d. Sore spot on observer's neck, (claimed as a radiation burn). Spot was observed by the investigator. The spot was on the nape of the neck at the collar line. It appeared the size and shape of a man's thumbprint. At the time of observance there was no evidence of an open sore. The spot appeared to be a large pimple or small boil that had no core and appeared to be in the healing stage.

e. Landing Site. An investigation of the alleged landing site was conducted in the presence of the observer. No physical evidence of landing was noticed; no marks on the ground, no burned areas or any sign of disturbance. Survey of the area with an AN/PDR-27 Radiac Instrument produced only normal radiation background indication.

f. Observer Statement: The observer's personal written statement (Atch #1) and drawing of the UFO (Atch #2) are attached. His initial formal report is also attached (Atch #3).

14. This report has been delayed in the hope that further proof might be advanced by the observer either to verify or, inadvertantly, to negate his earlier statements. During several telephonic discussions since the initial visit and inquiries, nothing further has been offered that can prove or disprove the validity of his statements.

15. Conclusions: It is the undersigned's opinion that:

a. The story is too pat, well remembered, and systematically presented to have actually occurred to a scared 14 year old boy;

b. Some incident did occur on that evening that was not fully understood by Timothy, he was worried about it, either because of his own implication or implied danger to himself and he developed the story as an excuse;

c. The possibility of a deliberate hoax cannot be definitely eliminated although the observer's continued interest and his forthright attitude do tend to show an innocent motivation; and finally;

d. The lack of physical evidence and absence of further reports from other individuals in this rather populous area tend to belie his statements.

I have written a short narration of my experiences ~~and~~ including sightings, landing, inhabitants, interlude with inhabitants, strange meeting with other person, strange material sphere, seemingly known wave transfer, speech, tings + pictures. It includes most information I could give. Also the fact that they looked almost identical to humans except for mark, hands and features of face.

Feb. 5, 1967 (Time - almost dark or at night, between 8 o'clock + 10:00 o'clock. place - On a gravel walkway on small field with a sort of pond. Across from the Avery Elementary School) I was returning home after going to a friends house, and bowling at Sierra Grande was at the time walking home between the Millard Fairgrounds and my house. It was very cold outside and I wasn't really watching what was going on around me. While I was walking home I heard something (this not but I think it was a dog) that made me suddenly look around I kept on going for a few seconds and I then heard a faintly piercing sound (like that of a police car but higher in pitch). When the sound became louder I looked both ways down the road for a police car or something to that effect. Before this I had always been interested in space and I held and now more than ever, held a strong belief that there are beings from other planets and that they have both landed & tried to make contact with the earth. I am not a saucer nut and I don't believe in every saucer sighting there has been. Well as I was telling you before my interruption of the main story I was looking to see if there was a police car around. At this time I could hear nothing else but that strange high pitched noise. It began to hurt my ears, when I got the urge to look in the sky. I'd say about 100 to 200 ft. above me was large oval shaped thing that I know now was probably the bottom of it. On it were three distinct markings that looked like three rectangles (wider at end than the other.) Below is a crude sketch of what I think was the bottom of the craft.)

Picture A1.

It's bottom had no lights that I could see, but was ~~in~~ platinum in color and seemed to glow a little. I guess I just stood there in a daze

of curiosity until it passed over me. After it had moved for a few seconds it would see what looked like the back of it. Below is another sketch of what I believe to be the back.

Picture A2.

On the back it had two lights on the upper third. It also had dim yellowish lights (rectangular in shape) in the middle portion. These dimmer lights seemed to follow a pattern, that is when one would go off the next would go on. (The pattern was rotated very quickly)

Picture A3.

The craft was descending constantly lower and I just stood there and watched it. Then after it had passed over the school its piercing vibrations of sound stopped slowly and then dwindled in a low pitch hum. I suddenly got the urge to run after it and I did so. It seemed to be looking for a certain place to set down and by this time I was hiding behind part of the wall at the school. I think it was the left wing. (It seemed at that particular moment no cars came past me or were on the road. The I now think was unusual) It moved on, about 150 ft. (estimated of course) from the ground and I followed it until I was off the school property. Between the fields there are narrow borders of various sized trees which I hid in, and went along while following the object. I am not exactly sure where it was that it landed but I think in the second of three fields connecting from Avery Road to the Railroad Tracks a distance from the school.

Until about 30 ft. from the ground. Then three very sturdy looking tripod like legs came out from the bottom of the craft and put it in position. Then it sat down slowly with a slight clunk which I could barely hear.

Sketch A4.

Above is a sketch of what the legs of the craft appeared to look like.

There was no blast of fire but the lights encircling the craft were now very brightly shining. The steady beam of the craft stopped abruptly but the lights dimmed just a little bit. At the time I was so overcome that I didn't know if I was sitting or standing or lying at the time. I kept telling myself to be calm + not to panic when from the middle of the craft a large shaft-like thing protruded from the bottom until it reached the surface. It was lit up and had what looked like a hexagon shaped door. Below is the sketch of it.

Sketch A5.

It was rectangle shape with rounded edges.

Door or Hatch

Turn to

After watching it (I don't know how long).
 for a while the door on the shaft went upwards until
 it was above the doorway. It showed another doorway
 in two sections and after a second or two it parted and
 disappeared into the wall. Out from it came three
 or four man like beings, who walked with a
 slight hump or strange walk not much different
 than our own. I could see what they looked like
 clearly because of the bright light. They were,
 I'd say, about 6 feet tall. Their build was the same
 as ours except for a probable differentiation in
 bone structure. They had slight seemingly
 identical heads and had what seemed to be
 a smaller neck for their size. They wore long
 robe-like garments and had a triangular black
 shaped insignia on the front of it (on the
 part of the garment). They looked almost identically
 the same as humans despite for those questions also

After looking around for awhile they all looked
 at each other and without any exchange of word
 quickly entered the shaft again. The doors
 and the shaft went back up into the craft. I was
 to pass but my curiosity got the best of me and I stood
 behind the trees + brush. Though they didn't move
 their lips I heard them talking. I am not sure of
 what this meant but I think an advanced
 wave transfer from one brain to the others seems
 probable to me. But what is more puzzling is
 that I could hear what they were saying. It
 seems that the brainwave transfer between
 those beings affected me also. Though the
 language was different and had a garbled tone
 I seemed I could understand ~~some~~ a little
 of what they were saying. (Most of what they were
 saying was a quick garbled noise)

After a period I don't know how long the

Except that this time each of them was holding a couple of sphere-like objects. This time there were five or six of them and they surrounded the craft. Then they placed the spheres in what looked like a circular pattern. They were about a foot in diameter and platinum in color. The most amazing thing about them was that they seemed to defy the law of gravity. The beings simply put them in a certain place and they stayed, not moving an inch. Now I was shivering not only from the cold but also from my brain. I was on the verge of panic but I kept telling myself to be calm. Then I heard the noise of crunching ice and thought at first it was help. I wanted to yield out to whoever it was but I'm glad I didn't. Out of the partially-lighted field came a man dressed in what looked like hunting clothes. He walked up to one of them and started to talk to him. 2 others went over also and I think 3 others guarded the area. This time it was different. These beings were talking with their lips & vocal chords. I could see their mouths move and barely heard part of what the outsider said. After a very short time of a minute or more he left. I watched him till he was out of sight and then turned my concentration back to the space craft. Why did that man contact them and did he say I will not discuss with anyone except what officials with authority.

As I was watching them I must ^{have} made a sound that caught their attention (though I don't remember any sound I made other than a steady shivering). One of them looked at another and pointed near to where I was. I jumped up on an impulse and began to run but every step I made it seemed I would fall down. Almost as quickly as I had started, one of them had grabbed my by part of the neck. (I later discovered that where I was standing there was a very low wall.)

It started to bring me back to the ship and
 I remember coughing a few times to try to breathe.
 At the same time I felt a vibrating ache in
 the area of the upper part of the back of my
 neck. I remember struggling to get free but
 it was to no avail. (The beings' hands felt cold
 and clammy) It had dragged me almost all the way
 to the space craft when another came to help.
 Then I noticed their hands. Their joints in the
 phalanges were shaped differently and these joints
 had a peculiar effect on me. Just as the other
 one was about to help they looked at each other
 & dropped me in the snow. I was more agast
 at this than anything else that had happened.
 They could do anything they wished with me but
 they just dropped me. After dropping me they
 hurried into the shaft and ascended to the
 inside of the craft. Tripped by panic I picked
 myself up and ran in a direction I still do not
 know. After a few seconds of running I came back
 to my senses and ran home as fast as I could.
 Almost home I stopped running and caught my
 breath until I was able to breathe almost normally.
 Then I entered the house and went into the kitchen
 and almost fainted. For a reason, probably curiosity,
 I went back. When I arrived at the spot the beings
 were hurriedly collecting the spherical objects and
 then entered the rectangular shaft. Almost as soon
 as the shaft had disappeared into the craft a hum
 started. The lights that were very dim then
 were now brightly shining and the pitch of the
 hum was ascending rapidly. The craft ascended
 a little, and the tripod-like legs slowly disappeared
 into the bottom. Then it rose about 200 ft.
 above the ground and quickly went out of sight
 moving ~~down~~ as fast as it had come. Then
 I walked home (ran part of the way) and didn't
 get hardly any sleep that night. That was
