UFO

Relayed by the Duty Officer at Willow Grove
Naval Station on 3 Aug 66

Sighting made by Mrs. [REDACTED]

Philadelphia, Penn 19148

Description: seemed to be as bright as
a star, stationary at first then moved NE
until out of sight, observed to approximately
10 minutes, 6 witnesses, sighting at
0315 Z.

Send 144

Willow Grove duty officer was advised that
sighting should be reported iaw. AFR 200-2
but his instructions were to report
by telephone to us so I accepted the
info.

Mrs. [REDACTED]

[REDACTED]
Philadelphia, Pennsylvania 19148

Dear Mrs. [REDACTED]

Reference your unidentified observation of 3 August 1966. The information which we have received is not sufficient for evaluation. Request you complete the attached FTD Form 164 and return it in the envelope provided.

We wish to thank you for reporting your observation to the Air Force.

Sincerely,

HECTOR QUINTANILLA, Jr. Major, USAF
Chief, Project Blue Book

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

The only object in comparison is a star's brightness.

12. The edges of the object were:

(Circle One):

- a. Fuzzy or blurred
- b. Like a bright star
- c. Sharply outlined
- d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time? Yes No Don't know
- b. Suddenly speed up and rush away at any time? Yes No Don't know
- c. Break up into parts or explode? Yes No Don't know
- d. Give off smoke? Yes No Don't know
- e. Change brightness? Yes No Don't know
- f. Change shape? Yes No Don't know
- g. Flash or flicker? Yes No Don't know
- h. Disappear and reappear? Yes No Don't know

14. Did the object disappear while you were watching it? If so, how?

It disappeared ~~only~~ when it was out of range to be seen in a city street.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what in front of: or on the side of stars in passing across the sky.

17. Tell in a few words the following things about the object:

a. Sound no sound, it was too high to be heard.
 b. Color the same color as the stars, whitish silver?

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

I find it very hard to try to draw the object because it looked like a star. How would a star be considered this shape  or this shape  by the naked eye? It was moving north east in the sky.

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

IF you answered YES, then what speed would you estimate?

as fast as a long flying jet, yet it was higher than any jet could fly, so the speed was considerable.

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

IF you answered YES, then how far away would you say it was? *as high as the stars.*

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

23. Were you (Circle One)

a. In the business section of a city?

b. In the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

e. Binoculars

Yes

No

b. Sun glasses

Yes

No

f. Telescope

Yes

No

c. Windshield

Yes

No

g. Theodolite

Yes

No

d. Window glass

Yes

No

h. Other *naked eye*

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

[Redacted]

[Redacted] To a star twinkling

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

yes. 1959 I saw many flying or moving across the sky in a definite pattern. One would move, pass another and both would move then goes another one would stop and a new one take its place in a definite formation.

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes No

31.1 IF you answered YES, did they see the object too? (Circle One)

Yes No

31.2 Please list their names and addresses:

I don't have their permission as they would like to be unconcerned parties, but I can give you one name & address. mrs. [REDACTED]
2621 [REDACTED]
Blala Pa. 19148 There were 6 other people who would rather be anonymous

32. Please give the following information about yourself:

NAME

Last Name

First Name

Middle Name

ADDRESS

Street

City

Zone

State

TELEPHONE NUMBER

AGE 27

SEX Female

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

3

August

1966

Year

Day

The air force and I spoke by telephone to the officer of the day Major [REDACTED].

Forgive me but I forgot the major's name.

34. Date you completed this questionnaire:

11 August 1966

Day

Month

Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I feel my answers to this questionnaire are not too clear so I'll try to explain here. I was sitting on the steps when looked up and saw a very bright star sparkling what seemed to be silver and a very faint red. I started talking to my friends and when I looked up again I saw a moving object or what seemed to be a star moving across the sky and I informed all who were around me of my sighting and asked them to watch because I had seen this phenomena many times before and no one believed me. They all believed once they saw it themselves and agreed it was not an airplane or anything they had ever experienced seeing before. The moving object crossed over our street from one end to the other in a north east direction until it went over the roof tops and out of our vision. I still do not know if it was the sparkling silver and red star I saw in the beginning that started and moved because I looked down from the sky about 10 minutes before. I looked up again and saw the moving object. I looked again for the sparkling star after the moving object went out of sight, but the stars by that time were in a different position and I never could locate the sparkling star or object I had first seen again.

In further explanation to question 30.

I was on the 3rd floor of my apartment when my husband and his friends called for me to come out on the flat to see the stars moving in formation. This night many different objects that seemed to be stars were moving in formation, they would pass a stationary object and that would move and one that was moving would stop and a new one would take its place in formation. We all knew no jets or planes or satellites or anything we knew or heard of could move at such speed and then suddenly stop, neither could a stationary object begin to move at such speed from the spot it was stationed at. I called the International Airport in Plaza by phone, they referred me to someone else who referred me to someone else etc. until I became disheartened and gave up my efforts to report my sightings to anyone because no one seemed to want to be burdened with my information. On various occasions since then I have observed similar happenings. One was about two years ago, another last year, and the one I have notified the Air Force about on August 3, 1966, and this is the first time I have gotten any reaction to my information. I thank you for taking out the time to concern yourself with me and for not scoffing at the unexplainable. Please inform me if you do know what my phenomena are, I would be very happy to know what exactly could be ~~such~~ ^{such} marvelous things and are they anything of this planet?
