35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting. Object first sighted by my 17 yr. old son, Fred Ooten from his upstairs bedroom window. Husband, Jack, son, and I rushed outside. The object was above the treeline in the west - slightly north, passing over house at terrific speed. Time was somewhere between 9:05 pm and 9:20 p.m. Object moved in straight path, did ~~not~~ not waver. Made no noise. After it had passed overhead, but before it had disappeared, we could hear a jet, but could also see it, above and to the left of object. Object passed fairly low over our house, low enough that if object had been a plane, there should have been a great deal of noise. Lighted area was forward - not like a spotlight, but as if it were a fairly large, curved, lighted area. Rear area shadowed and indistinct, but definitely some density there. Lighted area was intensely lit. almost blue white light. Total time of sighting 45-60 seconds, estimated. I honestly don't know what I saw. I only know that I have never seen anything in the sky shaped quite like it, nor have I ever seen any plane which moved at such great speed.

This object was moving faster than any aircraft I have ever seen before. I was most impressed by the lighted area. It seemed to come from a convex window or windows and was intensely ~~xxxxx~~ bright. Light did not actually shine as a beam, but gave the feeling of coming from a window. At one point, when the object was straight overhead, it was distinctly outlined, except for the rear 1/3 of area, which could or could not have been concave. Before the object disappeared, could hear and see jet plane, higher and to the left of the object. At no time did I see any familiar type of aircraft lighting.
