To whom this may concern,

On Friday April 8, 1966 a strange U.F.O. was spotted in Ellenville, New York, and was witnessed by four people. It was first spotted over a mountain and slowly descended out of sight at the base of the mountain.

It was a very strange transparent sort of shaped like a space ship. It was as long as a quarter of the mountain.

This was the first time that the incident was witnessed by [REDACTED]

It was first noticed from the third floor of the American Legion on the east side. We may as well be honest about it and tell you that it was not multi-colored like all those other ores spotted, it was an off colored white or yellow. You may not be interested in this but we thought it only right to report it.

Two Images

This high-contrast, black-and-white image depicts a series of dark, horizontal bands against a light background. The top band is the most prominent, appearing as a thick, solid black line. Below it, there is a thinner, more irregular band with some internal texture. A third, very dark band is visible in the middle ground. The bottom band is the most irregular and fragmented, with several distinct dark shapes and some lighter, textured areas. The overall effect is reminiscent of a film scratch or a heavily processed photograph of a textured surface.
