PROJECT 10073 RECORD

1. DATE - TIME GROUP 29 August 66 19/2250Z	2. LOCATION Donnybrook, North Dakota (1 Witness)
3. SOURCE Civilian	10. CONCLUSION UNIDENTIFIED Jpt
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 5 Minutes	11. BRIEF SUMMARY AND ANALYSIS Observer watched a white, silvery, aluminum colored object move across the valley, coming from the SE. At first bright flashes in the clouds were noticed then after observer got further down the road he observed the round disc with a dome top. Object moved across the valley, hovered over a reservoir, flattened out and then appeared to land in a small field. Object disappeared into the clouds very rapidly. No radar returns of the alleged object. No information available to place a known object in the area.
6. TYPE OF OBSERVATION Ground-Visual	
7. COURSE N/A	
8. PHOTOS X Yes (IN FILE) No	
9. PHYSICAL EVIDENCE ☐ Yes XX No

REPLY TO
ATTN OF: BDO

SUBJECT: UFO Report

TO: AFSC (FTD)
Wright-Patterson AFB, Ohio 45433

In accordance with AFR 200-2 as changed, the following information is submitted:

a. Description of object:

(1) Shape: Round disc (with dome top).

(2) Size: Approximately 30 ft in diameter and 15 ft high. (See attached drawing) Atch 5.

(3) Color: White, silvery, aluminum color.

(4) Number: One (1).

(5) Formation: N/A.

(6) Object was tilted on its side and a large dark spot noticed in the center with 3 smaller spots around the larger one forming a triangle.

(7) None.

(8) When object departed there was a rushing air sound. Mr Flickinger was in radio contact with his office when the sightings occurred, as the object came close to his position, static blocked out his radio. As it departed static dissappeared.

(9) None.

b. Description of course of object(s):

(1) Noticed bright flashes in the clouds and started looking in that direction.

(2) About 10° angle, in a valley, below the horizon of the hills beyond.

(3) About a 45° angle into the clouds.

(4) Flight path and maneuvers of object: See Atch 4.

(5) Rapidly at a 45° angle into the clouds.

(6) Five (5) Minutes.

c. Manner of observation:

(1) Ground Visual.

(2) None.

(3) N/A.

d. Time and date of sighting:

(1) 19/2250Z Aug 1966. 5 pm local

(2) Day.

e. One (1) mile north of Donnybrook, NDak, on U.S. Highway 52.

f. Identifying information on observer(s):

(1) [redacted] N.W., Minot, NDak., [redacted], works for the U.S. Border Patrol (Work Phone area code 701 [redacted].

83-

(2) N/A.

g. Weather and Winds:

(1) Cloudy and windy with small areas of blue sky showing.

(2) Weather from forecaster: The following weather information is needed for a report of an Unidentified flying Object (UFO) sighted: Donnybrook, NDak., on 19 Aug 1966 at 1650CST.

a. WIND

	DIRECTION/VELOCITY
Surface	100/10 & 13 knots
6000 ft	130/10
10000 ft	270/10
16000 ft	290/20
20000 ft	270/30
30000 ft	250/60
50000 ft	270/40
80000 ft	090/18

b. Ceiling: 50 ∅/⊕.

c. Visibility: 15+ miles.

d. Amount of cloud cover: 10/10.

e. Thunderstorms in area and quadrant in which located:

None.

f. Vertical temperature gradient: -3°/1000 ft.

h. Any other unusual activity or condition: None.

i. Interception or identification action taken: None.

j. Location, approximate altitude, and general direction of:

(Air traffic or balloon releases): None.

k. Position title and comments of the preparing officer:

CHESTER A. SHAW, Jr., Major, USAF, Base Director of Operations. Comments: On 23 Aug 1966, [redacted] was interviewed and the area where the UFO was sighted was observed. [redacted] appeared to be a down to earth and practical individual not inclined to be excitable or the type to relate wild stories. He was not seeking publicity as he stated that if his sighting was publicized, he would deny any knowledge of the occurrence. In observing the area nothing definite could be established beyond the fact that there were two (2) sets of three (3) each depressions in the shape of a triangle. Spacing between depressions in each set varied, from approximately 9½ to 12½ feet. In a swath down the hillside from these depressions approximately ten (10) rocks had been displaced from their resting place (rocks varied in size from approximately 12 inches and weighing ten (10) pounds). Personnel who have observed the pictures of the area and are familiar with wild game indicated that grouse (common in this area) make similiar depressions in their nesting. It is also thought that coyote and badgers over turn rocks in the manner observed. Observations of [redacted] cannot be discounted however, it is felt that the physical evidence observed (i.e., depressions and over turned rocks) are probably due to animal wild life.

l. Existence of physical evidence: See Atch 3.

CHESTER A. SHAW, Jr., Major, USAF
Base Director of Operations

When first sighted, object was on its edge floating down side of hill wobbling from side to side about 10 feet from the ground. When it reached the valley floor it climbed to about 100 feet, still tilted on its edge, and moved across the valley to a small reservior. Over the reservior it flattened out and I noticed the dome on top. It hovered over the water for about 1 minute and then moved to a small field. At this point it settled toward the ground and appeared to be landing. It did not touch the ground but hovered about 10 feet above and about 250 feet from where I stood beside my car. It slowly tilted back on edge and dissappeared rapidly into the clouds.

[redacted] made the above drawing of the UFO he observed.

ATCH #4

31 August 66

Conversation with Major Shaw, Minot AFB, Ohio revealed that there were no radar returns from the alleged UFO.

No additional information has been obtained on the sighting. Major Shaw feel that the individual definitely saw something most unusual. Witness seems very stable.

Had taken a pressure to
Canada.
Fine natural flash - patch of
fleecy sky
but almost entirely
cloudy
looked for motorists
Stopped car
