35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

On the evening of February 12th, [REDACTED]
and I walked out on the fire escape of the building where I
work. Something very bright caught our eye and we looked
up and saw what I have described in the form. We looked
at it for about 30 seconds to one minute. There were about
the rest of the guys from my section to all of it. It changed
from two overlapping tall lights to one about like Venus,
and it started moving away very quickly, while doing so
made many different movements and zig zags until it
was out of sight. When I first saw the object it was
first straight up and stopped a moving very very
slowly. We could tell very easily that it was
varying its speed.

I swear that the above is true to the most
extent that I can from my own two eyes.
