Dear Sir

On October 7, 1966, between the hour of 8:10 P.M and 8:45 P.M. [redacted], and my self [redacted] saw what we belive to be a U.F.O., we followed it from a pair of field glasses, it was traveling from a Southeasterly direction to the East, it traveled across the sky in about 10 seconds, at first the only thing we saw, was a light, blinking off and on rapidly, then it went out of sight behind some hills. We went to a neighbors house, ask to use the phone, to report it, but they just laughed. Then discouraged, we went outside, and saw it again, It went Southeastly then went back to the middle of the sky. It stop, it move toward us, then zig-zaged ~~it~~ left to right, then it move toward the east. Then a red object appeared moving very fast away from the blinking object. We looked at it closely, and a red green, and yellow lights sort of rotating around the middle of it. Then as the object stop it had a white flash of light comming from it. About five minutes later, we looked to the Southwest, and saw it again. it move up the down, the to the west and that was the last we saw of it.

Sincerely yours,
