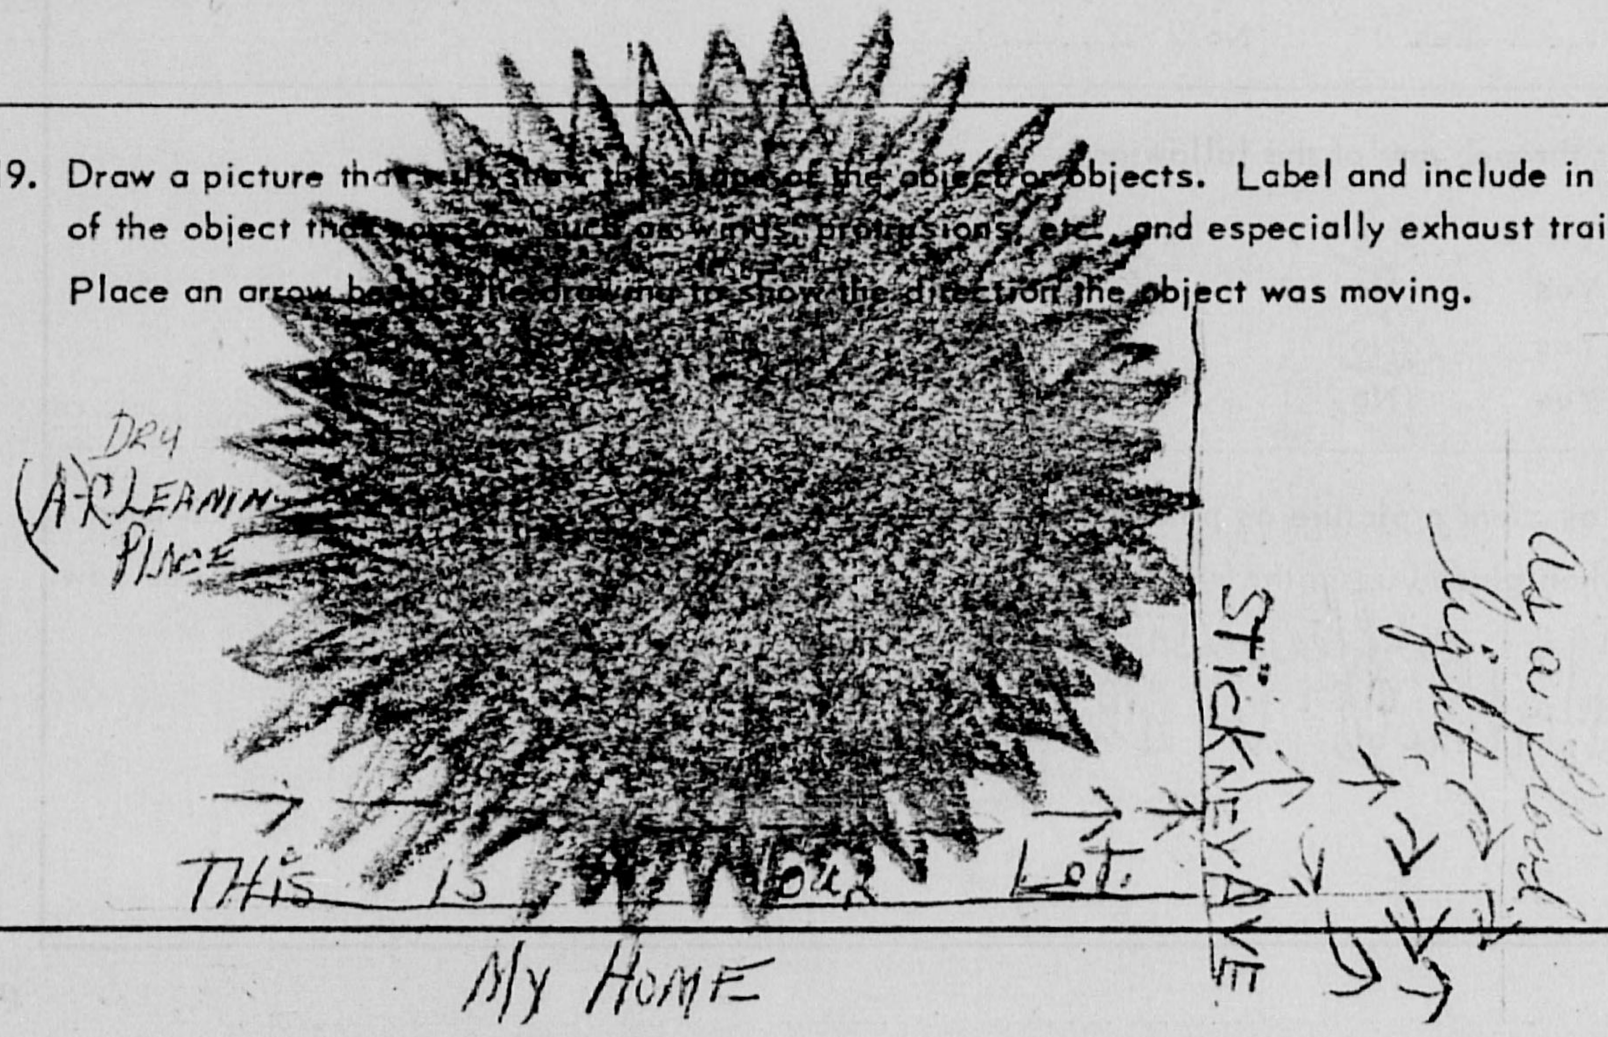
a. Sound None

b. Color Very bright orangest red turning to white as if of a television spot light.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

1/3 of the tip

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you observed such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? If I were in a car I guess would be 45 to 50 miles per hr.

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 25 ft

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other Called from my home to ~~go~~

23. Were you *(Circle One)*

a. In the business section of a city?
(b.) In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

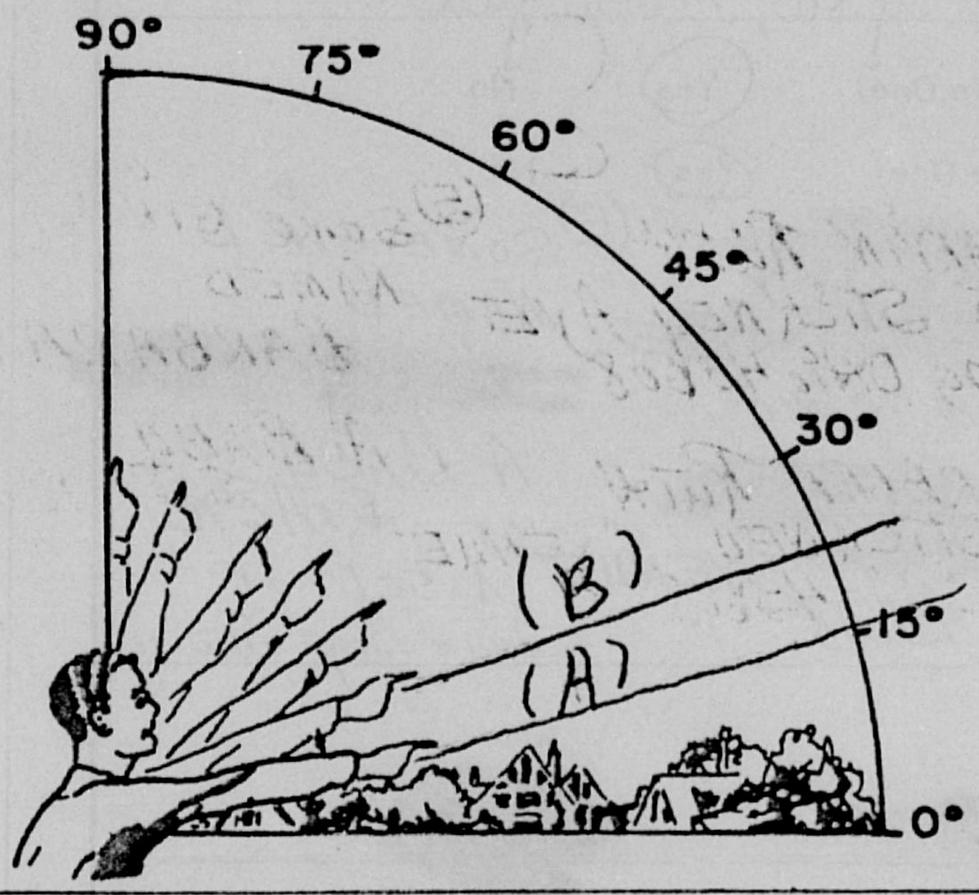
a. Eyeglasses	Yes	(No)	e. Binoculars	(Yes)	No
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other a naked Eye.		

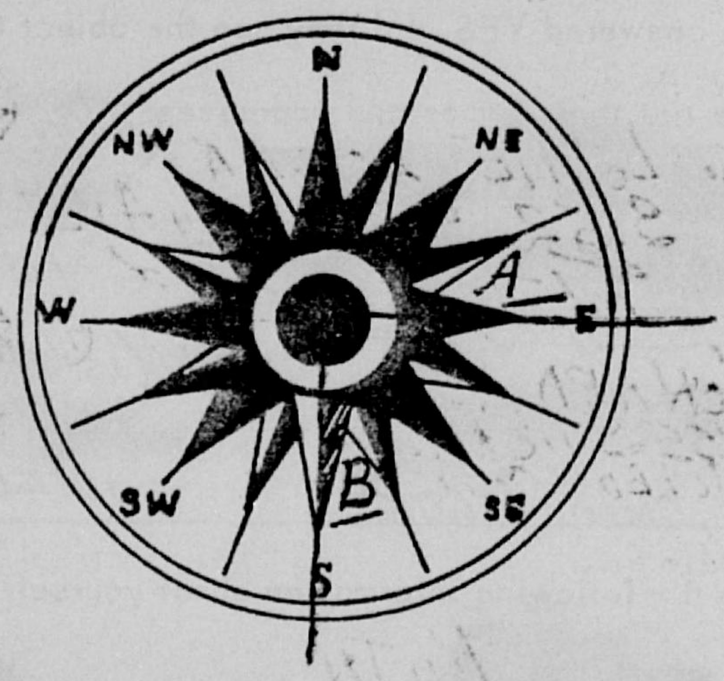
26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

A reddish orange coffee saucer with hundreds of turned upside down V shaped points.

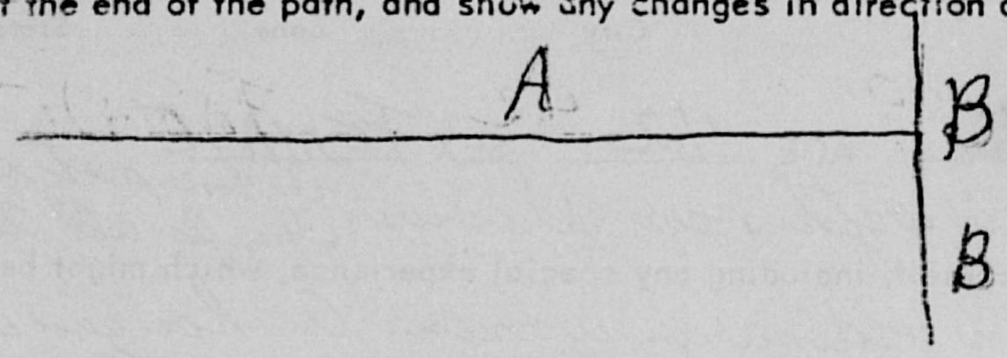
R

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

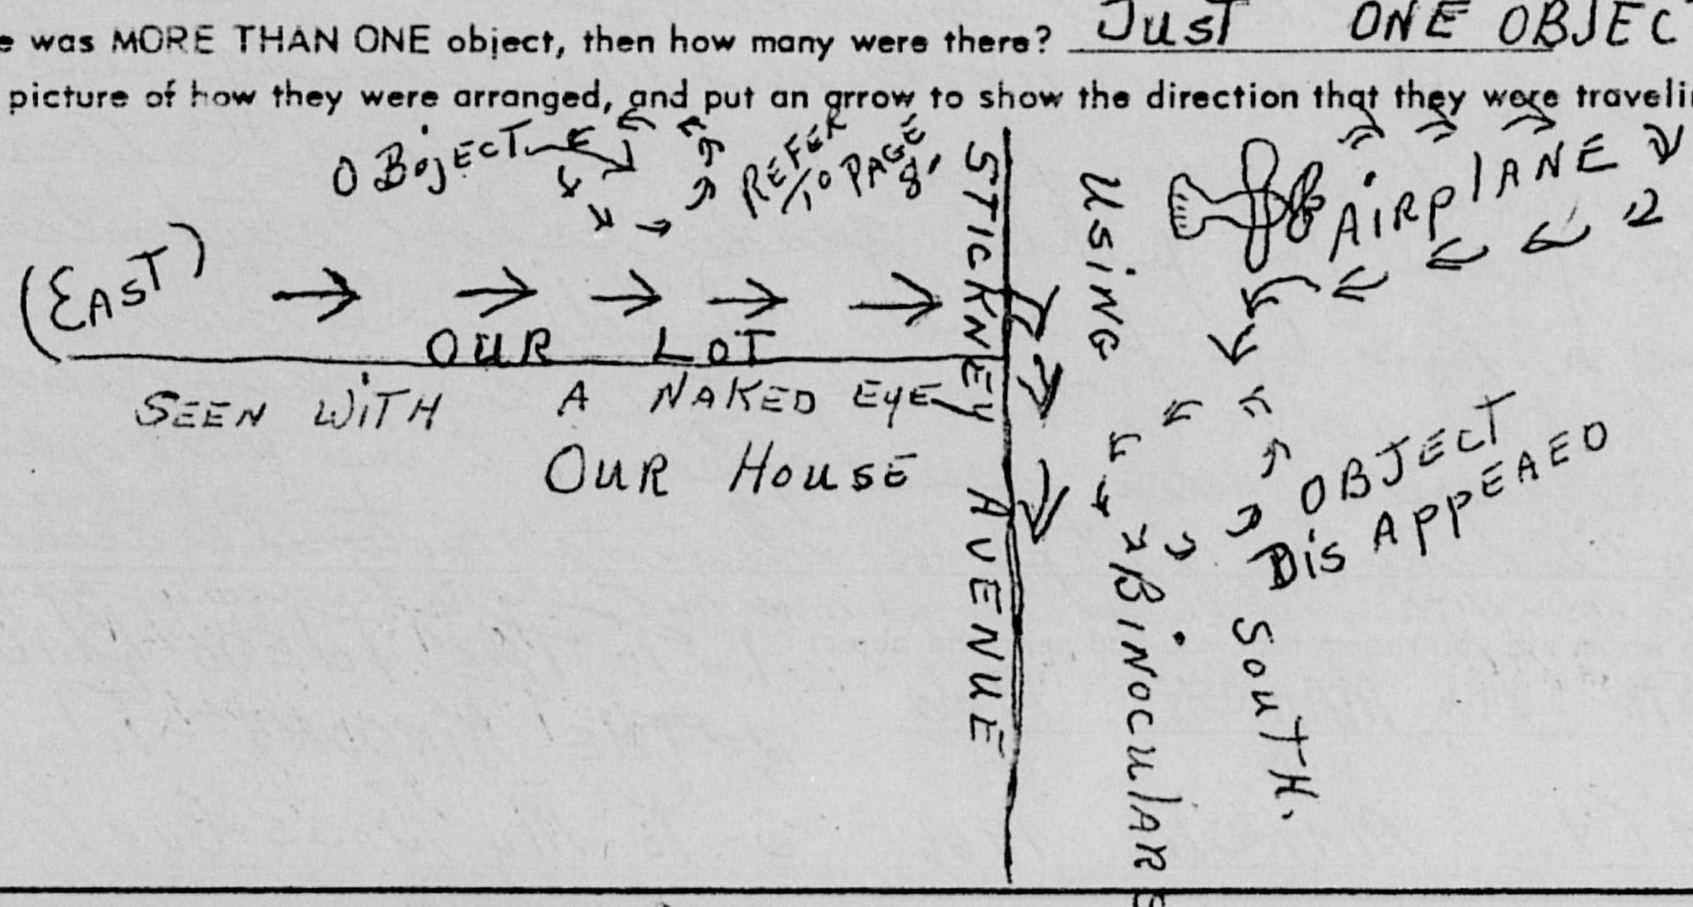




28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.



29. IF there was MORE THAN ONE object, then how many were there? Just ONE OBJECT
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.



30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No, I have never seen this object before. I had seen any object in the form of a ball of fire. This was thirty-three years ago. In Maybee, Michigan

31. Was anyone else with you at the time you saw the object? (Circle One) (Yes) No

31.1 IF you answered YES, did they see the object too? (Circle One) (Yes) No

31.2 Please list their names and addresses: (3) MR. [redacted] TOLEDO, OHIO 43608

(1) MRS. [redacted] TOLEDO, OHIO 43608

(2) D. [redacted] STICKNEY AVE TOLEDO, OHIO 43608

(5) SOME GIRL NAMED [redacted] A BABY SITTER.

(6) A SET OF TWIN BOYS AGE 10.

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted] (Street) AVE TOLEDO (City) 8, (Zone) OHIO (State)

TELEPHONE NUMBER [redacted] AGE 42 SEX FEMALE

I do not wish to tamper with our Savior. I am not a crack pot This is all true.

Indicate any additional information about yourself, including any special experience, which might be pertinent.

About myself I am just an ordinary women. A house-wife, Mother of two children. I am employed in a Catholic Rectory. I do Secretarial work, and do cleaning etc for two Priest. I also have been teaching Cathism for four years for public grade school students. I am from a family of seven children. I know for certain that I did see this object, as an example while being in a hospital when Jesus appeared to me with open arms dressed in white on the top of stair, also when in an automobile accident he appeared to me again. Believe me I am not crazy for seeing type of thing.

33. When and to whom did you report that you had seen the object?

28TH & 29TH (Day) MARCH (Month) 1966 (Year)

1 = TO THE TOLEDO BLADE

2 = THE AIRPORT - TOLEDO, OHIO

3 = TO MY BOSS - OUR PASTOR

W.O.H. Station 29TH MARCH 1966

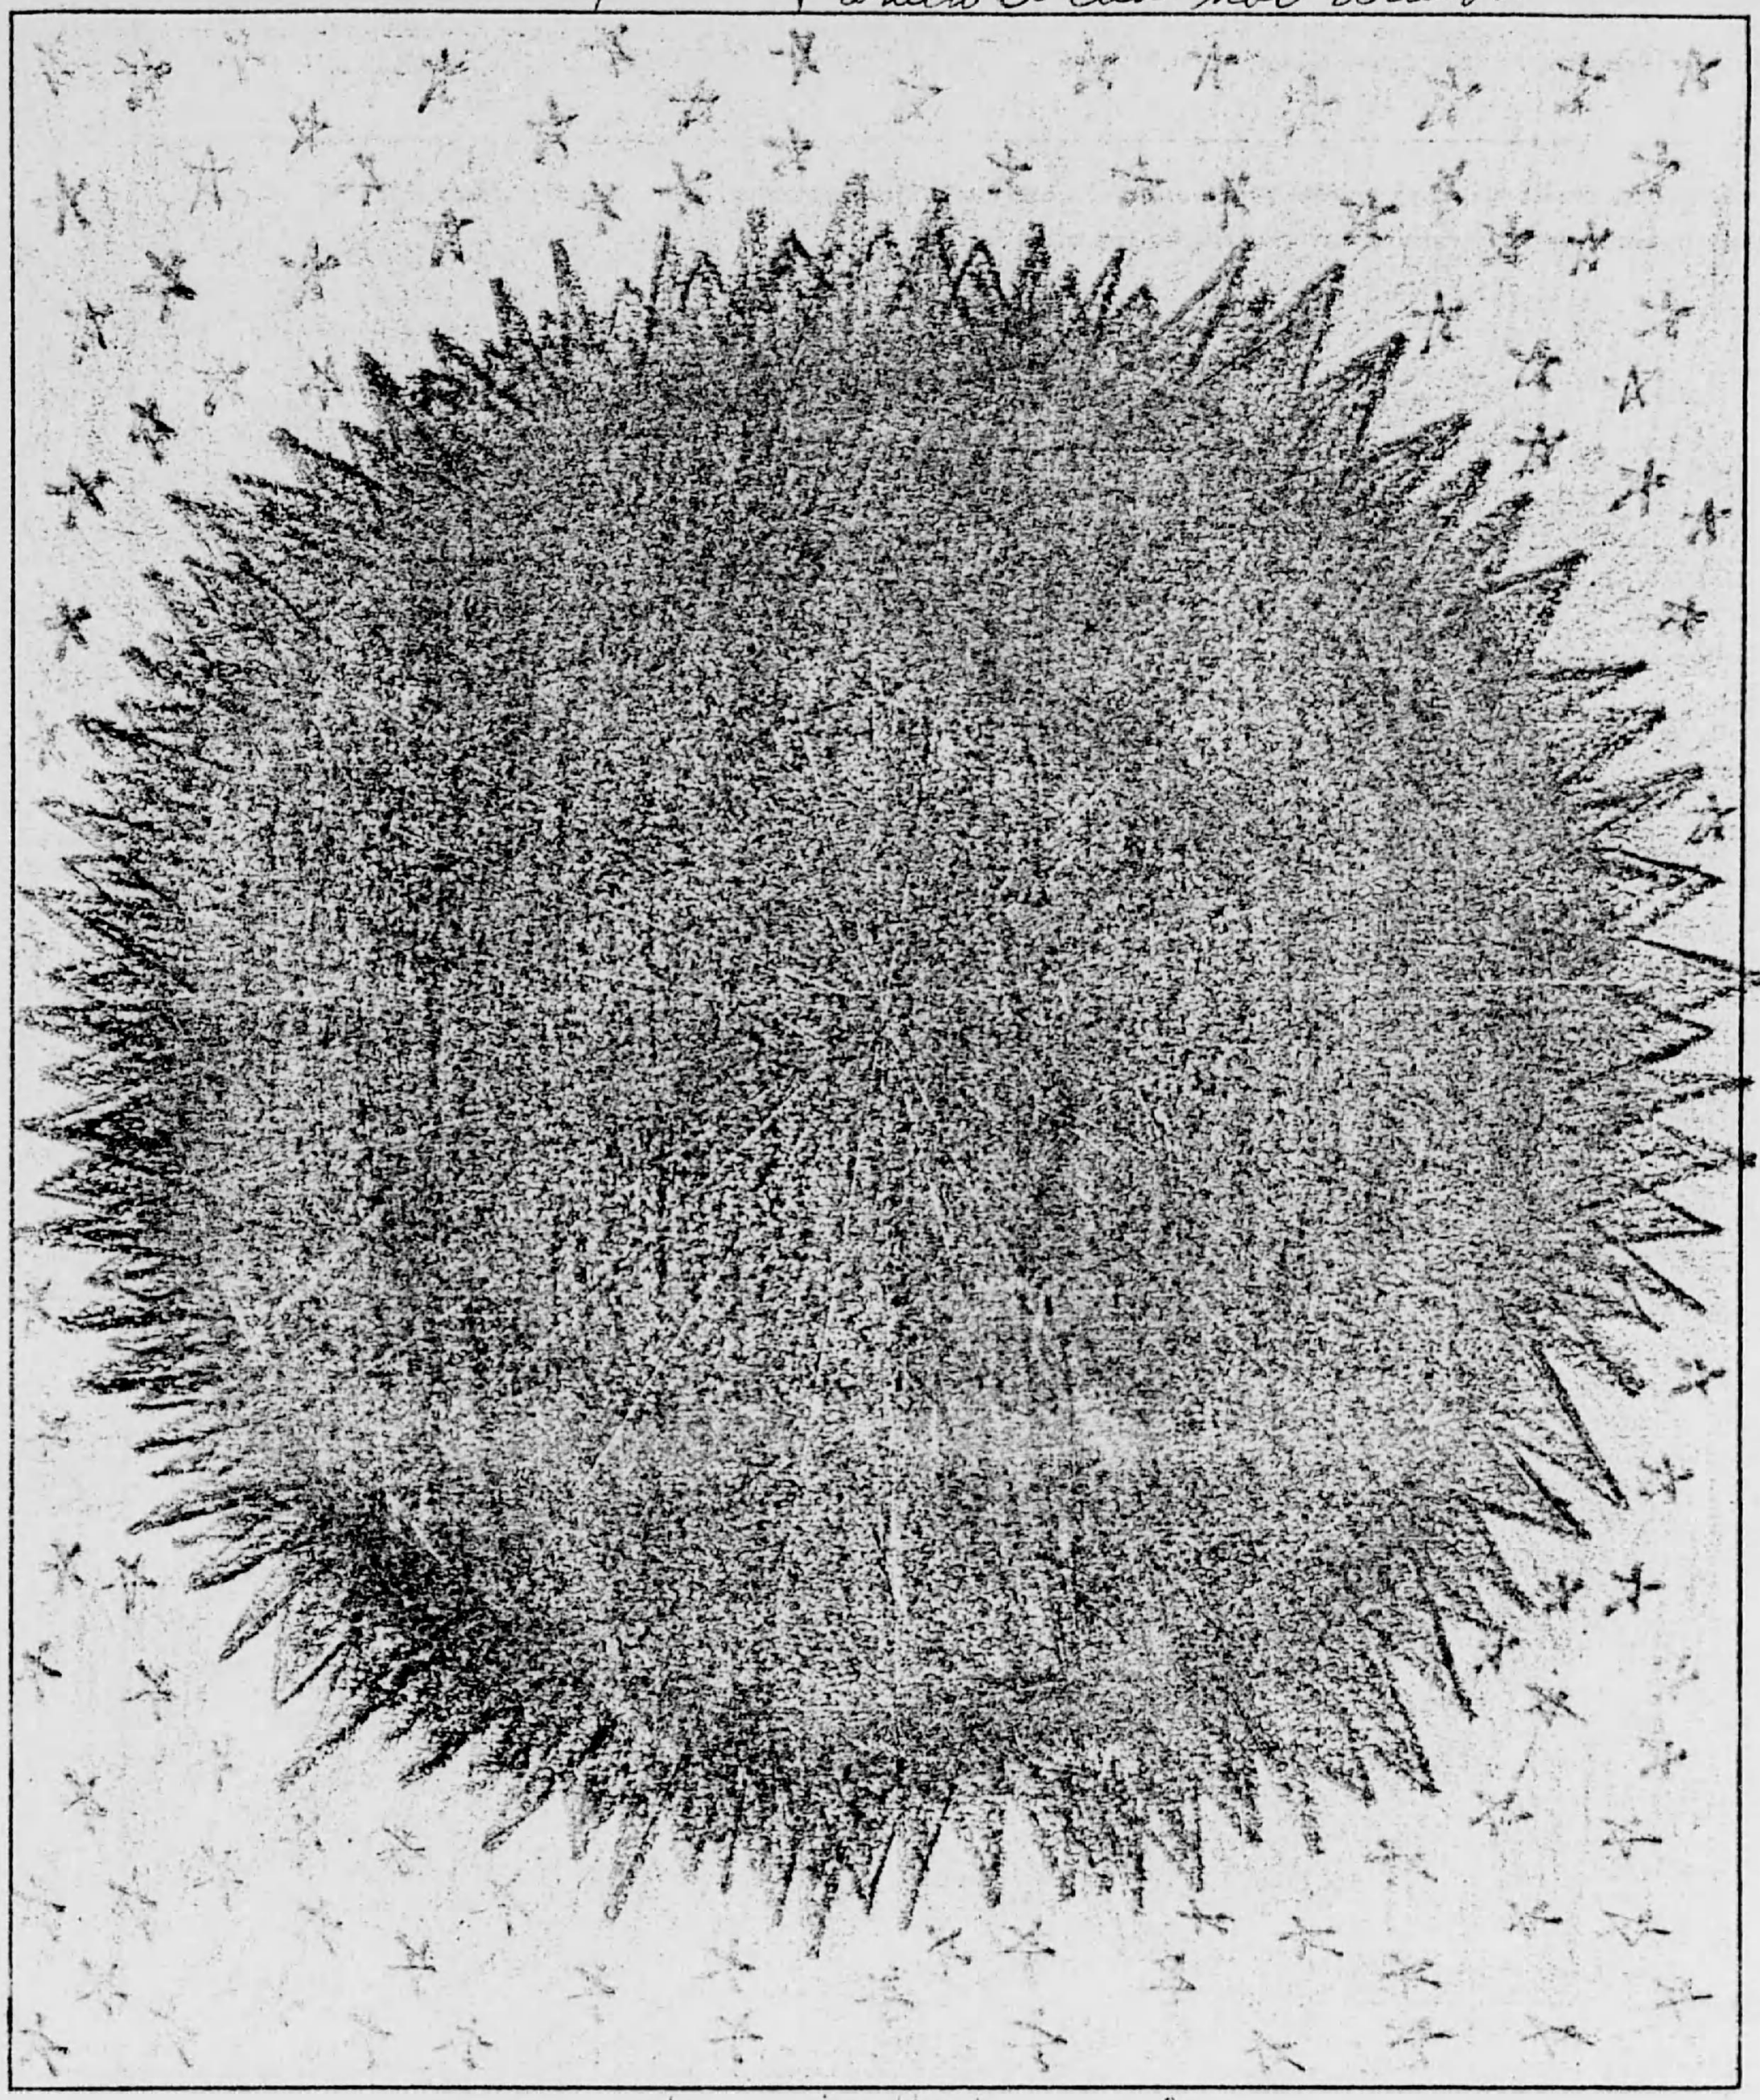
WHERE I WORK → ST. VINCEN DEPAUL - REV. [redacted]

34. Date you completed this questionnaire: 15TH - JUNE - 1966
Day Month Year

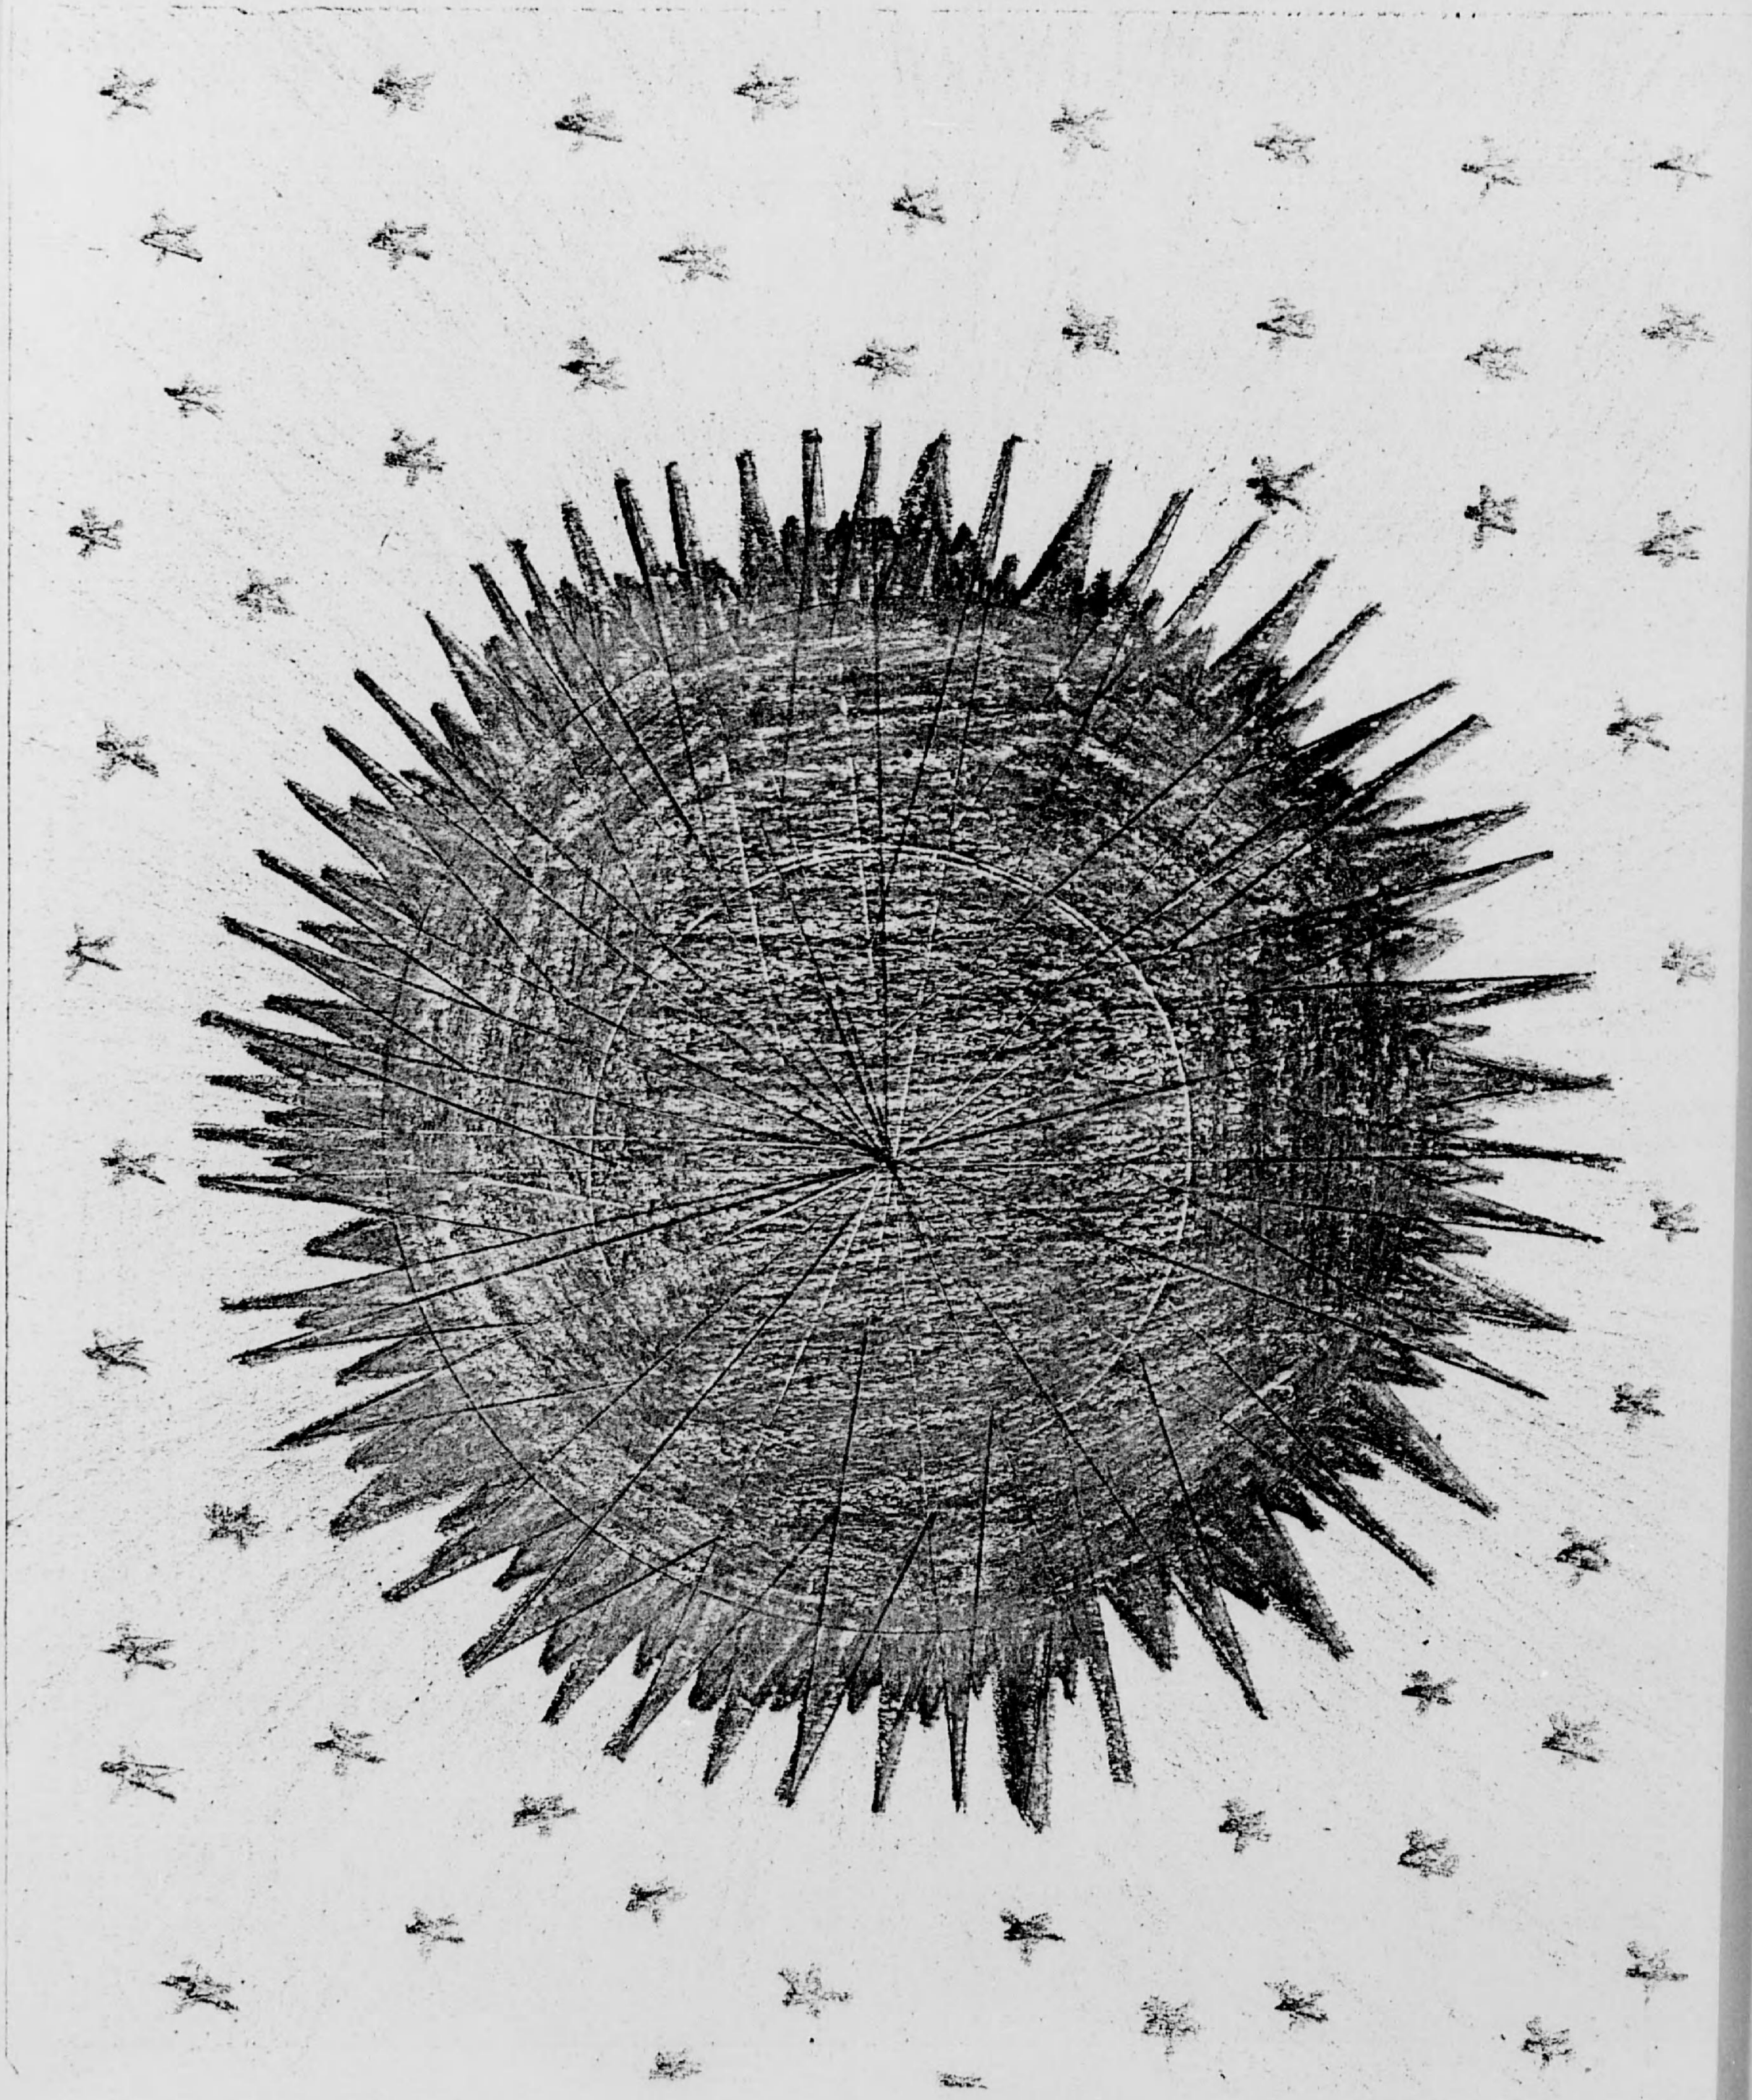
35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

To begin this on the evening of March 28, 1966 while changing my clothes & getting into my pajamas, and being base-bat. I heard a terrible pounding at my front door I took my good old time in seeing who was at my door. Some women had asked me to come out, and look into the sky. So I finally went out, and looked. Standing on my steps without shoes on. I looked, and there was a large reddish orange object with hundreds of points, at this moment, this object seemed to be at a stand point as if walking something. Than it seemed to go slow. While crossing Hickney Avenue, the points seemed to disappear. Than a shooting star fell. I did run into the house to get a coat, and a pair of binoculars. Than an airplane was chasing this object, this is when the reddish orange color had changed to a bright white light as if a flood light which is used on television for stars. When first seeing this object it seemed as if someone could have reached it with an extension ladder. I had never seen so many stars in the sky before, I was not frightened only being as I had never seen such thing before, it all seemed very untrue. I do hope that some day this can all be explained. No-one can believe this unless they get the opportunity to see an object such as this. I am out side every day, and had never seen any thing like this in the day time. There is one thing which I have not seen since this happened as there are not as many stars in the sky.

This is the way the object appeared to me on the evening of March 28, 1966. With only using a naked eye. Only there were hundreds of points which I can not draw.



Many, Many Stars also.



{ NOVEMBER 28, 1966

SAFOI, Washington 20330

Richard Roth

To Whom It May Concern;

On the evening of March 28,1966 Between the hours of 8:00, and 9:00 P.M. I was called out of my home to see some sort of an object which was in the sky.

At the moment that I first saw this object it was no higher than a home. It traveled in the form of a figure 7 This object had a flickering light. When approaching the longest point of the figure 7 there was a very bright light, as if of a flood light, than a very bright reddish orange. Than an airplane had seemed to be chasing this object, and the object had diappeared somewhere. When the object had been in the air our television set would flicker off, and on.

When first seeing the object with a naked eye it had appeared to have hundreds of points as if there were figures a nd they were like V/s upside down. When this reached the longest point of the figure 7 than I watched it with a pair of binoculars and could not see these points any more.

I did not need a camera to know what I had seen, so I have made a sketch of the way this object had looked to me. My eyes are in perfect condition, and I know that I did not see swamp gas, nor a ballon tied to a flare, nor even baloney.

Every time this airplane would go closer to this object is would go away from the plane. Perhaps someone is trying to reach us, as we are trying to reach to the moon. We may be able to find the solution to this some day.If this object ever lands in our yard I will contact you.I would certainly would like to know what this is, as thousands of others would. This does not frighten me in the least. Perhaps it could be MARS.

I am employed and certainly am not CRAZY:

Is My NAME Not Given. IF you WOULD CARE To KNOW it, PUT SOMETHING IN THE NEWPAPERS.

THANK You, AND MAY GOD BLESS Us All.

I changed my mind about my name, and address please inform me on how to address Thank You!

Dear Mr. and Mrs [redacted]

Reference your recent unidentified observation of 28 March 1966. The information in your letter was not sufficient for evaluation. Request you complete the attached FTD Form 164 and return it in the envelope provided.

I wish to assure you that we do not release the names of witnesses without their permission. For your information I am enclosing a copy of the brochure which describes the Air Force's program on unidentified flying objects.

I wish to thank you for reporting your observation to the Air Force.

Sincerely,

(4)

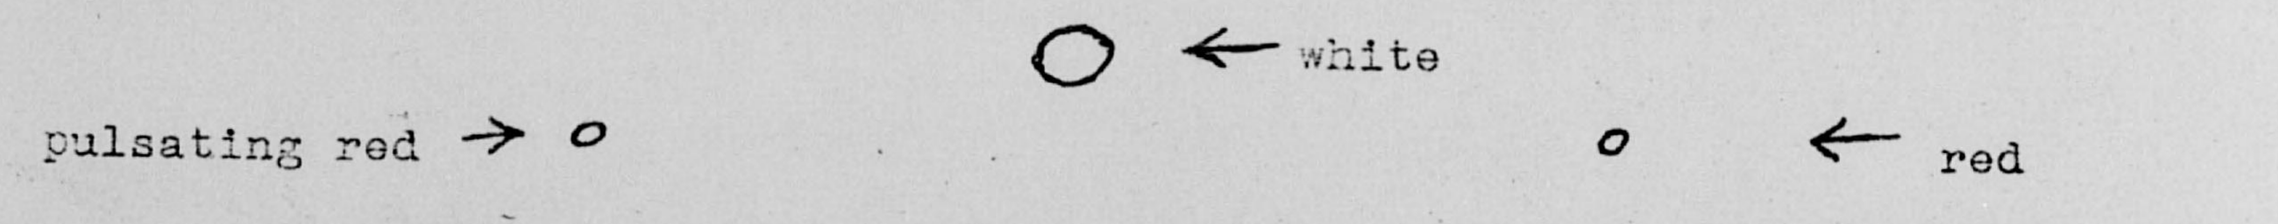
Wright Patterson Air Force Base
Project Blue Book U.S.A.F.
Dayton, Ohio

Dear Sirs;

On monday night March 28 of this year I received a telephone call from a friend of mine Roger Panek. He told me that he saw 3 UFOs go over his end of town. (Toledo) He wanted me to see if I could see them also.

So the wife and I went out on the front porch. Its heated and looks out over Maumee bay. For we live on the water front in point place.

In about 15 minutes the phone rang again. It was Roger, and he told me he saw them again going N.N.E. fron his south end of town. So this time I thought that I would move to a better vantage point. So out to the break wall I went. In about five minutes time I saw a light, off orange or amber in color to the naked eye. It moved slowly over and following the Maumee River, when it reached a point between Presque Isle and BAy View Park it stoped and remained stationary for about 3 minutes. When I first saw the light it was about 8:28 PM. After the light stoped I returned to the house for my binoculars. Upon returning, with the wife, I could make out a light separation of red and white. There was no noise, and the range could not have been two miles. My estimate one and a half miles at 1500 ft. Almost half again as high as a near-by TV tower. Wanting to see better, I returned to the house as quickly as possible this time and got the telescope. I changed the lens to a 60 power land lens so that I would be able to see right side up and not to over power making it hard to find or follow. I leave the telescope set upon the tripod so I was back in less than a minute. Turning the telescope on the light I could see three very sharp lights, the center light was very white to a point of a blue tint and very bright. On either side of the white light was a smaller red light. The red light on the right side of me or west remained on, as did the white light, but the other red light pulsated . About one second on and one second off.



Still no sound other than distant street noises. Then just above the horizon, behind the light we were watching with the telescope traveling at a high rate of speed from east to west, we saw another light with our naked eye. At this time the lights that we were watching started to move towards us slowly, Then arced west ward. At this point the white light seemed to get brighter. Whether it was the distance closing, or it actually got brighter would be hard to say for sure. For at this point it was at its nearest, a mile or a bit less. The lights at this time had moved just over the western bank of the bay and the three lights slowly moved to a parallel position because of the crafts turn. At this point it really started moving still west for a short distance, then up at an angle of about 1:30 on the hour hand of a clock. There was an audible hum for just a few seconds not more than 5 . This was the only notable sound that we could hear.

H/C

From the time it started to really accelerate untill it was beyond the telescopes view took about 15 seconds. I must say it left me in awe. The only difference the wife an I had is in the size of the white light. I thought 3 times as large as the red lights. She said it looked larger. Perhaps she is right , for with the binoculars the separation would not be as much as in the telescope, and it would be much easier to compare size.

We did not see any other color of lights, or hear engin noises as normal with air craft. The distance from red light to red light must have been about 70 ft.

About 20 min. later there was a single engin jet craft that came from the north and flew over the same area that the lights remained stationary. Its lights did not begin to fill the telescpoe in separation the way the two red and the white lights did, nor were they as bright. So what we saw had to be larger.

On wednesday we call the Federal Aviation Agcy. and asked if any air craft had running lights as we had seen on monday night. He said No. Weather balloon do not carry this type lights either. The wind was W.N.W. so the craft or light we saw came across wind and then remained stationary in the wind then moved against the wind and then up at a speed I have never seen before.

We thought this information would be of use to you, and help to determine what we saw.

Sincerely

1. DATE - TIME GROUP 28 Mar 66 29/0122Z	2. LOCATION Toledo, Ohio
3. SOURCE Civilian	10. CONCLUSION Astro (STARS/PLANETS) Photo analysis proves the objects to be the moon and other celestrial objects.
4. NUMBER OF OBJECTS 10-15	
5. LENGTH OF OBSERVATION 8 seconds	11. BRIEF SUMMARY AND ANALYSIS Observer was in the yard looking for UFO's. He saw 10-15 lights moving in the sky. He took a picture nad quickly ran into the house to tell his parents. The lights were reported as being bigger than stars but not as bright. The discernable images on the film are felt to be the moon in its first quarter and other celestrial bodies. Motion and the duration of the sighting here has little meaning since the observer only glanced into the sky and then ran into the house. The objects were only observed for approx. 8 sec. It is felt that had the observer taken more time to observe the objects he would have discovered that they were stars. The apparent motion of the objects were probably caused by the movement of the eyes as they scanned the sky.

SUBJECT: UFO (US)

ANALYST: MAJOR QUINTANILLA PI: LAND DATE: 15 APR 66

Analysis was requested on a polariod photograph containing a string of objects. All similar in appearance, taken in the vicinity of Toledo, Ohio. Analysis was conducted by the Photo Analysis Division (TDDPA) and Photo Processing Division (TDDPP) with the following results:

The photograph was unusable for detailed photo analysis due to scratches, fingerprints, lint, and dirt on the print. It is felt that the discernible images are the moon in its first quarter and other celestial bodies.

S

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
(c.) Many
d. Don't remember

8.2 MOON *(Circle One)*:

(a.) Bright moonlight quarter moon
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

(a.) Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

(a.) Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The objects appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
(d.) As a lights
e. Don't remember

11. If ~~it~~ they appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
(b.) Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

They were a little bigger than stars but were not as bright

12. The edges of the objects were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other there were approximately ten to fifteen seperate lights following each other at a close distance. They were clear not fuzzy

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	(No)	Don't know
b. Suddenly speed up and rush away at any time?	Yes	(No)	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	Yes	(No)	Don't know
f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker?	Yes	(No)	Don't know
h. Disappear and reappear?	Yes	(No)	Don't know

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

28 (Day) 3 (Month) 1966 (Year)

2. Time of day: 8 (Hour) 22 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): (a.) Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
(b.) Standard

4. Where were you when you saw the object?

[redacted] Hwy (Nearest Postal Address) | Toledo (City or Town) | Ohio (State or County)

5. How long was object in sight? (Total Duration) _____ (Hours) _____ (Minutes) 8 (Seconds)

a. Certain
(b.) Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? wrist watch

5.2 Was object in sight continuously? Yes X No _____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a.) Bright
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FTD FORM OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

14. Did the object disappear while you were watching it? If so, how? I was watching in my back yard. I saw it and watched for about 8 seconds. I ran in the house before it was out of sight, to tell my parents.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: ____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: ____

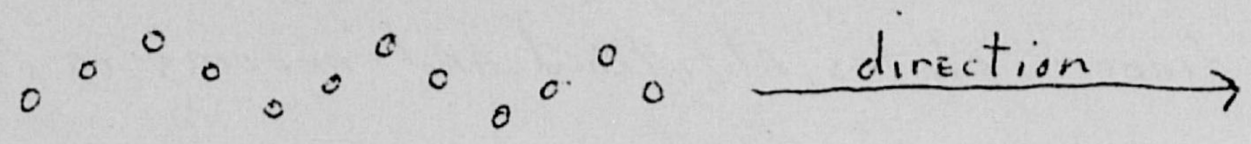
17. Tell in a few words the following things about the object:

a. Sound None

b. Color A group of seperate dim white lights

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? One maybe two of the lights would have been covered.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



At first they seemed to be tied together since they were all following the same exact pattern

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No) Since I do not know how high it was, Faster than an airplane or jet

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No) All I can say is a great distance.

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you *(Circle One)*

a. In the business section of a city?
(b.) In the residential section of a city?
(c.) In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	(Yes)	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I would guess white dinner plates attatched and moving in the same eratic pattern.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes (No)

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted]rt Hwy (Street) Toledo (City) 9 (Zone) Ohio (State)

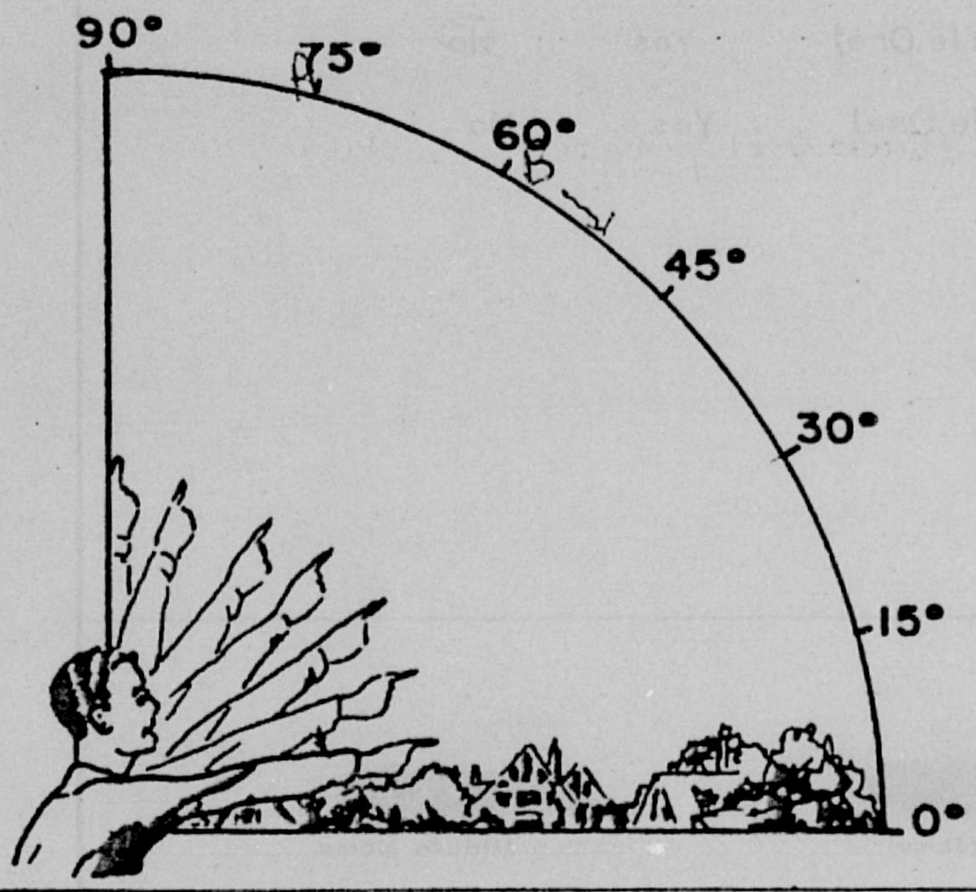
TELEPHONE NUMBER [redacted] AGE 19 SEX Male

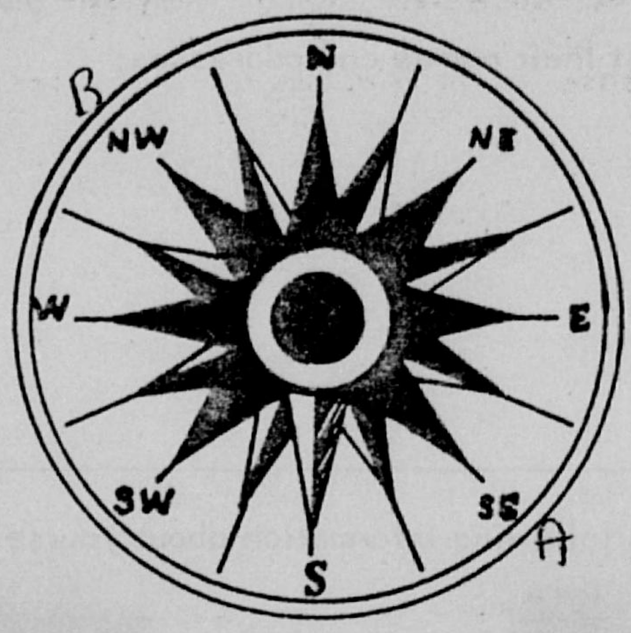
Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object? Toledo Police department

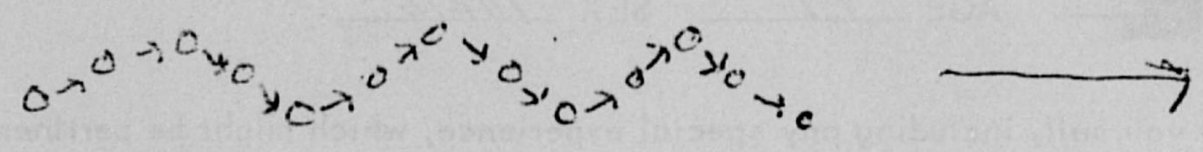
28 (Day) 3 (Month) 1966 (Year) When I called they told me that a lady in Trilby, Ohio reported seeing the same string of objects

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.



29. IF there was MORE THAN ONE object, then how many were there? 10 - 15 I counted eight and then stopped
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

SAME AS ABOVE

All were seperate objects moving in the SAME pattern

UNCLASSIFIED
Date Received

34. Date you completed this questionnaire: 5 (Day) 4 (Month) 1966 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was in my back yard at the time of the sighting It was the first time I had gone out to look and see if I could see anything since the rash of sightings in Southern Michigan. I had with me a Polaroid Swinger camera. I was nervous when I quickly snapped the camera picture so I dont think I got it in the picture. If I did it might not even show up since it was night time, and also because it takes such a small and imperfect picture. I am however enlosing the picture for your viewing.. These objects were also moving in a different direction than the wind was that night.

May I point out that the two white lines are scratches in the picture made by me while examining it.

Sincerely yours,

[redacted]

March 30, 1966

Dear Sirs:

On the night of March 28, at approximately 8:20 I spotted in the sky a string of white dim lights about twice the size of stars moving in a whip like pattern out of the south-east towards the north-west. Their were to the best of my knowledge about 10 - 15 of these seperate lights following each other at what seemed to be very close. I have no idea at all of the altitude of these objects. I live in the south end of Toledo and upon seeing these objects I called the Toledo police and reported it to them. They told me at this time a lady in Trilby Ohio, which is just North of Toledo spotted the same string of objects. The same night many Toledoans reported seeing an object but this is now believed to be only a hoax. In the papers it had no mention of the lights which I and the lady reported. I am very interested in knowing what it is that I saw. If you have any idea would you be kind enough to let me know. Thank you for your time and trouble. Fred Moor/3365 Airport Hwy./Toledo, Ohio

Proposed reply to letter from [redacted]

Dear Mr [redacted]

Reference your letter requesting our evaluation of your 28 March 1966 observation. A detailed photo analysis of the photograph was not possible because of scratches, fingerprints, lint, and dirt on the print. It is felt that the discernible images are those of the moon in its first quarter and other celestial bodies. We wish you had spent more time observing the objects so that a more detailed account of the observation would have been possible. A study of the submitted data did not reveal a positive explanation, but it appears that astronomical bodies were observed.

Inclosed is the photograph you made available for analysis.

Thank you for reporting your observation to the Air Force.

UNIDENTIFIED FLYING OBJECT DATA REPORT

Date of sighting: 23 March 1966 Time: 6:30 p.m. Duration: ~~Hours~~ 10:30 PM

Reported by: Name [redacted]

Address: [redacted] East Rochester, N.H. Telephone [redacted]

Age: about 40 Occupation: Automobile salesman

Number of people ~~hearing~~ observing object: 12 Also [redacted] Samon Falls Road, Rochester, N.H. Tel. [redacted]

Description of object: no object was sighted. "Beep-beeping" noise was heard indoors and outside. Its sourse of emmision could not be determined.

Shape: n.a. Was it sharply defined: n.a.

Did shape change: n.a. Color of object: n.a.

Did color change: n.a. Did color change in intensity: n.a.

Speed of object: "source of noise could not be determined but it did not seem

~~Did speed change~~: to move" Did object stop: n.a.

Where: For how long:

Location of sighting: Summer Street Extention in East Rochester, New Hampshire

Description of direction and path of travel: n.a.

Was any noise associated with sighting: see above Describe

Describe the object's distance from you in relative terms, such as "About tree-top level", "About one block away", "A few hundred feet above the ground", "High in the sky", etc.: distance to noise could not be determined

Describe size of object, such as: "size of a golf ball", "size of an airplane", size of a house", "huge", "size of a star or satellite" from me:

Weather conditions: (such as clear night, cloudy, hazy, etc.) clear night

How did object disappear from sight. ( ) All at once ( ) slowly in distance

UFO-Watching Newest 'Sport' Of Area Residents

ELIOT — The newest sport in this town is watching UFO's, or unidentified flying objects.

In the old days, boys and girls parked on lonely country roads to "spark" a bit, but nowadays in Eliot, most of the parkers are looking for space ships and little green men therein.

Friday night in East Eliot, there were at least a dozen parked vehicles whose occupants were scanning the skies for sight of a UFO.

* * *

A number of peole reported hearing "s t r o n g beeping sounds" and there was an area near the gravel pit off Goodwin Road, where some felt "something" may have landed.

The reasoning was that a number of trees were crushed and branches broken. Those who inspected the area didn't believe the damage could have been done by snow and ice.

Earlier in the week, some other people saw a "thing" over Spinney Creek, and on Wednesday three men driving along Beech Road observed something in the sky near the power lines, and followed it.

The "thing" was making "erratic motions" and was moving quite rapidly.

The men followed it toward Kittery down Route 236, caught up with it or near it, before it veered off and vanished.

* * *

One woman reported finding some odd "plastic type object" near her home.

Although the UFO activity have come mostly from Eliot, there was a rumor that a spaceship, or "something" landed a few nights ago on the beach in Rye.

In fact, police checked out a report of a "loud beeping" near one home, and when they went there found out the beeping was really peeping from a frog pond.

Noise appeared simultaneously on Channel 10 ~~xx~~ a local television station and on 960 KC on a radio station. It could not be determined if these signals coincided exactly with the auditory sighals heard outdoors in Rochester. The signals have not reoccurred since 23 March.

DEPARTMENT OF THE AIR FORCE
HEADQUARTERS 509TH BOMBARDMENT WING (SAC)
PEASE AIR FORCE BASE, NEW HAMPSHIRE 03801

29 MAR 1966

REPLY TO ATTN OF: Directorate of Information (BDXI)

SUBJECT: Unidentified Flying Objects

TO: AFSC (FTD)

1. Attached are two preliminary reports of alleged UFO sightings, forwarded in accordance with AFR 200-2.

2. Also, enclosed is a clipping from the local newspaper, containing an article on UFO interest in the local area.

3. I believe the newspaper article will help in part to explain the "sightings". There has been a normal amount of interest generated locally since the recent "Michigan sightings." With more people looking for flying saucers more people will undoubtedly "see" them.

4. I don't believe the two enclosed reports require any further follow-up action. One can be attributed to over-active imaginations possibly aided by aircraft sightings on a cloudy night. The other could possibly be some sort of radio transmission from a "ham" radio or even due to frogs.

Church Notes

Sunday school superintendent, Eugene D. Cram was absent Sunday morning due to a heavy cold. His competent wife, Gloria asumed charge in his place.

The Evairita Allen memorial bouquet was given to Mrs. Arthur Cressey's mother, who has been confined to her home for some time, with illness.

Flying Intruders from Outer Space?

F. B. I. -- Take Notice! Strange noises have been noted recently in this vicinity. They have been described as a pulsating be-eeping sound, loud enough at times to be heard indoors. They come mostly at night and have been heard in various parts of the village by several residents. It has been conjectured that they may be caused by "ham" radio operators, by some errant and strange animal or even as signals from outer space. We suggest that an investigation be made without delay.

SUBJECT : Unidentified Flying Object Sighted at Nampula

REF :

Enclosed for the use of the appropriate U. S. Government office (presumably in the Department of the Air Force) is a clipping from a local newspaper, Diário, of March 29, 1966 describing a UFO which was observed by several people, including a newspaper reporter and a local artist in the town of Nampula on the evening of March 26. According to the article, the UFO was relatively stationary for several hours during the night near a rounded granite mountain 26 kilometers from Nampula. The three sketches contained with the article show a) an idealized version which apparently utilizes the artist's imagination as well as his direct observation, b) the UFO as it appeared from the closest point of observation, and c) the UFO as it appeared to the artist from Nampula.

COMMENT: Because of the generally serious tone of Mozambique's newspapers, government censorship, and the naming of witnesses, we doubt that the story of the UFO sighting was fabricated, though we are, of course, unable to evaluate the accuracy of the reporter and artist's observations. Other less detailed and more hazy reports of sightings of UFO's in Mozambique have appeared two or three times during the past year or two.

Dear Mr [redacted]

Reference your recent unidentified observation of 23 March 1966. The information which we have received is not sufficient for evaluation. Request you complete the attached FTD Form 164 and return it in the envelope provided.

We wish to thank you for reporting your observation to the Air Force.

Sincerely,

for HECTOR QUINTANILLA, Jr, Major, USAF
Chief, Project Blue Book

UM OBJECTO ESTRANHO NO CÉU DE NAMPULA

(Continuação da PRIMEIRA pág.)

nuava frente aos nossos olhos. A forma modificava-se dando a impressão de leves movimentos rotativos sobre o seu próprio eixo aumentando e diminuindo a intensidade das cores vermelhas e verdes. O esplendor branco, faiscante, não diminuia.

Não havia nuvens no céu que justificasse essas modificações. Nem neblina. A noite continuava cálida e quente.

Eram 3.20 da manhã e resolvemos regressar a Nampula. Necessitávamos de mais testemunhas, de mais gente a comprovar a estranha visão. As ruas continuavam desertas. Um cacimbo morno e irritante amanteigava os vidros do carro.

Durante o trajecto de regresso, Vilela, no banco de trás, acompanhava, sem um segundo de desatenção, o objecto luminoso. Nós íamos atentos à estrada ouvindo a voz de Direito:

— Quanto mais avançamos para Nampula menor é o diâmetro. Reparem: ele não pode ser muito grande! ...

Ele diminuia, de forma sensivel, quanto mais o carro rolava, mas, mesmo de Nampula, era ainda espectáculo digno de ser visto.

À porta de armas do Batalhão de Caçadores o soldado olhava, também, o objecto luminoso.

— Está a ver aquilo? — perguntámos-lhe.

— O que será? — respondeu-nos ele: — Já há uma porção de tempo que estou a ver!...

Pedimos para falar com o Oficial de dia e fomos levados à sua presença. Com ele estava um outro Oficial, de nome Guerra, que já conhecíamos, e todos comprovámos a existência do objecto. Contámos tudo o que nos sucedera mas não havia, à mão, uns binóculos, que auxiliassem a melhor definir as formas do objecto.

— Está a aumentar de tamanho! — dizia um.

— Porque não vão à Força Aérea? Eles têm observatório. Depois fossem por cá porque agora queremos saber que raio é aquilo.

— Já daqui não saio sem aquilo sair dali!...

Dirigimo-nos para a Força Aérea. Um polícia indicou-nos a entrada e levou-nos ao oficial. Conhecia-o o Sargento da Guarda.

O Oficial olhou o objecto e afirmou que o observatório já estava fechado.

— Está muito alto. Um avião não chega lá!...

A neblina aumentava. E nuvens negras também. A noite modificava-se para um acordar de dia tropical.

Regressámos à cidade. Da Praça do Infante era visível o aparelho. Quando uma nuvem o tentava cobrir ele ficava como grande rectângulo com pontículos luminosos.

TESTEMUNHO OFICIAL

O chefe do Laboratório Militar saiu à rua com binóculos e assestou-os para o objecto luminoso, notando, imediatamente os reflexos vermelhos dos extremos da base. As antenas, porém mostravam-se, com o auxílio das lentes, azuis e amarelas, o que tomámos pela decomposição do verde.

O dia nascia. As estrelas apagaram-se completamente, apenas ficando a forma luminosa no horizonte. Pouco faltava para as 5 horas da manhã, de uma manhã cinzenta e húmida.

Quedámo-nos no local até que, às 5 e 10 o objecto desapareceu completamente já com o céu coberto das nuvens que transformaram uma noite quente numa manhã chuvosa.

O repórter não dormira. Os seus companheiros, também. Mas valêra a pena: a noite fora diferente.

Fernando Lopes Direito fizera no local apontamentos a lápis. Ele reproduziria no papel o que a noite nos mostrara.

INÁCIO DE PASSOS

N.R. — Porque as gravuras que ilustram esta reportagem do vosso dedicado colaborador Inácio de Passos, feitas no louvável intuito de bem servir reflectem os naturais nervosismos chegasse à mão a tempo da sua publicação nesta edição publicamos a seguir as respectivas legendas:

1.ª **Gravura** — «Pontos de Luz» — «Pormenor do aparelho observado a coberto de leves nuvens» — «O aparelho idealizado pelo Autor, com os elementos observados».

2.ª **Gravura** — «Cor verde» — — Rectângulos de cor vermelha» — «Verde» — «O aparelho visto a 26 quilómetros de Nampula» — «Distinguiam-se por vezes os traços verdes e uns pontos vermelhos» — «O aparelho visto de Nampula».

UM "OBJECTO ESTRANHO" NO CÉU DE NAMPULA

OBSERVADO DEMORADAMENTE POR DIVERSAS PESSOAS

Por *INÁCIO DE PASSOS* (Da nossa Delegação em Nampula)

NAMPULA, 27 — A vida de Sábado em Nampula encerrara-se com uma sessão de boxe. A ela acorrera grande parte da população confiante nas promessas propagandistas de ambos os lutadores que ofereciam à cidade vitória. Depois um café apressado, os desejos de boa-noite e a cidade adormecia.

A noite estava clara e sem teto de núvens. E quente. O ar asfixiava convidando à rua, à vida nocturna que a cidade se nega a oferecer a quem nela vive. Mas as ruas estavam desertas; apenas os cafés sentiam, à sua volta a presença humana.

Quedámo-nos em conversa com o jovem artista plástico Fernando Lopes Direito, amigo de há muito e que longos anos de afastamento obrigavam a conversa longa. Junto o furriel miliciano Vilela.

Novos cafés, água gelada, e a rua abriu-se à continuação da conversa no aconchego da pouca velocidade do carro.

Eram duas horas, e o encerramento dos últimos cafés levava para os lares os poucos noctívagos. Mas a noite continuava convidando e sentia-se a sua voz nos sentidos.

UM «OBJECTO LUMINOSO» PARA OS LADOS DE NAMIALO

Para os lados do Namialo um objecto luminoso grande, esbranquiçado, quedava-se no céu estrelado. Fixo, ou parecia fixo. O carro rodou na sua direcção e dez, quinze, vinte quilómetros foram vencidos.

De angulos que as curvas caprichosamente ofereciam parecia-nos uma janela iluminada por luz irreal e de intensidade estranha, para logo se mostrar como nave de ficção científica suspensa, curiosa, no firmamento. Mais seis quilómetros e o carro estacionava.

— Apaga a luz! — **sussura uma voz nervosa.**

— Repara nas antenas! — **responde o artista Direito.**

E curiosamente abandonámos o carro.

Tinha forma o que víamos. Era o esplendor de uma grande lâmpada com dois enormes traços verdes em «V» em forma de antenas saindo do seu topo e da sua base. Nos extremos laterais da luz dois pequenos rectângulos vermelhos espalhavam reflexos da mesma cor. Por vezes balouçava com elegância e com beleza.

— Vai aterrar! — **afirma-nos Vilela.**

ESPECTÁCULO DIGNO DE SER VISTO

Ficámos na estrada junto ao carro. Os olhos não se despegavam de espectáculo inédito que conti-

Strange Flying Object Is Spotted in Columbus, Ga.

COLUMBUS, Ga. (UPI) — An airport control tower operator reported seeing a glowing, oblong object maneuvering high in the sky yesterday. He said it was tracked on radar.

Six Columbus policemen, and a control tower operator at Ft. Benning, Ga., also said they saw the strange object.

Doyle Palmer, an air traffic control operator at Muscogee county airport, said he first spotted the greenish white, cigar shaped object at about 5:30 a.m., and that it was tracked on radar at Atlanta for over an hour.

Palmer said he had first thought the object was a star, "but you don't pick up stars on radar." He said he could still see it clearly after the sun came up — when stars normally disappear — but by that time it had shrunk to the size of a pin head and was moving southeast.

Columbus police detective G. H. Ferguson said he spotted the object after hearing radio reports about it. He described the glowing thing as wedge-shaped and said he saw it rising in the air. He reported it was much brighter and moved faster than a star. Ferguson said he observed the object until after 7 a.m.

UFO Photograph

Mrs. C[redacted]
[redacted]
Orlando, [redacted]

Reference your unidentified photograph that was taken at 1100 hours, 27 March 1966 at Orlando, Florida. Photo analysis has been completed with the following results.

a. The character of the five images suggest that the photograph was taken through a plate glass window or through an open doorway with an overhead transom. The images appear as reflections from overhead rectangular ceiling light panels positioned to the rear and above the camera, possible unnoticed by the photographer prior to taking the photograph.

b. Any further detailed analysis would depend upon the receipt of additional information relating to the camera position, light sources and relative location to any surrounding reflective surfaces.

Satellite. This only 27 March

SIGHTING: 27 March 1966, Dayton, Ohio

Miss [redacted], SGD, W-P AFB, Ohio observed an object on the night of 27 March 1966 at the Dixie Drive-in. Object went N to SW, looked to be high as airplane. Saw it for just a few minutes. Looked like a star. observed 1145 or 12 pm. Looking through the windshield, object went over the screen. Major Quintanilla said we had a couple of reports for satellites at that time last night (when she observed object). She said it looked like satellite. (It is quite possible that she had her directions off slightly).

1. PURPOSE: This report answers Work Order 66-45, submitted by Major H. Quintanilla, Jr. of TDEW, which requested an analysis of the five objects or reflections of objects that appeared in the photograph.

2. ANALYSIS:

a. The character of the five images suggest that the photograph was taken through a plate glass window or through an open doorway with an overhead transom. The images appear as reflections from overhead rectangular ceiling light panels positioned to the rear and above the camera, possibly unnoticed by the photographer prior to taking the photograph.

b. Any further detailed analysis would depend upon the receipt of additional information relating to the camera position, light sources and relative location to any surrounding reflective surfaces.

Photo/negative

This case contains 2,
8"x10" photos.

THE SKETCH SHOWS APPARENT SIZE THRU 16X50 BINOCULARS. THE SHAPE CLOSELY APPROXIMATED THAT OF A FOLDED PAPER AIRPLANE. NO WINGS WERE APPARENT. VISIBLE ABOUT 8-10 SECONDS (TRAVERSED ABOUT 120° - DISAPPEARED BEHIND HOUSES ACROSS STREET)

Since the craft was travelling from left to right, the green light should have been on the right wing, behind the nose and the red light on the left wing should have been invisible because of the low viewing angle. Also, ordinarily the white light would not be below the fuselage. Note that the green light is at the extreme point of the nose, while the red light is above the white light at the tail. This is contrary to FAA regulations.

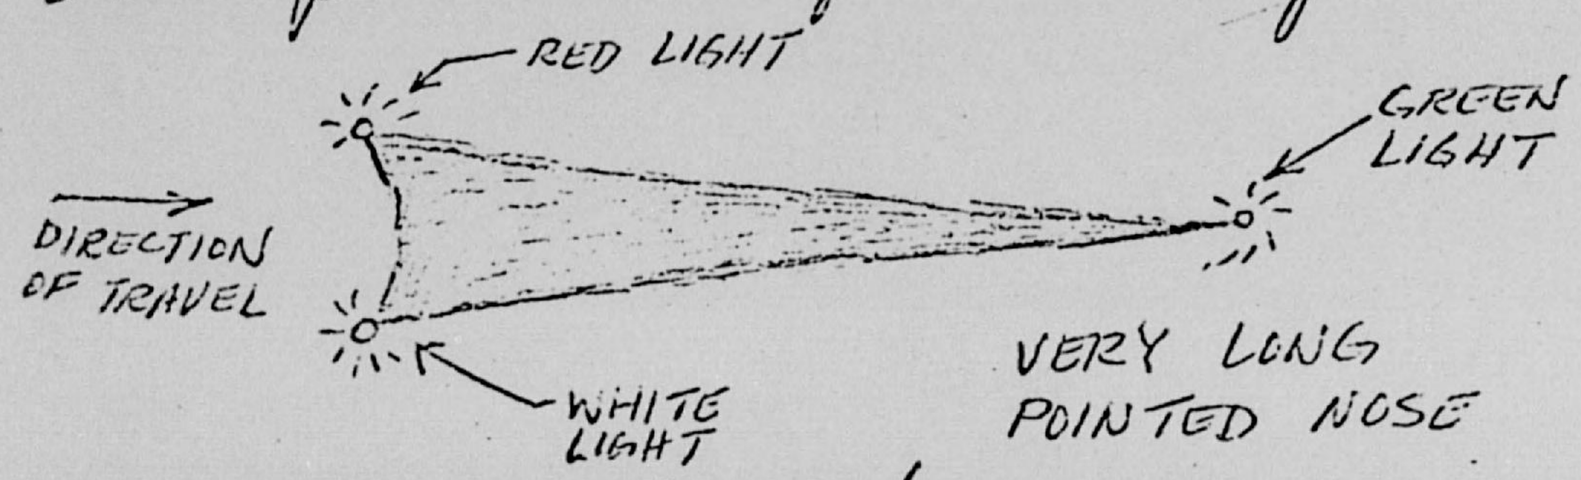
MARIANO SALCEDO

3-20-66
10:45 PM

3-25-66

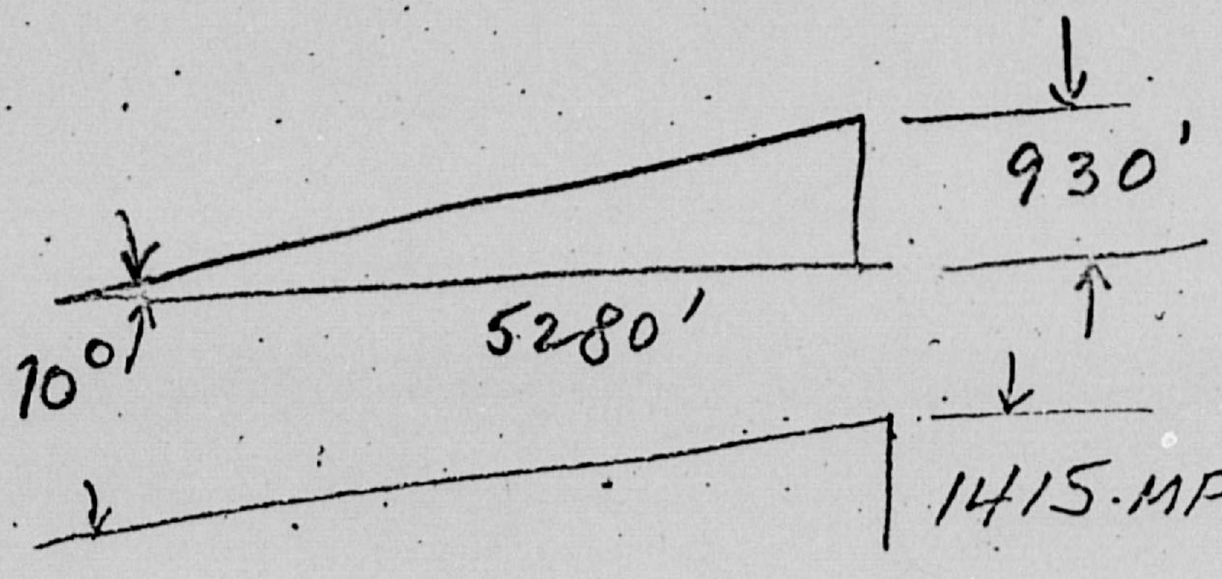
Unusual object seen travelling E to W approx 10° above S horizon. Appeared to be approx over Lomita Village area. 1 mile away. (Was closer than aircraft which followed similar path (altho slightly higher) a few minutes later.)

The object was moving much faster than later prop-jet a/c, but was absolutely silent. No sound could be heard, altho the area was quiet. Other plane was quite noisy.



TRAVERSED ABOUT 15°/SEC. SILHOUETTED AGAINST GLOW FROM GROUND LIGHTS. OBSERVED THRU 16x50 BINOCULARS BY CARR, BALD

.17 in = .0156 ft
1 mile = 5280 ft
.0156 : 2 = 82.37
2X = 82.37
X = 41.185 ft. long



$\frac{a}{b} = \tan A$

$a = b \tan A$
