11. BRIEF SUMMARY AND ANALYSIS
One object had red light, one had white light. Object had a humming sound at a high freq. Object was first observed low to the north and disappeared low to the NE. Object traveled to the W, reversed course abruptly several times, ended going W. Lights appeared to flash extremely bright periodically, then fade (not completely out), then flash again. All that was noted was the lights, at low angle, no object was actually seen.

COMMENTS INVESTIGATING OFFICER'S: There was at this time at Chreve City, a carnival with several large rides and most of them are equi ped with brightly colored lights of various descriptions. There were, in fact, several small clouds at a low altitude in the area and investigating officer strongly feels that what the boys noted was one or more of these lights reflecting on the clouds as they passed over. The movement of the cloud would give the light the ~~appearance of moving. No ther reports of this from the Shreveport~~ area for that night.

FORM FTD SEP 63 0-329 (TDE) Previous editions of this form may be used.

UNIDENTIFIED FLYING OBJECTS (UFO)
WORK SHEET

Name of Observer [redacted] Occupation Student

Address [redacted], Shreveport, La. Age 13 Phone [redacted]

Estimate of Reliability Not too good because of age

a. Description of Object:

(1) Shape Not noted

(2) Size (compare known object) Unk

(3) Color Unk

(4) Number 2

(5) Formation? Yes

(6) Features, details One had red light, one had white light (see remarks)

(7) Tail, trail, exhaust (compare to size of object) No

(8) Sound "Humming at a High Freq."

(9) Special features None

b. Description of Course of Object:

(1) Reason for noticing object Boys often study stars and sky

(2) Angle of elevation and azimuth of object: When first observed Low to the North. Upon disappearance Low to N.E.

(3) Description of flight path and/or maneuvers Traveled W., reversed course abruptly several times, ended going West

(4) Manner of disappearance Sudden disappearance.

(5) Length of time in sight 15 minutes.

c. Manner of observation:

(1) Ground or air, visual or electronic. Type radar Visual.

(2) Optical aids description N/A.

(3) If air observation, type a/c, no., alt., heading, speed, home station N/A.

d. Time-date Apr/2050C Light conditions: Day, night, dawn, dusk.

e. Exact location of observers Southeast section of Shreveport, La.

f. Physical evidence None.

g. Weather: Observer's account "Clear, hazy, with small occasional cloud.

Official: Wind Direction & velocity at surface

6000'------10------16------20------30------50------58.

Ceiling Visibility Amount of cloud cover.

Thunderstorms Temperature gradient.

h. Remarks:

With the observer at the time of sighting were:

[redacted] 17 yrs
[redacted] 12 yrs
[redacted]s 8 yrs
[redacted] 9 yrs

Address given as [redacted], Shreveport for all the boys.

"Lights appeared to flash extremely bright periodically, then fade (not completely out), then flash again." All that was noted was the lights, at a low angle, no object was actually seen.

INVESTIGATING OFFICER'S REMARKS:

I drove out to neighborhood and noted a large glow in the sky to north. It was caused by the lights of the shopping center called Shreve City. There is, at this time at Shreve City, a carnival with several large rides and most of them are equipped with brightly colored lights of various descriptions. There were, in fact, several small clouds at a low altitude in the area and I strongly feel that what the boys noted was one or more of these lights reflecting on the clouds as they passed over. The movement of the cloud would give the light the appearance of moving. There were no other reports by anyone else of noting "strange lights" in the Shreveport area for that night. Because of this this simple explanation and the lack of corraborating witnesses from another area, I chose to report this solely by letter and not by message.

Sent to Colorado Springs

U.S. AIR FORCE TECHNICAL INFORMATION

Rec. Oct 1967

Because of late date reporting NCIO

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Friday (Day) April (Month) 1966 (Year)

2. Time of day: 8:30-9:00 (Hour) _____ (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
(b. Central)
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. (Daylight Saving)
b. Standard

4. Where were you when you saw the object?

[redacted] (Nearest Postal Address) DECATUR (City or Town) ILLINOIS (State or County)

5. How long was object in sight? (Total Duration) 1 (Hours) 45 (Minutes) NOT SURE (Seconds)

a. Certain
(b. Fairly certain)
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? BY WATCH

5.2 Was object in sight continuously? Yes √ No ____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	(a. Bright)
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):
a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FTD FORM OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

Reproduced by Library of Congress, Legislative Reference Service
May 1966

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON (Circle One):

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER (Circle One):

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: (Circle One):

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

LIKE A SEARCH LIGHT.

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember

c. Other _____

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? 40 mi.

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

The way I would ~~it~~ describe this object IT looked like an auto-gyroscope. A small solid circle in center to be silver in color. The ~~shell~~ steel looking circle around it was green and red. Which beamed brightly. IT traveled Fairly slow.

14. Did the object disappear while you were watching it? If so, how?

NO.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: ___

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: ___

17. Tell in a few words the following things about the object:

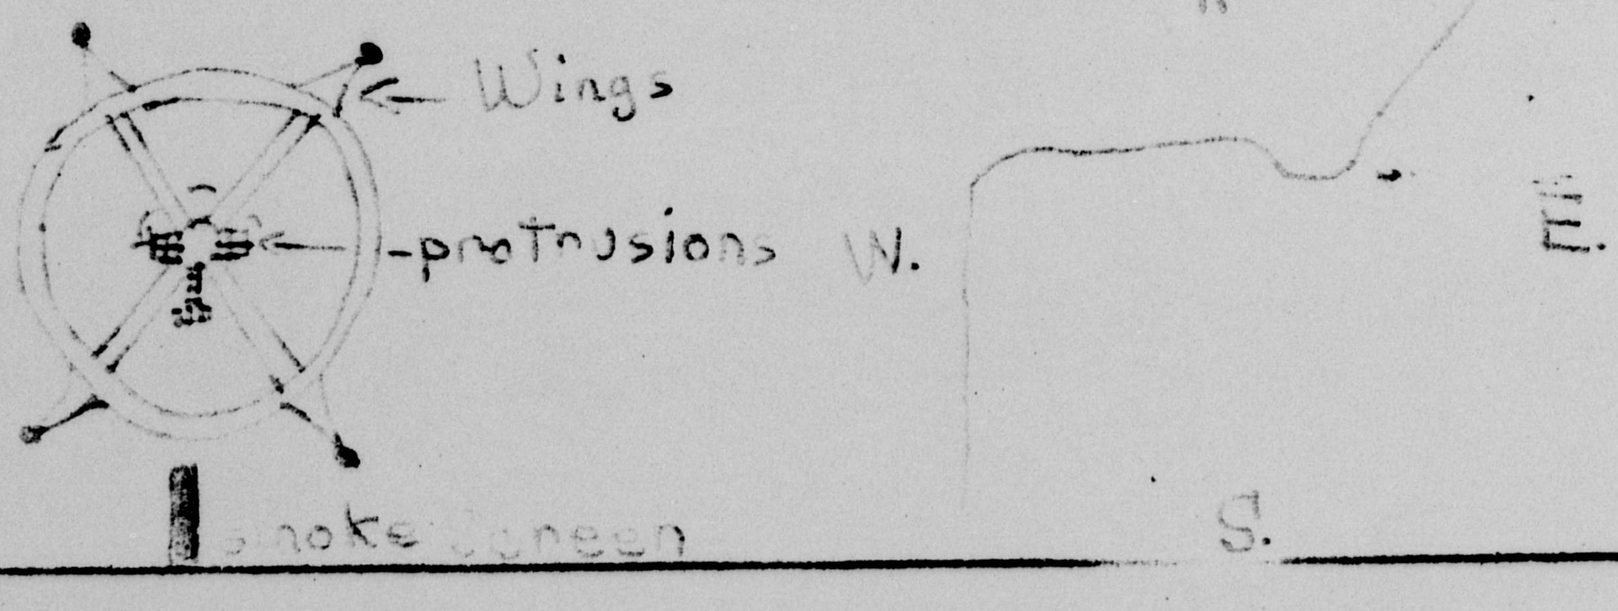

a. Sound LIKE A MOTOR.

b. Color RED, GREEN, and silver.

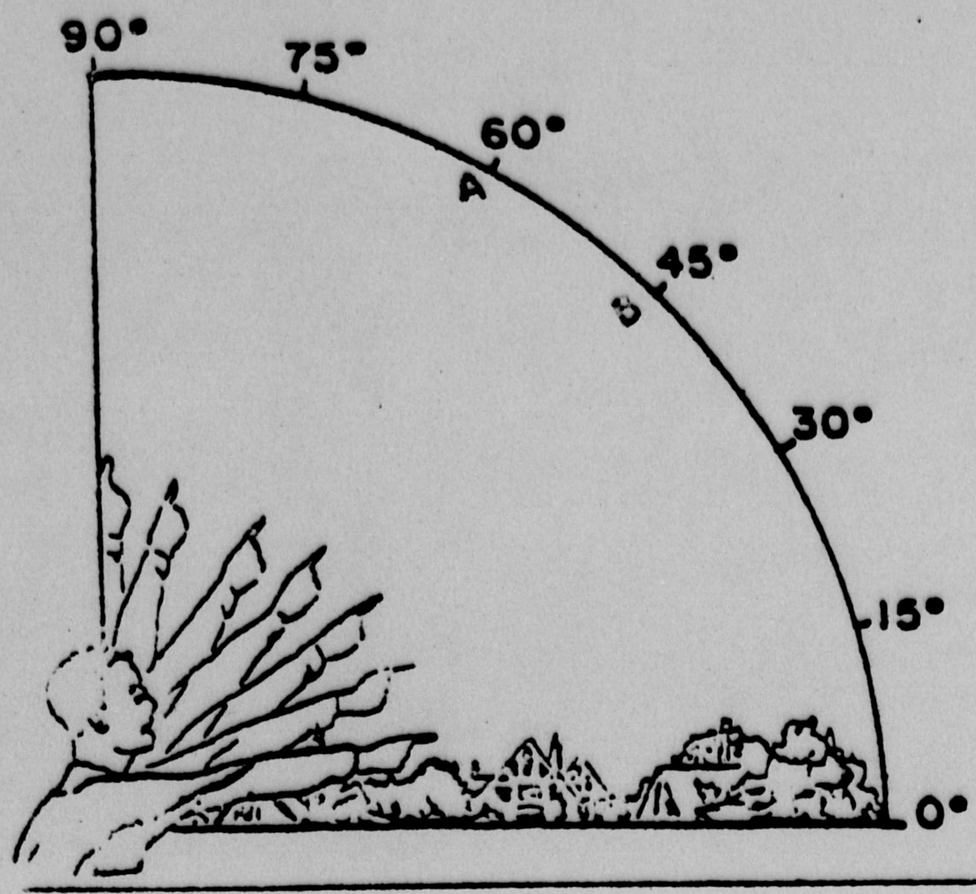

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

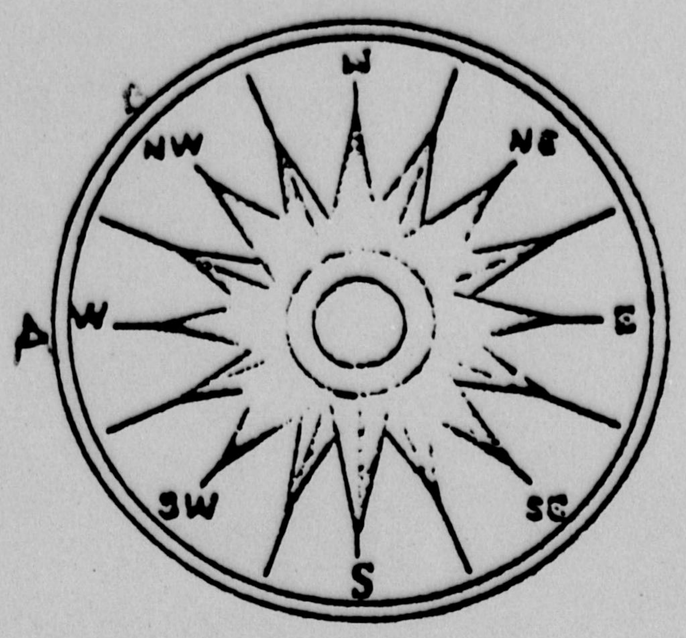

DIDN'T Perform the experiment.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

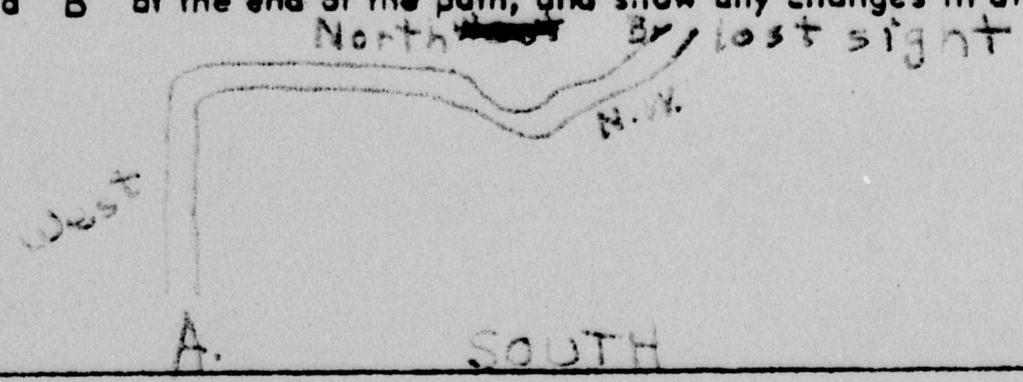

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO!

31. Was anyone else with you at the time you saw the object? (Circle One) Yes No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

31.2 Please list their names and addresses:

[redacted] DECATUR, Ill.
[redacted] - SAME address.
[redacted] - Same address.
[redacted] - SAME address.

32. Please give the following information about yourself:

NAME [redacted] [redacted] [redacted]
Last Name First Name Middle Name

ADDRESS [redacted] DECATUR [redacted]
Street City Zone State

TELEPHONE NUMBER [redacted] AGE 51 SEX FEMALE

Indicate any additional information about yourself, including any special experience, which might be pertinent.

NONE

33. When and to whom did you report that you had seen the object?

Day: 28th Month: April Year: 1964 DID NOT REPORT IT.

34. Date you completed this questionnaire: 8 OCT 1947
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

NONE.

Flying Saucers? Can 5 Million Americans Be Wrong?

By George Gallup

More than five million Americans claim to have seen something they believed to be a "flying saucer." And, about 10 times as many people — or nearly half of the U. S. adult civilian population — believe that these frequently reported flying objects, while not necessarily "saucers," are real and not just a figment of the imagination.

These are the principal findings in a nationwide Gallup survey of the American people on this subject, when survey percentages are translated into numbers of people.

Since late in the 1940's, scientists and military officials have been investigating hundreds of reported sightings of unidentified flying objects. A recent rash of sightings prompted a congressional hearing last month and also this special survey.

How do typical Americans feel about flying saucers? How many people have seen them? Are they real or imaginary? Do people believe there is life, as we know it, on other planets?

More than 150 Gallup Poll interviewers have been out questioning typical Americans — men and women, people of all ages in all educational levels and in every region of the nation. Tabulation of their statements and views reveals:

First, almost everyone (96 per cent) has at least heard or read something about flying saucers. For something so highly publicized as these objects, this finding may, at first, not seem unusual. However, in terms of the history of the public's awareness of other incidents or events, this figure is extraordinarily high. In fact, this awareness score is one of the highest in the 30-year history of the Gallup Poll.

✣ ✣ ✣

ARE FLYING saucers a hoax? Philip Easter of Baltimore, Md., told one of our interviewers this story: "It was dark and I had just come out of a building. I looked up and saw this object hovering in the dark sky above me. It was very bright and stayed in about the same position for several minutes. At first I thought it was a planet, but I knew it couldn't be because of the way it moved."

Harold Stoops tells of the time last June when he was driving through Topeka, Kansas:

"It was very late — about 2:30 in the morning. I saw this round-shaped object in the sky ahead of me. It was extremely bright and I could notice a greenish hue. By the time I stopped the car and got out, it had disappeared."

A New Jersey housewife was startled during the night recently:

"It was about three in the morning," she relates, "I was suddenly awakened by a very bright light outside. I got up and looked out the window. The whole area seemed to be lit up like a phosphorous fire. I could hear strange sounds, like the ringing of bells. I know it sounds strange, but the next day several people about 20 miles away reported a similar experience and at

**Based on persons who heard or read about flying saucers.*

Five Million Have Seen Something Up There

(Continued From Page 1)

"real" than believe they are "imaginary." Forty-six per cent (or about half of the U.S. adult population) hold this opinion, while 29 per cent describe them as "a figment of the imagination." The rest cannot make up their minds.

This represents quite a change in public attitudes toward the credibility of "flying saucers" since a Gallup survey conducted almost 20 years ago. At that time — shortly after the flying saucers were first noted—four out of every ten called the saucers either a hoax or the product of some overheated imagination. In 1950, another Gallup survey showed that attitudes had begun to change. More persons that year held the view that the saucers were a reality.

✣ ✣ ✣

IN WEIGHING what evidence there is about the credibility of flying saucers it is important to note that while most of the reported sightings have been explained, according to Air Force reports, there are still many sightings without explanation. Persons with college training are more likely to believe in the reality of flying saucers than are persons with a high school background, or less.

Among those persons who believe flying saucers have an explanation, (that is, those who think they are "real"), here is how they describe them:

1) **Experimental projects, Air Force tests**
2) **Actual vehicles from outer space**
3) **Burning gas, "swamp gas"**
4) **Meteors, shooting stars**
5) **Weather balloons**
6) **Supernatural revelations**

Those who believe they are from outer space account for 6 per cent.

✣ ✣ ✣

DO PEOPLE who are living in space age believe there is life, as we know it, on other planets?

Many scientific authorities believe that intelligent life must exist elsewhere in the universe, because the statistical odds are large that there are millions of planets in the universe enough like our own to support life, as we know it.

One person in every three (34 per cent) who participated in this survey said they believe life does exist on other planets.

Again, persons with the most education are most inclined to believe in the existence of intelligent life on other planets.

Air Force Officials Face Quiz on UFO

WASHINGTON (UPI) — The House Armed Services Committee announced Thursday it will question Air Force officials next week about recent sightings of unidentified flying objects.

Chairman L. Mondell Rivers, D-S.C., directed Air Force Secretary P. McConnell, Air Force chief of staff, to meet in a closed session with the committee Tuesday.

March 29, 1966

Mr [redacted]
Elwood, New Jersey

Dear [redacted]

Thank you for your letter prompted by the article, "Outer-Space Ghost Story," which appeared in the February 22, 1966, issue of LOOK.

You and several other readers offered possible explanations for the U.F.O.'s, and the editors were appreciative of your taking the time to share your views with them. Because there is so little known about the subject, your comments were read with special care.

Again, our thanks for writing. May you see many more birthdays.

Cordially,

Anne Celli
Assistant to the Editors

Observation of 3 April 1966, [redacted]

Hq USAF SAFOICC (Mrs. Hunt)

Reference the attached letter from [redacted] regarding an observation which he made on 3 April 1966. The following is a suggested reply.

a. Dear Mr. [redacted]

Thank you for your most gracious letter of 22 May 1966. Your description of the formation of aircraft lights is excellent. I would like to congratulate you for sticking to your observation long enough to determine what the source of the lights were.

The Air Force agrees that most people are basically honest. Unfortunately, the average person is a poor observer. This has been confirmed time and time again in controlled experiments.

The Air Force wishes to thank you for reporting your observation. No other reports were received from the Kalamazoo area for the night of 3 April 1966.

22 April 1965

Dear Sir,

With the world on the verge of travel into space, and with everyone wanting to participate and most of them never to get the opportunity to do so and realizing it, it's small wonder that sightings of UFO's have increased. To this growing list I would like to contribute a sighting of mine that resulted from my wife's curiosity in a pulsating star.

On Sunday, April 3, 1965, at 10:30 P. M., my wife observed a pulsating object in the sky. I quickly dismissed it as a star, but as we watched, a second star appeared, lower in the sky. It appeared to be the same size as the first star. We watched from the bedroom window, and then from the living room window, observing that it remained as we had first seen it. I then decided to investigate by coming outside and did so, leaning against the rear of my car. After a few additional minutes lapse, my wife joined me to continue our watch. All during this time the second star remained in its position. A few minutes after my wife joined me the star began to move, and when it did move it was perfectly obvious. It moved towards us, or in an Easterly direction. In a matter of 2 or 3 minutes the star was directly over us, but it no longer was a star.

It was approximately 1000 to 2000 feet high, and the only shape we could see was that shape outlined by the light configuration. There were five lights, laid out in a slightly V shape, such as a wing, and they were not pulsating, but they were on and easily seen. Beginning at one end they had the colors of, white, red, red, red, and white on the opposite end too. All were spaced about the same. From the rear, or at least from the area that appeared to be trailing the line of lights, and from the approximate center, an intermittent blast of flame could be seen, at 1 second intervals. As it passed overhead both of us were consciously aware that no sound could be heard of any kind, just as other people have been reporting. It's light configuration we have never seen, and as this colorful aircraft passed silently overhead, it's majestic appearance made us feel quite insignificant.

about 5 minutes later another one passed over, heading in an easterly direction also, but further south of us and about twice as high. It's lights were easily identified with the first one, but the later itteht flame was twice as fast or often, or about twice each second.

It would seem that someone, somewhere, might have seen this also, and might have reported it. For this reason and to collaborate their story, or to have mine collaborated, I felt I should report what we had seen.

In this Era of controversy on UFO's we all realize the need for proof to substantiate what we see, but lets face it, most average people couldn't prove an F-99 jet was an F-89 jet. An encouraging note however, is that basically, most people are honest, and after seeing what we saw I am even more inclined to feel this is true.

Respectfully yours,

[redacted]

Kalamazoo, Mich. 49002

REMARKS

Dear Sara,

I disagree with your statement. [redacted] evaluated the light configuration as that coming from an aircraft.

Please read the last sentence on the first page.

His reference to a F-89 has nothing to do with pulsating lights which he reported.

Major Hector Quintanella Jr.
PROJECT BLUE BOOK
UNITED STATES AIR FORCE
WRIGHT-PATTERSON AIR FORCE BASE
Dayton, Ohio.

Major Quintanella:

RE: U.F.O.s : A YEAR'S WORTH OF ACTIVITY
(in Corvallis)

DATE: 4 April 1966
TIME: 8.30 P.M.
TIME IN VIEW: (60 seconds) 1 Minute.
SPEED: Extremely slow. Almost stationary.
DIRECTION: Due North.
ALTITUDE: Low. Just above the tree-tops.
SOUND: None.
NUMBER OF OBSERVERS: 3
SHAPE: 4 or 5 huge lights in a solid line: 
COLOUR: Greenish-Yellow.
SIZE: Very large.
WEATHER: A clear starless night.

DATE: 29 June 1966
TIME: 6.05 P.M.
TIME IN VIEW: (60 seconds). 1 Minute.
SPEED: Moderately fast.
DIRECTION: North to Northwest. About 70° degrees to about 20° degrees.
ALTITUDE: Not too high.
SOUND: None
NUMBER: One.
NUMBER OF OBSERVERS: One.
SHAPE: Disc. Like a Melmac dinner plate turned upside down:
COLOUR: Pure white.
SIZE: Too far away to be sure. Uncertain.
ACTIONS: Flew between cloud banks. Object stopped once and hovered.
WEATHER: Blue sky with fairly low large white cloud banks.

DATE: 29 September 1966.
TIME: 7.45 P.M.
TIME IN VIEW: (120 seconds). 2 Minutes.
SPEED: Moderately fast.
DIRECTION: Due South. From about 90° degrees to about 40° degrees.
ALTITUDE: Low. (Very low).
SOUND: None.
NUMBER: One.
NUMBER OF OBSERVERS: One. (Myself and an 18x telescope).
SHAPE: Sphere.
COLOUR: Silver.
SIZE: Large (As seen through the telescope).
ACTIONS: From point first seen to point last seen, object flew in a PERFECTLY STRAIGHT LINE.
WEATHER: Clear, starry night.

DATE: 29 November 1966.
TIME: 2.00 A.M.
TIME HEARD: 60 minutes (1 Hour).
LOCATION: Above driveway between south end of my house and Mrs. [redacted] house next door. Above height of said houses and a bit to the East.
SOURCE: Unknown.
TYPE OF SOUND: An EVEN low to high pitched whirring sound that gradually increased in volume. Then at the end of the hour....disappear As the whirring increased in volume, it also seemed to increase in altitude.....to go higher and higher into the sky.....straight up.....until it was heard no more.

WHAT THE SOUND WASN'T: (1) A Train. (2) A Jet or Airplane. (3) A Car. (4) The heater downstairs. (5) The wind. There wasn't any. (6) A hellocopter.

DATE: 18 December 1966
TIME: 4.05 A.M.
TIME HEARD: 5 minutes to half an hour.
LOCATION: Above Northern portion of the house .
SOURCE: Unknown.
TYPE OF SOUND: Rotary motor.....like in a heliocopter.

DATE: 1 March 1967
TIME: 5.30 A.M.
TIME HEARD: 5 minutes.
LOCATION: Above the rooftops and to the Southwest.
SOURCE: Uknown.
TYPE OF SOUND: An *** UNEVEN high pitched, loud, rasping, grinding sound. Everytime I tried to go back to bed, the sound got louder and I'd go back to the window to see if I could see anything, but I never did.

WHAT THE SOUND WASN'T: (1) the revolving fan on top of Mrs. [redacted]' house. (2) A train (3) A Jet or Airplane. (4) The heater downstairs. (5) The wind. (there wasn't any.

POSSIBLE SOURCE? A heliocopter with engine trouble.

DATE: 19 May 1967
TIME: 4.55 P.M.
TIME IN VIEW: 30 seconds (½ a minute.)
SPEED: Moderately fast.
DIRECTION: North to South. From about 110° to 60° degrees.
ALTITUDE: High.
SOUND: None.
NUMBER: One.
NUMBER OF OBSERVERS: 2
SHAPE: Disc.
COLOUR: Silver.
SIZE: ?
ACTIONS: Smooth and straight.
WEATHER: Blue sky with sparse feathery clouds.

Sincerly Y ours

SUBJECT: Report of Possible UFO

TO: FTD (TDEM/UFO)
Wright Patterson Air Force Base
Ohio 45433

1. The following report is furnished in confirmation of telephone conversation with Sgt. Jones, your office, this date.

2. On 6 April 1966, at 2120 hours, T[redacted], age 15, residing [redacted], Aberdeen, Md., and [redacted]., age 16, residing Minnick's Tourist Home, [redacted], Aberdeen, Md., advised Aberdeen Police Department that they had sighted a UFO flying in a Northeasterly direction over Aberdeen, Md. The Aberdeen Police Department immediately notified the Military Police Desk Sergeant, Aberdeen Proving Ground, Md. Subsequent investigation by the Intelligence Office reflects that Smith feels the UFO was actually an airplane with its landing lights turned on. He saw and heard the aircraft in the same direction moments after he thought he saw a UFO.

3. There has been no publicity on this reported sighting in local news media.

FOR THE COMMANDER:

Harry A. Mencke
HARRY A. MENCKE
Intelligence Officer

cc: USAF Liaison Officer
APG, Md.

6 Apr 66

North Attleboro, Mass

Dear Major;

I am sorry it may not look very complete but come to North Attleboro and we will recreate the whole thing.

Yours truly,

[redacted]

FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight—pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

Flare were light, and the were bright than airplane lights

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other_____

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

OFFICIAL U.S. AIR

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

6 (Day) April (Month) 1966 (Year)

2. Time of day: 7 (Hours) 30 (Minutes)

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

[redacted] (Nearest Postal Address) North Attleboro (City or Town) Massachusetts (State or County)

5. How long was object in sight? (Total Duration) 1 (Hours) 15 (Minutes) 10 (Seconds)

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? subtracting time of sighting till time of leave.

5.2 Was object in sight continuously? Yes ✓ No ____

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a. Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FTD FORM OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

64

Official U.S. Air Force

14. Did the object disappear while you were watching it? If so, how? but only in thick trees and behind houses. Yes it did disappear

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): (Yes) No Don't know. IF you answered YES, then tell what it moved behind: houses and thick patches of trees.

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): (Yes) No Don't know. IF you answered YES, then tell what in front of: a radio tower about 5 miles away.

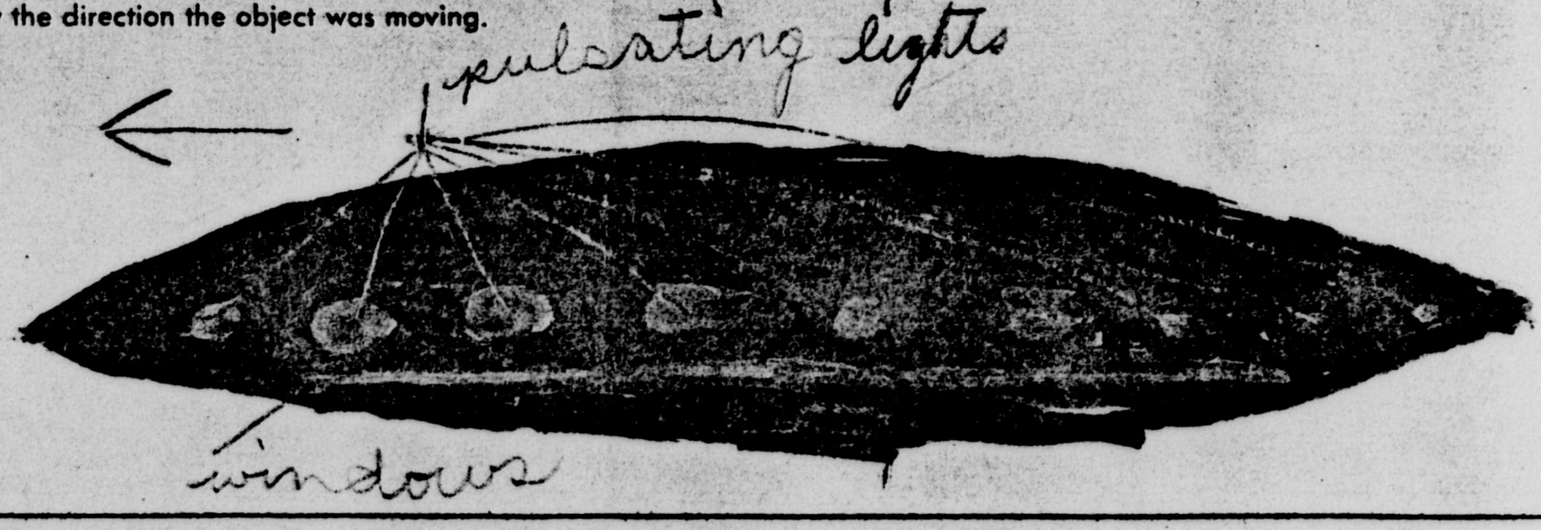

17. Tell in a few words the following things about the object:

a. Sound (none)

b. Color red blinking lights with a metallic shell

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? about $\frac{1}{4}$ to $\frac{3}{4}$ of the object.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

UFO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? 45 m.p.h.

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 1/4 mi.

22. Where were you located when you saw the object? *(Circle One):*

a. Inside a building
b. In a car
(c. Outdoors)
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you *(Circle One)*

a. In the business section of a city?
(b. In the residential section of a city?)
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? *(Circle One)*

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	No	e. Binoculars	(Yes)	No
b. Sun glasses	Yes	No	f. Telescope	(Yes)	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

First one object came out of the sky and later was joined by 3 others, then they flew eastward where they disappeared over the horizon. Each UFO looked like the picture in 19.

UFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location. Yes, I've
North Attleboro.

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

31.2 Please list their names and addresses:

[redacted] Ave.

[redacted] Ave.

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted] (Street) N Attleboro (City) ____ (Zone) Mass. (State)

TELEPHONE NUM [redacted] AGE 14 SEX boy

Indicate any additional information about yourself, including any special experience, which might be pertinent.

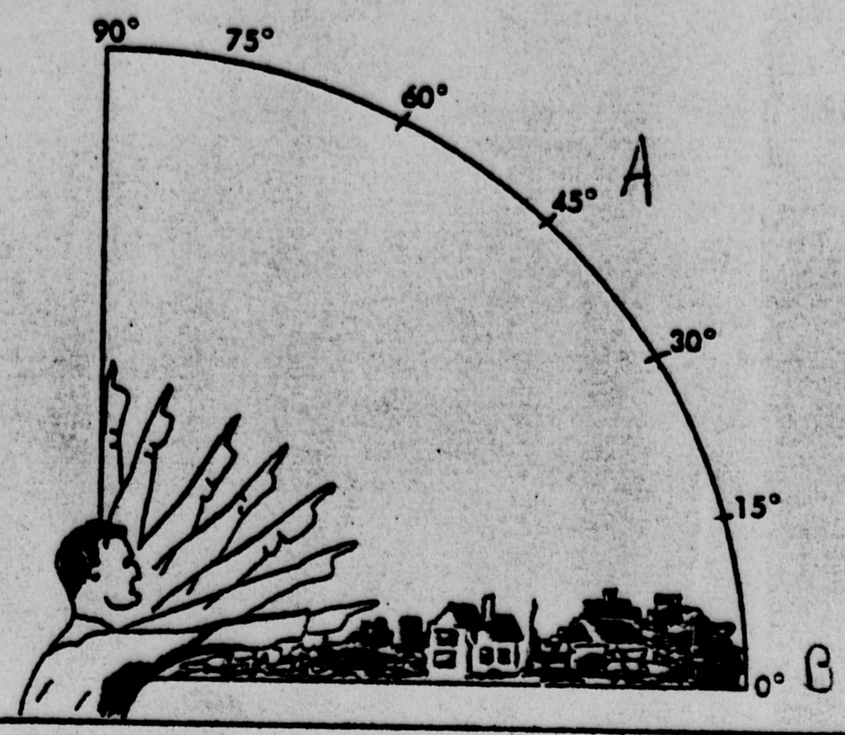

I am an amiture astronomer, I can identify a plane at night, And have had experiance with U.F.O.'s before

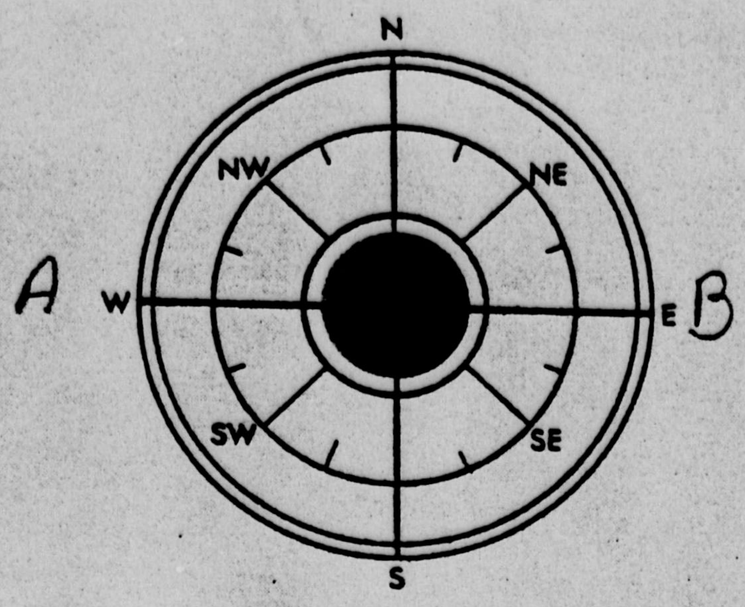

33. When and to whom did you report that you had seen the object? mother & father

7 (Day) April (Month) 1966 (Year)

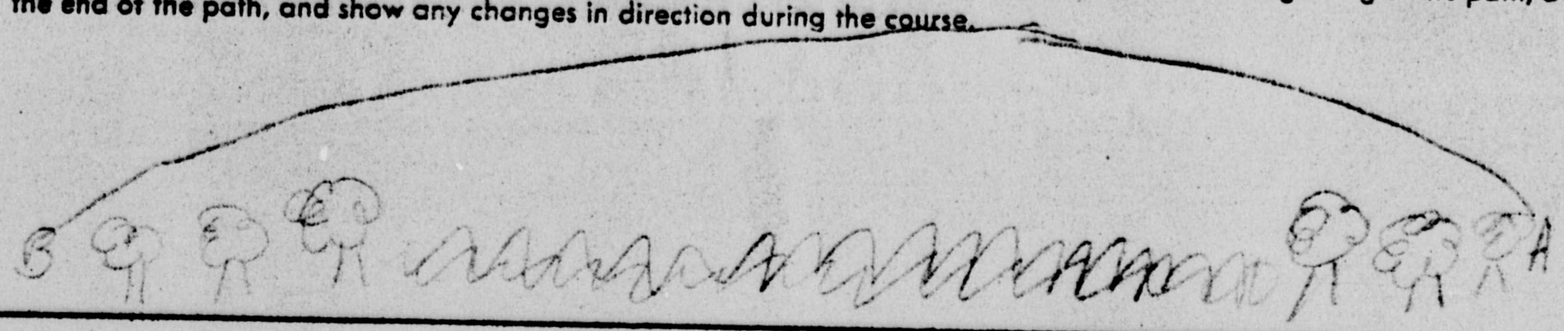

Official U.S. Air Force

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? 4
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

Official U.S. Air Force

34. Date you completed this questionnaire: 16 (Day) Feb. (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Dayton, Ohio

Dear sir:

My name is [redacted]. I am in the 8th Grade at the Berkley Jr. High in Berkley, Massachusetts. I am interested in U.F.O.'s, and when a number of my classmates claimed to have seen some, I interviewed some of them. I am including a copy of the interview. Some of the answers may seem to be the same. This is purely coincidental as the people had no idea what the others answered. Since I am very interested in these things, I would appreciate any information you could send me. My address is:

[redacted]
Assonet
Mass. 02702

Thank you.

Sincerely yours,

[redacted]

Witnesses:

[redacted]	Porter Street	Berkley, Mass.	Age 13
[redacted]	Locust Street	Berkley, Mass.	Age 14

1. Date of observation:
   M) April 7, 1966 9:30 P.M.
   D) April 6, 1966 8:30 P.M.
   E) Unknown 7:30 P.M.

Location of observer:
   M) In front of house
   D) In front of and in house
   E) In front of house

3. Duration of observation:
   M) 50 s.
   D) ½ h.
   E) 5m.

4. Condition of sky:
   M) Dark and clear
   D) Black
   E) No trace of daylight

5. Position of sun/moon in relation to observer:
   M) Moon to my left
   D) Moon to my left
   E) Moon in front of me

6. Number of stars and state of moon
   M) A few stars Dull moonlight
   D) Many stars Bright moon
   E) Few stars Dull moon

7. Was the object brighter than the background of the sky?
   M) Yes
   D) Yes
   E) Yes

8. If so, compare brightness with known object:
   M) Brighter than star
   D) Bright as star
   E) Brighter than moon

9. Behavior of object:
   M) Flicker, throb, pulsate
   D) Appeared to stand still; suddenly speed up; change shape; flicker, throb, pulsate
   E) Change of brightness

10. Did the object pass behind or in front of anything?
   M) Behind trees
   D) Behind trees
   E) Behind trees, in front of moon

4 stars (S/A)

11. Did you observe the object through anything?
   M) No
   D) Through window part of the time

12. Was there any wind?
M) No
D) No
E) Unknown

13. Please describe: Sound; colr
M) No sound; Flashing red, white, and orange
D) No sound; Red and white
E) No sound; Blinking green, red, and white.

14. Describe outline:
M) No definite outline
D) Like a bright star
E) Sharply outlined

15. Was the object self-luminous?
M) Yes
D) Yes
E) Yes

16. Did the object rise or fall while in motion?
M) Yes, and dart around, too.
D) Yes
E) Fell, then rose

17) Apparent size of object held at arms length:
M) Dime held on edge
D) Nickle
E) Penny

18. How did the object disappear from view?
M) It sank behind the trees later.
D) Behind trees
E) Zoomed away

19. How did you happen to notice the object?
M) I was looking at a cemetery across the street from my house when the flashingglight attracted my eyes.
D) My brother saw it and called me.
E) It was bright and blinked.

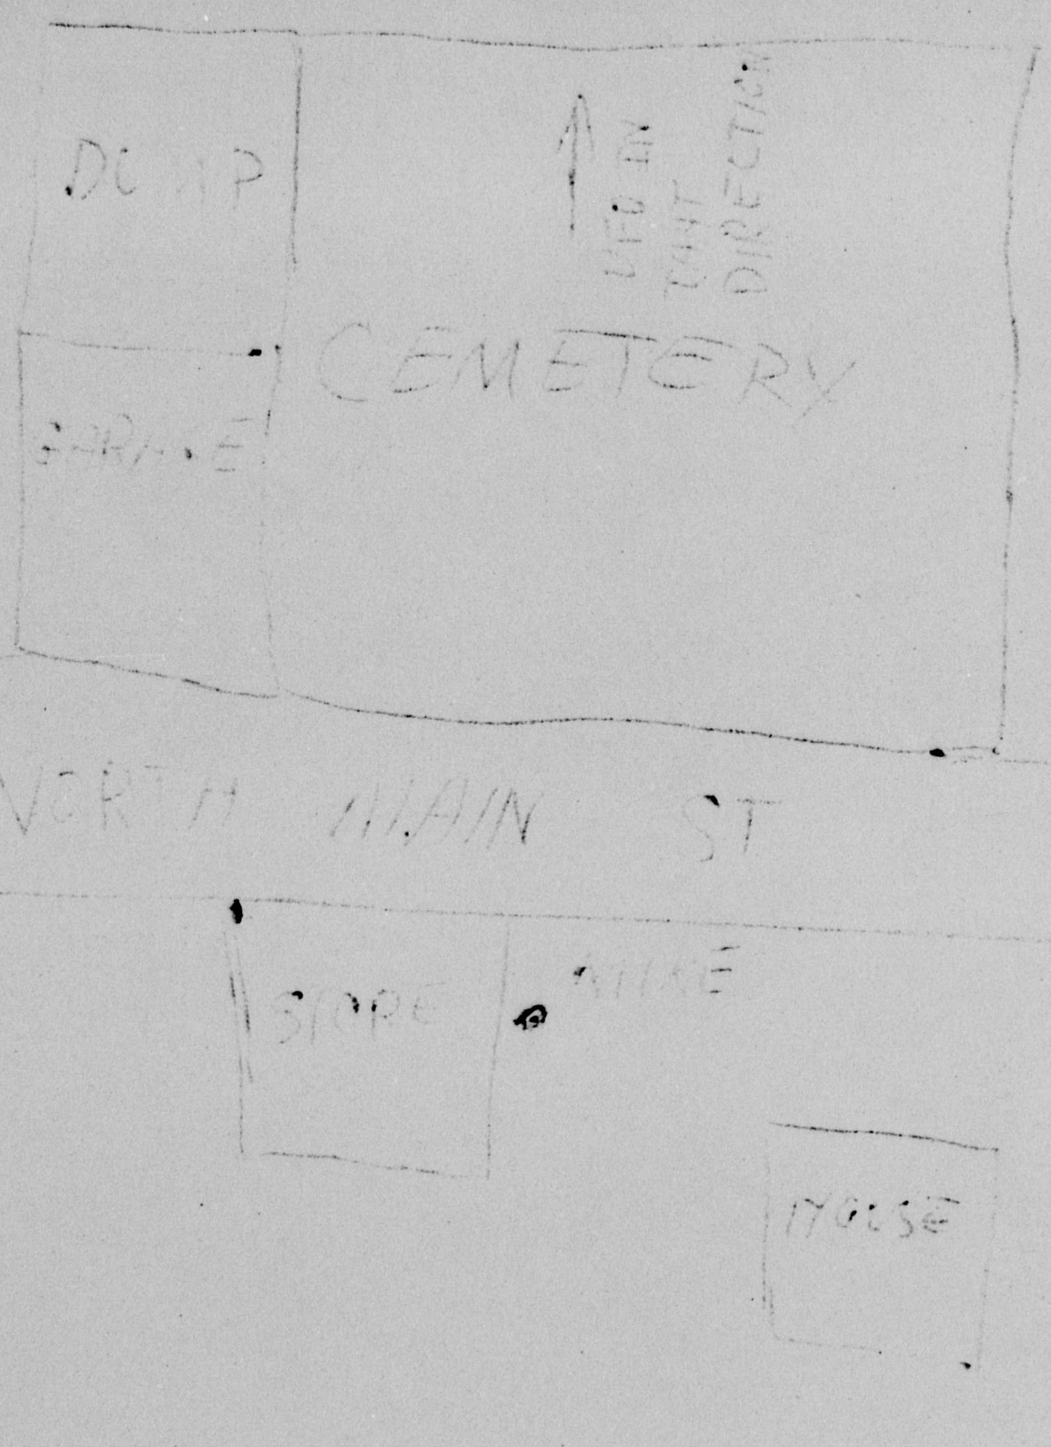

20. Estimated distance of the object:
M) 5 miles
D) 5 miles
E) -------

21. Compare speed with jet at same distance:
M) It would just dart about very quickly, in the blink of an eye almost. (About ten times as fast as a jet)
D) Faster than a jet
E)-------

22. What were you doing at the time?
M) Locking a door
D) Watching T.V.
E) Playing tag

(Address)
Mantua- Ohio CR-4-2251
(City) (Phone)

Evidence obtained, Yes (X), No, ( ). Photographs taken by Chief Buchert

Prosecutor's Report submitted to _____ Date _____

PROGRESS REPORT:

At about 5 A.M., April 17, 1966 a radio call from Summit County Sheriffs Department to Portage County Sheriffs Department was received over the Police radio which I was listening to while on normal patrol. This call requested Portage County Sheriffs Department to look for a UFO which was reported to Summit County Sheriffs Department going east and being a very bright light. At about 5:04 A.M., I was at Canada Road by Main Street (S.R.#44) and I sighted a very bright light which appeared in the southeast portion of the sky. The object appeared to be round and not moving. It was brighter than anything I had ever seen in the sky before. There was no fog and it was very clear out with no clouds or stars in the area of the object. When the object moved left or right, it appeared to tilt or tip and then appeared to be saucer shaped with some sort of light coming from it. I say this because the light was narrow by the object and became wider as it went away from it. I went home and got my wife out of bed to see it and confirm my observation. While we both observed it, the object appeared not to be moving. It then moved up and down still appearing round and very bright. The object then moved to the left and to the right and when it did this, it appeared to tilt or tip and be saucer shape. It's my opinion the object definately was controled by some means because when it moved up it returned to its normal position and then moved down and again up to its normal position. When it moved it left no vapor tail.
I took 3 pictures of the object from my front yeard located at 4487 Orchard Street, Mantua, Ohio. These pictures were taken with a Kodak, Brownie, Starmite Camera, having a Dakon lens with a fixed focus, lens setting at 14, the film was black & white #127.

Discription of object: Round object except when it moved left or right it appeared to tilt and be saucer shape with a light coming from it. Object was very bright and was a steady light. It did NOT twinkle like a star does. No other stars etc. (Except moon) in area of object. Object appeared larger than any star ever seen by officer. Heard no sound from it and no vapor trail, etc. was left by it. The object had no wings. The sky was clear. No distance or size of the object is stated because it would be purely a guess on my part.

NO CASE INFORMATION ONLY 7 April 1966, Daniels Park, Denver, Colorado

Conversation FTD (TDETR) and Amn Mellish, Lowery AFB, Colo on 12 Jul 66

Conversation with Airman David S. Mellish of the Information Office at Lowery AFB, Colorado on 12 July 1966 revealed that a sighting on 7 April 1966 at Daniels Park, Colorado was not reported to Lowery AFB, Colorado.

7 APRIL 1966

THE DANIELS PARK CASE

or

THE CASE OF THE DISRUPTED PICNIC

(This case was investigated by myself, Dr. J. Allen Hynek, on July 4, 1966. [redacted] drove me to Denver from Boulder - having come upfor me. Visited [redacted] first, [redacted], [redacted] Got her statement and story. Next met Mike [redacted], and we all went to visit [redacted], [redacted].

[redacted] drove [redacted] and myself out to Daniels Park where we re-enacted the story. The case illustrated the importance of visiting the scence of the sighting. A totally erroneous impression was originally gained by the preliminary interview. Photographs attached show the reasons why.)

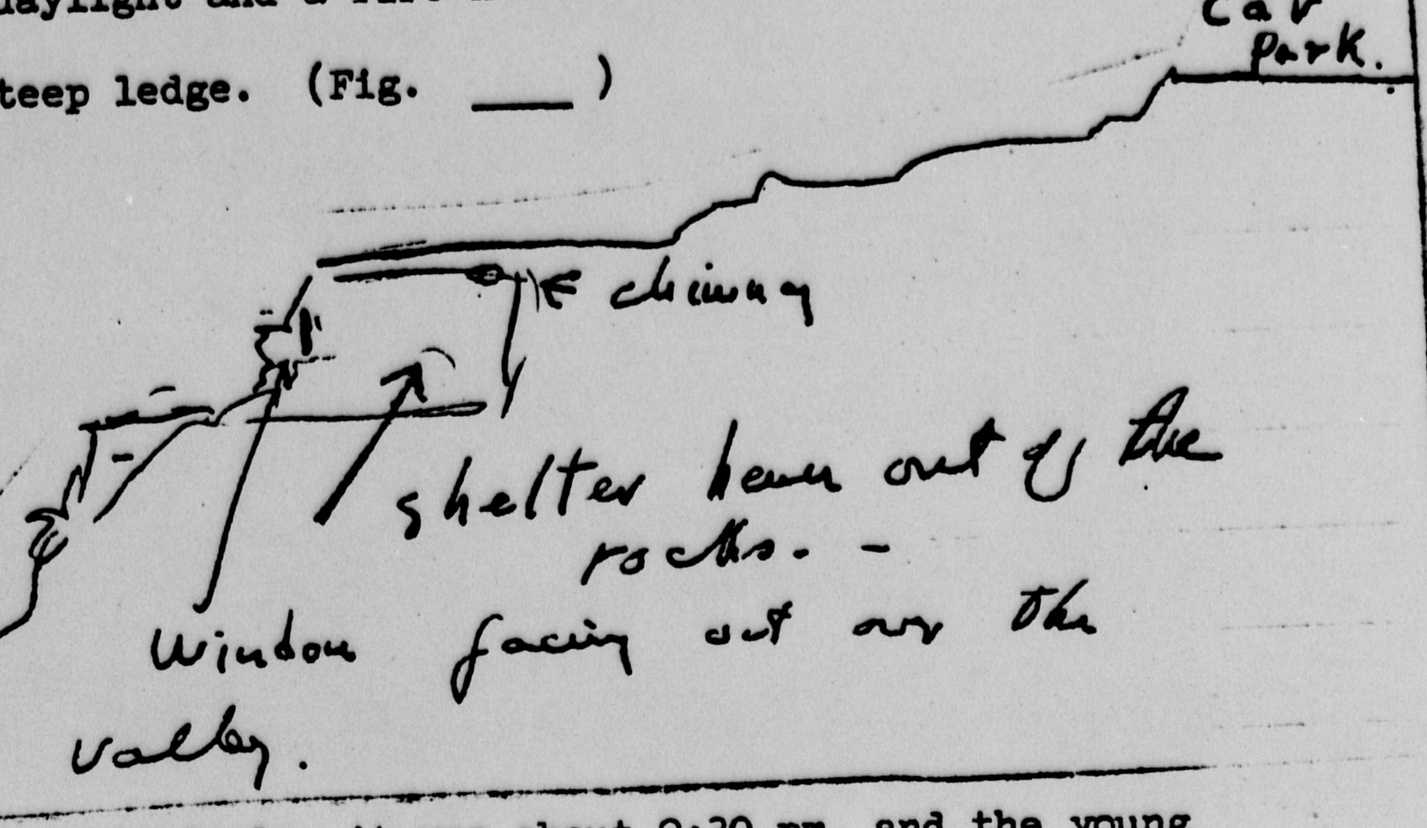

7 APRIL 1966

THE STORY

On April 7, 1966, three teen-age couples -- [redacted] and [redacted] ([redacted]) and [redacted]; and [redacted]) and [redacted]) had gone to Daneils Park, south of Denver by some 10 - 15 miles - in completely open, hilly, uninhabited territory, save for two or three houses inthe distance. The territory was strangely remminiscent of the Socorro sighting -- gullies and deep wooded valleys, but much more vegetation that New Mexico. I saw it in July. In early April the foliage would not yet have been out. No establishments

of any kind -- but power lines about ½ mile away.

The picnic started in daylight and a fire had been started in the shelter which is on the side of a steep ledge. (Fig. ____)

Things were going slow, swimmingly, it was about 9:30 pm, and the young couples were preparing to do what all young couples do on picnics - the fire had subsided somewhat and they were preparing to roast marshmellows. [redacted] and [redacted] decided to slip away for awhile and wandered out front, with the light of the fire streaming out of the window. They were about 20 - 30 feet in front of the entrance. [redacted] and [redacted], looking out at them in the dim light insist that they saw a tall figure standing close to [redacted] and [redacted]

[redacted] and [redacted] returned and reported when asked that they had seen no one out there.

About then, footsteps were heard on the roof (which is level with the terrain) and [redacted] and [redacted] went out to investigate - taking one of [redacted] crutches with him [redacted] had a broken leg). They tapped on the roof, calling out, this is us now - this is [redacted] crutch. They then went to inspect the car, suspecting possible maurauders.

During their observance, more steps were heard on the roof and those inside called out in no uncertain terms to cut out the horseplay.

Shortly after, [redacted] was sitting near fire and looking up through the chimney, when she saw a figure above them. Shortly after, [redacted] and [redacted] said they saw a huge figure of a man (presumably) about 7 ft tall and with a tight felty black garmet, like a trench coat - - but the could not see the form.

When [redacted] and [redacted] returned they were accused of the horseplay on the roof but professed complete innocence. Furthermore, neither of the two were as tall nor dressed like the figure -- which had now been seen three times.

When [redacted] and [redacted] had gone to the car, [redacted] said he felt a presence and the hair stood up o n his neck. As they approached the car, walking toward the west, they noticed two circular lights (blue and red) with white lights in the center. The white lights were going on and off at an equal rate. [redacted] thought that there might be some pranksters in a car, so [redacted] and [redacted] went off the road on the opposite side, out of sight of the "objec t". After three or four minutes, during which time they found nothing, they went back on the road to see if the "object" was coming closer, but whatever it was was gone or invisible - there were no lights or sound. At night in Daniels' Park it is possible to see lights for a great distance. At night the lads assumed the light of the "car" (they looked something like back up lights being pumped on and off) were on a levelmeadow just off the road. When they returned in daylight they noted that the lights had appeared over a very uneven gully, where no car could be expected to be.

After [redacted] and [redacted] return, and their statement that they had not been responsible for the contrary noises, near panic set in. Up to this time the conclusion was that some hoodlums were about and that some harm might come to the girls or to all of them.

Thus, just when their picnic was settling down into the cozy stage it was rudely interrupted and the whole thing called off. This one fact above I believe rules out hoax on t heir part - who breaks up a cozy three couple night time party for a hoax that can only bring ridicule to them. It of course does not rule out hoax on the part of others, but this is effectively ruled out by other factors.

The entire party rushed toward the car (a 19__ _____). Now, [redacted], trailing, noticied a light behind him in the sky. (The sky was overcast). The light moved up and down, and when it went down it went behind ridge which hid it from sight temporarily. Two other lights were observed hovering near it. This was no essentially in the opposite direction from that in which they had seen the first set of lights.

They all got into the car but before key was put into ignition lock, car shook violently from side to side several times. Got car started and backed it up away from parking space and back onto road. No other cars or people around, way before season for picnics.

Now watched lights moving -- and seemed definitely attached to some object. Alan drew the object -- After car had been backed up, several got on top of the car to watch - but [redacted] and [redacted] stayed inside -- frequently yelling out screams of ffight. They noticied one light to the left of the other three which after about fifteen minutes, moved straight toward them. It came close and stopped. This is the object Alan drew.

A red light detached itself and came around to the left and along "the trees", but above them.

It would suddenly got out, and then very suddenly flash on nearby. All during the period an all pervasive humming sound was heard. No other noise. When red light, bright, popped up, over rockky terrain, just about 20 feet

them, they thought, they wanted to get out as fast as they could.

One boy wanted to reverse, stop the car to continue watching, but the screams of the girls and the fear of the rest made [redacted] insist they get out of the place.

They noticed one light to the left of the other three which after about 15 minutes, moved straight toward them. It came close and stopped this is the object Alan drew.

They started for hom - but the car motor frequently stalled momentarily and then started on its own. The engine went on and off, as if the ignition were being turned on and off. The radio was exceedingly full of static. The ignition key was not turned - car was started by pushing down accelerator - car would suddenly start chugging along again.

Finally, two things: about a mile or so down the road toward Denver [redacted] heard the others scream and Don Yell, "God, what's going on". They saw a bright light, white, projected from above onto the road. The light on it appeared on the road was circular and of diameter equal to width of the road. The light appeared about fifty feet behind them and caught up with them in about two seconds. The beam seemed to come straight down - or thought it was a coherent beam. Alan said that he hated looking for it in his rear view mirror but did not see it because, (his opinion) the light did not seem to reflect.

The rest of the trip was uneventful. Two or three of the group developed burn - like marks on their necks and backs.

When they reported it they were at first regarded very lightly but at the Littleton Police Office, where they went immediately to report it, their story was fully regarded seriously because they had not been drinking (even beer had not been brought to the picnic) and were obviously seriously frightened.

7/Apr/66
Daniels Park Case.

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

7	4	66
Day	Month	Year

2. Time of day: 9:30 (Hour) _____ (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
b. Central
(c. Mountain)
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
(b. Standard)

4. Where were you when you saw the object?

Daniels Park	Denver	Colorado
Nearest Postal Address	City or Town	State or County

5. How long was object in sight? (Total Duration)

_____	30	_____
Hours	Minutes	Seconds

(a. Certain)
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? time first noticed until time leaving

5.2 Was object in sight continuously? Yes ✓ No ____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. Bright
b. Cloudy	(b. Cloudy)

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM
FTD OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object: Light was larger than star at 400 yds. Ship was comparable to a searchlight in size + brightness

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other _____

13. Did the object: objects (Circle One for each question)

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

There was more than one object

14. Did the object disappear while you were watching it? If so, how?

one object appeared approximately 100 yds. directly in front of us.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): (Yes) No Don't Know. IF you answered YES, then tell what it moved behind: a ridge east of us

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: _____

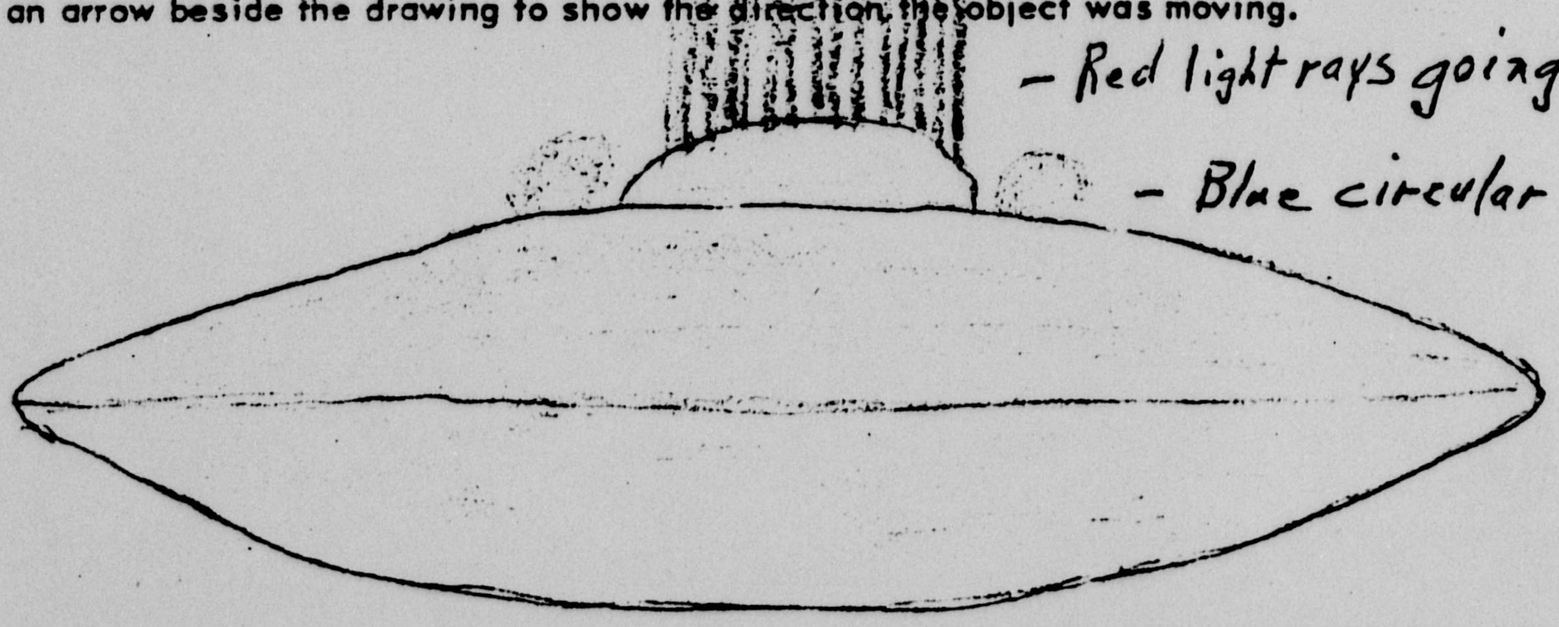

17. Tell in a few words the following things about the object:

a. Sound a wind humming, pulsating noise, I never heard it before

b. Color dark gray but distinct outline

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? A very minimal amount. The object was in front of us on the ground. The object, as a guess, was 15 ft across. ←15→ ✓

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 50 ~~yds~~ yds at closest position

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
c. Outdoors
d. ~~In~~ an airplane (type)
e. At sea
f. Other used auto to sit on and leave

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
(e. South)
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? 35 miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) (Yes) No

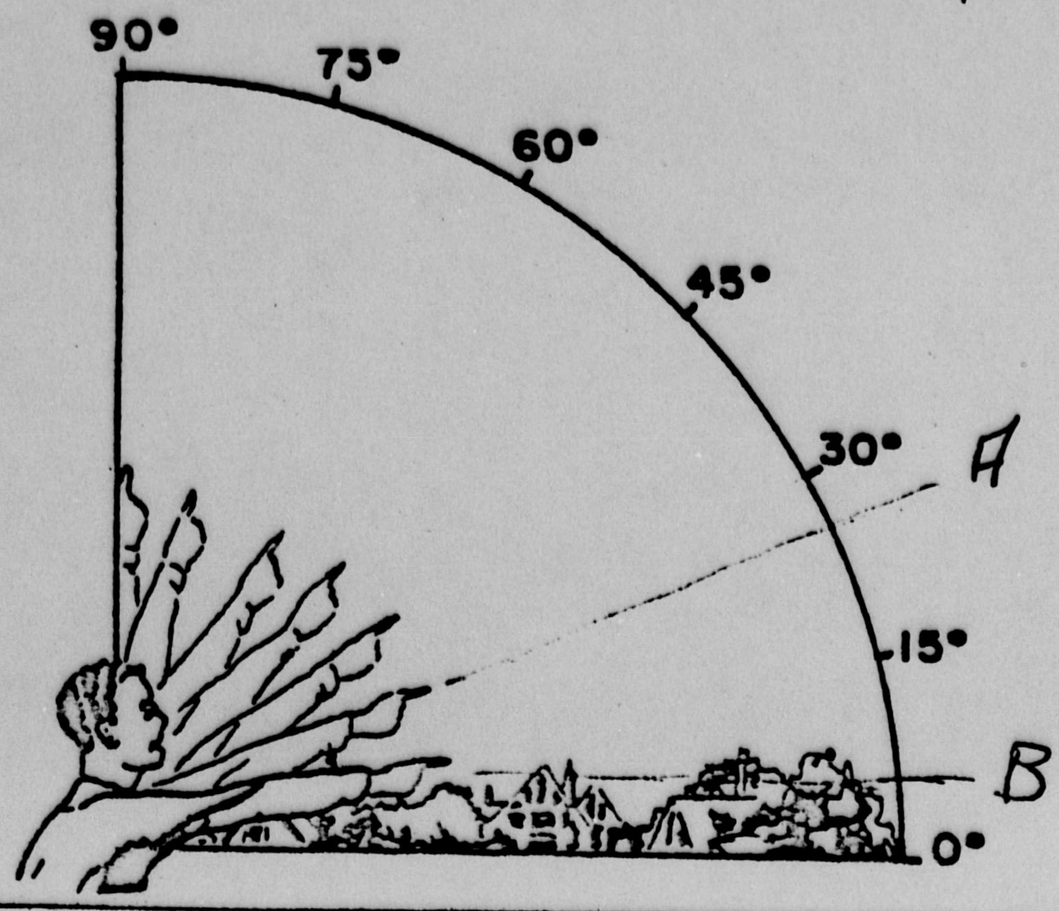

25. Did you observe the object through any of the following?

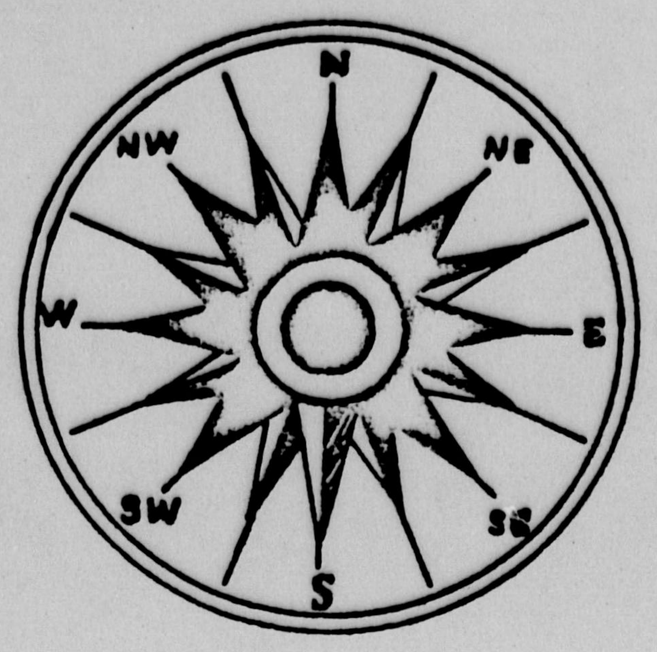

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

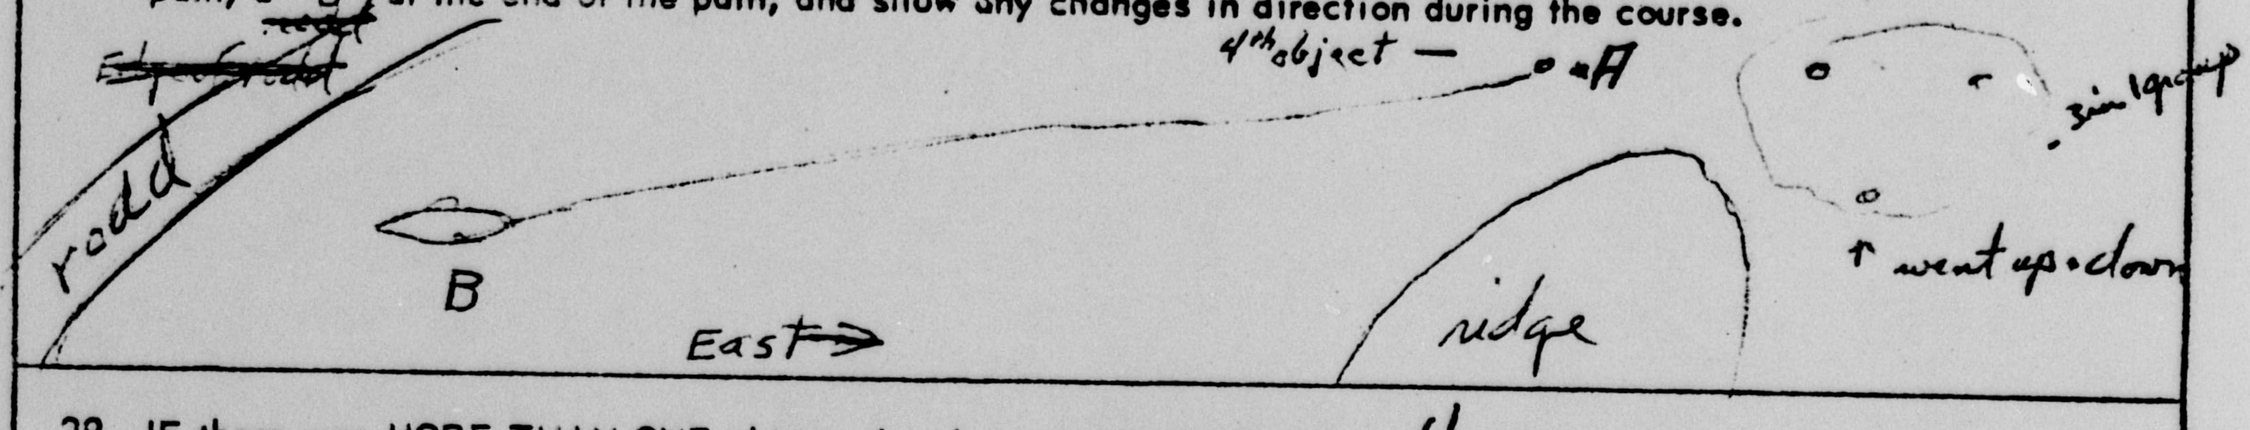

We saw the object clearly in front of us, on the ground.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

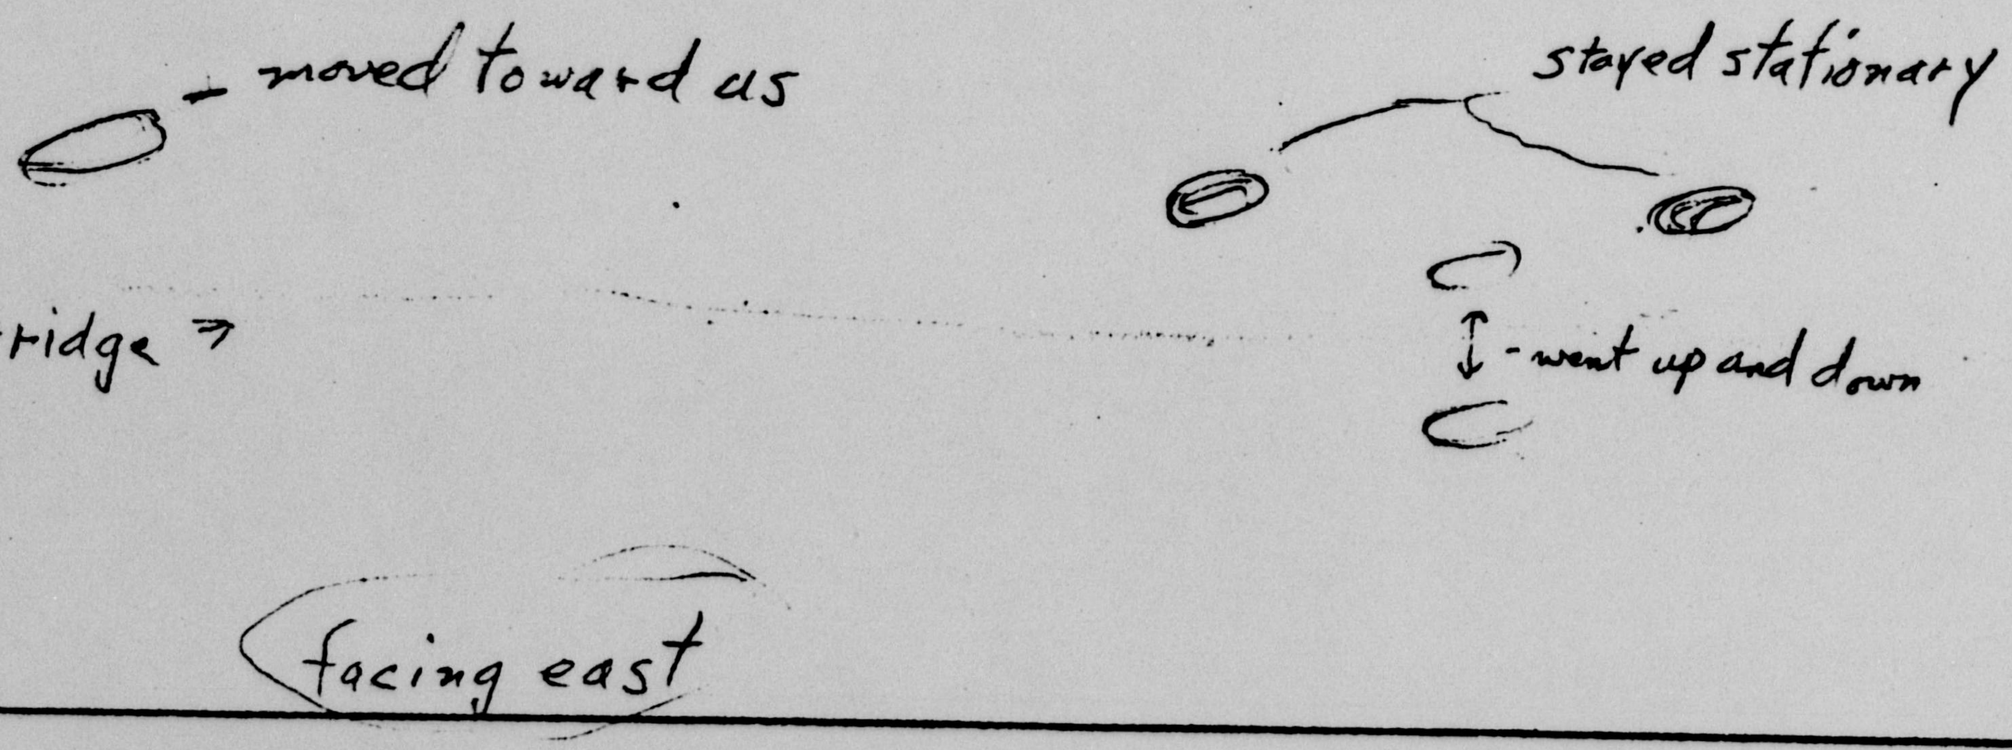

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? 4
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes No

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

[redacted]

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted] (Street) Denver (City) 80206 (Zone) Colo. (State)

TELEPHONE NUMBER [redacted] AGE 17 SEX Male

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I have no police record. I have a low Baverage in school.

33. When and to whom did you report that you had seen the object?

7 (Day) April (Month) 66 (Year) Police Chief MacIvor Littleton Police Dept.

34. Date you completed this questionnaire: 7 (Day) June (Month) 66 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

~~We went on a picnic to Daniel's Park in the afternoon. After we had eaten (approxamately 9:00) we heard footsteps on the shelter, Don and I went to chek it out~~ My typing leaves much to be desired.

[redacted] and I went out to try and see what was going on. We heard steps, but saw nothing. I wanted to make sure the car was all right, so [redacted] and I went up to the road to check it. We faced west walking toward the car, and noticed two circular lights with white lights in the center. The white lights were going on and off at an equal rate. I thought it might be some pranksters in a car, so we went to the opposite side of the road to see what would happen. After 3 or 4 minutes, when we had heard nothing, we went back onto the road to see if the object was coming, or what, but it was gone, no sound, no lights, nothing. At night in Daniels' Park one can see for lights miles in either direction on the road, but the lights were gone.

When [redacted] and I returned to the shelter house, two girls, [redacted] and [redacted], said they saw a huge figure of a man. About 7 ft. tall and with a tight fitting black garment, like a trenchcoat, they could not see the face. The figure was seen in front of the window and through the chimney (a hole in the roof). We were all scared so we decided to leave. We walked to the car and Don noticed a light behind him in the sky. We all turned and saw it. The light moved up and down (when it went down it was behind a ridge which made it out of sight) and we noticed two others hovering near it. I moved the car back so we could watch. We then noticed one light to the left of the other three, which, after about 15 minutes, moved straight toward

us. It came close and stopped. (I drew it under question #19) Then we decided to leave and my car didn't operate right. The radio played static, and the engine went on and off, as if I were turning the ignition on and off. All at once I heard the others scream and [redacted] go "God, what's going on". (diameter the size of the width of the road)

They saw a circular light, projected from above, on the road behind us. They say it appeared about 50 ft. behind us and caught up in about 2 seconds. I was driving and looked in the rear view mirror, and the light did not reflect!

As we progressed out of the area the car and radio worked fine, and all was normal. That is what I and the others witnessed.

[redacted]

14. APPROVING AUTHORITY:

15. SUMMARY: On 8 April 1966, an unidentified object was reported over the city of Rivera, Uruguay. According to reports of the many citizens who viewed the object, it remained in the vicinity of Rivera for approximately 1 hour 40 minutes beginning at about 3:00 A.M. A radio announcer from International radio of Rivera by the name of Duarte, viewed the object, and reported his views over the radio. The object was spherical, changing color constantly, could hover in one spot for long periods of time, and when it moved left a brilliant glow in its wake.

COMMENT: This is just one of several reports of unidentified flying objects that occassionally appear in the press.

REPLY TO ATTN OF: ROBO

11 April 1966

SUBJECT: Information Concerning UFO Sighting on 9 April 1966

TO: Foreign Technology Div (TDEW/UFO)
AFSC, Wright-Patterson AFB, Ohio 45433

1. A sighting was made by a civilian at approximately 2000 hours EST on the 9th of April 1966. The sighting was made approximately six miles south of Griffiss Air Force Base. It had typical aircraft lighting and movement.

2. This sighting was determined to be a departing C-124 aircraft from Griffiss Air Force Base.
