MEMO for the Record: 8 March 67

Contact with WP AFB, Base Operations revealed that there was an aircraft flying around the north Dayton area on the day in question. The aircraft was not from WP as far as the base ops personnel know. The aircraft was testing aircraft lighting and was a most unusual thing to observe. A local company that makes aircraft lighting tests similar configurations on different aircraft. These configurations have been responsible for numerous UFO reports. The exact company was not known. Base personnel said that they felt that this aircraft was responsible for the sighting.

As we were traveling East on Strip road approaching a shipping crate we saw the object over the area. Immediately we were concerned about what it was We stopped briefly to make a legal stand at the back and the object was lost of our sight about five to four minutes. It appeared to be in the same position as we entered Strip road. Hawes and me moved down Strip it began to travel East and land on us. We lost it in sight about ten minutes from the time we entered the road then it began to black out (in an eclipse). At the time it was 9:25 P.M.
