ATTN OF: XPCP

Date 23 Mar 67

SUBJECT: Unidentified Flying Objects (UFO)

TO: 9th Aerospace Division
Ent AFB, Colorado Springs, Colorado 80912

When unidentified flying objects (UFO) are reported, the following information will be filled in and then forwarded immediately to Plans/Program attention XPCP.

a. Description of the Object(s):

(1) Shape. Round

(2) Size compared to a known object (use one of the following terms: Head of a pin, pea, dime, nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball) held in the hand at about arm's length.

Quarter

(3) Color. Orange

(4) Number. One (1)

(5) Formation, if more than one. N/A

(6) Any discrenible features or details. N/A

(7) Tail, trail, or exhaust, including size of same compared to size of object(s).

(8) Sound. If heard, describe sound. No

(9) Other pertinent or unusual features Something under it looked like a platform.

Sand 164

b. Description of course of Object(s):

(1) What first called the attention of observer(s) to the object(s)?
Looked up

(2) Angle or elevation and azimuth of the object(s) when first observed.

(3) Angle or elevation and azimuth of object(s) upon disappearance.
Unknown

(4) Description of flight path and maneuvers of object(s).
Northeast

(5) How did the object(s) disappear? (Instantaneously to the north, etc.)
Vanished to the northeast

(6) How long was the object(s) visible. (Be specific, 5 minutes, 1 hour, etc)
One and one half minutes

c. Manner of Observation:

(1) Use one or any combination of the following items: Ground-visual, ground - electronic, air electronic. ( If electronic, specify type of radar.)
N/A

(2) Statement as to optical aids (telescopes, binoculars, and so forth) used and description thereof.

(3) If the sighting is made while airborne, give type of aircraft, identification number, altitude, heading, speed, and home station. N/A

d. Time and date of sighting:

(1) Zulu time-date-group of sighting. 0[illegible]0720Z

(2) Light conditions. (use on of the following terms: Night, day, dawn, dusk) Night

e. Location of Observer(s). Exact latitude and longitude of each observer, and/or geographical position. A position with reference to a known landmark also should be given in electrical reports, such as "2mi N of Deeville; "3mi SW of Blue Lake". Typographical errors or "garbling" often results in electrically transmitted messages, making location plots difficult or impossible.

EXAMPLE: 89 45N, 192 71W for 39 45N, 102 21W.

Lealwood, Colo

f. Identifying Information on Observer(s):

(1) Civilian - Name, age, mailing address, occupation, and estimate of reliability. [redacted]

Not very convincing sort of confused as to details. 90207

(2) Military - Name, grade, organization, duty, and estimate of reliability.

g. Weather and winds -- Aloft conditions at time and place of sightings:

150degrees at 9 Knots

(1) Observer(s) account of weather conditions.

Clear

(2) Report from nearest AWS or U.S. Weather Bureau Office of wind diection and velocity indegrees and knots at surface, 6,000', 10,000', 16,000', 20,000', 30,000', 50,000', and 80,000' if available.

as of 0356Z

(3) Ceiling. 16,000 Broken

(4) Visibility. 20 miles

(5) Amount of cloud cover. High overcast

(6) Thunderstorms in area and quadrant in which located. None

h. Any other unusual activity or condition, meteorological, astronomical, or otherwise, which might account for the sighting. None

i. Interception of identification action taken (such action may be taken whenever feasible, complying with existing Air Defense directives).

None

j. Location, approximate altitude, and general direction of flight of any air traffic in the area at time of sighting.

None

k. Position title and comments of the preparing officer, including his preliminary analysis of the possible cause of the sighting(s).

l. Existence of physical evidence, such as materials and photographs.

None

## U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

TUES (Day) MARCH (Month) 1967 (Year)

2. Time of day: 1020 (Hours) _____ (Minutes)

(Circle One): (A.M.) or P.M.

3. Time Zone:

(Circle One): (a.) Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

I WAS IN MY CAR GOING TO WORK ON 11-7 SHIFT

Nearest Postal Address / City or Town / State or County

5. How long was object in sight? (Total Duration) _____ (Hours) 4 (Minutes) _____ (Seconds)

(a.) Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes ✓ No _____

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a. Bright ✓ X
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you

14. Did the object disappear while you were watching it? If so, how? NO

15. Did the object move behind something at any time, particularly a cloud? NO

(Circle One): Yes No Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound YOU COULD HEAR IT ONLEY A LITTLE SOUND

b. Color RED

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving. THE DOTS ARE RED

14. Did the object disappear while you were watching it? If so, how?

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound _____

b. Color Silver with a little red light

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

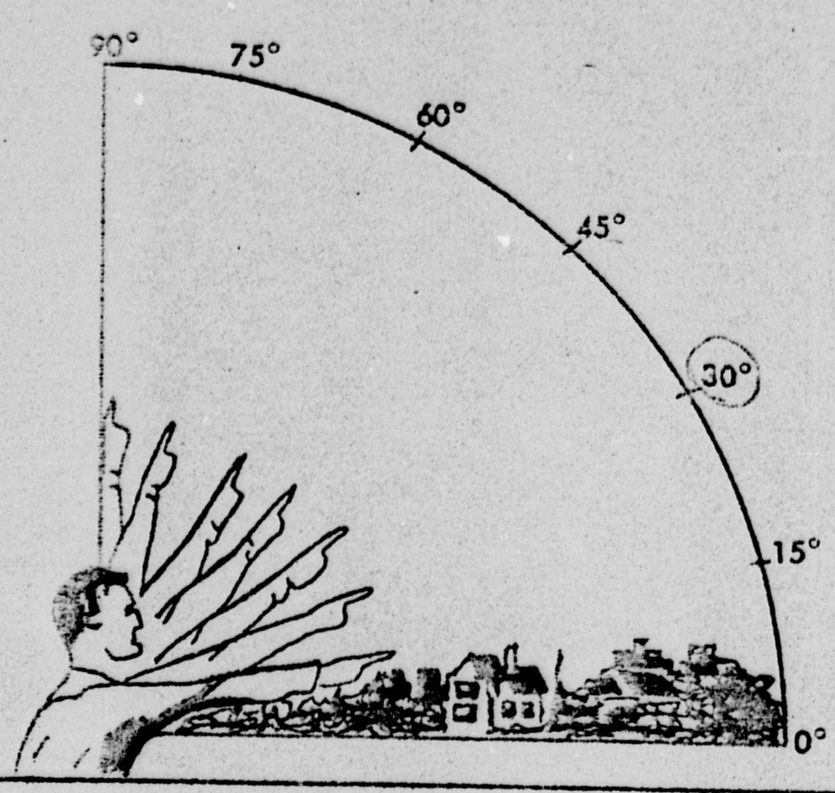
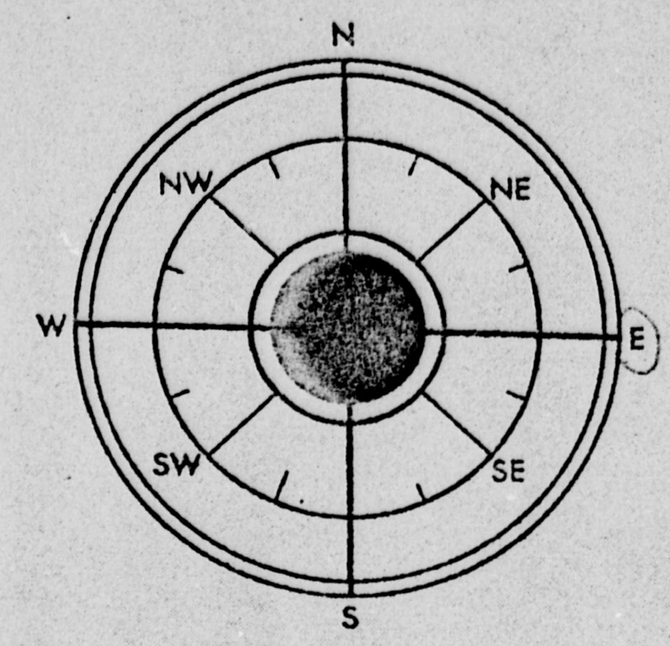
26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

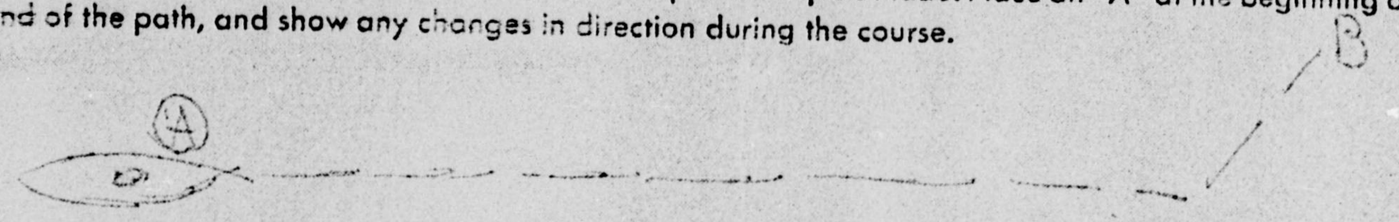
A silver disc shaped object with a little red light in the center.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.



29. IF there was MORE THAN ONE object, then how many were there?_____

Dear [redacted]

Reference your recent letter concerning your observation of an unidentified flying object in March 1967.

We are hesitant in offering any explanation for the sighting without additional information such as detailed flight characteristics, and angular velocities.

Our responsibility does not cover the investigation of sightings outside the continental limits of the United States; therefore, we are unable to perform a comprehensive investigation. Your information will, however, be added to the present data base.

Thank you for reporting your observation to the United States Air Force.

Dear Sir:

The following is a report of a UFO seen in the sky approximately within a radius of 3 miles from that of my residence. In giving the data that I collected immediately after witnessing this phenomena, I will try to follow ~~as~~ closely the form of the 'Official U.S. Air Force UFO Form'.

The following is a transcript of all observations I nade during or immediately afterward the above-mentioned sighting.

[redacted]

1. Date of sighting: uncertain, March, 1967
2. Time of day: 10 hours, 20 minutes(22:20) P.M.
3. Time zone: eastern standard
4. Location at time of sighting: above given address
5. Length of time in sight: 0 hours, 15 minutes, ?seconds(fairly certain)
   determined by wrist watch
   in sight almost continuously
6. Condition of sky: night... clear and bright
7. Stars: many
   Moon: bright moonlight
8. Weather conditions: clouds... clear sky
   weather... snow on ground
9. Appearance of object: as a light
   brighter than brightest stars
   similar intensity to that of high intensity light source found at edge of airport runways
10. The edges were: fuzzy or blurred
11. The object: did appear to stand still(once)
    " flicker and change colour
    didn't suddenly speed up and rush away
    " break up into parts or explode
    " give off smoke
    " change brightness or shape
    " disappear and reappear
12. Movement: the object moved behind trees and houses
    didn't move in front of anything
13. Characteristics: no sound
    colour changed from red to white to red continuously
13. Angular size: holding a match stick in line with the object, the match head would have covered approximately the whole of the object
14. Sketch:

15. Velocity of object: similar to that of a helicopter at a distance of approximately 1 mile
16. Distance of object: seemed to range from 3 to 5-8 miles
17. My location: in a car, outdoors, inside a building
    in residential section on west end of island of Montreal approximately 4 miles from Dorval International Airport
18. Located in car: moving in roughly a westerly direction at approximately 20 miles per hour
    stopped twice while observing(stop signs)

19. Observation made through: windshield, window glass. binoculars (7 + 35)

20. Comparison: the only object similar to that which I observed would be a large, high intensity light placed up in the sky

21. Hight: when first observed, the object was approximately 10-12 degrees above the horizon and 7 degrees above when last observed

21. Similar observances: I have never seen this or a similar object before

22. Other observers: one also observed the object.....

Canada
tel.no. [redacted] age 18 sex M
-have lived near airports and/or air force bases for last 10 years
-my father works for the airline Air Canada
-an familiar with many types of aircraft plus most types of commercially used aircraft
-have studied a number of books on aircraft identification (RAF and RCAF types of books) per year
-have flown an average of at least 1000 miles since I was two months old

24. Date completed: 11, July, 1967

25. Further pertinent information: the following three sightings and related information were noted from three different locations; returning home in a car, outdoors upon disembarkation from car, and indoors inside place of residence
first sighting- object seened approx. 3 miles distant
- heading from rough direction of Dorval airport area
- from my point of view, object was bearing approx. due east
- proceeded to move in a straight line(seemingly) to a point bearing SSE 160 degrees approx.
second sighting- two minutes later
- went from last mentioned point to bearing SW 230 degrees in what seemed to be an arcing path
third sighting- proceeded on a course arcing away to bearing WNW 290 degrees(all the while object was growing dimmer)
- time was 22:25
-object seemed to stay in general area of last mentioned sighting for 2-3 minutes(when viewed through binoculars, object appeared to be moving up and down a slight amount very rapidly)
-appeared to reverse direction(course) all the while exhibiting rapid up and down motion
- finally lost sight of object when it moved behind roof of neighbour's house
- last seen at about 22:35 with a guess at between 5-8 miles distant
- temperature was 25 degrees F
- when resting in area(3rd sighting), object was about 13" above horizon when looking 8 at 6" ruler held at arm's length
- when first seen, was much brighter than 1st magnitude star(made me immediately think of high intensity light source)
- from second notation of second sighting(above) to last notation under third sighting, intensity

decreased to that of 3rd magnitude star brightness
- when colour of light changed from red to white to red etc., each colour lasted for approximately 1 second
- from second notation of second sighting, the length that each colour remained visible changed to approximately ¼ second(stayed this way up to end of sighting)
- only comparative brightness(when first sighted) of light, was that of the warning light(somewhat dimmer) of an Air Canada Viscount passing directly overhead(approx. 1500') at 22:23
- only applicable term would be that of a flickering light(no physical shape was discernable)
- the only reason that I was attracted to notice the object was because of its (to me) unusual physical appearance(ie. brightness of the object, such slow speed... winds were against it, and non production of sound on such a clear sound carrying night... could hear diesel train horns from approx. 3 miles distant)
- for the above reasons(exhibiting heavier-than-air machine characteristics while not exhibiting others), I felt that it was reasonable to bring this to your attention as a UFO sighting
- below is a sketch(not to scale) of what I believed the flight plan of the object to be

Dear [redacted]

This replies to your recent letter concerning the observation of an unidentified flying object (UFO).

Without essential information, such as detailed flight characteristics, angular velocities, or weather information, we are unable to undertake a scientific investigation. Had you contacted the UFO investigator at your nearest Air Force base immediately, an on-the-spot investigation would have been possible.

We hope the inclosed Project Blue Book report may be of help to you in identifying your observation.

Thank you for reporting your observation to the Air Force.

Dear [redacted]

Reference your recent letter regarding an unidentified flying object (UFO) which your grandmother observed in March 1967.

With the information submitted, it would be extremely difficult to offer much of an explanation. Essential data such as flight characterisitcs, maneuvers, and duration of sighting are quite important in a comprehensive evaluation. If your grandmother had reported her observation to the nearest military installation at the time, an evaluation would have been possible. The local UFO investigator is in a far better position to conduct an on-the-spot investigation. Your information will be added to our present data base.

The inclosed brochure on the Air Force project on UFOs may be of interest to you. Thank you for bringing the observation to our attention.

Dear Major Hector Quintanilla, Jr.

I am typing this for my Grandma. Sometime in March I967 about 2:I5 A.M. my Grandma heard the two big dogs Tarzan and Rex barking. She got up to let Cindy our small dog out and quite the big dogs down, when my Grandma opened the door Cindy jumped out and ran up the road barking, my Grandma looked up the road and saw a large dome with red, yellow and blue lights that was hovering over an orchard about a ½ of a mile away, she went back to bed because she was scared, about twenty minutes later she looked again and it was gone.

As I was 4 to 6 enormous windows As this object moved not to fast to the east The windows closed like a Rolling over closing over them. Until only one light - on the South, was left. The noise ceased and the object looked like the South at a high rate of speed. We watch it until it disappeared in the distance.

# UFO form continued

THE SIZE OF THE UFO WAS VERY IMPRESSIVE. THE LIGHTED WINDOWS WERE SYMMETRICAL. THEY APPEARED TO BE SQUARE. I WOULD ESTIMATE THE HEIGHT OF THE WINDOWS TO BE APPROXIMATELY 40 FT. IF THIS ESTIMATION IS CORRECT, THE UFO WOULD BE FROM 120 TO 240 FT. LONG. IT IS VERY DIFFICULT TO COMPARE THE INTENSITY OF THE LIGHT WITH A KNOWN LIGHT SOURCE.

THE SOUND IS ALSO DIFFICULT TO EXPLAIN. IT HAD A VERY LOW PITCH. IT MIGHT BE DESCRIBED AS A PULSATING OR VIBRATING HUM OR WHIZZING NOISE. THIS SOUND WAS ALSO HEARD BY TWO OF OUR NEIGHBORS.

WE DECIDED NOT TO SAY ANYTHING ABOUT THIS SIGHTING TO ANYONE. IT WASN'T UNTIL SIX DAYS LATER WHEN SEVERAL REPORTS APPEARED ON T.V. ABOUT OTHER U.F.O. SIGHTINGS IN THE AREA THAT WE CALLED A LOCAL T.V. STATION AND REPORTED OUR SIGHTING.
