

PROJECT 10073 RECORD

1. DATE - TIME GROUP 8 Oct. 66 2350Z	2. LOCATION East Dennis, Massachusetts	one witness
3. SOURCE Civilian	10. CONCLUSION Other (Electrically charged corona) <i>Because of observer poss. seeing of value, can should be followed up. J. B. G.</i>	
4. NUMBER OF OBJECTS One		
5. LENGTH OF OBSERVATION 30-40 seconds	11. BRIEF SUMMARY AND ANALYSIS The object was of a spherical shape being about 2 feet in diameter. The object was compared to that of a mercury light in color with a brightness of approximately $20-30 \times 10^3$ Lumens. A nearby swamp area was lit up by the object. The observer was in a hydraulic basket lift 30 feet above the ground checking a power transformer. The object appeared to be about 50-60 feet above the ground and about 100 yards away. The investigating official stated that the object was observed in the area of a power transmission line. Considering the area being in close proximity to salt water and the description and characteristics are consistent with those reported for electrically charged corona, such is a possible and probable explanation.	
6. TYPE OF OBSERVATION Ground Visual		
7. COURSE Stationary		
8. PHOTOS <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		
9. PHYSICAL EVIDENCE <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
