SIR I AM REQUESTING INFORMATION ON THE AIR FORCES PROJECT OPERATION BLUEBOOK, ALSO YOUR FINDINGS AND ~~REG~~ REPORTS PICTURES OF UFO'S IF ANY.

NOW DON'T SAY THERE IS NO SUCH THING AS UFO'S BECAUSE I HAVE SEEN TWO MYSELF.

DESCRIPTION: SPHEREICAL BALLS WITH RED,YELLOW,BLUE,GREEN . LIKE A BEACHBALL. FIRST THEY APPEARED SMALL THEN GOT LARGER. THEN THEY TURN INTO LIGHT BLUESISH WHITE AND GOT SMALLER LIKE A EXHAUST TRAIL ACROSS GIONG EASTERLY DIRECTION.

I ALSO BELIVE IN THEM.

SO WILL YOU PLEASE SEND ME THE ABOVE INFORMATION.

P.S. I HAVE WITNESSES TO WHAT I SAW.

SINCERELY,

OFFICIAL-INFORMAL

Edward M. Bolster, Esquire
Director, Office of Aviation
Department of State
Washington, D.C.

Dear Ed,

The enclosed report relates to a somewhat different type of "aviation" than you and I are accustomed to handling. I am sending it to you with the request that you pass it on to the appropriate office.

Because we are in Africa, where widespread knowledge of a report like this would be an ultra-sensational item, it seemed to us that no useful purpose would be served in disseminating the report locally until and if our people back home check it out. The Ambassador, Jim Auchinloss and I are the only ones who know of its existence.

A word about the Hoskins. Mr. and Alice are close personal friends of ours. He is a Methodist Minister, an American, connected with the All Africa Conference of Churches. Both are well educated, stable persons, and I have no doubt whatever that they saw something and reported it soberly. I'm just sorry that I didn't see it, too! Alice came to our house on Monday, March 20, and told me of their experience. She said they had no desire for the widespread publicity (and ridicule) which most certainly would follow a report to the local authorities. They felt it should be reported to some official agency, however, and came to me as the Civil Air Attache.

Upon arriving home the Hoskins listened to the radio for possible news, but there was none. I asked whether there were other cars on the road. They said they recollect only one car passing them during this period, and he seemed intent on getting somewhere in a great hurry. The village Africans would not be likely to report an item like this even if they saw it. Most go to bed at darkness. At Jim Auchinloss's suggestion I called the East African Meteorological Department and inquired whether they had any knowledge of unusual meteorological activity on the evening of March 10. The answer was negative.

RFC

Although the enclosed drawing is the work of 11-year-old Gregory, each of the family (once it with) drew a picture, independently, and the results were remarkably similar, they tell me. The adult Maclins said they really couldn't say with certainty that they saw the shape of the objects beyond the lights, but the night was clear and it is possible that Gregory did see what he has depicted.

I have not heard of any other UFOs being reported in Africa. If they have been, perhaps the local authorities should be notified. The Maclins said they would be willing to submit to official questioning, but wish to avoid local publicity for personal and professional reasons.

Sincerely yours,

A

REPORT TO THE UNITED STATES EMBASSY, Nairobi, [illegible], OF UNIDENTIFIED FLYING OBJECTS BY MR. AND MRS. H. P. McCLIN and TWO CHILDREN

On the night of Saturday, March 16, 1957, we were returning to Nairobi from Kijabe. We left Kijabe about 9:20 p.m. and were at the top of the escarpment by about 9:40 p.m.. As we came to the top, our son, Gregory, 11, shouted, "There's a plane with all its cabin lights on!" I glanced ahead and to the right and got a glimpse of what I thought then was the fuselage about the size of a Fokker Friendship disappearing just out of vision beyond the hillside. The windows seemed unusually large. It appeared to be just above the level of the trees. My husband said, "If it's that low it will surely crash," and as we went up the hill we were all listening, but heard nothing.

Two or three minutes later we got another glimpse on the right over the valley, and as soon as the lights of the TV tower were in sight, we could see this object again in front of us and slightly to the right. As my husband was driving, this was the first clear view he got. We saw what appeared to be a row of lights coming from the windows, fairly clearly separated. The object was moving forward in front of us and perhaps a mile to the right (south) on the highway. At about this time our daughter, Ruth, 9, got her first glimpse of the object as she was sitting in the middle of the front seat and did not have a very good view. She became very frightened, and continued to be more and more so the rest of the way home. Gregory, on the other hand, was absolutely fascinated and saw more than any of the rest of us, as he had an unobstructed view. My husband, driving and I, comforting Ruth, saw somewhat less than he did although I saw the object most of the times Gregory said he could see it.

As we drove on we kept having glimpses of the object whenever there were no trees to obstruct the view. Sometimes we could see only part of it. Ruth became more and more agitated, and as we came nearer Kikuyu I said that perhaps it was lights in the direction of Alliance High School or the lighted verandah of a house on a hill, in order to calm her. However, since we had seen it from time to time since arriviing at the top of the escarpment, this could not have been the case.

As we passed the road to Kikuyu we could see the object very clearly, as we had caught up with it and it was now directly on our right. But now we could see two objects very distinctly. The one on the right was larger, and apparently was the one we had been seeing. The one on the left was smaller, one-third to one-half the size of the larger one. Because they appeared to be closer at this point we could quite clearly make out on both the fore and after parts of the objects red lights which were slightly extended and above the objects. Both were slightly inclined at an angle of about ten to twelve drgrees from the ground, the lower side in the direction in which they were moving.

We observed them whenever there were no trees between us for a few miles. Just after we passed the Zambezi Motel we saw them very clearly in a field to the right. They seemed to be hovering over one spot, no more than 50 to 100 feet above the ground. We did not feel that we were being observed but rather that we had come upon them by chance. Gregory was very curious; I was somewhat frightened but curious enough that I would have got out of the car, but Ruth became almost hysterical and we decided we had better drive on, since we had stopped the car for more careful observation.

It is impossible to say whether we were observing a round object from the side or a cigar-shaped object, except that we saw the row of lights very much the same when it was in front of us, to the side, and behind us. We all had the impression of looking at the side of a disc with two red lights on either end (that is, fore and aft). Gregory said he saw them as discs and could barely see in outline above the lighted windows a curvature somewhat similar to what one sees when observing a quarter-moon in a clear sky.

The lights did not flicker or fluctuate; there was no light observable above or below the objects. None of the lights changed color while we observed them, nor was there any impression of anything spinning. The objects did not appear at

4

anytime to be actually resting on the ground, but did appear most of the time to be "floating" below the level of the treetops. At no time did we hear any sound at all.

We continued to observe the objects until we got to Kabete and turned off to the left on Sclater's Road. They seemed to have slowed down and were behind us off to the right veering to the right when we turned off. Again, they were very low and following more or less the valley and much of the time were partly obscured by trees.

After we turned towards Westlands we did not expect to see them again, as the road follows a ridge and they had seemed to be starting down the valley out of our line of sight. There are also a great many tall trees as one approaches the old Nairobi city limits (30 mph zone). However, to our surprise, just as we passed the main entrance to the Nairobi School we saw both objects coming past the the ridge that Churchhill Avenue follows and coming into the valley above St. Austin's Road. They were rising slowly, and we could see them until we got to the ABC supermarket when they were definitely rising out of the valley and gaining altitude. Ruth became very distressed and so we continued on, but if we had turned into the ABC parking area we would have been no more than possibly a half to three-quarters of a mile from them at most. At this distance the larger object looked as if it might be the size of the fuselage of a DC-8 or larger. They were rising out of the valley together, still inclined slightly towards the direction in which they were moving. They were rising at about the speed and angle of a large helicopter but at no time was there any noise whatsoever or change in the appearance of the lights. Again there was feeling of "floating" effortlessly.

About three minutes later we were at our house. I looked at my watch and it was 10:15 p.m. We looked up into the sky but saw no sign of anything unusual. There were few or no clouds in the sky, and the quarter-moon was clear.

We have recently been especially interested in UFOs, as a friend of ours had seen a formation of them cross the sky in Brazil in November. We had, in fact, mentioned that very evening that we had never heard of a sighting in Africa, and surely not in East Africa. All four of us, however, clearly saw these objects over a period of approximately 30 minutes, and over a distance of more than 20 miles. At one time we stopped so that we could see more clearly. As our daughter is still very upset about the whole thing we have not discussed what we saw any further in front of her except to reassure her that UFOs have never been known to harm anyone. Gregory, H. T. and I, however, agree that this is an accurate account of what we saw. Gregory encloses a picture of what we saw and all agree that this is very nearly correct.

Dear [redacted]

Reference your recent letters addressed to 1st Lt. Marley and SSgt Jones at Wright-Patterson Air Force Base, Ohio, regarding your observation of an unidentified flying object (UFO).

With the information submitted, it would be extremely difficult to offer much of an explanation. Essential data, such as flight characteristics, maneuvers, and duration of sighting are quite important in a comprehensive evaluation. If you had reported your observation to your nearest military installation at the time, an evaluation would have been possible. The local UFO investigator is in a far better position to conduct an on-the-spot investigation. Your information will be added to our present data.

The inclosed information on the Air Force's program concerning UFOs should be of interest to you.

Thank you for reporting your observation to the Air Force.

Dear Sgt.Jones,

My name is [redacted] I am 13 Years old. I am a student at George Dewey Junior High School, Bremerton, Washington. I have quite an interest in UFOs. I would like to make sort of a study on UFOs. I am writing because I would like you to send me some pictures or information of some kind on UFOs. You probably are busy but if you could find time to do this I would appreciate it very much.

I will tell about my experience with a UFO. One night about 9:45 about March 20, 1967 my friend and I were looking out of my telescope.at a star in the West.I was about to go in and get a higher powered lense then I lookedto the East and saw some kind of object. I called my friends attention to the object. Both of us were scared. It made no noise that we could here but my dog stared in the area of the object and started to whimper and bark. The object was illuminated but we could still se the outline ofthe object. It zig-zaged and seemed to take sharp turnes. It traveled at about 5 or 600 miles per hour. It hovered over a tree for about 15 secondds then shot up and disappeared. I wanted to call the police or the nearest A.F.B. but my mother wouldn't let me. Thatsthe story.

1. On 22 March 1967 the crew of a Brazilian Air Force C-47 and the crew of a Cruzeiro do Sul photomapping aircraft reported having seen a flying saucer in the vicinity of Porto Alegre, Rio Grande do Sul. The object was initially sighted by the BAF crew who described it as a reddish colored full moon that appeared to be flying in circles. The BAF C-47 advised Salgado Filho Tower of the sighting, and the tower asked the Cruzeiro do Sul aircraft to intercept and identify the object. The Cruzeiro do Sul aircraft made contact with the object and pursued it for 15 minutes before it finally disappeared. No pictures were taken of the object. In addition to the reported sightings by the aircraft crews, the object was also reportedly seen by ground observers in the Porto Alegre area.
