Dear Sir:

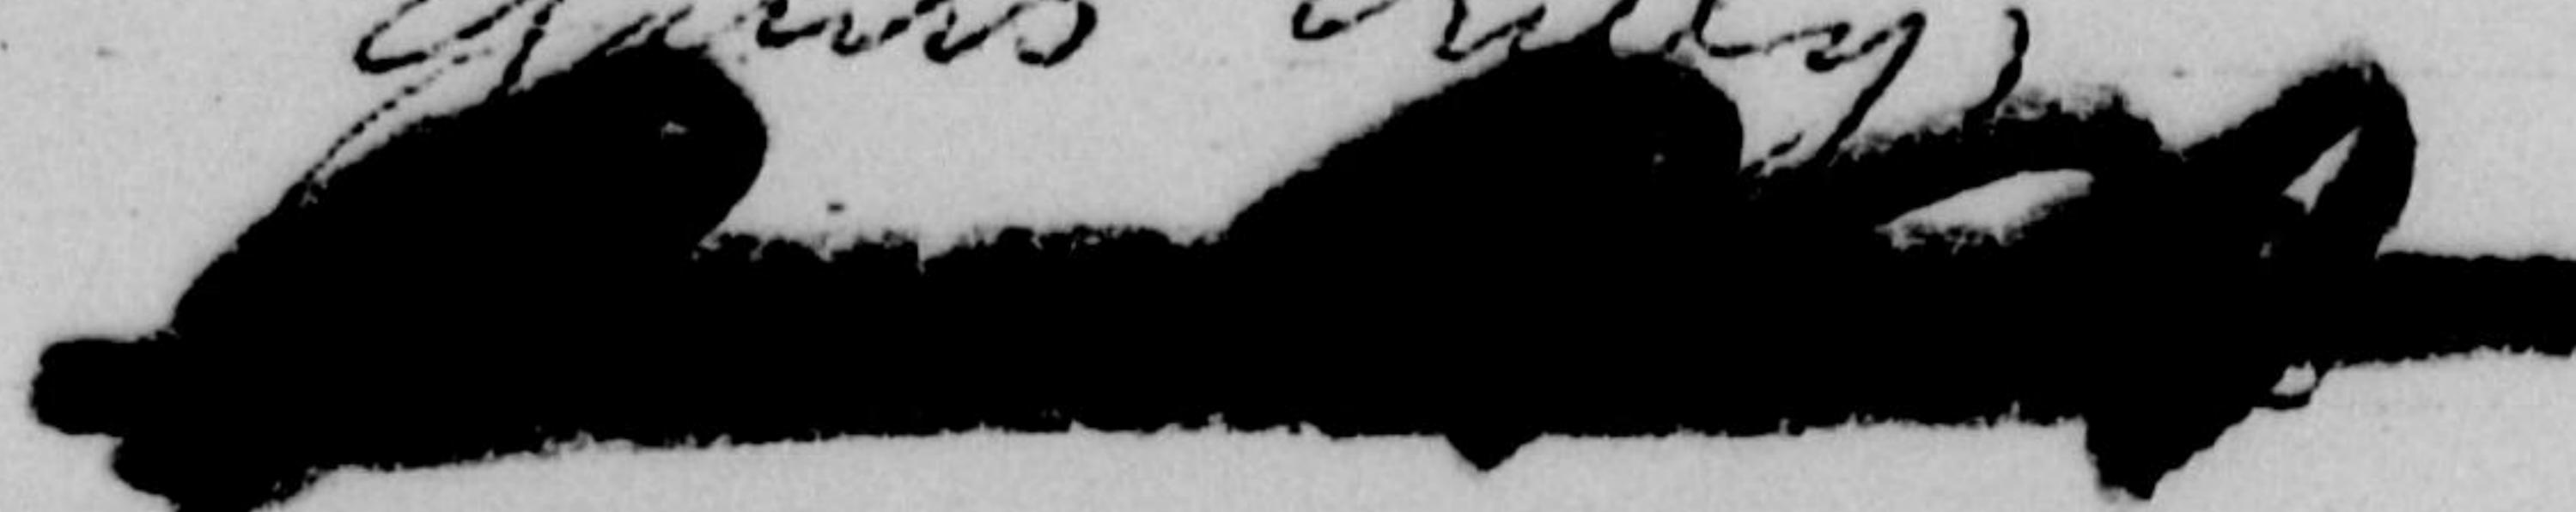

Serial 164

Last Saturday morning, September 17, I saw something in the sky between 4 and 4:30 A.M. I haven't reported it sooner, because I figured Air Force Radar or something would pick up anything strange. I just heard over the Radio that a number of persons in the Midwest reported seeing an object in the sky early this morning. I'm very much interested in and hope to work on the Space program. So this, naturally, interests me. I realize much of your information must be classified, but could you tell me anything at all about this particular "UFO"? The object I saw looked like a star, except it didn't "twinkle". At first I thought it was a falling star, but there was no tail or streak or anything. It "flew" downwards

and then seemed to hover at one point for about a minute, definately not more than 2 minutes. Then it blinked on & off a few times and "flew" sideways behind a tree. I couldn't see it anymore.

Thank you very much.

Yours truly,

A large, solid black rectangular redaction box covers the signature.

Contact with WP Base Operations revealed that several aircraft were in the area on the morning of 17 Sept. 66. At 0343 EST a DC-6 landed at the field. There was a B 52 that landed at 0305 EST and another that landed at 0505 EST. A KC-135 landed at approximately 0645 EST.

After long trips sometimes these aircraft(B-52) make several low level runs prior to actual landing. Other times these aircraft just fly around the area for an hour or so making low level runs. ~~-Although-it-is-not-positively-an-B-52-aircraft-that-the-witness-~~
