During the more than 20 years I spent in the AF under my various aeronautical qualifications I have never observed anything of this nature. I have flown most everything from a a Piper J-3 to jet fighters. The Aurora Borealis is no stranger to me after flying in Canada and Alaska. In over 100 combat missions in Korea, flying the Atlantic, etc., I've seen many windshield reflections. I've also observed Radiosonde balloons.

But this, particularly considering my wifes qualifications and conformation, is without precedent in our experience.
In conclusion let me say that I must apologize for not having replied to your request for information sooner.

Major Quintanilla I must add that I do believe in UFOs - or some logical explanation of the many observations - other than "swamp gas." This is my first and only report, but I would hasten to assure you that, whatever I may personally believe, it has not been influenced by that. I've been through enough de-briefings not to try, or want, to "snow" anyone.
