U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

14 (Day) APRIL (Month) 1967 (Year)

EAST TIME

2. Time of day: 7:30 (Hours) _____ (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
b. Central
(c.) Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

14. Did the object disappear while you were watching it? If so, how?

NEVER DISAPPEAR.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't know. IF you answered YES, then tell what in front of: IT MOVES FROM BACKSIDE OF A BIG MOUNTAIN STAYS HOVERING FOR A WHILE. THEN SPEED AWAY

17. Tell in a few words the following things about the object:

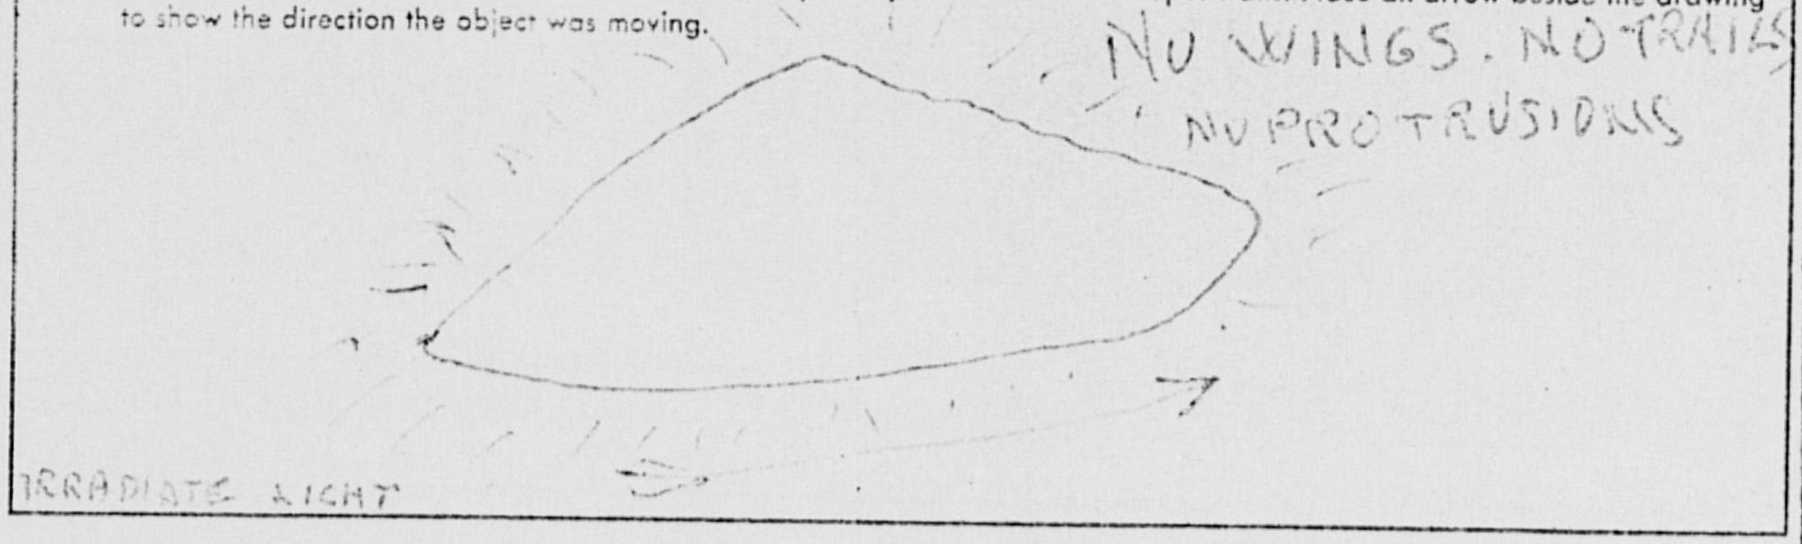

a. Sound NO SOUND

b. Color ORANGE RED CHANGING TO VIOLET WHEN GOING UP.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

CAN'T PRECISE. NO MATCHES IN MEXICO THE EXPERIMENT IS USEFUL RIGHT AT THE TIME OF THE SIGHTING.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

Flying Saucer? Nope, Flying Sign

It was a sign of the times — not a flying saucer.

When Oklahoma City residents saw something crossing the sky for more than an hour Saturday night they telephoned police and stared into the sky.

A Cessna 172 airplane towing a 40-foot-long electric advertising sign flew north to south from 7:30 to 9 p.m. Saturday.

Telephone calls started soon after pilots Allen Mosley, 35, of 111 Kelley Dr., Moore, and William Haynes, 35, of 409 NW 92, took to the air with a 9-foot-high sign covered with white electric lights.

Oklahoma City's police department received the most calls (more than 2-dozen). Other metropolitan police departments also were phoned.

Tinker Air Force Base, Will Rogers World Airport tower and Wiley Post tower also received calls.

Police information officer J. D. Burkhart received the first call and mentioned it to a skeptical reporter. The reporter walked up one flight of stairs to the police dispatcher's office and found D. C. Bowen also talking on the phone about a flying saucer.

And then the phones really started ringing.

Most of the calls came from the northwest Oklahoma City area. The "craft was seen hovering over my house," a man said. "My son and I are watching it this second," an excited mother said in another

conversation.

Most of the calls were the same report, and were prefixed by: "I saw it, What is it?, You won't believe this," and "Now I'm not a nut, but. . ."

Oklahoma City police via telephone quickly learned from Tinker's Rapcon (Radar Approach Control) that the base was in radio contact with the pilots and it "all was an advertising gimmick."

Police learned the pilots had written permission from the Federal Aviation Agency several days ago.

Two persons entered the police station to give their eye-witness account.

"It looked like a giant hamburger bun without meat," Mrs. Linda Simmons, 29, Oklahoma City, said. Her sister-in-law, Miss Jean Rice, 14, said: "There were lights in the middle of it where the meat would be going 'blip, blip, blip'."

The pair said everyone (about 50 persons) parked at a downtown drive-in cafe was out of the cars and looking upward. "One guy even tried to follow it in his car," Mrs. Simmons said.

The pair was enlightened about the Cessna 172 and seemed a little disappointed.

The pilots, both Tinker flight instructors, are the men who fly the bannered plane at the University of Oklahoma's home football games.

Mosley said their plane flew from 65 to 85 miles per hour at about 1500 feet. "We flew over the field here several times to make sure people could read the sign at that altitude," he said.

Asked if he was concerned about triggering a flying saucer scare, Mosley said: "I hope it didn't scare anyone, but it is to attract attention."

THE OKLAHOMA JOURNAL, WEDNESDAY, MAY 24, 1967

UFO Seen In City

A Del City man reported sighting a "flying saucer" in the southwest skies over Oklahoma City Tuesday night.

Jim Misenheimer, 4125 SE 29, said the flying object had the appearance of a billowing parachute with "a bunch of lights in line."

He said the lights pulsated at five - second intervals as the object circled in the southwest skies, turned south and reversed directions at least once.

Misenheimer said the object was first spotted by Wilma Patrick, daughter of Mr. and Mrs. Amos Patrick. It was also observed by Mrs. Misenheimer and Mr. and Mrs. Patrick. The sighting was at 9:22 p.m. and the object went out of sight about 10 or 12 minutes later, they reported.

"I know it wasn't a plane," Misenheimer said.

We have very open minds towards this. We figured that it might not be anything more than a weather ballon or airplane. We as a class figured you could tell us what you think it is. It did not have a jet stream, nor did it have a sound, yet the sound may be due to the distance we were away from it. It was pretty high up and distant features could be given. The class was an academic Analytical Geometry class. A total of twenty-seven watched the (object).

I'm John Brumbaugh and I have been delegated to write to you and find out what you think please send information to my address on the other page because we will be busy school shortly.

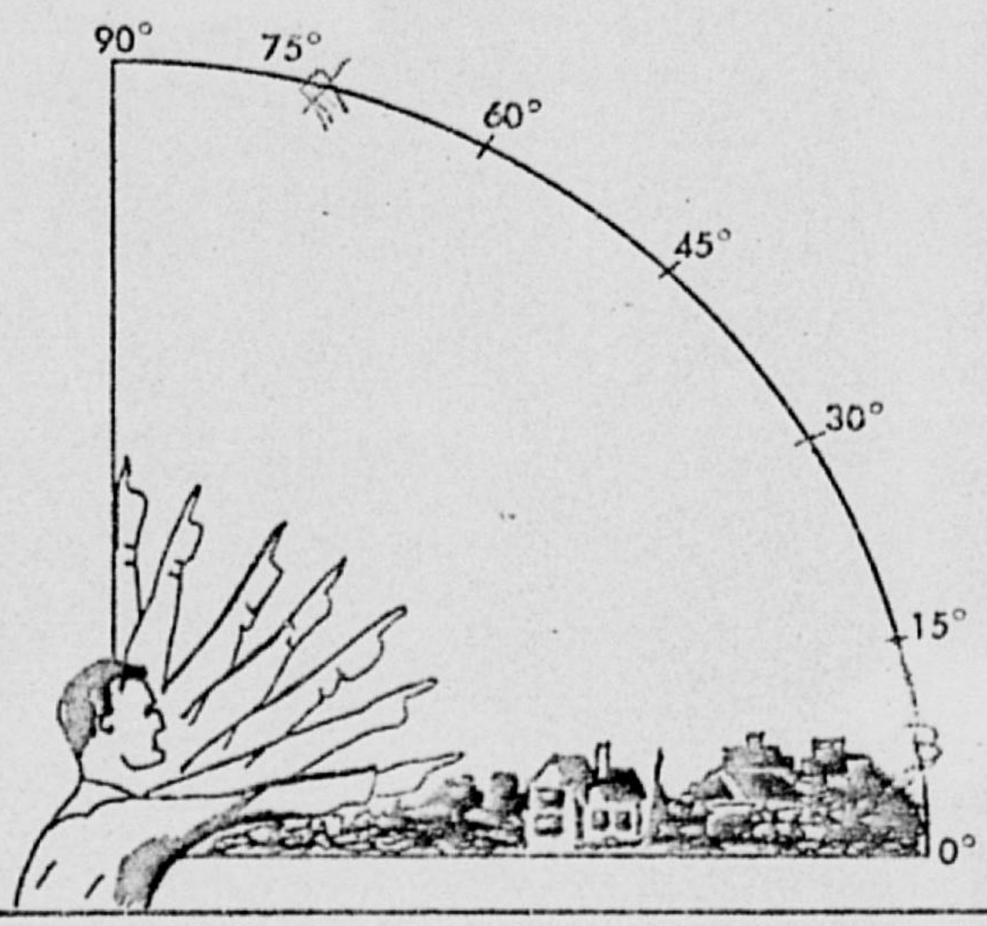

Thank You

The object ~~was~~ I then spotted to the left of the airplane (WEST) which was before it. As the plane advanced more west the object turned north and went over the airplane. It was hovering all the while I saw it. It then proceeded North until another airplane was to the right of it coming from the North East. The object then went toward the airplane changing its direction to northeast. It went over it and went on until it came to a complete stop. Something came out of the bottom (smaller the object) ⅓ of its size. It came out about 10 ft. from the bottom and it also stopped (about 3 sec.). Then they both went real fast N.E. for

I was leaving my house and just as I stepped off my back porch I noticed this red-white color changing light I called my mother and ran upstairs while she watched it. I got my binoculars and got a short look at the object just before it went behind the hill. It appeared the same as it did to the eye. I then later it dissappeared ran up Maple Ave to see if I could see it again, which I didnt. I have counted out airplane because it moved to slowly and helicopter because a helicopter that close would make a hell of a lot of noise.

Proposed reply to [redacted], letter August 3, 1967 (Sighting April 8, 1967

Dear Mr. [redacted]

Reference your latest correspondence of August 3, 1967. We still have been unable to reach a definite conclusion on your observation because of insufficient information.

A possible explanation would be that of a hot air balloon. The description you submitted is consistent with such an evaluation. There are many individuals who have launched hot air balloons, therefore, it would be impossible to determine whether a hot air balloon was positively in your area at the time of your observation.

The form you completed is a copy of an Official Air Force Form; however, we normally need additional information on any sighting before reaching a definite conclusion. That is why an individual needs to contact the nearest Air Force base. The base investigator is in a far more desirable position to collect essential data such as detailed flight characteristics, angular velocities, weather conditions, etc. It is his responsibility to collect and analyze all data pertinent to each sighting. If he is unable to reach a positive identification the report is then sent to the office at Wright-Patterson Air Force Base for further investigation for a final determination.

Since there was no indication in your report, of a threat to the security of the United States, nor was there any indication of any new scientific or technical data, the Air Force does not feel that further investigation into your sighting should be made.

AUG 21 1967 for Sefton

We regret that you are unsatisfied with our present policy; however, if you desire to contact the investigator at Stewart AFB in the future, I am sure he will be available.

attn: Lt. Colonel Barnett B. Young

Dear Mr. [redacted]

This is a reply to your letter explaining my observation of an unidentified flying object.

In that letter you stated that my observation could not be thoroughly investigated due to insufficient data. You stated that flight characteristics, maneuvers, angular velocities etc. are essential for proper investigation. If you check the form I submitted to Project Blue Book, Wright-Patterson AFB, you would clearly see that I described flight characteristics and maneuvers, though they were not irregular. As for angular velocities, I saw no questions pertaining to this subject nor explaining this characteristic of flight.

I filled out all the questions accurratly, as well as including a two page narrative of my experience. I am connected with a UFO organization which supports the Air Force stand that there is no evidence that UFOs are extraterrestrial. I am very familiar with this mystery. And I can say that I have eliminated all of the common explanations from the planet venus to ion plasma. To me, receiving a letter stating insufficient data is unacceptable.

I am sure that if you wished, This case could be investigated. I cannot accept this because I know that the Air Force has the means to investigate every case.

If my report was lacking in information why was I not contact immediatly so I could supply the information? I am sure you will not overlook this case again, and will contact me as soon as you come to a plausible conclusion.

I can now see why many people become angry with the Air Force after receiving such a letter. As Cheif of the Community Relations Division, you should relize that a letter such as that one could only antagonize a citizen who is truly searching for an answer to his case but is left "hanging in the air."

I hope you will ask for my case to be rexamined. I would like to contact the UFO investigator at Stewart AFB, New York concerning this case unless you think it is to late for this since a few months have past.

Sincerely,

Proposed reply to letter from [redacted]an (Sighting: Apr 8, 1967)

Dear Mr. [redacted]

This replies to your recent letter in which you requested information on your unidentified observation of April 8, 1967.

We have been unable to reach a definite conclusion on your observation because of insufficient information. Essential data such as flight characteristics, angular velocities, maneuvers, etc., are quite important in a comprehensive evaluation. If you had reported your observation to your nearest military installation at the time, an evaluation would have been possible. The UFO investigator, at your nearest military installation, is in a far better position to conduct an on-the-spot investigation. Your information will be added to our present data base.

If you should ever witness another strange phenomena in our atmosphere, contact the UFO investigator at Stewart AFB, New York.

14. Did the object disappear while you were watching it? If so, how? YES, AFTER IT HAD DROPPED MANY FLARING OBJECTS, IT FADED AWAY, BUT DIDNT MOVE.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of: _____

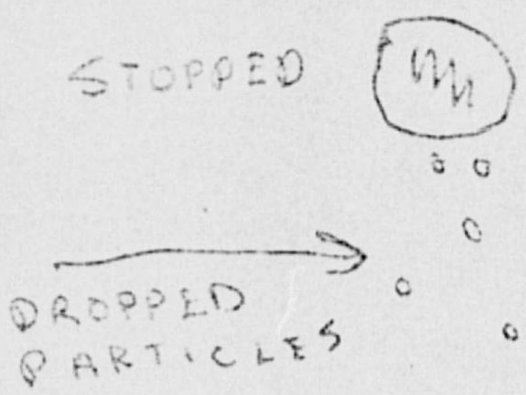

17. Tell in a few words the following things about the object:

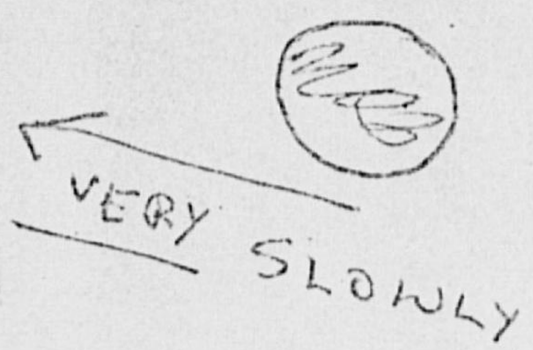

a. Sound There was no sound heard, but if there was, I was too far away to hear it

b. Color A VERY BRIGHT ORANGE, BUT WASNT HAZY

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? I did this during the sighting. the outer edges of the UFO would not be covered

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? 50 MPH

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 2½ - 3 MILES

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
(c.) Outdoors
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you (Circle One)

a. In the business section of a city?
(b.) In the residential section of a city?
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other_____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving?_____miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

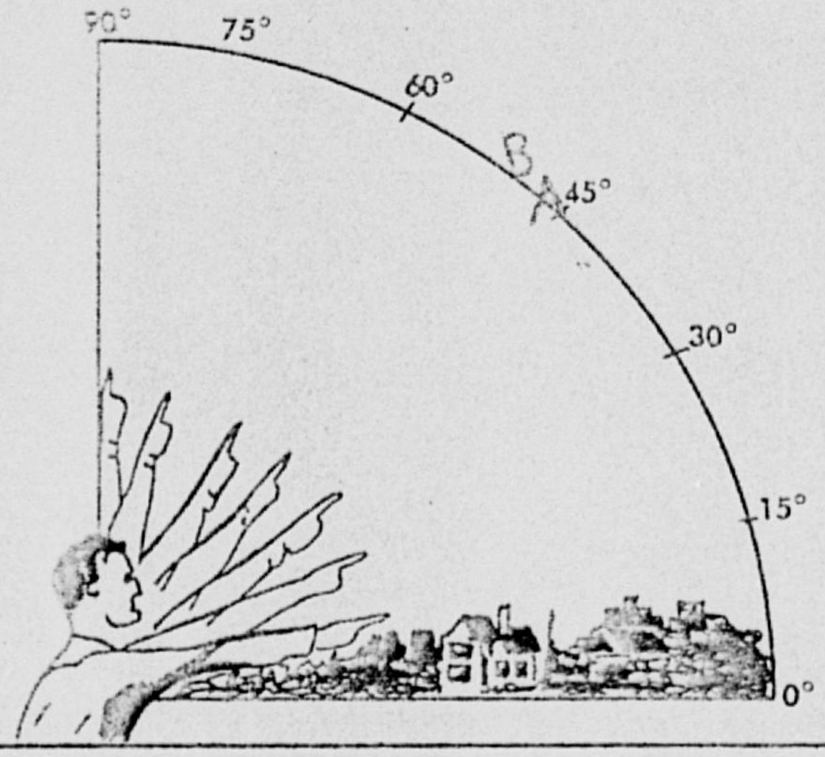

a. Eyeglasses	Yes	(No)	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other_____		

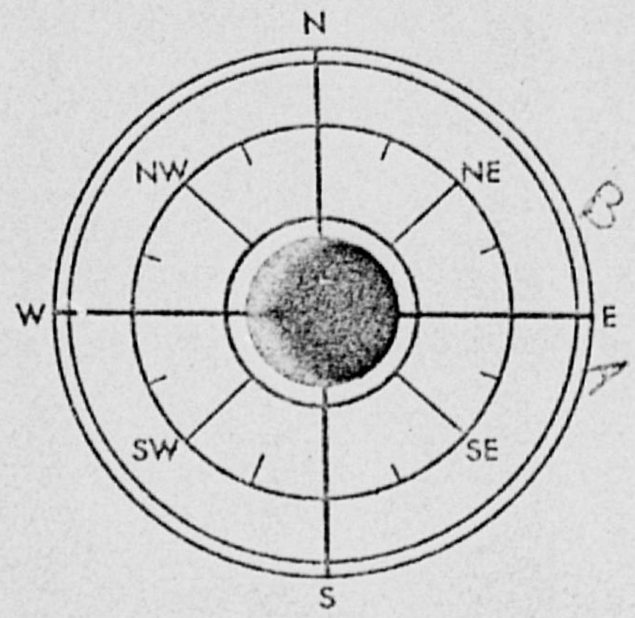

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

it looked very close to the light that they put up in New York & there is a fire box on the corner, but I stress this is deffinitly not that.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was going to work my shift on with a friend, mitchael Bornstein. We were at the bus stop of 34th St & Glenwood Road B'KLYN N.Y. We waited and then I saw it first. I turned to my friend and said "Is that an airplane?" and he said No. there was a lady at the bus stop, one of the *unknowns, and she still did not notice. I then said to mitchael that it wasnt carrying any running lights. I then turned to the lady and said "Do you see that?" she answered yes. She was very interested and pointed at it. It mived slowly for a short distance for about 2 minutes. It then came to a dead stop and we all said it stopped. 2 men were walking by and they saw that we were excited and turned to look at it. They confirmed the sighting. I dont know who they

were. & then tested for angular size, distance, altitude, direction, time, wind, (about 3-5 MPH from the west) and speed. (let me make a correction. I estimated the speed since it had by now stopped) & checked the weather, moon & stars. & didnt notice until later but a man had come out of his house to watch. I am including his name in this report without his permission. all six of us then confirmed that particles were falling from the bottom of the UFO. These particles were only visible a few seconds ① after being dropped, but they kept coming one after another. I estimate about 20-30 "particles" Interesting thing was that the size, shape, and brightness of the UFO did not change while this was happening. after the particles had been dropped the UFO gradually faded away but did not move. We then boarded a bus and I talked to michael about the sighting extensively. The entire incident took about 5 minutes. I have eliminated certain possibilities through my experience and my knowledge of UFOs. (continued on paper)

① The particles may have reflected the light of the UFO. That may be the reason we saw them only for a second or two.

Sirs:

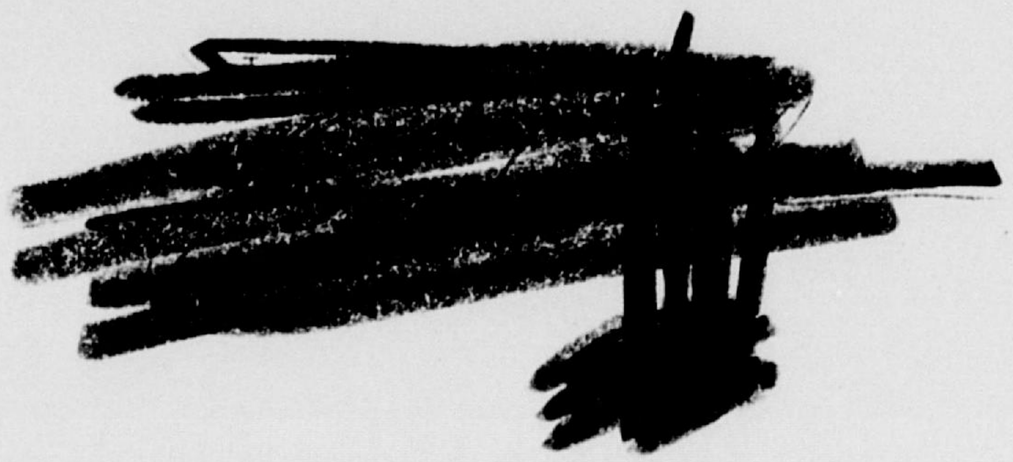

Has the Air Force reached a conclusion pertaining to my sighting ?
My name is L[redacted]n and I sent a UFO questionarre to Wright Patterson AFB during the month of April this year.

I was under the impression that a representative of the Air Force would contact me to discuss my case. This has not been done.

If you have reached a conclusion please notify me of the results. I am very interested in UfOs and am head of a UfO organization. We support the Air Force's conclusions that at this time no scientific evidence has been presented to support the idea that UfOs are extraterrestrial.

I am anxiously awaiting your reply,

Sincerely,

Dear Mr. [redacted]n:

This replies to your recent letter in which you requested information on your unidentified observation of April 8, 1967.

We have been unable to reach a definite conclusion on your observation because of insufficient information. Essential data, such as flight characteristics, angular velocities, maneuvers, etc., are quite important in a comprehensive evaluation. If you had reported your observation to your nearest military installation at the time, an evaluation would have been possible. The UFO investigator at your nearest military installation is in a far better position to conduct an on-the-spot investigation. Your information will be added to our present data base.

If you should ever witness another strange phenomena in our atmosphere, contact the UFO investigator at Stewart Air Force Base, New York.

Dear M[redacted]

Reference your latest correspondence of August 3, 1967. We are still unable to reach a definite conclusion on your observation because of insufficient information.

The description you submitted could be that of a hot air balloon. Many individuals launch hot air balloons; therefore, it would be impossible to determine whether one was in the area at the time of your observation.

The form you completed is a copy of an Official Air Force form; however, we normally need additional information on any sighting before reaching a definite conclusion. We recommend you contact the nearest Air Force base immediately after a sighting. The base investigator is in a far better position to collect essential data. If he is unable to reach a positive identification, he will then send the report to Wright-Patterson Air Force Base for further investigation. However, it is necessary to report without delay.

We regret that you are unsatisfied with our present policy; however, if you desire to contact the investigator at Stewart Air Force Base in the future. I am sure he will be available.

Proposed reply to [redacted], letter August 3, 1967 (Sighting April 8, 1967

Dear Mr. [redacted]

Reference your latest correspondence of August 3, 1967. We ~~have~~ still have been unable to reach a definite conclusion on your observation because of insufficient information.

~~A possible explanation would be that of a hot air balloon.~~ The description you submitted could be that of a hot air balloon ~~is consistent with such an evaluation.~~

~~There are~~ Many individuals ~~who have~~ launched hot air balloons, therefore, it would be impossible to determine whether ~~a hot air balloon~~ one was ~~positively~~ in the your area at the time of your observation.

The form you completed is a copy of an Official Air Force form; however, we normally need additional information on any sighting before reaching a definite conclusion. We recommend that ~~That is why an individual needs to~~ immediately upon sighting contact the nearest Air Force base. The base investigator is in a far better ~~more desirable~~ position to collect essential data ~~such as detailed flight characteristics, angular velocities, weather conditions, etc. It is his responsibility to collect and analyze all data pertinent to each sighting.~~ If he is unable to reach a positive identification ~~the report is then sent to the office at Wright-Patterson Air Force Base for further investigation, for a final determination.~~ he will then send the report to Wright-Patterson AFB where it is analyzed by technically trained personnel.

Since there was no indication in your report of a threat to the ~~security of~~ the United States, nor was there any indication of any ~~new scientific or technical~~ data, the Air Force does not feel that further investigation into your sighting should be made.

We regret that you are unsatisfied with our present policy; however, if you desire to contact the investigator at Stewart AFB in the future, I am sure he will be available.

ADDRESS [redacted] (Street) Columbia (City) ___ (Zone) Missouri (State)

TELEPHONE NUMBER [redacted] AGE 15 SEX female

Indicate any additional information about yourself, including any special experience, which might be pertinent.

My father owned a private plane for several years. During that time I made 3 three trips from Columbia to Muskegon, Michigan; and numberless trips around Boone County. The thing I saw was definitely not a Cessna 172 or a single engined aircraft.

33. When and to whom did you report that you had seen the object? my parents and family

4 (Day) ___ (Month) 1967 (Year)

Official U.S. Air Force

34. Date you completed this questionnaire: eighth (Day) April (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

At first I thought the thing was an airplane but it had some of the flashing & navigational lights on just the one steady light. Someone then mentioned that it might be a blimp advertising a new shopping center in town; however it was the wrong shape for a blimp and besides, what company would be advertising at that time of night?

I only this morning when at the school orchestra someone mentioned that numerous people had called the weather and radio stations to report a U.F.O. at about 10:05 in the west end of town did I think it might be a U.F.O. I was convinced to submit this only after an eight grade started talking about seeing an orange-red object at about that time during rehearsal.
