Dear Mr. [redacted]

Reference your recent correspondence concerning your unusual observation, the description you submitted was similar to that of an aircraft. We contacted the Bendix Flight Operations at Ffriendship Airport, since they operate several aircraft for the Goddard Space Flight Center, and in the past, these aircraft have been responsible for numerous UFO sightings.

Between 10:00 p.m., June 17, and 1:15 amm., June 18, a C-118A NASA aircraft was in the area of the reported sighting at approximately 10:30 p.m., June 17. The tests were conducted at varying altitudes, displaying a 4050-watt tracking light located on the bottom of the aircraft.

Although we cannot identify your observation positively, we do believe this aircraft to have been responsible for your sighting.

Sincerely,

BARNETT B. YOUNG

Gentlemen:

I would like to report a phenomenon to you, and would appreciate it if you know of some explanation. It occurred June 17, 1967.

At about 10:30 PM EDT we were anchored in a cove just above Marsh Point on the Sassafras River, Md. One of the two girls in our group pointed out something in the sky with a statement such as "Look at those flashing lights." We all looked, and all saw a series of perhaps 20 to 30 flashes in a zig-zag pattern covering an arc of about 45°, for a 20-30 second period. The lights were in a easterly direction towards Georgetown, Md. and proceeded from about directly above towards the horizon in a west to easterly direction. The first flashes were about as bright as a bright star. The last flashes diminished somewhat, and then simply stopped about 45° above the horizon. The flashes seemed to be at regular time intervals but the distance intervals varied greatly. There was a star we could use as orientation. I have attached a drawing. There were no colored lights, sounds, etc. and none of us imagined it could be any type of plane, balloon, flare, etc. we had ever seen. One of our group is a pilot.

The only thing I can imagine, unless it is a "UFO", would be some kind of test of high altitude photography.

If you know of an explanation I would appreciate hearing from you, otherwise we will claim that we have seen a "UFO". Naturally, I wanted to check this out before we feel sure we actually have witnessed something that doesn't have a common technological explanation.

Very truly yours,

[redacted]

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

17 (Day) June (Month) 1967 (Year)

2. Time of day: about 10 (Hour) 30 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object? 1½ miles downriver from Georgetown, Md. on the Sassafras River

Nearest Postal Address | City or Town | State or County

5. How long was object in sight? (Total Duration) _____ (Hours) _____ (Minutes) 10 To 30 seconds (Seconds)

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes ____ No X (flashing),

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
(a. Bright)
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FTD FORM OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter at first
b. Dimmer at close
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

Between 1st magnitude star & Venus

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other _____

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

14. Did the object disappear while you were watching it? If so, how?

Yes. Faded into haze.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

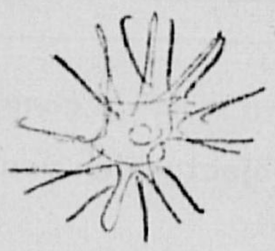
a. Sound none

b. Color bright white

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

About same size or smaller - size of Venus to start

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.



like a bright star

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
(c. Outdoors)
d. In an airplane (type)
e. At sea
f. Other (At anchor on a boat)

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
(c. In open countryside?)
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

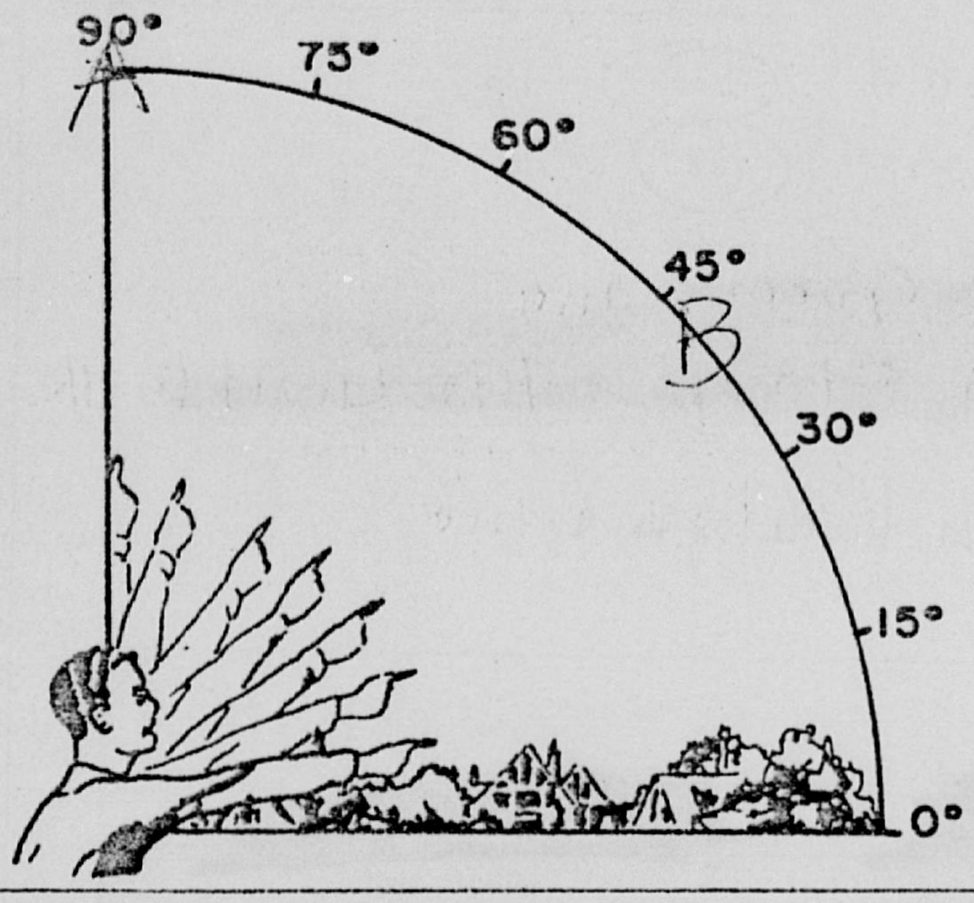
25. Did you observe the object through any of the following?

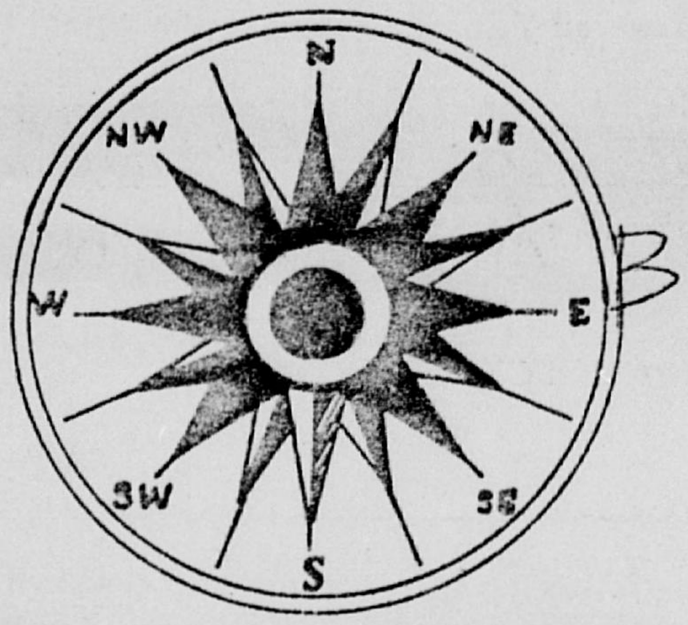
a. Eyeglasses Yes (No)
b. Sun glasses Yes (No)
c. Windshield Yes (No)
d. Window glass Yes (No)
e. Binoculars Yes (No)
f. Telescope Yes (No)
g. Theodolite Yes (No)
h. Other _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

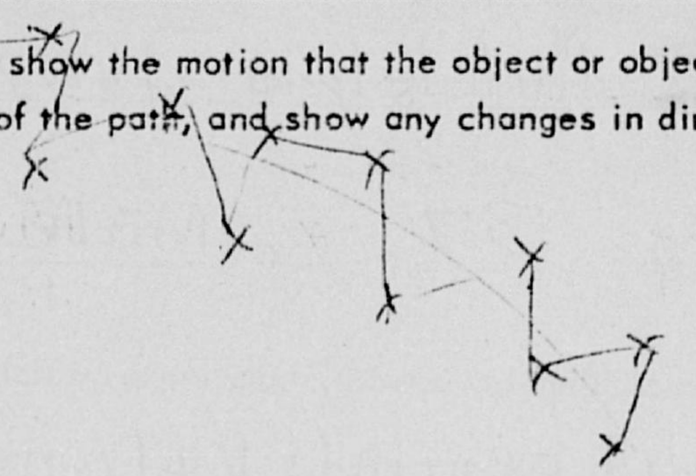
Bright star

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.



29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes No

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addr[redacted]

Review of the flight records on file this station reveals that a C-118A, NASA 428 was conducting tests on the REEVES Ranging and Tracking System in the vicinity of Friendship Airport from June 18/0200 GMT to 18/0515 GMT. This would place this aircraft in the area of the reported sighting on 17 June 2230 EDT.

These tests were conducted at varying altitudes of 5000 to 12000 feet, displaying a 4050 watt tracking light located on the bottom of the aircraft.

Proposed reply to letter from [redacted] July 24, 1967 (Sighting 4 Jun 67)

Dear [redacted]

Reference your recent letter in which you requested information on unidentified flying objects.

With the information which you submitted in your letter, it would be extremely difficult to offer an explanation on your observation. Essential data such as flight characteristics, maneuvers, and duration of sighting are quite important in a comprehensive evaluation.

Also, it is not possible for us to undertake an investigation into the cause of your observation, since your sighting occurred outside the limits of the United States.

The inclosed information on the Air Force's program on unidentified flying objects should be of interest to you.

Thank you for bringing your observation to our attention. We hope that your visit to the United States is pleasant.

Dear Sir,

I am an Irish Student working in the United States for the Summer. I am extremely interested in UFO's, and I believe that you issue certain articles and booklets to the general public. If this is so perhaps you could send me the material available. After July 29 my address will be:

[redacted]
Litchfied, Conn.

I am seriously interested in the UFO mystery, and have read books and articles by Hynek, Vallée, Menzel, Ruppelt, Adamski, and many others. I have seen one UFO. It looked like a pencil-shaped cloud (about the size of a pencil held at arm's length). Very regular shape. It covered almost half the sky (90° — 20° above horizon) in about 10-15 seconds. It was cloud coloured, and completely silent. It moved due East. My sighting occurred in South Dublin, on June 4, 1967 10.45 p.m.

If you are interested I could (may) make out a more complete report. Hoping I am not causing you too much trouble, I remain, Sincerely

Dear [redacted]

This replies to your recent letter concerning the observation of an unidentified flying object (UFO).

Without essential information, such as detailed flight characteristics, angular velocities, or weather information, we are unable to undertake a scientific investigation. Had you contacted the UFO investigator at your nearest Air Force base immediately, an on-the-spot investigation would have been possible.

We hope the inclosed Project Blue Book report may be of help to you in identifying your observation.

Thank you for reporting your observation to the Air Force.

Dear Sirs,

I would like to report a UFO Sighting. It happened in June of 67, but I have been rather reluctant to report it. It was the 6th, at about 7:00.

I was going out to look through my telescope. It is a refractor, a three inch.

Just as I was going out I noticed a bright object passing from east to west very fast. It was only in veiw for about three seconds.

It was about the size of an egg at arms length, the shape was oblong, it was white with a blue haze around it.

It could have been a meteor or comet. I would like to know if there were any comets in the Durango area at the time.

I am twelve years old. I have read about them many times, and I know I didn,t see swamp gas, or a hallucination , or satellite.

Sincerely,

Proposed reply to letter from [redacted] 15 June 1967 (sighting 7 June)

Dear [redacted]:

Reference your recent observation of an unidentified flying object.

The Project Blue Book office has received no information from Chanute Air Force Base, Illinois, concerning your observation. If the base UFO investigator is able to determine what was responsible for the sighting, then the report is not forwarded to our office. The base investigator is in a much better position to quickly investigate sightings from your area than members of the Project Blue Book office.

If the Chanute AFB investigator found that an aircraft was in the immediate area making instrument landings then this could have been what you observed. Such aircraft on instrument missions have been responsible for UFO sightings in the past.

If any alien craft had been in the area, our radar sensors and our aircraft crews would have certainly detected such an event. We have received no additional reports from your area on the date of your sighting.

Dear Sirs:

I'm printing because I have the most unreadable writing. On June 7, 1967 at Holy Trinity Catholic school during 11:30 - 12:30 recess a U.F.O. was sighted and it caused havoc in the entire school. I am a 6th grader and our class phoned W.C.F.L., a local radio station but they gave it no concern. So some of us went and reported it to the police. The police also gave no concern. But a local newspaper, the graphic, sent over a reporter who interviewed some of us about it. When first seen at recess it was about the size of a small stone. But on the way back from the Police Station Joseph Barrett and myself saw it again in the shape and size of a football. It dropped something from its bottom and the disappeare

It looked like a star, a large star, the whole time. It twinkled and remained in the same place for about fifteen seconds, long enough for me to make my first. It then traveled rapidly across the sky so I attacked it. At first I didn't think it was really moving, but I measured it from the distance it was from a tree. It moved slowly at first, then picked up speed. It was last behind a little bit of cloud on a hill and they didn't appear on the other side. I moved my head so that I could see behind the cloud and noticed it was gone. I was left with the thought that it had changed direction and gone into space. This is probably imagination, but it is a very strong feeling.

June 19, 1967

Gentlemen,

I wish to inform you of an Unidentified Flying Object sighting on the night of June 16, 1967 at 11:35 P.M.

Two of my friends, [redacted] Street and [redacted] Street were sleeping out with me in Larry Raykovics' backyard. It was a cloudy night and neither the stars nor the moon were visible.

Larry and I were wearing eyeglasses and facing the southwest. Randy doesn't wear glasses and was facing the opposite direction (northeast). I first saw it in the southwest and I told Larry to look at the light, but it suddenly moved faster than anything I have ever seen into the northwestern sky where it faded out and lost speed, but a split second later it appeared again doing a 45° angle turn.

it did these split second manuevers for about 10 seconds in the northwest (suddenly slowing and fading then reappearing) until it suddenly made a long run towards the south going extremely fast. (In the middle of this run it slowed and faded, then did another long run (still southward) and disappeared. (we think it went above the clouds). (manuevers)

I would like to mention the fact that its manueuvers were very short runs except for the one to the south. It was a bright white color (brighter and slightly larger than the planet Venus which we had been watching the previous weeks) and we heard no sound.

I have the Look Magazine booklet on flying saucers and I am sending you the U.F.O. form in the back. If you wish for more information please send it to me.

Sincerely,

[redacted]

34. Date you completed this questionnaire: 19 (Day) June (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

all three of us saw it at the same time and place and agree it is not something ordinary or from earth, and we would not kid you about this kind of thing. There is a letter enclosed to tell you more. The UFO's path was very erratic and it always moved in a straight line, it never went in a curve but did angles going in and coming out straight.
