[REDACTED]
McKeesport, Pennsylvania 15131
May 19, 1967

Dear Major Quintanellar

I am writing to you for information on UFO's.

I became interested in them last year. I started to buy all the information I could on them.

Last week when [REDACTED] a friend of mine and I were walking home from school we saw what we thought was a helicopter for K.Q.V. a radio station in Pittsburgh Pa. which has traffic reports during the rush hour. As we watched it for a while we noticed that it was at a higher altitude than a helicopter could be and there was no sound at all. About a minute later a plane came in from the east to land at Greater Pittsburgh Airport then it started to move slowly away then gained speed and headed north.

We can't say it was a UFO but it sure wasn't a plane like I have ever seen.

Respectfully yours,

[REDACTED]
Wa. [REDACTED]

164 U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

10 9 MM 1967
Day Month Year

2. Time of day:

10 53
Hour Minutes

(Circle One): A.M. or P.M.

disappeared at 1108 CDT

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

sure 1030 → still visible going out
Hours Minutes Seconds

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

if sight now at
about 1055

5.1 How was time in sight determined?

5.2 Was object in sight continuously?

Yes X No _____

getting dimmer with time

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a. Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

2 times as bright as any visible star observed in his
telescope

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time?
- b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?
- d. Give off smoke?
- e. Change brightness?
- f. Change shape?
- g. Flash or flicker?
- h. Disappear and reappear?

<u>Yes</u>	No	Don't know
Yes	<u>No</u>	Don't know
Yes	<u>No</u>	Don't know
Yes	<u>No</u>	Don't know
<u>Yes</u>	No	Don't know
Yes	<u>No</u>	Don't know
Yes	<u>No</u>	Don't know
Yes	<u>No</u>	Don't know

14. Did the object disappear while you were watching it? If so, how?

No, it disappeared slowly over horizon as he talked to me

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't Know.

IF you answered YES, then tell what

it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't Know.

IF you answered YES, then tell what

in front of: _____

17. Tell in a few words the following things about the object:

a. Sound

No

b. Color

with white red glow at bottom when observed with telescope
before disappearing could see red with naked eye

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

all, bigger than any current star

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

Basically round during the entire sighting

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

23. Were you (Circle One)

a. In the business section of a city?

b. In the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

e. Binoculars

Yes

No

b. Sun glasses

Yes

No

f. Telescope

Yes

No

c. Windshield

Yes

No

g. Theodolite

Yes

No

d. Window glass

Yes

No

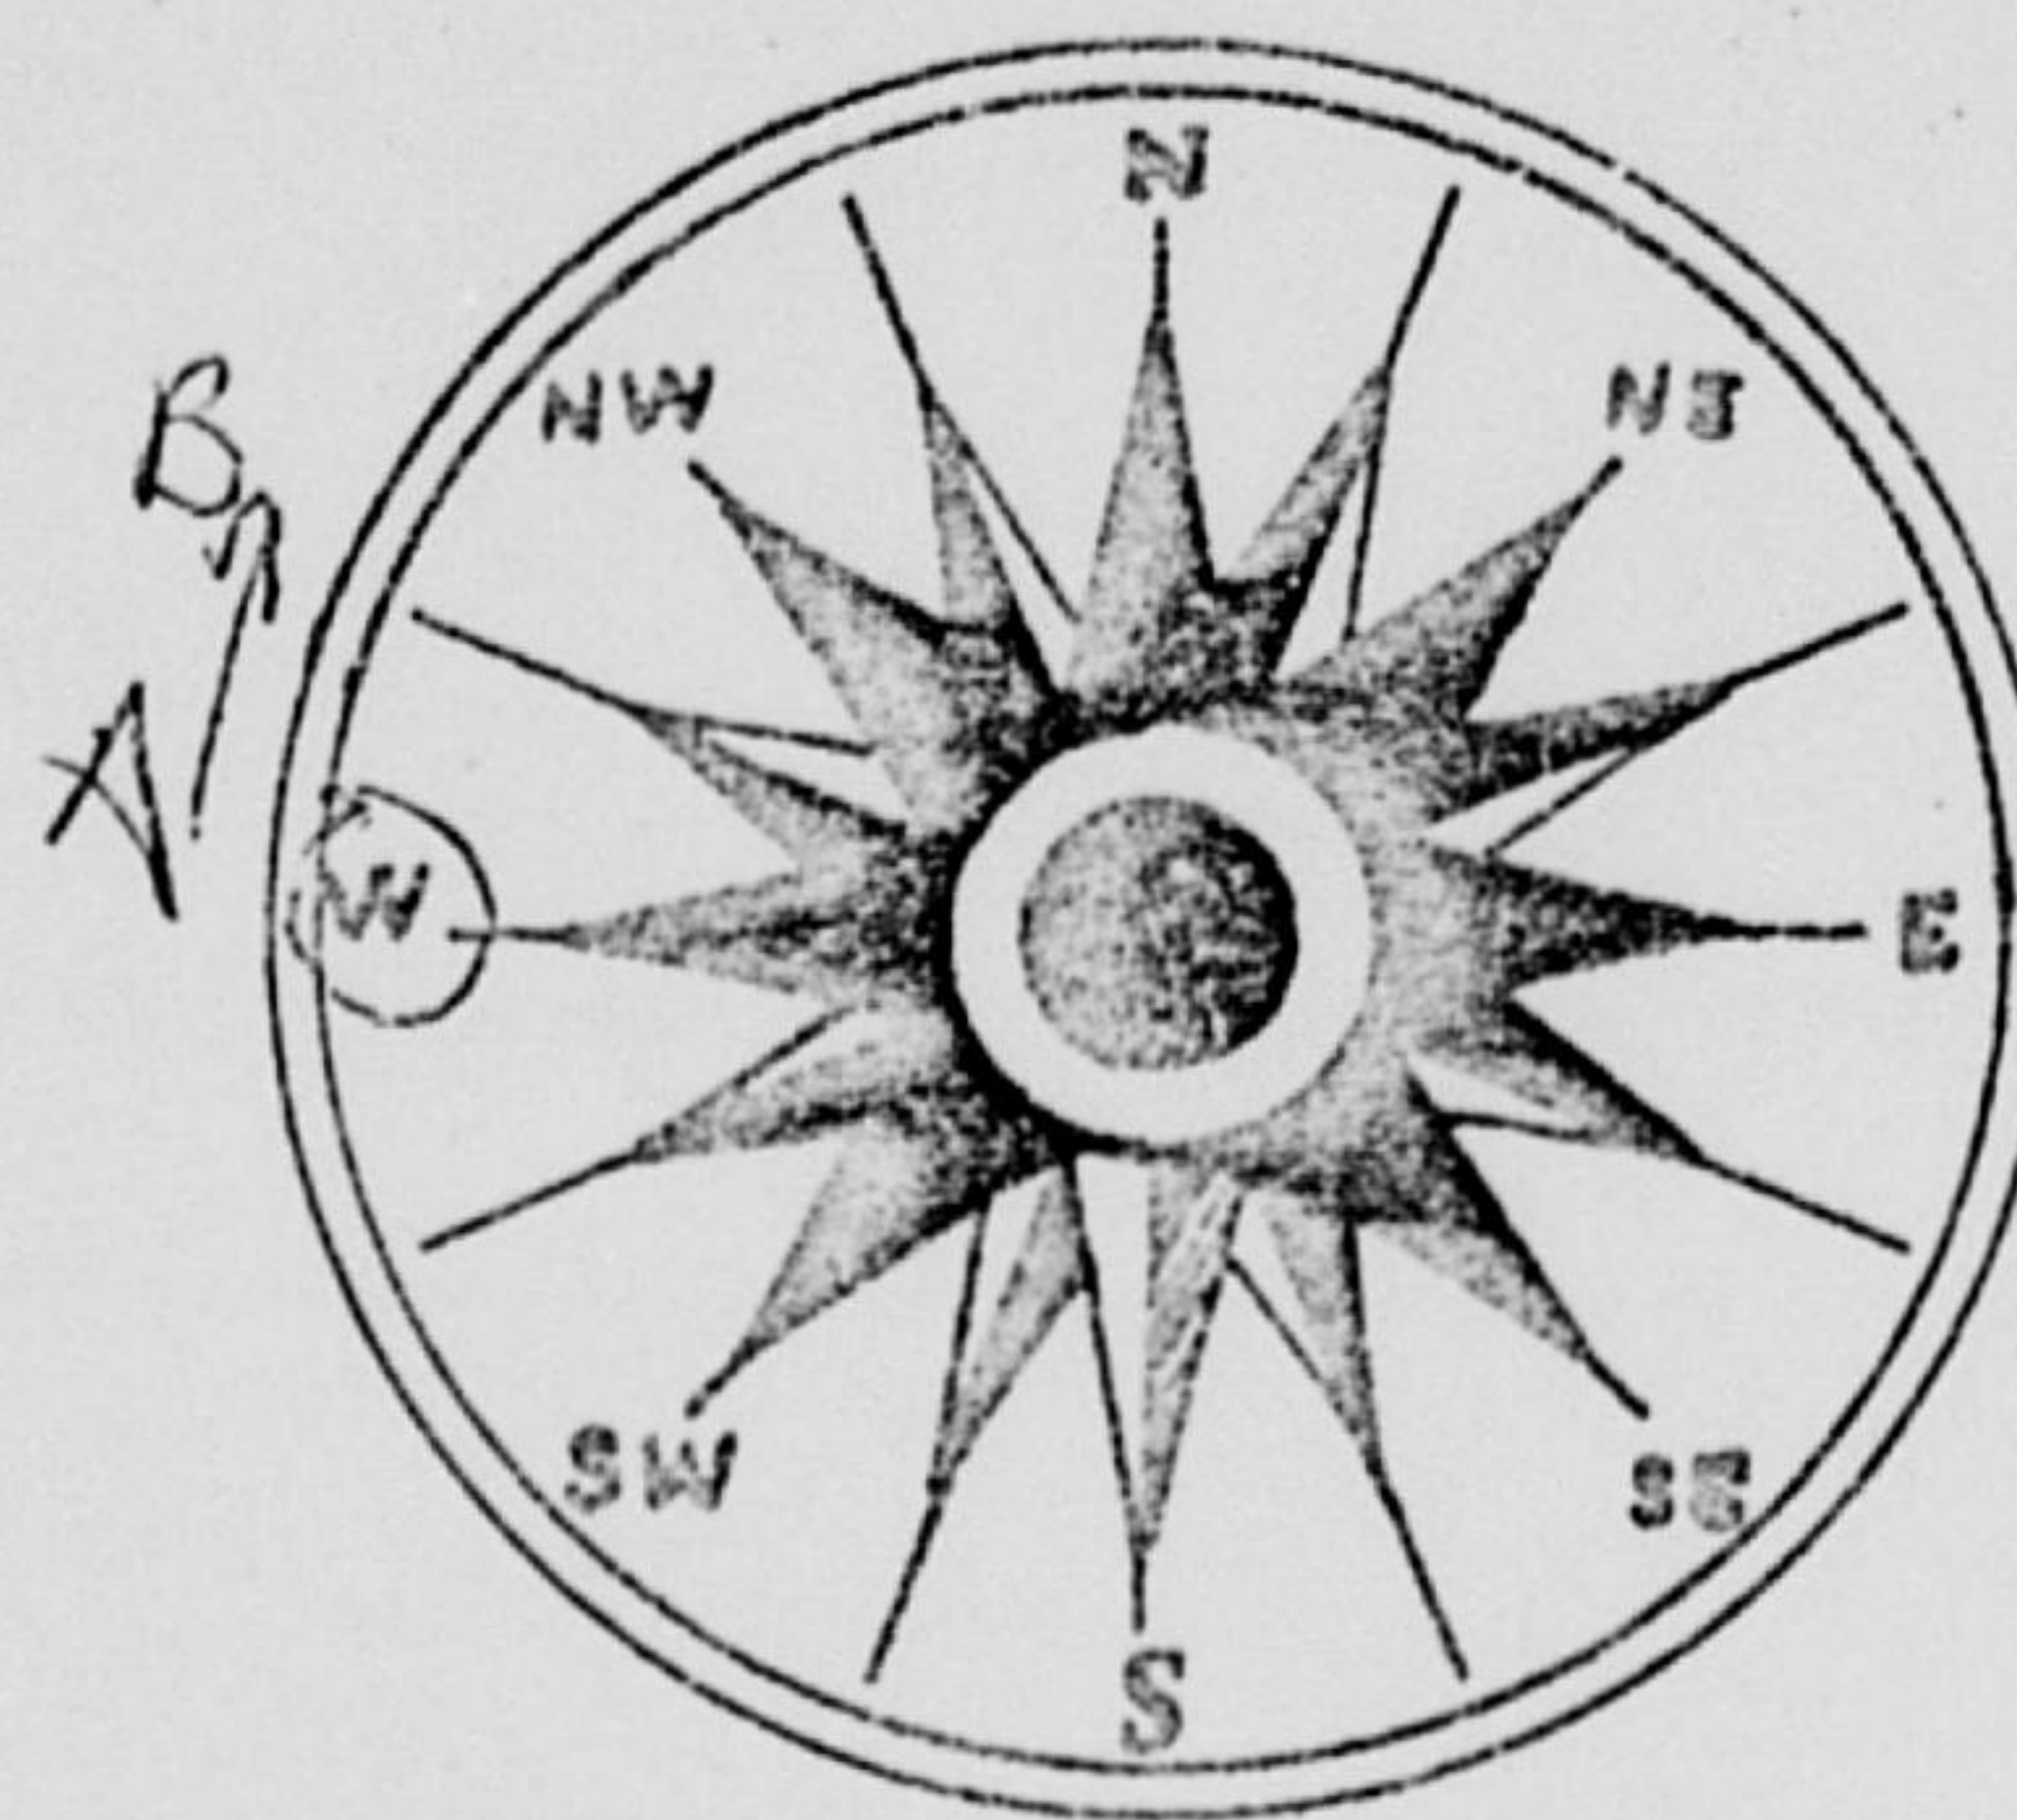

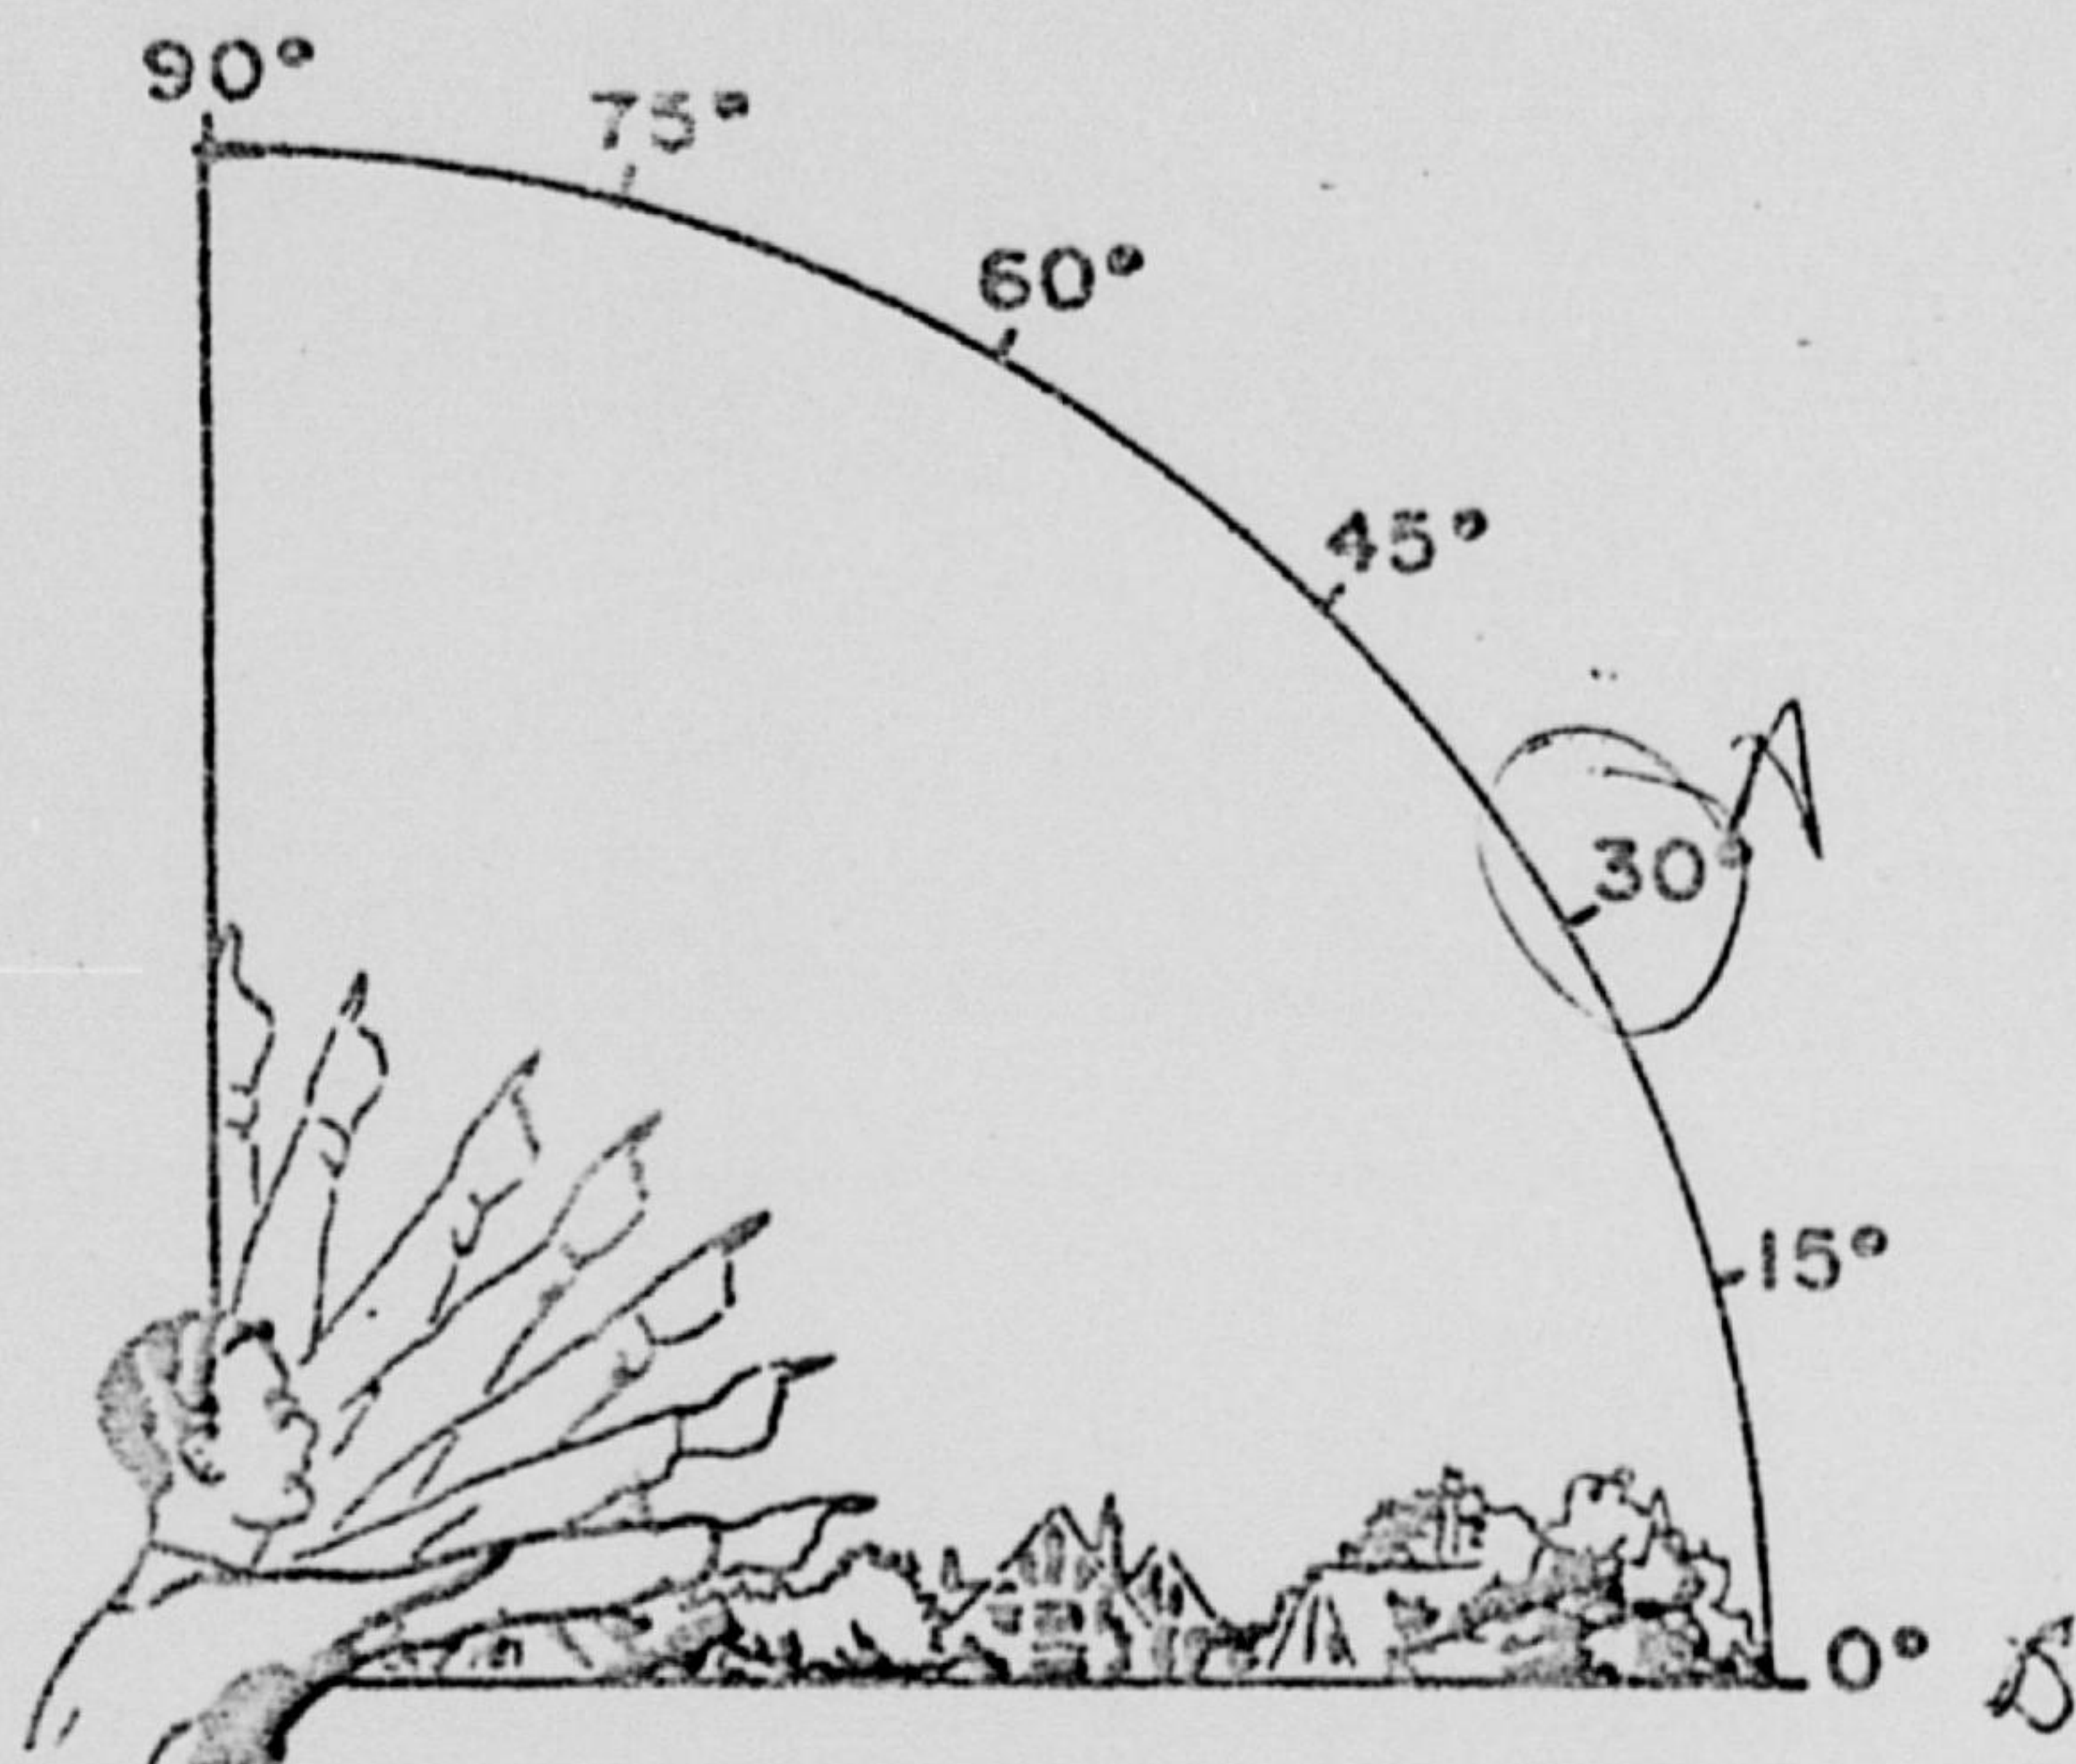

h. Other

Not sure

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

No

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No

31. Was anyone else with you at the time you saw the object? (Circle One)

(Yes)

No

31.1 IF you answered YES, did they see the object too? (Circle One)

(Yes)

No

31.2 Please list their names and addresses:

Wife
Mrs [REDACTED] Mr [REDACTED]

32. Please give the following information about yourself:

NAME

Last Name

First Name

Middle Name

ADDRESS

Street

City

Zone

State

TELEPHONE NUMBER

AGE

SEX

317 area

Indicate any additional information about yourself, including any special experience, which might be pertinent.

Makes a practice of observing satellites and stars through telescope. This object is different than anything he has ever seen.

33. When and to whom did you report that you had seen the object?

Day

Month

Year

FED (TDETR)
CSAF (AFEDC)
CSAF (SAF-OI)

Univ of Colo (Dr. Condon)

Attachment 1 is furnished for the benefit of the diagrams reported by the individual. The following additional information required by AFR 80-17 is furnished:

a. Weather and Winds-Aloft Conditions:

(1) Day - good visibility - cloudy, but no cloud interference.

(2) Winds: 6000 - 110 degrees at 6 knots
10000 - 250 degrees at 17 knots
16000 - 260 degrees at 46 knots
20000 - 270 degrees at 56 knots
30000 - 260 degrees at 130 knots
50000 - 280 degrees at 56 knots
80000 - Not available

(3) Ceiling: Estimated 7000 feet broken, 14000 feet overcast

(4) Visibility: 10 miles

(5) Cloud cover: 10 tenths

(6) No thunderstorms

(7) Vertical temperature gradient: Not available

b. Meteorological, astronomical activity/condition: N/A

c. Interception or identification action taken: N/A

d. Air traffic or balloon releases which might possibly account for the sighting: Unknown.

e. Assistant Chief, Information Division, [REDACTED]
2nd Lt., 1st Fighter Wing, Selfridge AFB, Michigan, 48045. Area Code
313, Office phone: 465-1241, Ext. 24224/24225, Home phone: 465-1084.
Miss Harriet Noble's UFO Report is quite detailed. Although her report

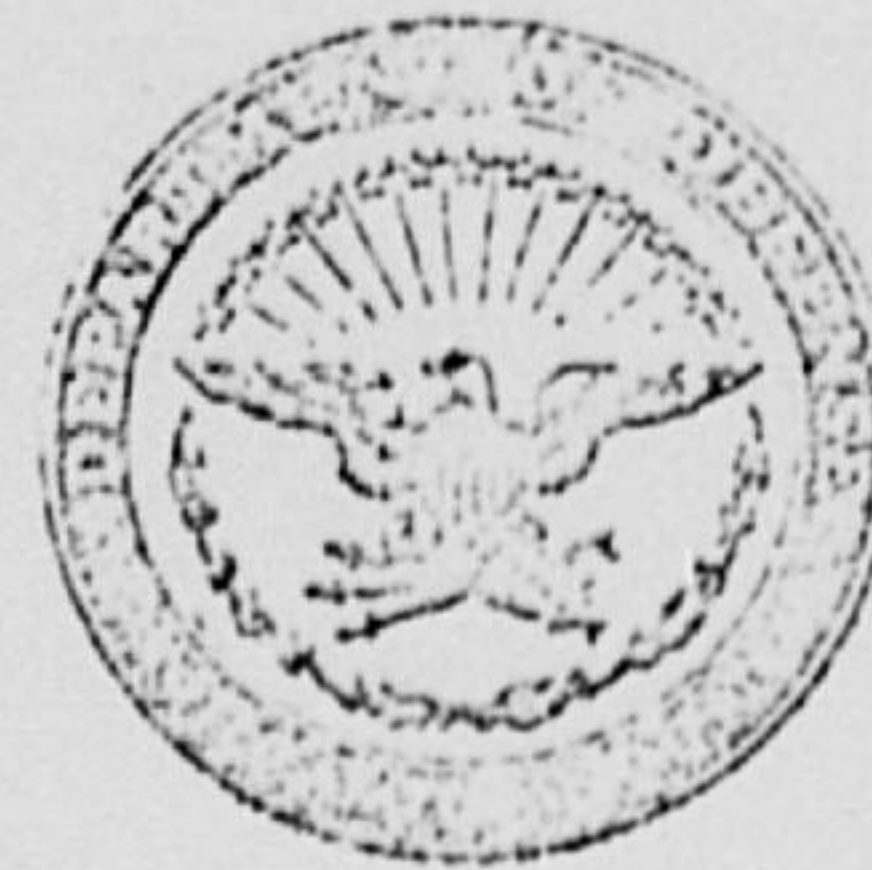

is very comprehensive, I can see no explanation. Since the observer seems to be above average in intelligence, the report should be considered valid.

SUBJECT: UFO Data

TO Miss [REDACTED]
[REDACTED]
Detroit, Mich 48204

1. Request you complete paragraph 2 below and return this letter as soon as possible to the 1st Combat Support Group (1CBOT), Selfridge AFB, Mich., 48045.

2. UFO Reporting Data:

a. Description of the Object(s):

(1) Shape ELLIPTICAL (45°) AT FIRST - ELLIPTICAL AT LAST ^{WARRUCK} _{VIEW.}

(2) Size compared to a known object (use one of the following terms: (30°) Head of a pin, pea, dime, nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball) held in the hand at about arm's length:

BETWEEN A QUARTER & A FIVE CENT PIECE

(3) Color DULL METAL (?) GRAY

(4) Number 4

(5) Formation, if more than one CHANGING

(6) Any discernible features or details JUST AN ELLIPSE

(7) [?] Tail, ^{NONE} trail, or ^{NONE} exhaust, including size of same compared to size of object(s) SMALL DOT ON REAR - A SMALL BUMP

(8) Sound; if heard, describe sound NONE - ROLLED

CAR WINDOW DOWN PURPOSELY TO HEAR AND SEE

(9) Other pertinent or unusual features ALL WERE SAME SIZE AT ANY ANGLE - NO WINGS!!!! VERY SHORT & STUBBY.

b. Description of Course of Object(s):

(1) What first called the attention of observer(s) to object(s)?

SUDDEN APPEARANCE IN LINE OF VIEW

(2) Angle or elevation and azimuth of object(s) when first observed.

WAS BETWEEN 40° & 45° ELE. & HEADING WEST (small figure)

(3) Angle or elevation and azimuth of object(s) upon disappearance.

35° & 40° GOING NW

dek

OOOO Phase I
 OOOO Phase II
 OOOO Phase III
 OOOO Phase IV
 OOOO Phase V
 OOOO Phase VI
 OOOO Phase VII
 OOOO Phase VIII
 OOOO Phase IX
 OOOO Phase X
 OOOO Phase XI

in phase I, II, III & VII
 air space was disturbed
 very easily handled.

(4) Description of flight path and maneuvers of object(s).

STRAIGHT WESTERN FLIGHT WITH CHANGING MANEUVERS.

(5) How did object(s) disappear? Instantaneously to North etc.?

DIDN'T SEE THEM DISAPPEAR

(6) How long were objects visible? (Be specific, 5 minutes, 1 hour)

APPROXIMATELY 1 TO 2 MINUTES

c. Manner of Observation:

(1) Use one or any combination of following items: ground-visual, air-visual, ground-electronic, air-electronic. (If electronic, specify type of radar). GROUND-VISUAL

(2) Statement as to optical aids (telescopes, binoculars etc) used and description thereof. PRESCRIPTION GLASSES

(3) If sighting occurred while air-borne, give type of aircraft, identification number, altitude, heading, speed and home station.

d. Time and Date of Sighting:

(1) Eastern Standard Time and Date of sighting 19C APRIL 1964

(2) Light conditions. (Use one of the following terms: night, day, dawn, dusk.) DAY- GOOD VISIBILITY- CLOUDY- BUT NO CLOUD INTERFERENCE

e. Location of Observers. Give exact latitude and longitude of each observer and/or geographical position. ON Southfield Rd- headed North- between 10 & 11 mile Road

f. Identifying Information on Observer(s):

(1) Civilian - Name, age, mailing address and occupation.

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

15 May 1967
Day Month Year

2. Time of day:

Hour

Minutes

(Circle One):

A.M.

or

P.M.

3. Time Zone:

(Circle One):

- a. Eastern
- b. Central
- c. Mountain
- d. Pacific
- e. Other _____

(Circle One):

- a. Daylight Saving
- b. Standard

4. Where were you when you saw the object?

Nauvoo Ill.
Nearest Postal Address

Nauvoo
City or Town

ILL. HANCOCK
State or County

5. How long was object in sight? (Total Duration)

Hours

Minutes

Seconds

a. Certain

b. Fairly certain

c. Not very sure

d. Just a guess

5.1 How was time in sight determined?

cf had a watch

5.2 Was object in sight continuously?

Yes

X

No

6. What was the condition of the sky?

DAY

- a. Bright
- b. Cloudy

NIGHT

- a. Bright
- b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):

- a. In front of you
- b. In back of you
- c. To your right

- d. To your left
- e. Overhead
- f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- ☒ c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- ☒ d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- ☒ a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- ☒ a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- ☒ a. Solid
- b. Transparent
- c. Vapor
- ☒ d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- ☒ a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

Sun during a sunset (red)

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - ☒ c. Sharply outlined
 - d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time?
- b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?
- d. Give off smoke?
- e. Change brightness?
- f. Change shape?
- g. Flash or flicker?
- h. Disappear and reappear?

☒ Yes	No	Don't know
☒ Yes	No	Don't know
Yes	☒ No	Don't know
Yes	☒ No	Don't know
Yes	☒ No	Don't know
Yes	☒ No	Don't know
☒ Yes	No	Don't know
Yes	☒ No	Don't know

14. Did the object disappear while you were watching it? If so, how?

Yes suddenly, with No reason

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't Know.

IF you answered YES, then tell what

it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't Know.

IF you answered YES, then tell what

in front of: _____

17. Tell in a few words the following things about the object:

a. Sound

None, it was far away (1 mile) approx.

b. Color

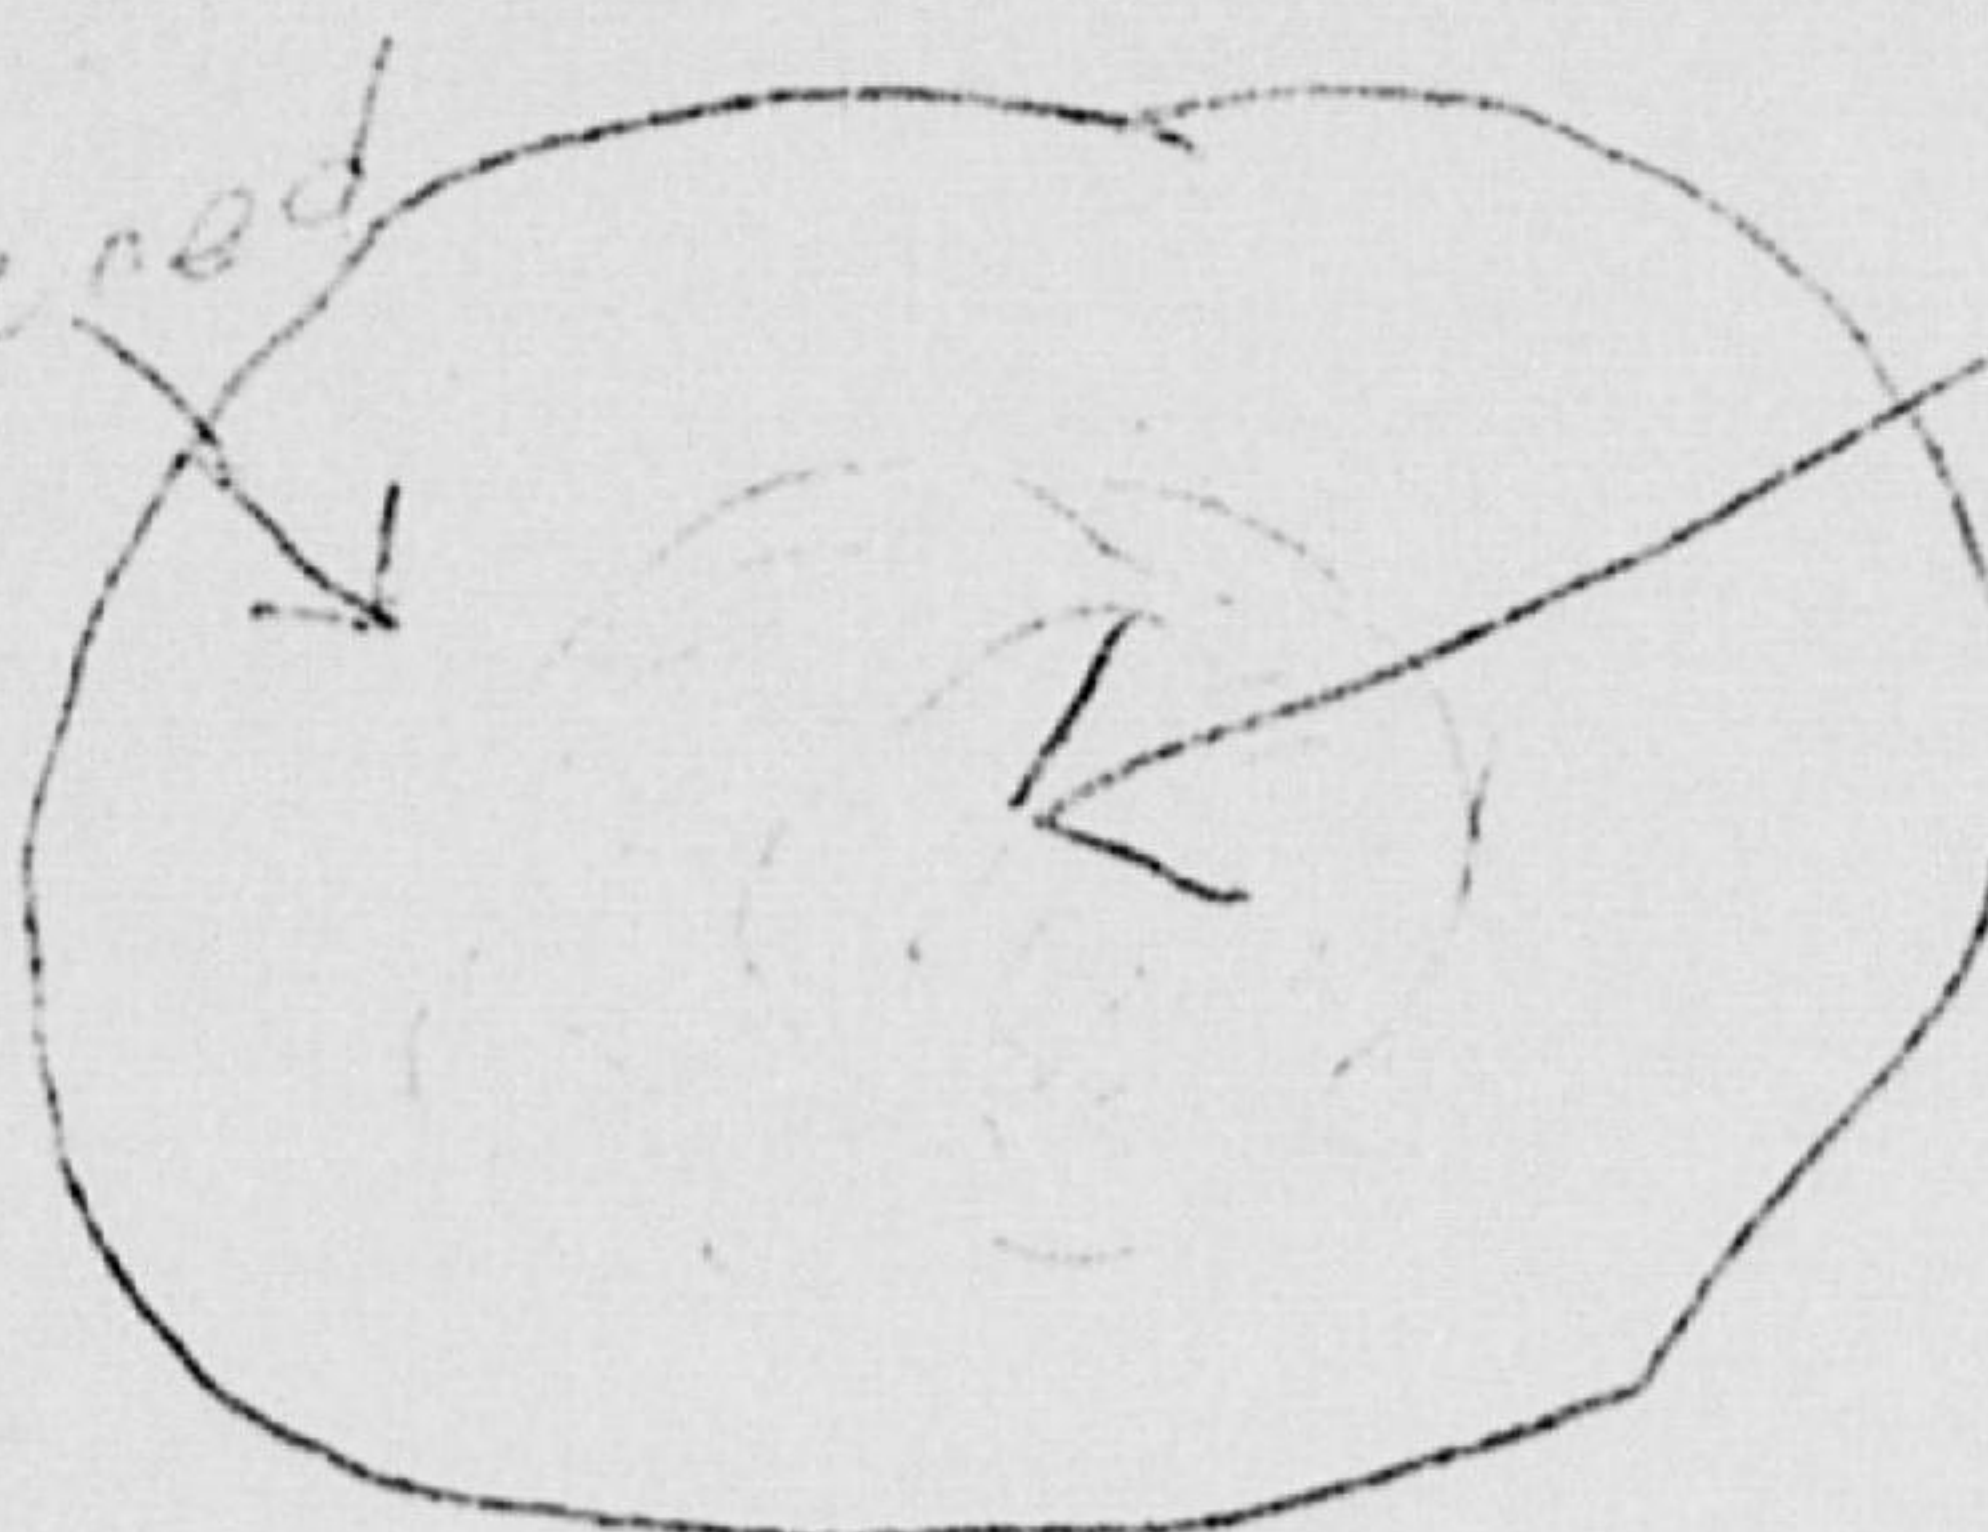

red & blue

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

Blue
glimmered
it was flying
side wards, with
top in middle

red stood out

AT 1 mile away,
it was about
1 1/2 inches in
diameter

20. Do you think you can estimate the speed of the object?

(Circle One) Yes ☒ No

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) ☒ Yes No

IF you answered YES, then how far away would you say it was? 1 mi. / 2

22. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- ☒ c. Outdoors
- d. in an airplane (type)
- e. At sea
- f. Other _____

23. Were you (Circle One)

- a. In the business section of a city?
- ☒ b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

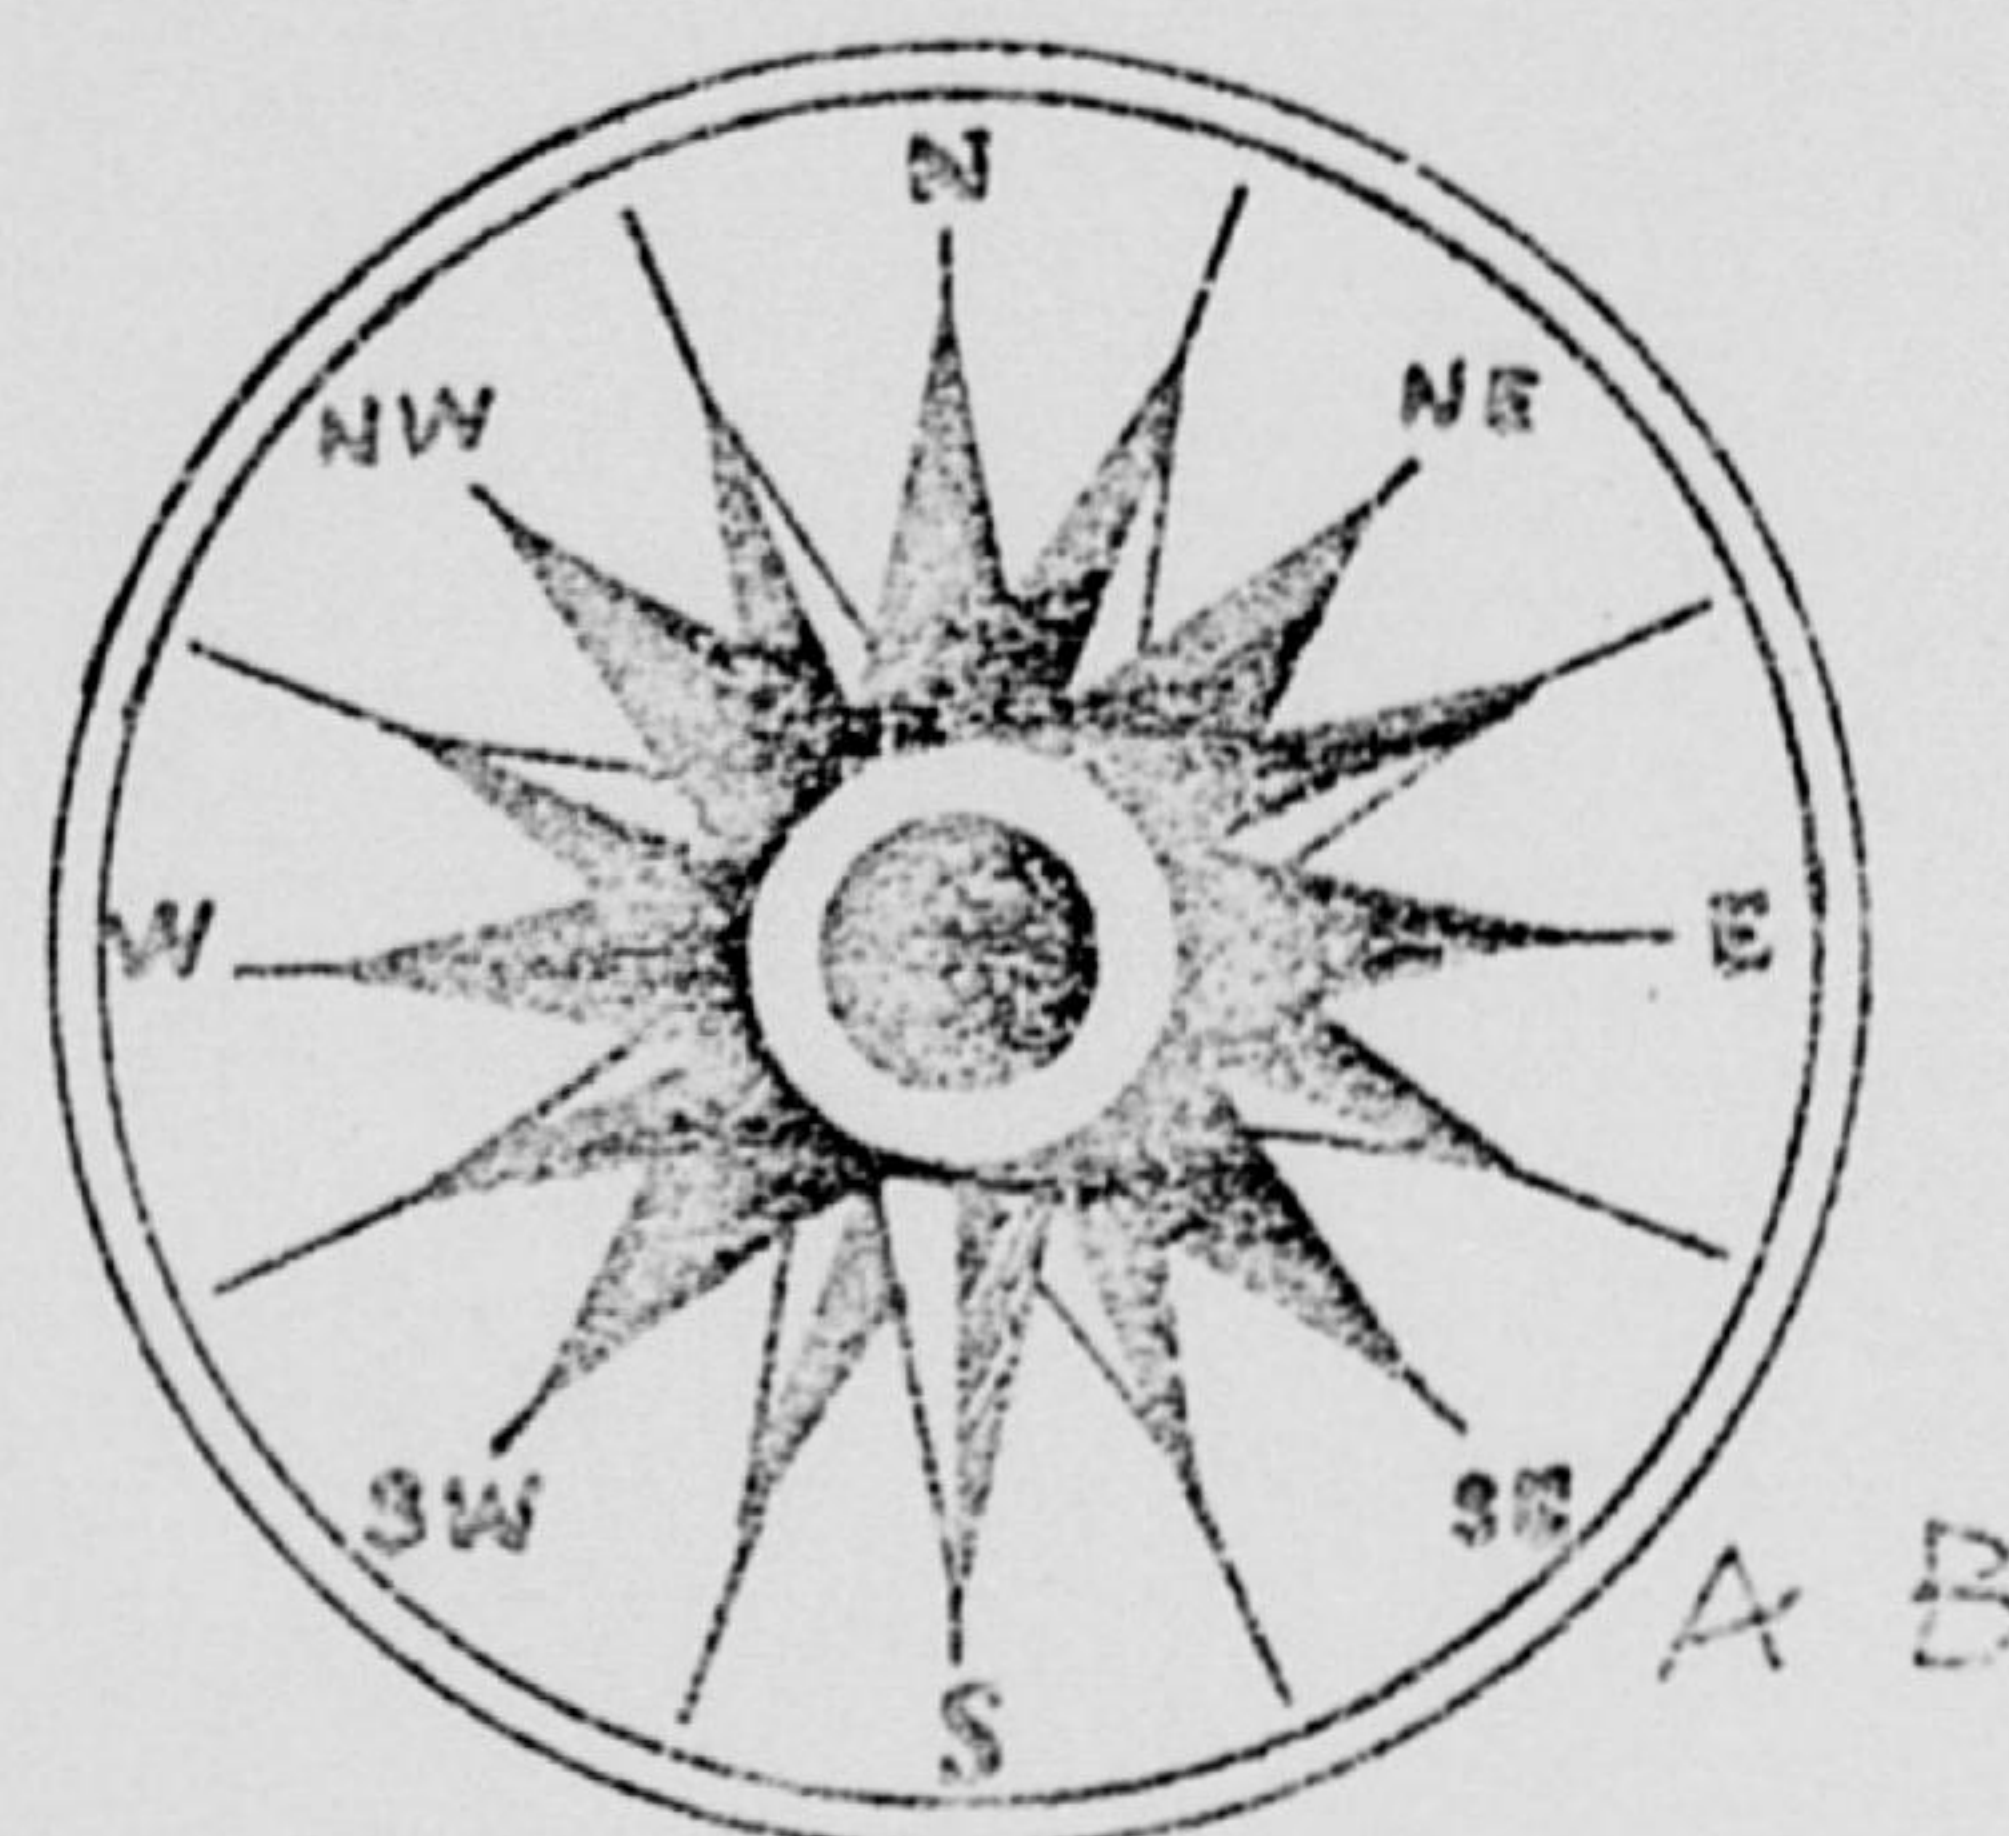

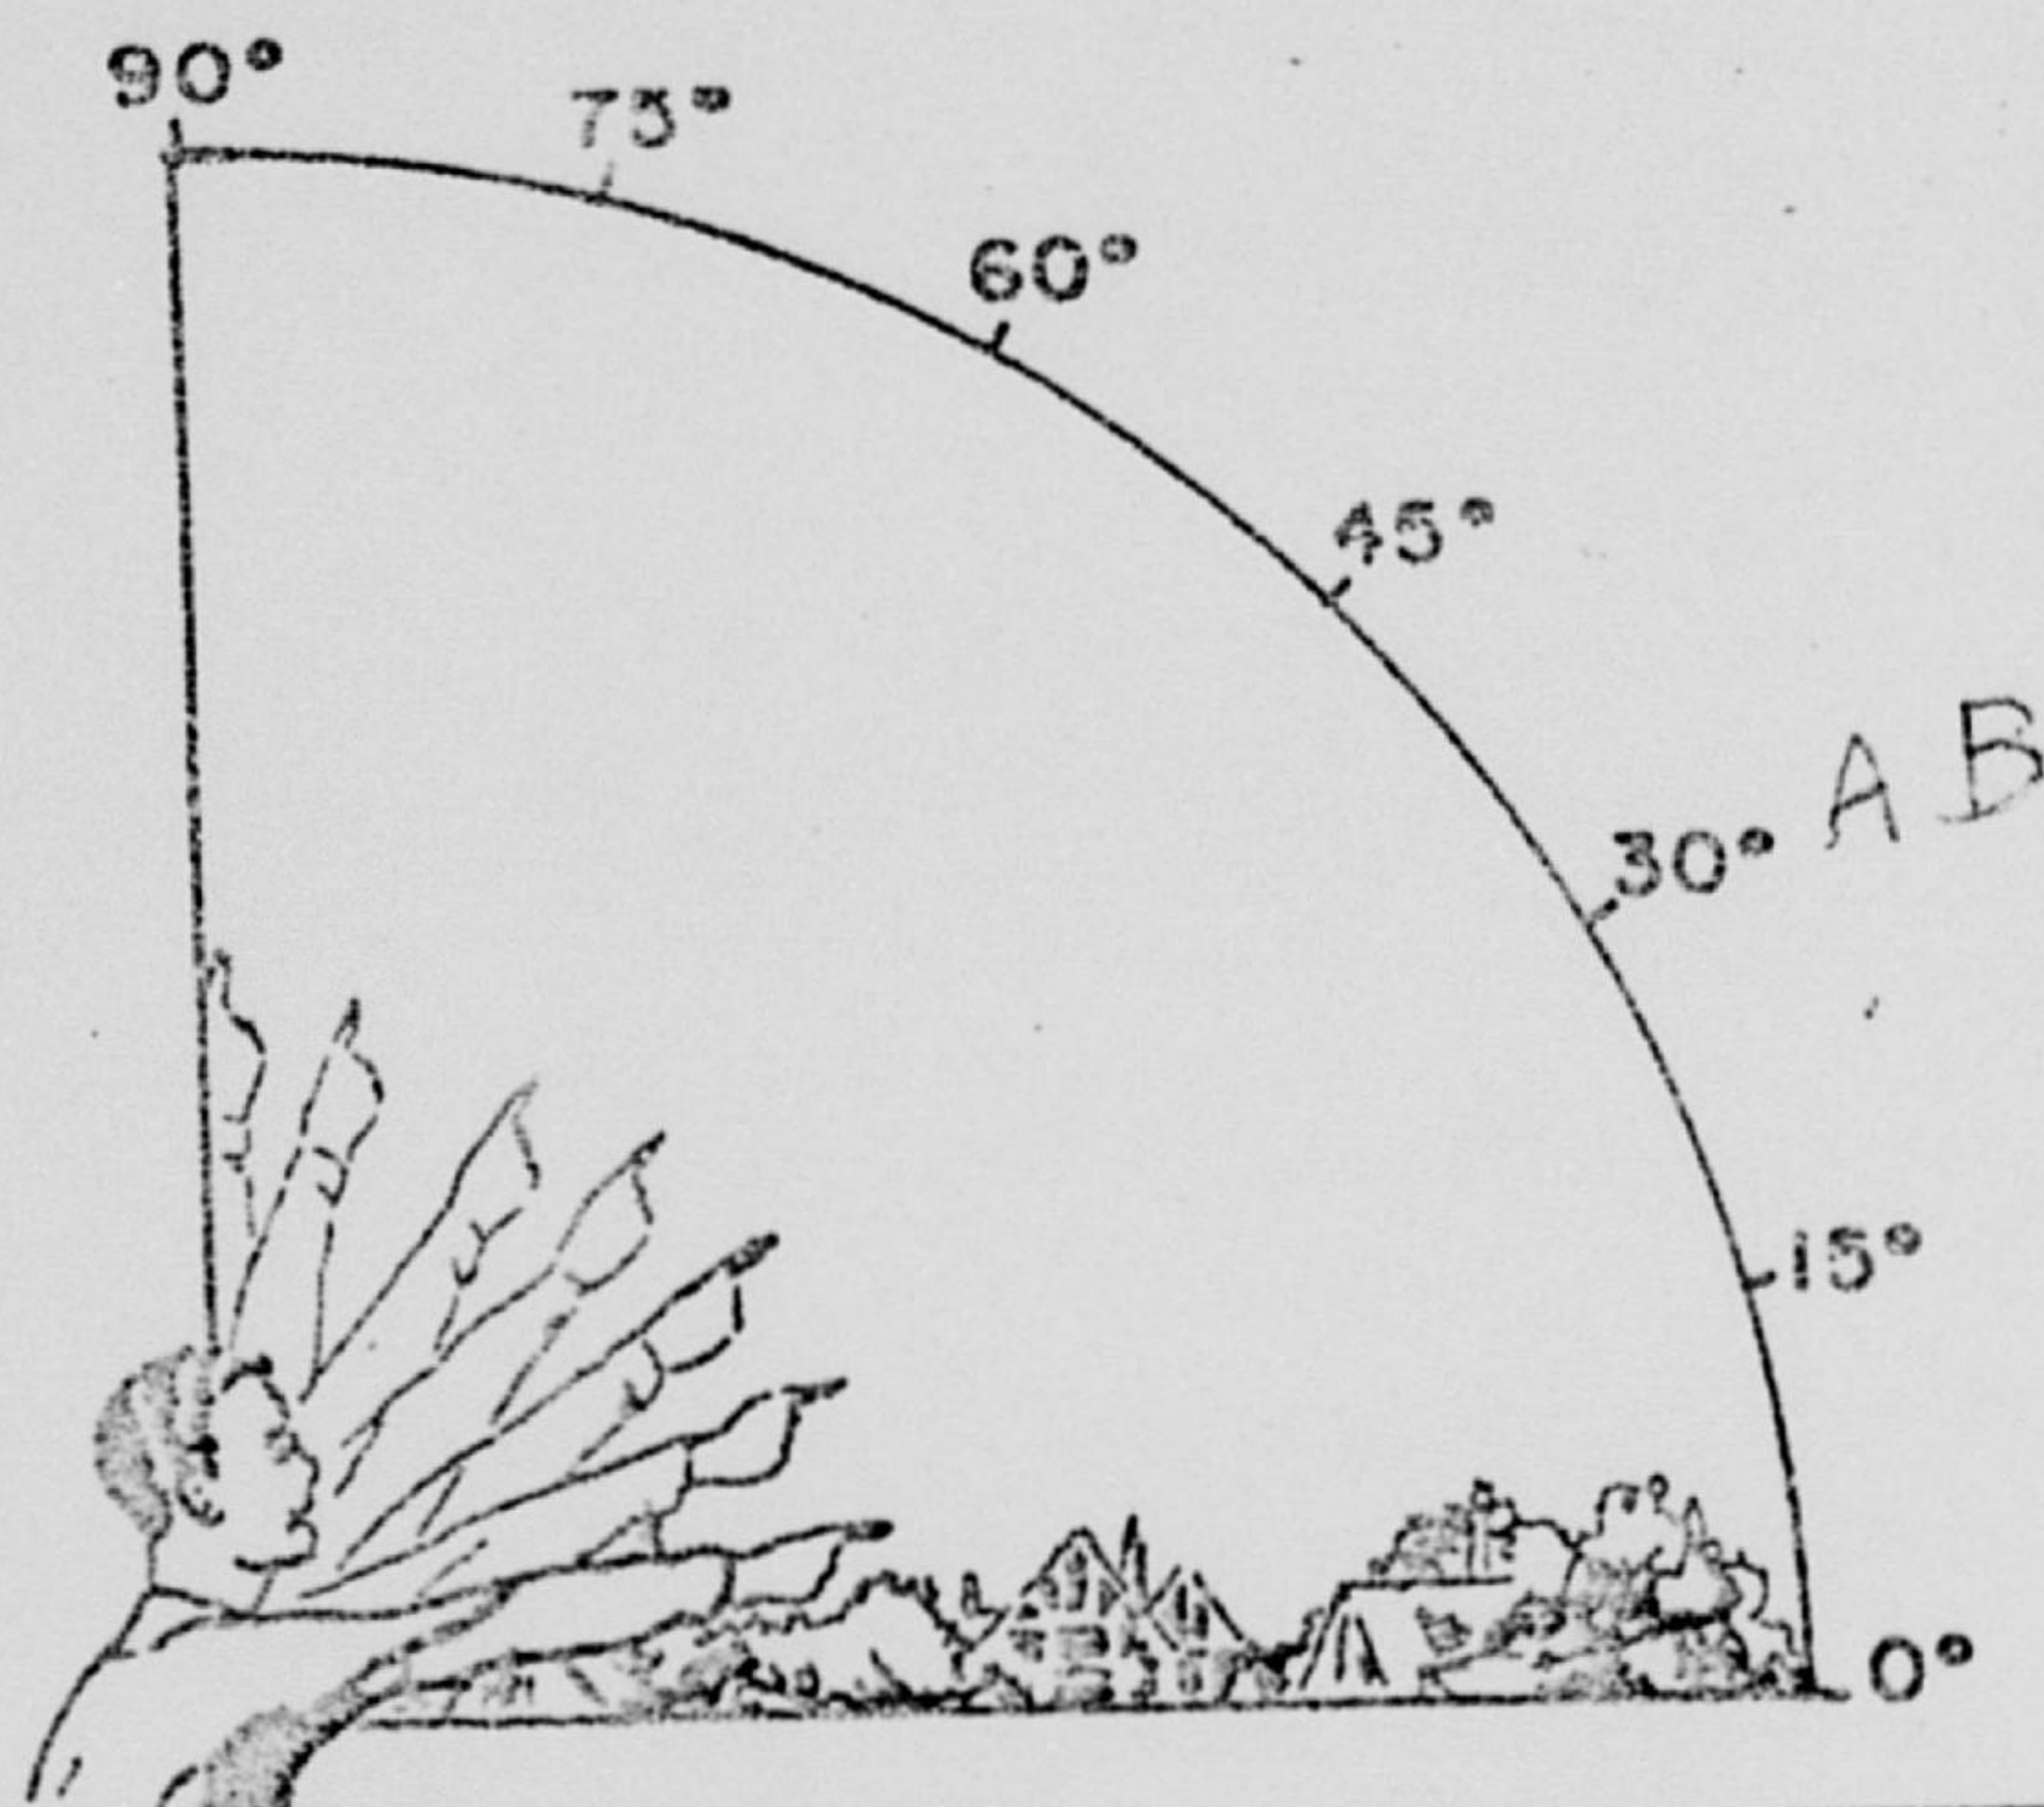

(Circle One) Yes No

25. Did you observe the object through any of the following?

- | | | | | | |
|-----------------|-----|-------------------------------------|---|--------------------------------------|-------------------------------------|
| a. Eyeglasses | Yes | ☒ No | e. Binoculars | Yes | ☒ No |
| b. Sun glasses | Yes | ☒ No | ☒ f. Telescope | ☒ Yes | ☒ No |
| c. Windshield | Yes | ☒ No | g. Theodolite | Yes | ☒ No |
| d. Window glass | Yes | ☒ No | h. Other _____ | | |

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

It turned, and when I looked
it was gone

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

ND

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes

No

31.1 IF you answered YES, did they see the object too? (Circle One)

Yes

No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME

Last Name

First Name

Middle Name

ADDRESS

Street

City

Zone

State

TELEPHONE NUMBER

AGE

SEX

~~MALE~~ FEMALE

Indicate any additional information about yourself, including any special experience, which might be pertinent.

Dear [REDACTED]

This replies to your recent correspondence concerning your observation of an unidentified flying object. Without an exact date or comment concerning the flight characteristics, a positive identification cannot be made. Your report will be filed for information purposes only.

The Air Force has found no tangible evidence that proves extraterrestrial vehicles exist. After investigating over 11,000 cases since 1947, there has been a total lack of evidence to substantiate the existence of extraterrestrial vehicles flying in and out of our atmosphere.

We wish to thank you for reporting your observation to the Air Force.

Sincerely,

BARNETT B. YOUNG

Project Blue Book Information Office
Safai
Washington, D.C.

Dear Project Blue Book:

I recently wrote to you for Information on Unidentified Flying Objects. Don't get me wrong I got the information but enclosed in one of your book-lets was the thing, that people when they see such things, fill out and send back. I wasn't sure it was official but I filled it out and returned it. But I recieved no more iterrigation sheets as there is much more to the story. You already know I spotted a flying saucer but that isn't all. I was so sure it was a comet, meteor, ect. that (just for fun) I waved at it with my whole arm. Well there must have been some sort of window in it with some one in it looking out, Because the minute I started waving it stopped and hovered. Then it continued on it's path. I would have ran inside and got my camera to photograph it but I was so scared (as I've never seen such a thing) I ran inside, locked the door, and didn't exit until late the next morning. I really couldn't get a good clear picture of it because of the flashing and pulsating lights. I wasn't even sure it exsisted but now I am. The other night I was just ready to go to bed when I thought I would retreave my telescope and take a look at the stars. I took a peak through the blinds to see what to focus it on when I saw something. I couldn't even see it but I saw the lights that were attached and the seemed to be attached to something sqare shaped. I'd say it was airplane lights but they formed a square and it went much too fast. This was the third time I saw such I thing and I think you ought to do a little more about these things than recieve reports. People like me all over the world are scared stiff. I get the feeling they're following me and beleive me it's not funny to be in our shoes. Yes ours don't read this and say I'm a nut. WAKE UP, the world may be in a state of danger. One man (Mantell) has already been killed it could be that if you don't do something many more could die. Please send me more information. At least I can say one thing your organization is trying I'm sure you'll not let the world end.

Sincerely Yours,

Proposed reply to letter from [REDACTED], 7 May 1967

17 MAY 1967

Dear Mr. [REDACTED]

This letter is in response to your request for information regarding your sighting of an unidentified flying object at Brindisi, Italy, on May 1, 1967.

Our current policy is to investigate only those sightings occurring within the continental limits of the United States. We are, therefore, unable to make a comprehensive investigation of your sighting. However, the information you submitted will be made a part of our data base.

Thank you for your interest in the Air Force project concerning the investigation of UFOs. We are inclosing a copy of the latest report, as well as the slides you submitted.

Sincerely,

DAVID L. STILES

PALLONE SONDA O DISCO?

Oggetto misterioso nel cielo salentino

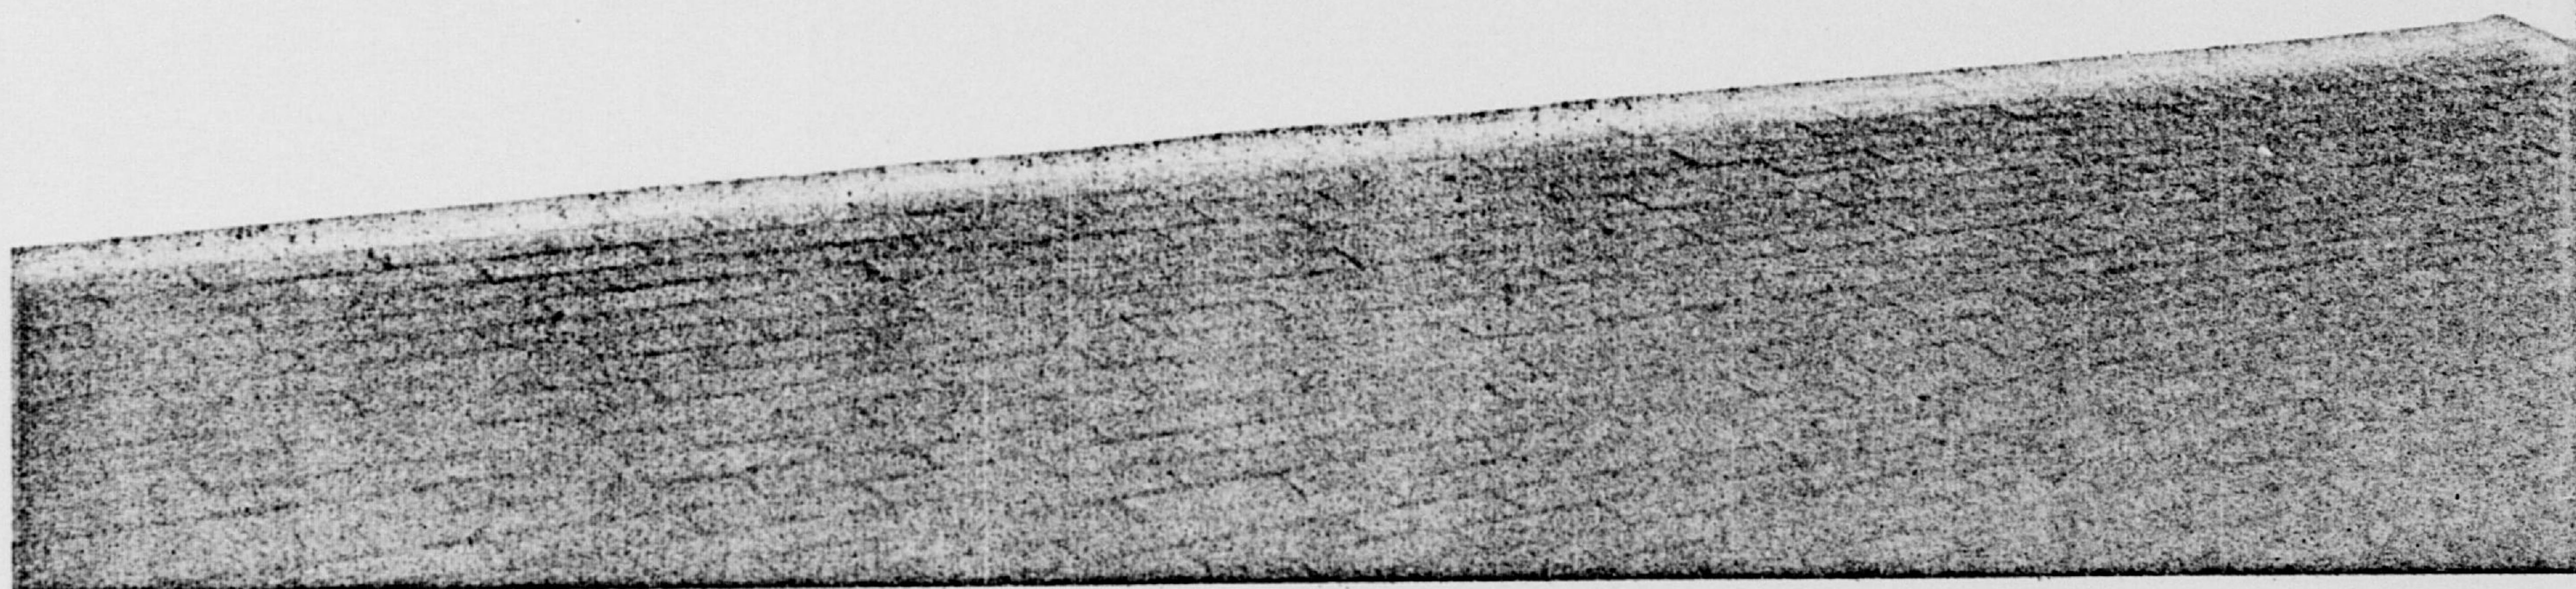

E' stato avvistato a Brindisi, Lecce e Casarano

Nel pomeriggio di lunedì 1° maggio, uno strano oggetto è stato visto nel cielo salentino. Non è stato possibile accertare di cosa si trattasse con precisione, anche perchè le versioni di coloro che l'hanno avvistato variano a seconda delle località. A Brindisi infatti, l'oggetto — avvistato da persone in più punti della città — è apparso come un rombo luminosissimo che ad un'altezza imprecisata a tratti restava immobile ed a tratti si muoveva. Ad un certo momento poi, più di uno ha visto il rombo dividersi in due triangoli che dopo essersi riaccostati una volta, si sono definitivamente allontanati uno in direzione nord l'altro in direzione est.

I leccesi invece hanno visto un solo triangolo, rimasto per un certo tempo immobile sulla città. La luminosità, anche in dipendenza del fatto che l'oggetto è stato visto più tardi che a Brindisi (e cioè verso le 17,30), è apparsa evidentemente riflessa e meno intensa. Anche a Casarano è stato avvistato l'oggetto. Coloro che l'hanno visto hanno potuto seguirne il movimento — da ovest verso est — finchè splendeva il sole.

Tutti comunque sono stati concordi nell'affermare che l'apparizione non era accompagnata da alcun rumore.

L'ipotesi più probabile è che si trattasse di un pallone sonda. I tecnici dell'aeronautica che a Brindisi e Lecce sono stati subissati di telefonate, non hanno dato alcun chiarimento in merito. Naturalmente più d'uno ha parlato dei dischi volanti.

1 Atch
Resume of Preparing Officer

4 May 1967

At 0930 hours a call was received from the Valley Daily News, Tarentum inquiring whether there had been any reports from that area concerning sightings of UFO's the preceding night. There had been no reported sightings. At 1000 hours another call was received from the newspaper stating they had had several calls from individuals who had seen amber lights in the sky, seeming to stand still then moving slowly. The object was sighted for approximately five minutes. Two names of individuals were given who had sighted the object and reported same to the newspaper, [REDACTED] and [REDACTED]. On 8 May 1967 the attached letter was received from [REDACTED] with newspaper clipping and diagram. Checking the diagram on a Pittsburgh map it appears that the plane described by [REDACTED] was in the area of the sighting. Deveraux Chevrolet is located in McKeesport which is located several miles directly south of the area where the sighting occurred. A check with the automobile company revealed that the aircraft was hired 3 May 67 for advertising purposes.

SUMMARY:

In my opinion, the UFO was definitely the aircraft described by [REDACTED]. The newspaper article is incorrect in stating that this office received a dozen reports of the sighting. The sighting was only reported by the newspaper, no one else. The Airport tower has informed me that the aircraft is owned by a [REDACTED] and he flies out of Calmerville airport, which is located Northeast of Pittsburgh in the area of the reported sighting. The aircraft is an older type byplane with lights under the wing which flash in sequence. The aircraft usually flies at an altitude of 1,800 feet. The aircraft also tows banners during daylight and usually flies in the area of Forbes Field when baseball games are scheduled. [REDACTED] reports to the Airport tower before he makes a flight. In the future, the Airport tower will inform me of scheduled flights of the aircraft. I have not informed the Valley Daily News of my findings. This report is being submitted as a matter of record.

UFO rep. sighted in Cheswick

Air Force Systems Command indicated today it will investigate a reported sighting over the Lower Valley last night of an unidentified flying object which passed over Cheswick and Oakmont.

The command's office at 911th Troop Carrier Group at Greater Pittsburgh Airport received a report of the sighting by a dozen persons in Cheswick between 9 and 9:30 p.m.

Two of the group of adults and young people, John Hirtle, 14, and David Mock, 14, put a telescope on the brilliant amber light, which resembled a bright star.

Estimated altitude was 15,000 to 20,000 feet. The light hovered over Cheswick for several minutes, the viewers said and then moved over Oakmont and disappeared.

The light appeared brighter when it hovered, all agreed.

The boys are sons of Mr. and Mrs. Roy T. Hirtle of 1107 Spruce St., and Mr. and Mrs. David Mock Sr. of 208 Meadow Court. They are both students in Springdale Junior High School.

Their parents and at least eight other neighbors saw the object.

Gentlemen:

I am writing in regard to the UFO reported by the enclosed article in our local paper, because I feel that a similar sighting by myself and 5 other people may explain the sighting.

On the night mentioned I and 5 other people were attending the baseball game at Forbes Field between the Dodgers and Pirates. Shortly after 10 o'clock one of my friends sighted a strange light very low on the horizon... visible just above the outfield wall. The enclosed diagrams show the positions 1. where first seen and 2. where identified.

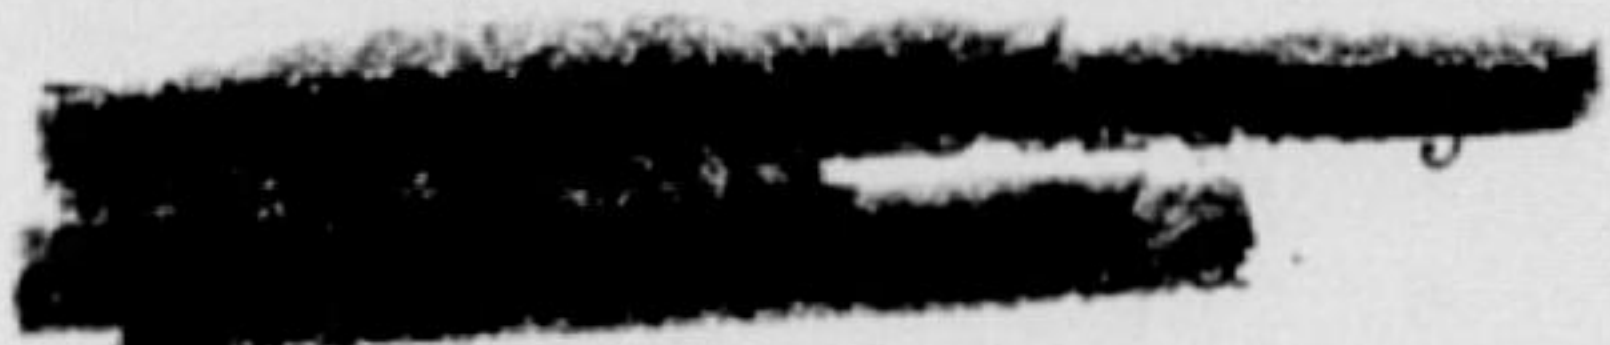

We were seated in the box seat section 8 first row. The one diagram shows the position sighted in relation to the light towers of the ball park.

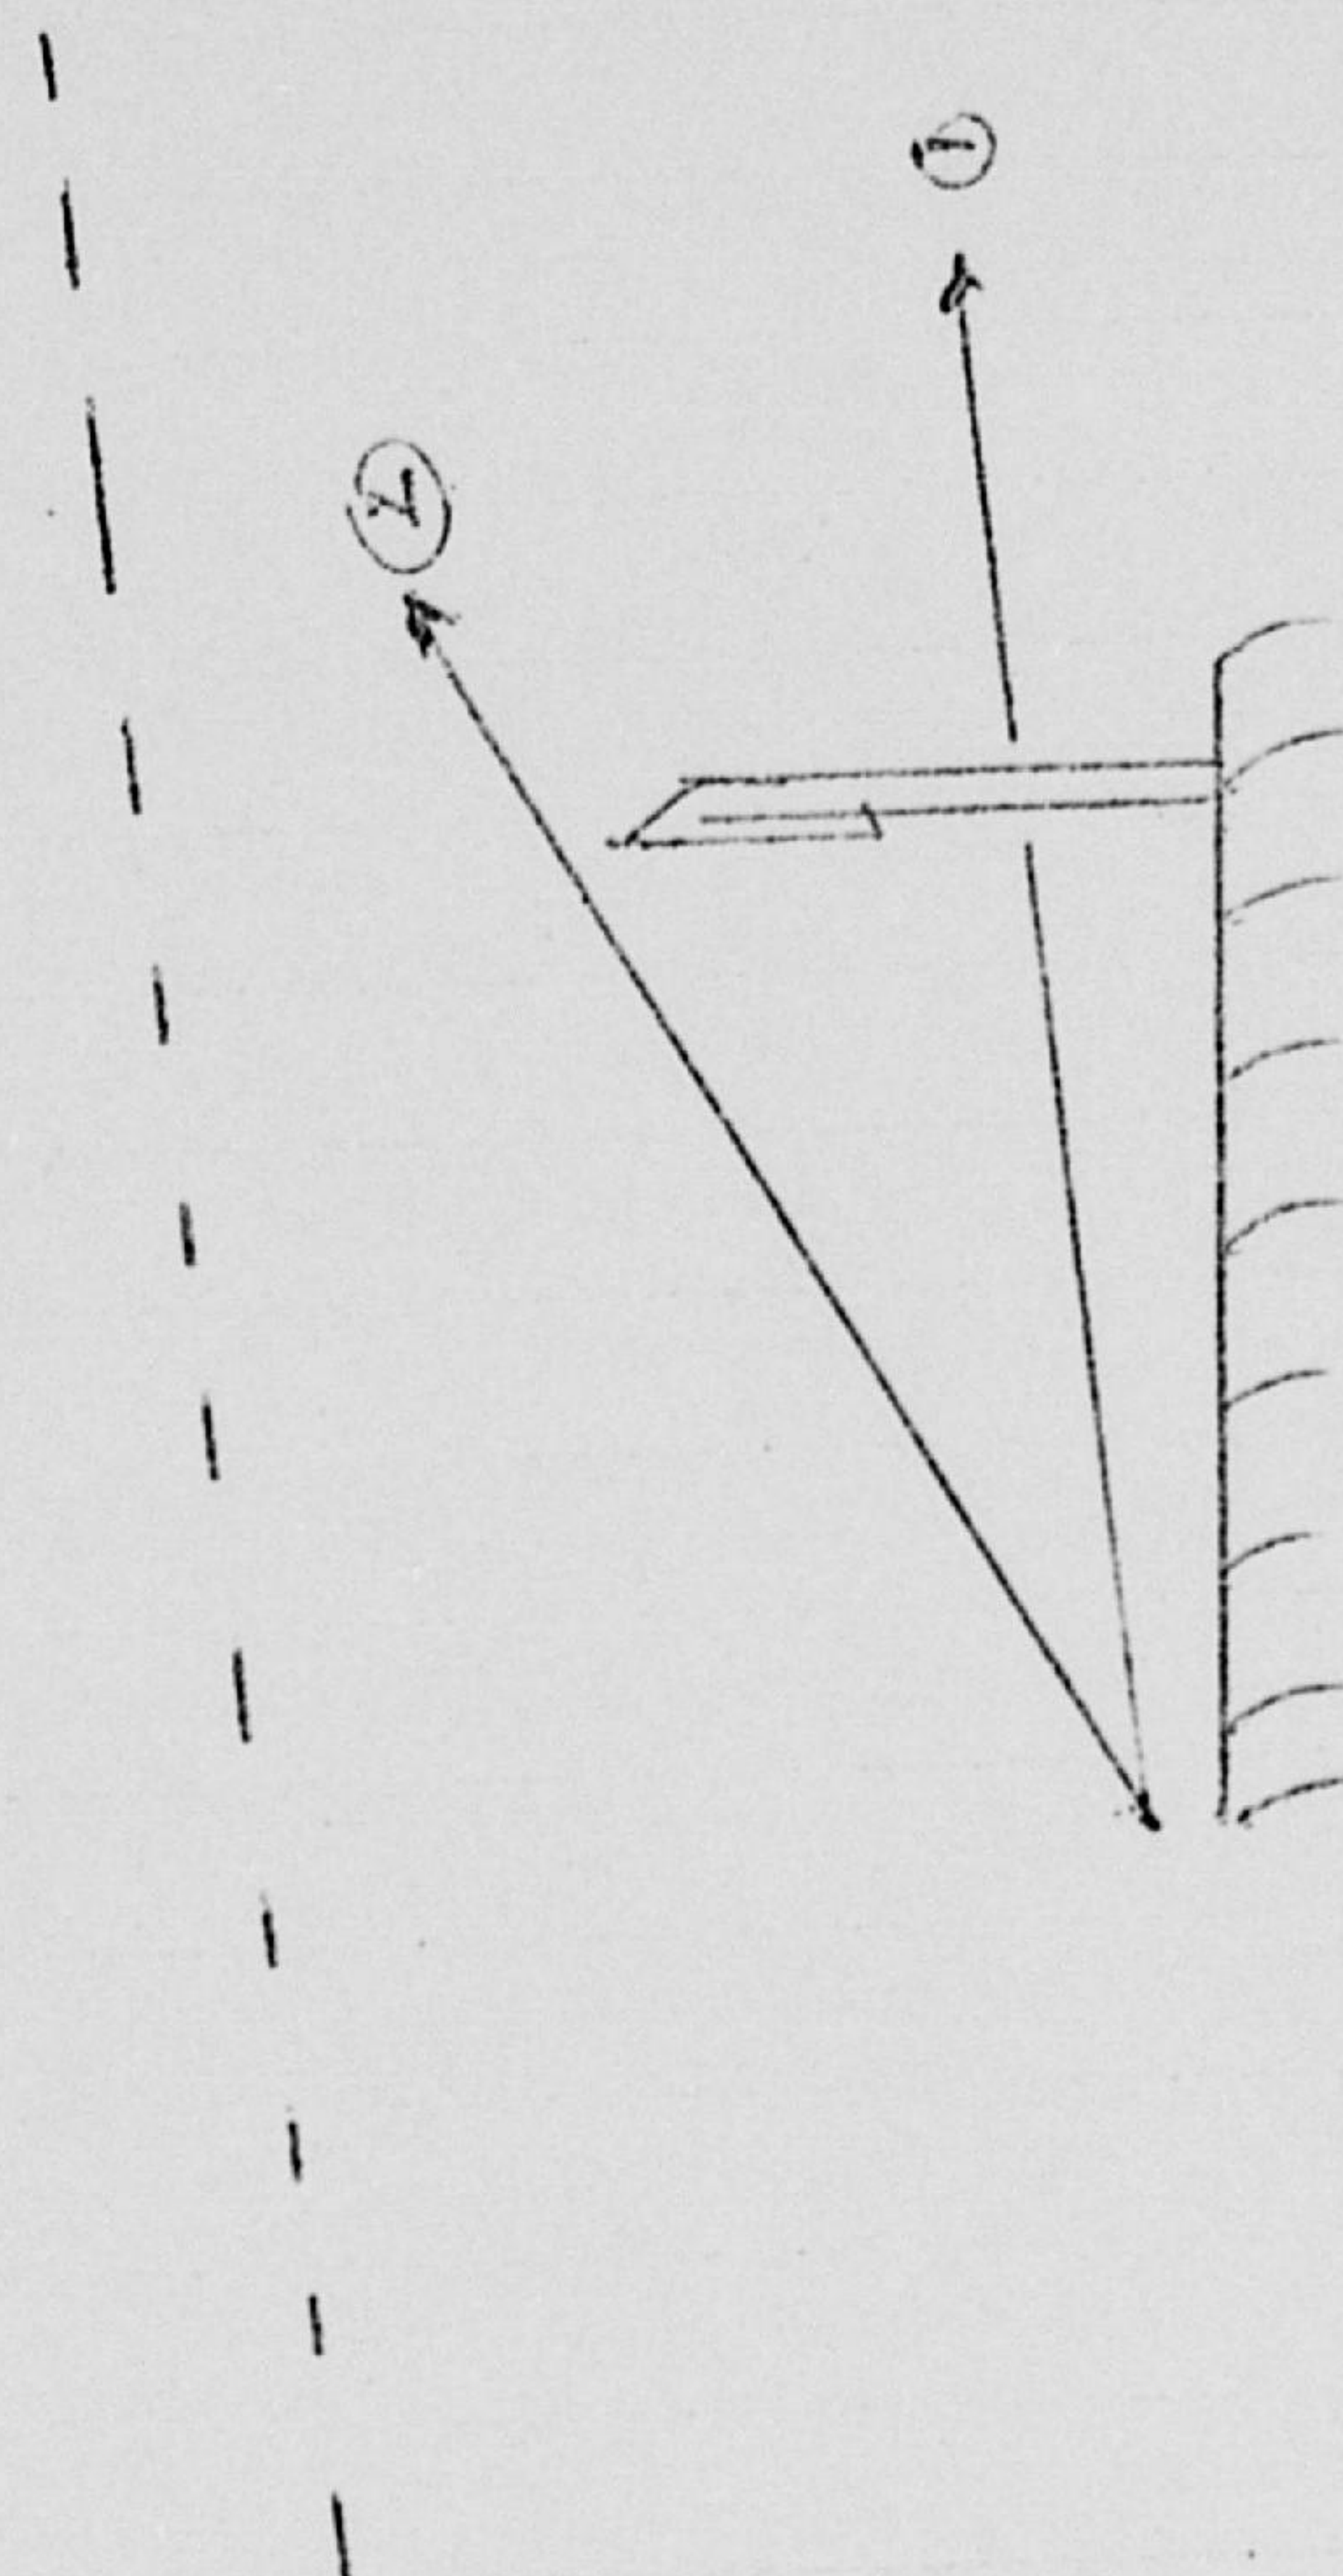

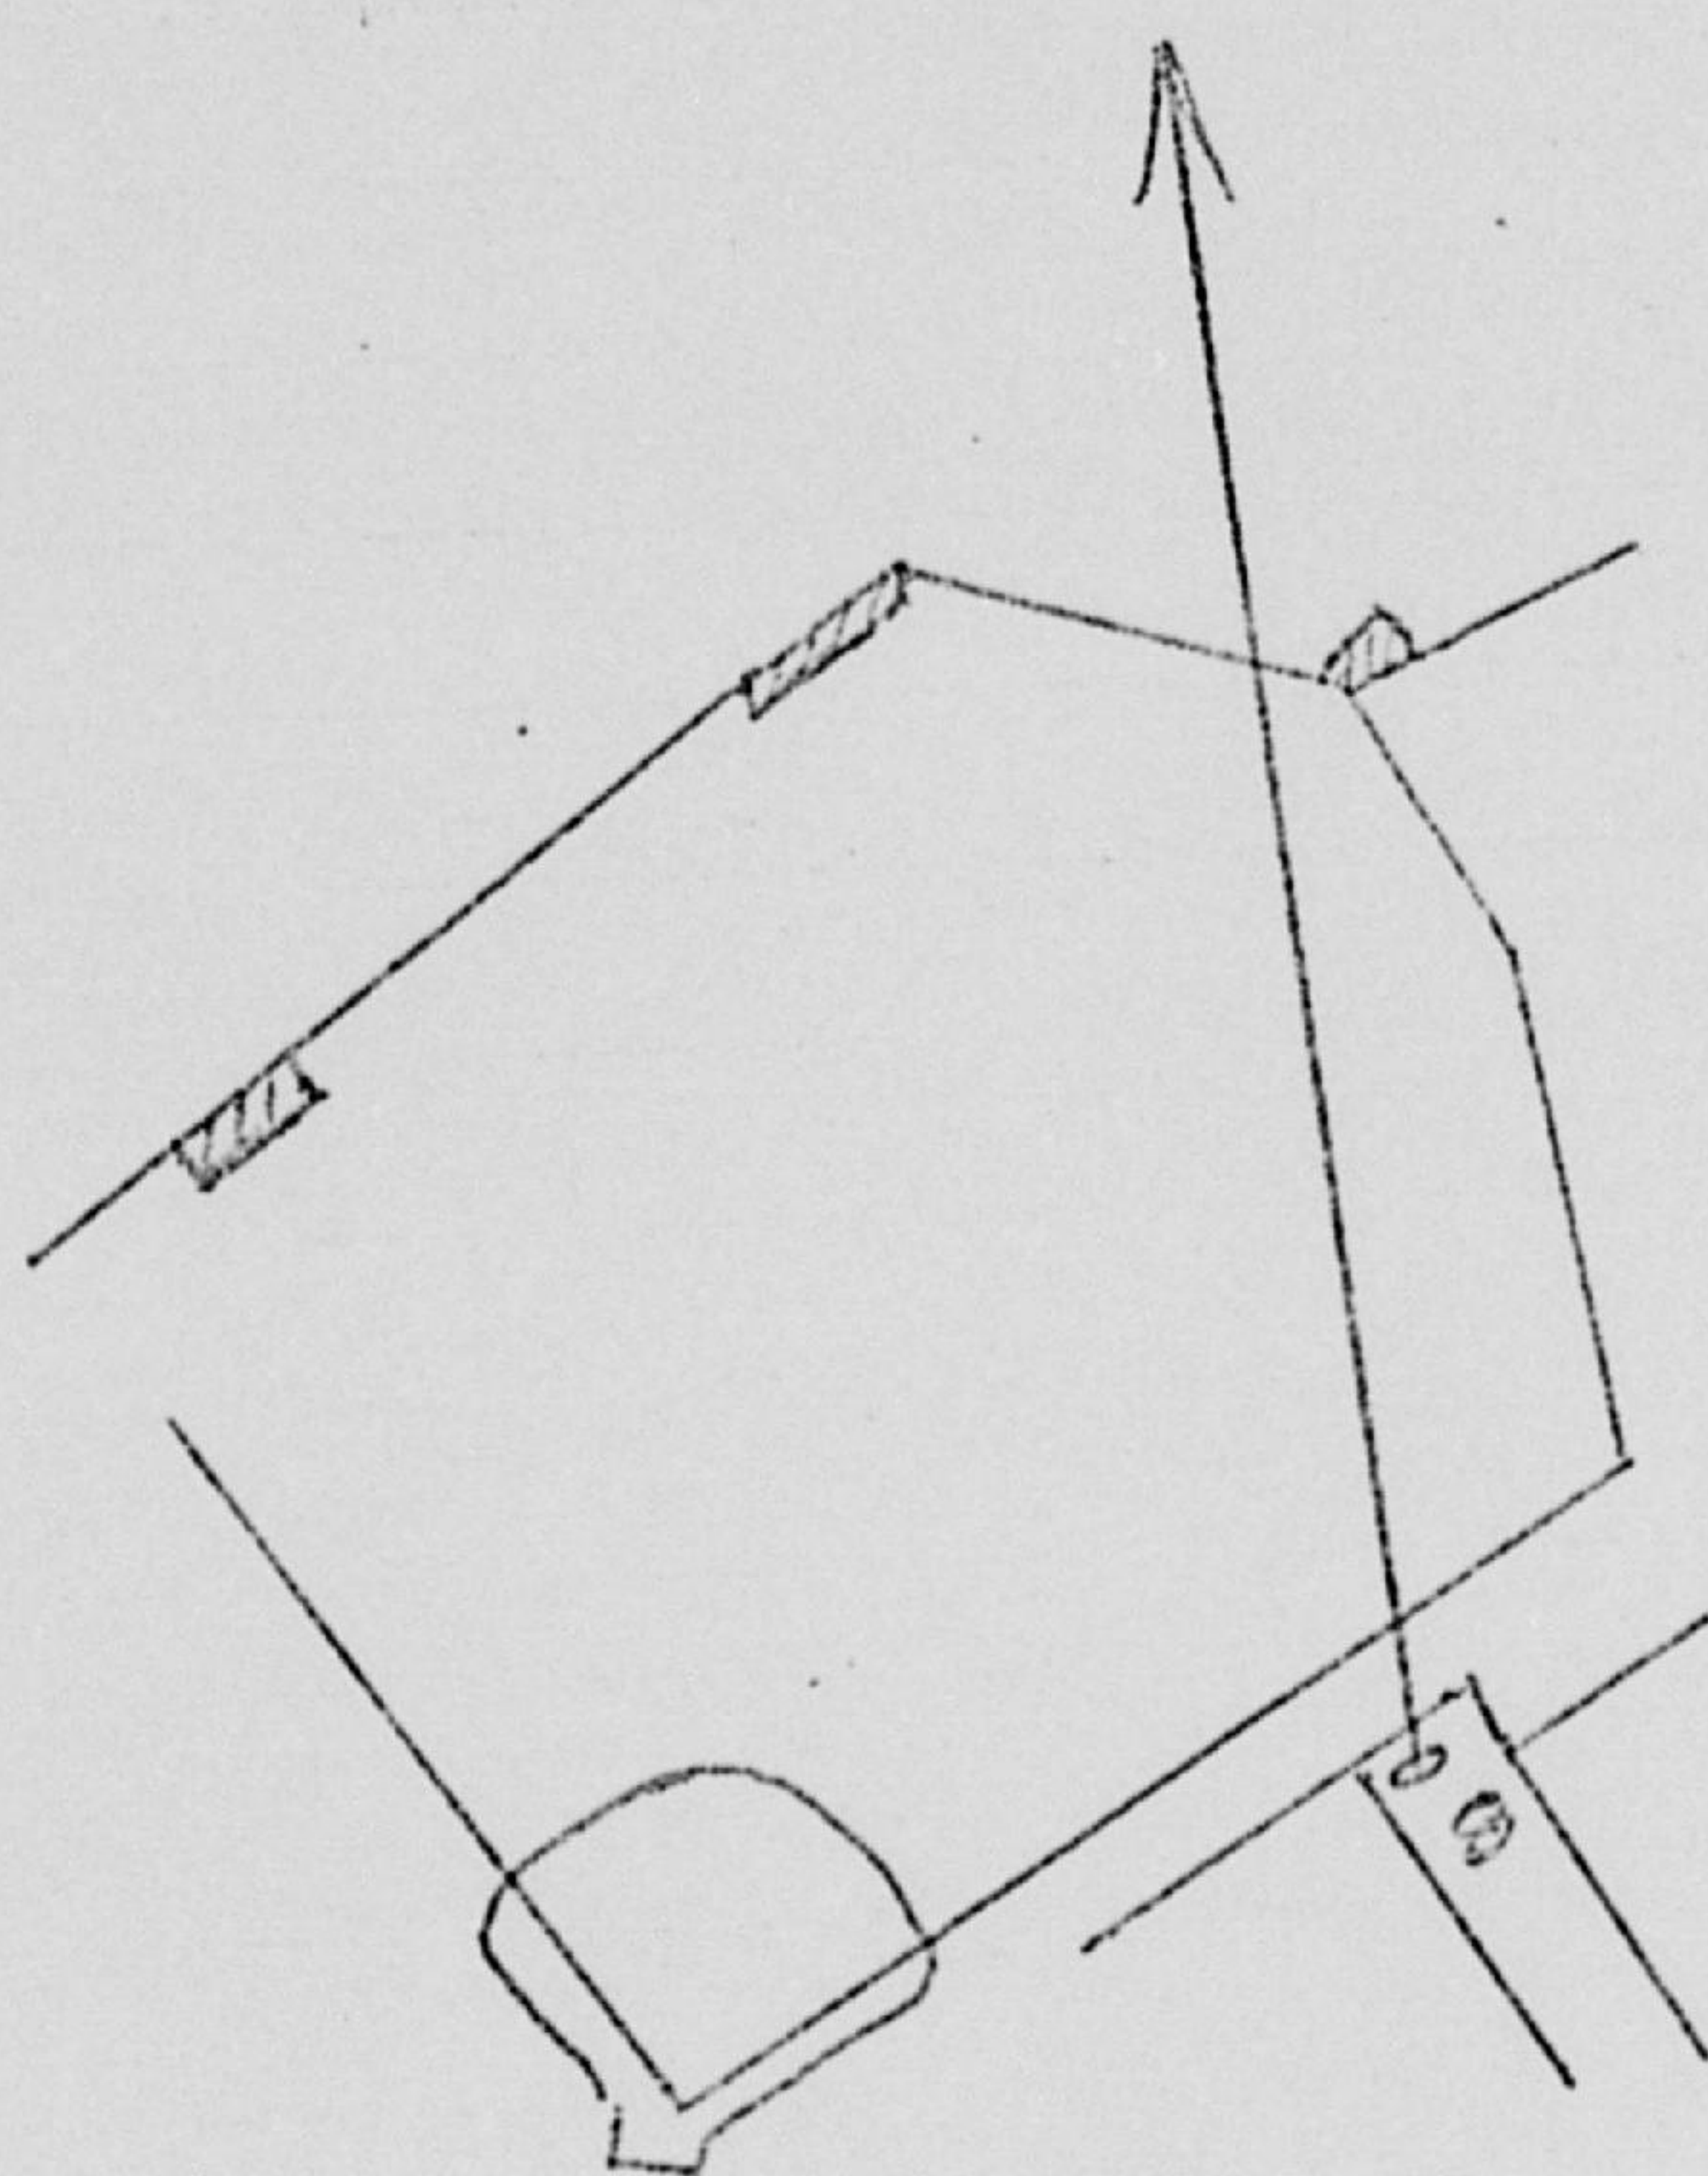

While low in the sky it appeared a amber-red disk ... rotating very slowly... and hovering. It slowly rose in a zig zag manner, then headed straight on a line to a point just above the light standard. At this point it was identified as a private plane.

The entire explanation was that it was carrying a lighted billboard type of sign where the writting moves along the length of the sign as shown below...

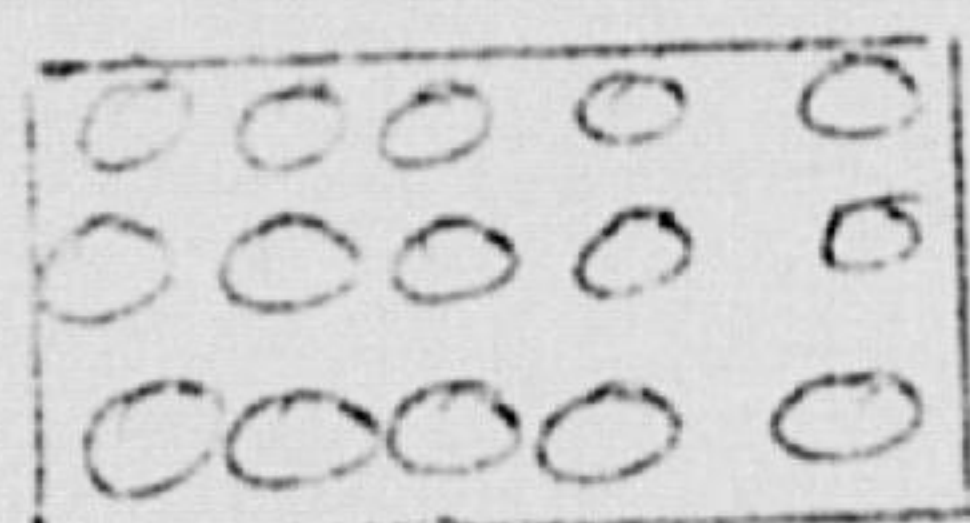

BUY BUY A Y A Ch A CHEVY

The advertisement was for Devereaux Chevrolet. And this could give you information on the planes flight path to see if it flew over Oaamont also. If any more information is needed to help I will be glad to give so. I hope this may be of service to you.

UNCLASSIFIED

23 May 67

At 212403 May 67, I the undersigned did witness the following:

Upon returning to the team house, located at Ba Chau, from inspecting the guards I went to the door on the west side of the house. I noticed an orange light rising up into the sky on an approximate azimuth of 285 deg (checked by compass on this day).

I sat in the chair watching it, after awhile I called it's attention to Sgt Burdick, who had just gone to bed. Sgt Burdick watched for awhile from his bed, then came to the door where I was.

This light traveled to an altitude of from 12-13 thousand feet, when it reached it's peak, it started to travel to the left. It went to the left quite a ways, distance undetermined, where it started to blink, by getting real dim then back to it's normal brightness. After blinking a few times, it made a circle and headed to the same point of ascent, where it headed straight down, almost in it's same path of ascent. After it started to descend another light started up, about a handwidth away to the right.

When the first light was about quarter to half way down it seemed to explode, however rather than shattering, it seemed to shoot three more lights downward, then

it started glowing in this direction.

Sgt Carlson and I went into the team house when the first light started to descend so he and I watched the first one while Sgt Burdick kept watching the path of the second light.

As the first light came closer it appeared to be a parachute flare, however it passed about 12 feet above our window, and we saw a clear (either nylon or plastic) cylinder about 3 feet long by 1 foot in diameter. The original light was still glowing in the lead end of the cylinder.

We watched it until it traveled out of sight, behind one of the houses. It appeared to have traveled outside of our perimeter, out not over the ridge behind our camp, on the east side.

After we lost sight of the first light we went back to the door to locate the second light.

The second light did exactly the same as the first, except it went to the right and emitted five lights, plus a sixth which was real weak, and extinguished after a short time. This second light blew over the mountain on the north side of our camp, traveling in a NE direction.

The duration of flight (from time of observation to termination of observation) for both lights was 30 min.

The eight lights emitted traveled straight down in the path of ascent.

It was a clear bright night with a strong westerly breeze.

This report is declassified in accordance with IV DASC(I) APO U.S. FORCES Ltr, subj: UFO Investigation, dated 16 Sep 67.

SUBJ: UFO Investigation

TO: FTD (TDET/UFO) Wright Patterson AFB, Ohio 45433
Attention: Maj Quintanilla

In response to your letter of 12 Sept 67, UFO Investigation, the following is submitted:

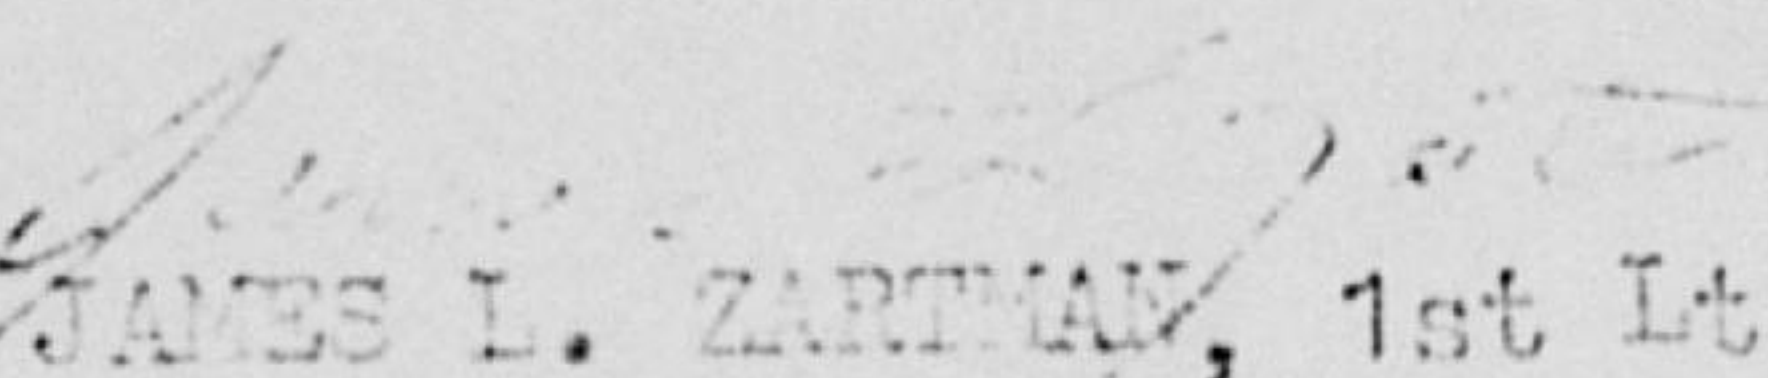

1. At the time the report was submitted, it was felt that the location of the takeoff of the object being in Cambodia would be of particular interest to higher headquarters.

a. The identity of the object has never been confirmed other than that submitted in the report.

b. Under the circumstances, the possibility that the objects were of a hostile nature cannot be overlooked. Had either object landed in the Special Forces Camp and caused serious damage, the incident could have aroused a great deal of attention on an international scale.

2. In as much as no further incidents of this nature have occurred in the IV Corps area, permission to downgrade Sergeant First Class Ringlands' statement is granted.

3. Downgrading of the report itself should be left to the discretion of a higher level than IV DASC. The possibilities and implications involved warrant closer scrutiny from higher headquarters.

Proposed reply to [REDACTED], age 15 (Sighting May 5, 1967)

Dear [REDACTED]

This replies to your recent correspondence concerning your observation of an unidentified flying object on May 5, 1967.

We are unable to offer an explanation because of insufficient data. Essential information such as detailed flight characteristics, weather information, and angular velocities are definitely needed in any scientific investigation of a reported UFO sighting. If you had reported your observation to your nearest military installation at the time, an evaluation would have been possible. The local UFO investigator is in a far better position to conduct an on-the-spot investigation.

I regret the long delay in answering your initial correspondence; however, our present heavy workload prevent an earlier reply. We attempt to answer all correspondence sent to Project Blue Book and at times, a backlog does occur.

Although a detailed investigation was not undertaken on your observation, the information will be added to the present data base.

Thank you for reporting your observation to the Air Force.

Bloomington, Ill.

61701

Major Hector Quintinilla, Jr.
Project "Blue Book"
Wright-Patterson Air Force Base
Dayton, Ohio

Dear Sir,

Concerning the information I have given you about my U.F.O, I think it is about time that you tell me what it was I saw. I have been waiting impatiently for a reply from you, which I have never gotten. I think I am entitled to know, and so is the public. I and others would like to know (we have to know) what we are seeing! I have been reading a lot of books and I know the way you are handling things. I have made a conclusion: The Air Force is a "coward" to tell the public what they are seeing! Besides that, they, (the Air Force) are throwing

ridiculous explanations at the public telling them what they saw were just weather balloons, meteors, and what have you! The Air Force in my point of view is "hiding something" that very few people know about.

There are many questions I have to ask you about U.F.O.'s can you answer this? "Will the public ever know the answer to 'flying saucers'?" I have that answer! The public will find out sooner or later what they are, and where "they" come from.

Concerning the U.F.O. (I and others saw) I told them that I wrote out a couple of sheets of questions that I turned over to you, about the sighting. I am the only one that saw those answers, and I think I have filled it out the best way I could. But, those people have taken my word about the answers to the questions! I am not considered a liar, but in the eyes of my friends

(that believe) ~~that~~ they mark me as
one. who is the liar, me or YOU?
I told them that they will get an
answer from me!

Here is another Question! Would
you be brave enough to let me
see those files, so I can give an
~~report~~ ^{answer} to my friends or the public?
I may not know the "answer", but
I will win their confidence. Would
you let me see those files (I mean
it) like you have let other people
see them? I am not trying to be
"smart" or "big" writing this letter,
but I want an answer! Did you
read, study, or even look at the answers
to my questions concerning the U.F.O.?
Or was it thrown into the waste-
basket marking me as a nut!

I hope you will think over the
things I have written, and I leave
you with this: The Air Force is
hiding something, and that some-
thing will be found by the public!

(over)

P.S. Will you let me see those
files, like files that have an an-
swer for me? Or will you
reply to my letter?

Thank you,
Very Sincerely,

[REDACTED]

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

5 May 1967
Day Month Year
and again on
6 June 1967

2. Time of day: Between 7 and 8 o'clock

about same time for second sighting
(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address

City or Town

State or County

5. How long was object in sight? (Total Duration)

about an hour (can't be sure)
Hours Minutes Seconds

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

5.1 How was time in sight determined? looked at clock often, sun was about set.

5.2 Was object in sight continuously? Yes ✓ No

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a. Bright
b. Cloudy

7. If you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

Official U.S. Air Force UFO form C

Page 3

14. Did the object disappear while you were watching it? If so, how?

I can't remember. after a while (I don't know if anyone with me saw it disappear) it just disappeared.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

in front of: _____

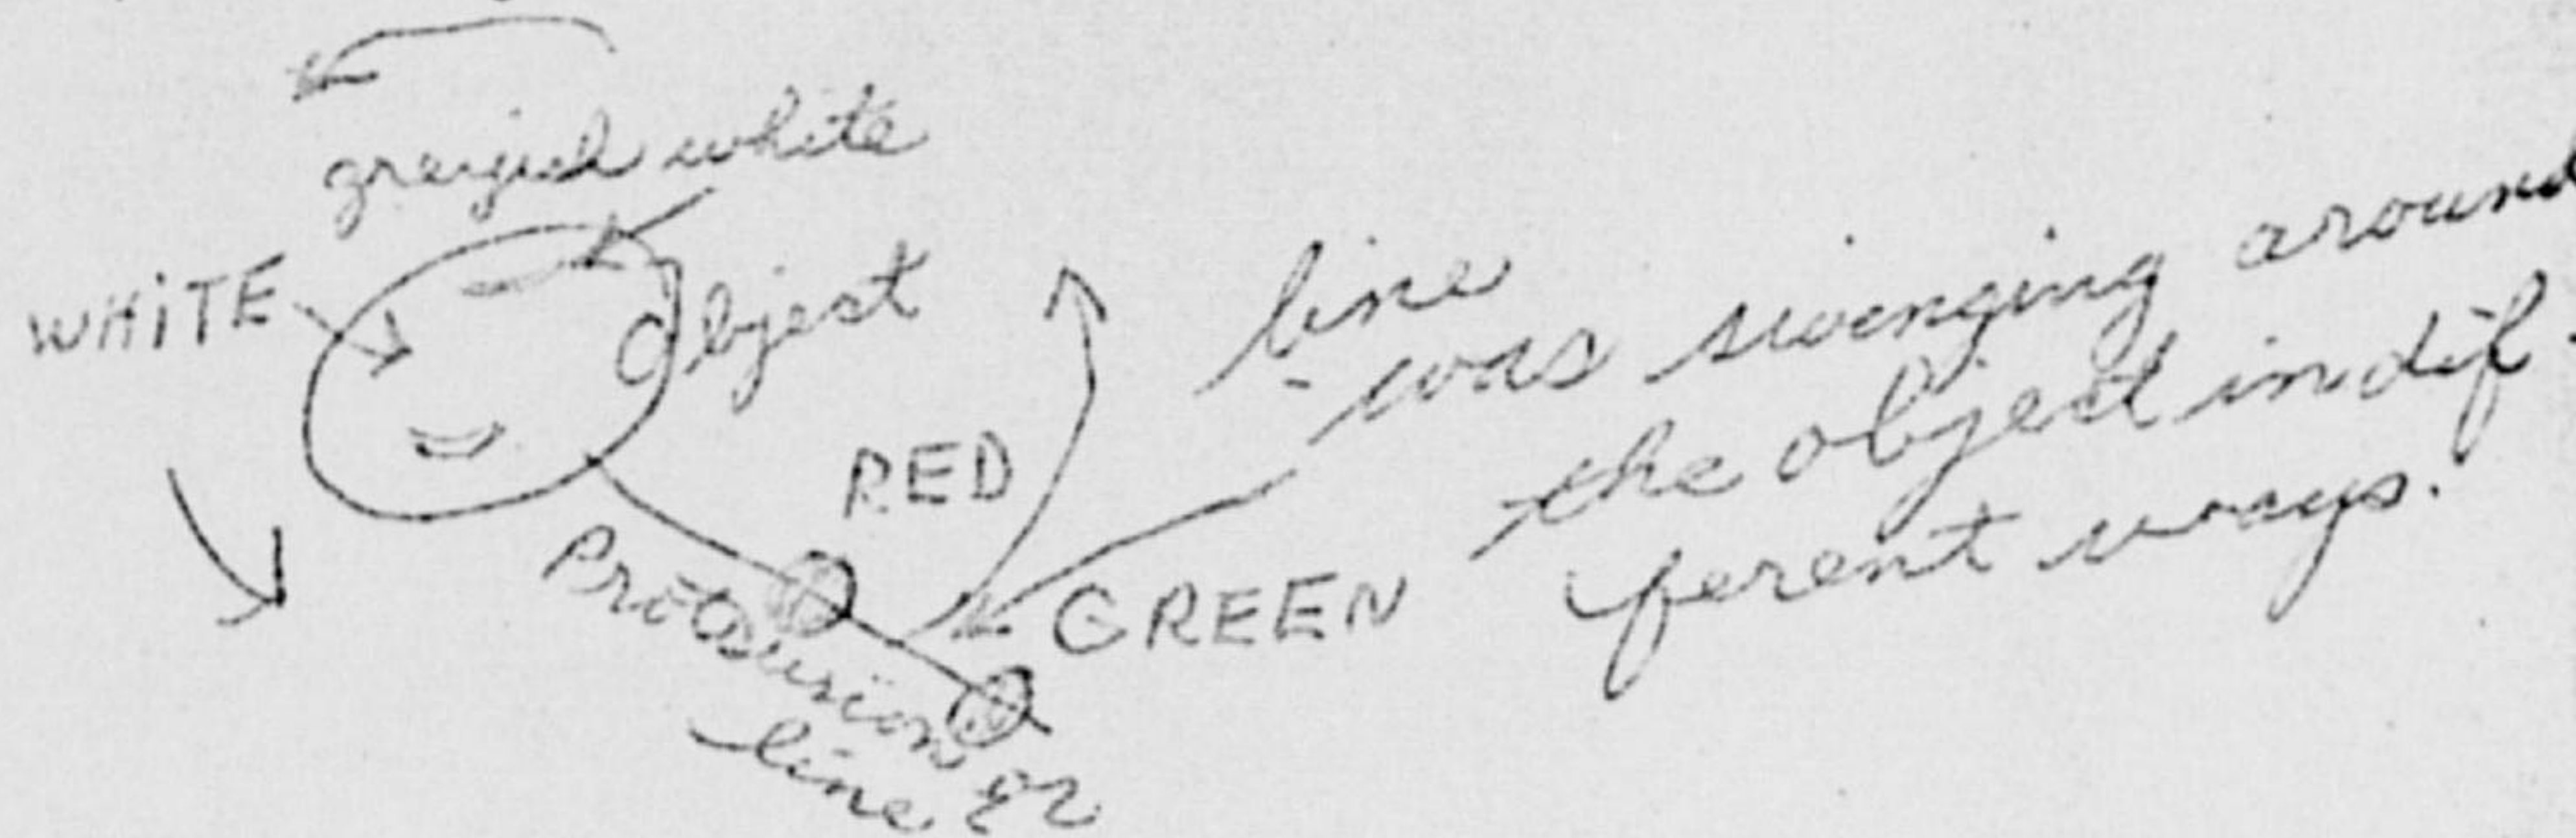

17. Tell in a few words the following things about the object:

- a. Sound *none was heard. (too high for sound?)*
- b. Color *White, whitish grey, red, green.*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

I can't remember, but I think that if I held a match stick at the object I think that the object ~~would~~ be seen (the sides) on the sides.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate

(Circle One)

If you answered YES, then

21. Do you think you can estimate

(Circle One)

If you answered YES, then

22. Where were you located when

(Circle One):

a. Inside a building

b. In a car

☒ c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

24. If you were MOVING IN A

24.1 What direction were you

a. North

b. Northeast

24.2 How fast were you moving

24.3 Did you stop at any time

(Circle One)

25. Did you observe the object through

a. Eyeglasses

b. Sun glasses

c. Windshield

d. Window glass

26. In order that you can give as much detail as possible, please indicate the objects which, when placed up

I think it was a satellite or satellite

the car

← P

Force UFO form continued

Page 4

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

If you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

If you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

23. Were you (Circle One)

a. In the business section of a city?

b. In the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other sitting in back yard.

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

e. Binoculars

Yes

No

b. Sun glasses

Yes

No

f. Telescope

Yes

No

c. Windshield

Yes

No

g. Theodolite

Yes

No

d. Window glass

Yes

No

h. Other several of us had.

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I think it would look like a small balloon or satellite (but I don't think it was)

Major Hector Quintanilla, Jr.
Chief, Project Blue Book
Wright-Patterson Air Force Base, Ohio
45433

Dear Sir,

Regarding my letters and information about a U.F.O, I, and others have seen, I have come to a conclusion. Within a month's time, if I haven't heard from you, I am taking my letters and etc. somewhere else. To Dr. Edward U. Condon, then I might get a reply back! The reason why I am taking it ^{to} Dr. Edward U. Condon, is this. I have not heard from you from the day I wrote my first letter, several months ago. During the Month of August, 1967.

(my friends and I) have seen the object again. This time we were ready, we took pictures and what have you. So, we have our proof.

As I have stated before if I don't hear from you in a month's time (the end of September) I am taking my notes and etc. to Dr. Cordov, who is on a new investigative committee.

I myself think that these investigations are worthless. That is to say, the U.F.O. might be solved and it might not. But like other people who have give up, I am the kind of person who DOESN'T.

This is my third letter.

Thank you,

~~XXXXXXXXXXXXXXXXXXXX~~

MAY 24 1967

Dear [REDACTED]

This replies to your letter regarding the unidentified flying object (UFO) sighted by your friend, Ricky.

It would be difficult to perform a thorough investigation of your sighting without a specific time or location. Also we do not investigate second hand reports. I do not know what it was he saw -- I believe he observed something which did not appear familiar. We define a "UFO" as any aerial phenomenon or object which is unknown or appears out of the ordinary to the observer.

The Air Force has been investigating UFOs reported to it for nearly two decades. To date, we have neither received nor discovered any evidence which proves the existence and intra-space mobility of extraterrestrial life. It would seem logical that if "flying saucers" do exist, we would have some physical proof by now.

I have attached two pamphlets on our program; I think you and Ricky will enjoy reading them.

Thank you for your letter.

Sincerely,

GEORGE P. FREEMAN, JR.
Lt Colonel, USAF
Chief, Civil Branch
Community Relations Division

Dear Sirs:

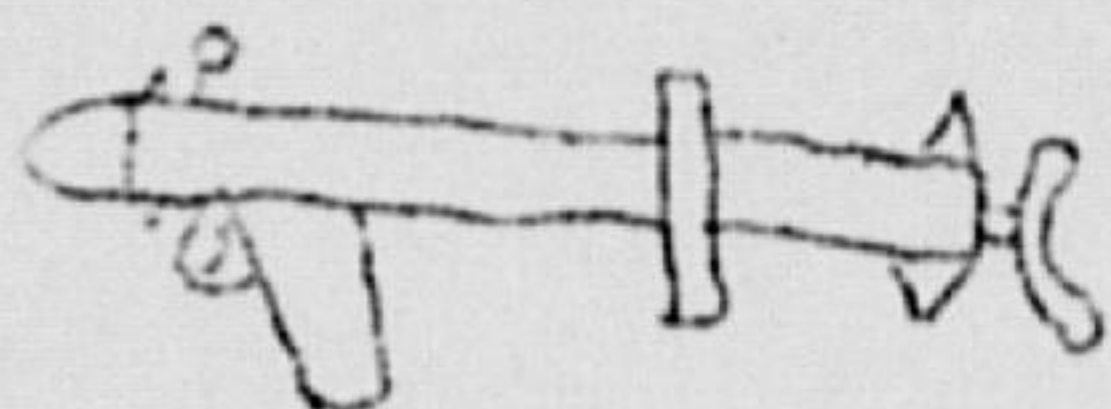

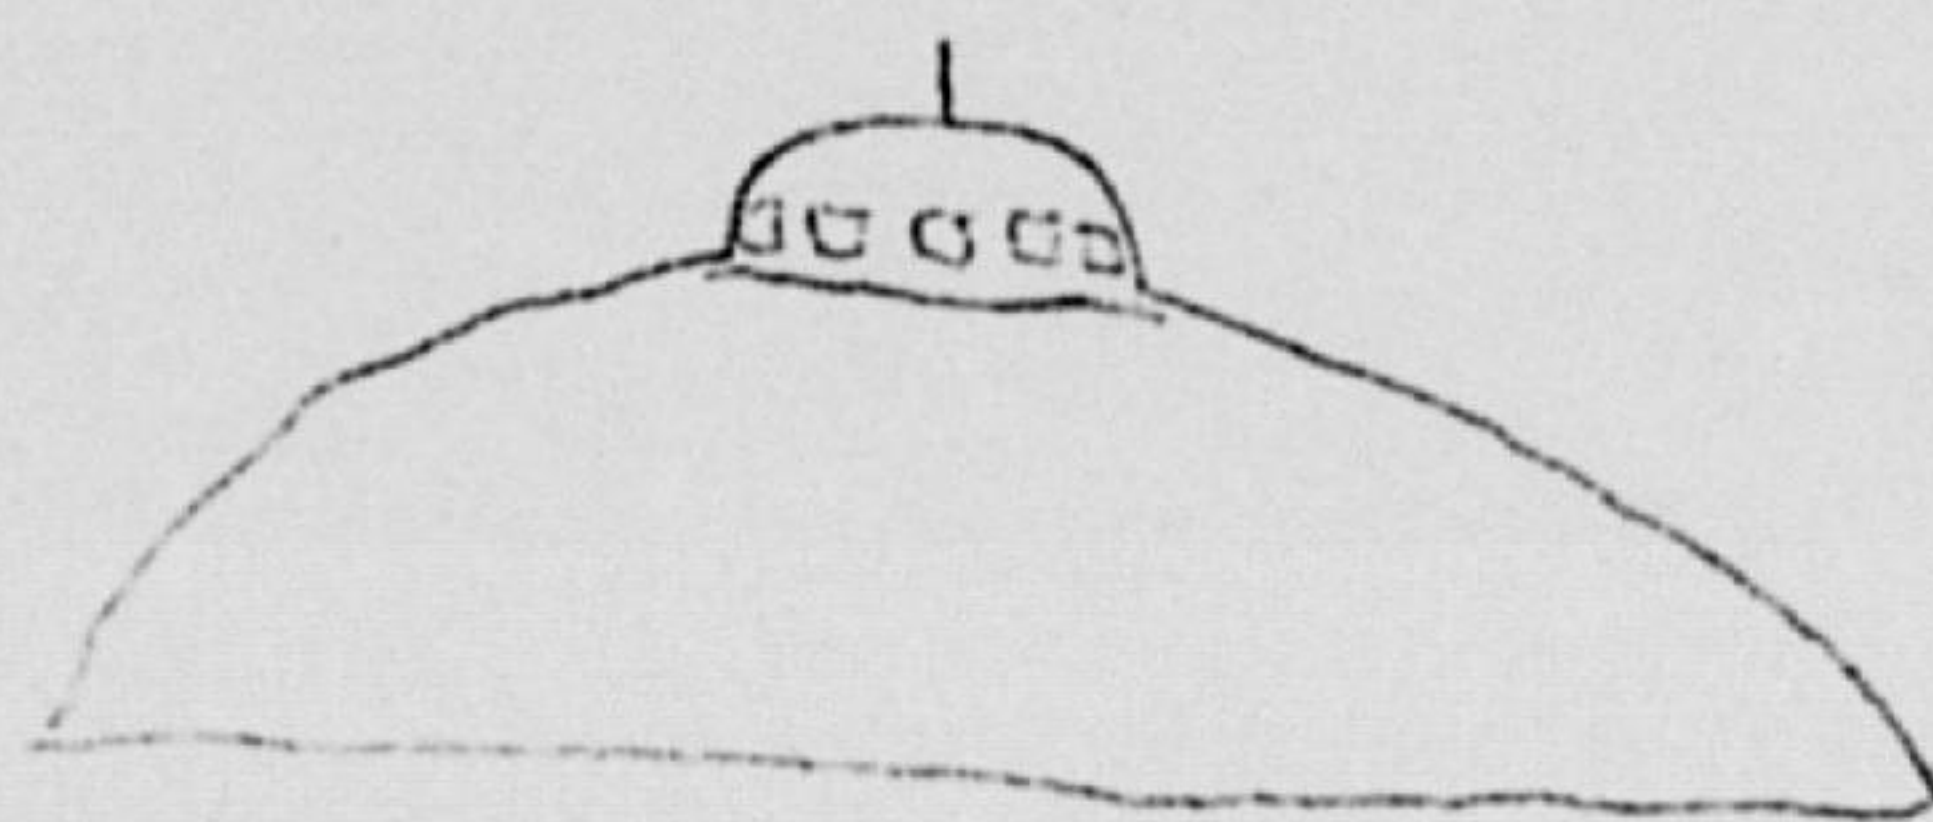

I am writing to tell you that my friend, [redacted] saw a UFO yesterday, May 7th. He said he and his neighbor saw it about 2:30. It was by a swamp. But it wasn't swamp gas because it was setting on the ground. He said that there was a little, white man standing beside his ship. He didn't have any arms or legs but he held some kind of gun somehow.

He was darn scared it so he and his neighbor galloped away fast.

Ricky and I are 10 years old.

Sincerely,
[redacted]

Here are some pictures as [redacted] described them.

The windows ~~had~~ sparkled with colors.
Everything, the ship, the man, and the gun,
were white.

nds (see No. 15)

20. Do you think you can estimate the speed of the object?
(Circle One) ☒ Yes ☐ No
IF you answered YES, then what speed would you estimate? 150 M.P.H.

21. Do you think you can estimate how far away from you the object was?
(Circle One) ☒ Yes ☐ No
IF you answered YES, then how far away would you say it was? 1 MILE OR SO

22. Where were you located when you saw the object?
(Circle One):
a. Inside a building
☒ b. In a car
c. Outdoors
d. In an airplane (type) _____
e. At sea
f. Other _____

23. Were you (Circle One)
a. In the business section of a city?
b. In the residential section of a city?
☒ c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)
a. North c. East e. South g. West
b. Northeast d. Southeast ☒ f. Southwest h. Northwest

24.2 How fast were you moving? 60 miles per hour.

24.3 Did you stop at any time while you were looking at the object?
(Circle One) Yes ☒ No

25. Did you observe the object through any of the following?

a. Eyeglasses	Yes	☒ No	e. Binoculars	Yes	☒ No
b. Sun glasses	Yes	☒ No	f. Telescope	Yes	☒ No
c. Windshield	☒ Yes	No	g. Theodolite	Yes	☒ No

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

7th May 1967
Day Month Year

2. Time of day: 7 : 30
Hours Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address

City or Town

State or County

just outside of
Scranton Pennsylvania

5. How long was object in sight? (Total Duration)

2 : 00
Hours Minutes Seconds

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes _____ No ✓

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a. Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at

8.1 STARS (Circle One):

a. None
b. A few
c. Many
d. Don't remember

9. What were the weather

CLOUDS (Circle One):

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy cloud

10. The object appeared: (C

a. Solid
b. Transparent
c. Vapor

11. If it appeared as a light

a. Brighter
b. Dimmer

11.1 Compare brightness

A light

12. The edges of the object

(Circle One): a. Fuzzy
b. Tight
c. Soft
d. D

13. Did the object:

a. Appear to stand still
b. Suddenly speed up
c. Break up into parts
d. Give off smoke?
e. Change brightness
f. Change shape?
g. Flash or flicker?
h. Disappear and reappear

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight—pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

A light in darkness 100 feet away

12. The edges of the object were:

(Circle One): a. Fuzzy or blurred

b. Like a bright star

c. Sharply outlined

d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time?
- b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?

Dear Mr. [REDACTED]

This replies to your recent correspondence concerning your unidentified observation on May 9, 1967. Without essential information such as flight characteristics, angular velocity, and weather conditions, I am unable to offer any type of explanation.

This office is responsible for investigating and analyzing unidentified flying object (UFO) reports which occur within the continental limits of the United States; therefore, a detailed investigation of your sighting is not possible. The information will be added to our data base.

We wish to thank you for reporting your observation to the Air Force.

Sincerely,

BARNETT B. YOUNG
Lt Colonel, USAF
Civil Branch
Community Relations Division

May 12, 1967,

~~_____~~
~~_____~~
Peterborough, Ontario,
Canada.

Dear Sir

The reason I am writing this letter to you is because I've seen somethings lately that may be of interest to you. On May 9th, 1967 from 10:20 P.M. to 11:30 P.M. I saw while standing in my back yard what appeared to a star. The interesting thing about it that caught my attention was its size. It was quite large. Like ~~an~~ a large apple mixed with a pile of apples. So I began look at it for a while just out of curiosity. Now interesting thing about this is it started to flicker go out like a light then it would come back on. Now another interesting thing about this object is it never seemed to gain its original size. I know this wasn't a figment of my imagination because the man I work for was working late night and just happened to look out his ship window.

Page 2
at that time and ~~the~~ saw the same thing I saw
in the location which was in the N.W.

Now this isn't all that I saw that night for
while the light out for ~~the~~ a while I looked
around in the sky to see if there any other
unusual sights I happened to noticed something
coming from the S.E. and flying to wards I
where I had saw the first light at undiscribably
fast speed. It's ~~hard~~ hard to describe this
object it wasn't in view that long. But what
it looked like, a cloud, but it couldn't be, because
it was in going in opposite direction of what few
clouds there was and furthermore what few
clouds there were, were the west going due
south.

Now my boss has seen an U.F.O. also which
may be of some interest to you also

He saw three circular objects flying
in formation from West to East at about
10 P.M. two weeks ago, a few days later
I showed him a photograph which was in
flying saucers magazine and he said they
were exactly the same as he saw. I drew you a
sketch.

Page 3.

Sketch

I've also got an idea that might like
why don't you organized interested volunteers
all over the country to work as a
Ground Observer Corps to look ~~these~~ ^{for}
~~things~~ for these things and have all this
information channelled to you. I now would
be willing to do this. Because I am interested in this
sort thing.

Please let me know if your interested.
Yours truly

24 May 1967

Balloon Retrieval

Mr. [REDACTED], Manager
Plant Protection, Safety and
Traffic Control
General Motors Proving Ground
Milford, Michigan 48042

Dear Mr. [REDACTED]:

This replies to your letter of May 17, 1967 regarding the retrieval of a balloon, battery, bulb and parachute on the GM Proving Ground. The UFO office has received several such balloons with similar components which have been the cause of numerous UFO sightings. A check of our records did not reveal any sightings from the Milford area which could have been attributed to the balloon.

We wish to thank you for submitting the specimen to our office. If you would like the return of the balloon, please let us know.

Sincerely,

 HECTOR QUINTANILLA, Jr, Major, USAF
Chief, Project Blue Book

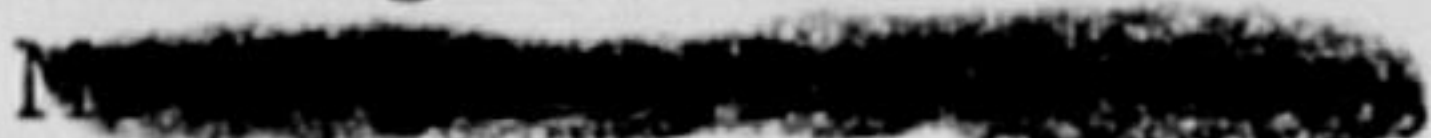

Cy to: Mr. James D. Taylor

Base Commander,
Selfridge AFB, Michigan

May 17, 1967

Commanding General
Wright-Patterson Air Force Base
Dayton, Ohio
Attn: UFO Office Project (Bluebook)

Gentlemen:

During the afternoon on Wednesday, 10 May 1967, two test drivers from our Cadillac Motor Car Division found the enclosed balloon, battery, bulb and parachute along one of our test roads here on the GM Proving Ground in Milford, Michigan. We promptly reported this to  Director of Plant Protection Activities for General Motors Corporation, GM Central Office, Detroit. Mr.  reported this information to the Selfridge Air Force Base that same afternoon. As of today, Wednesday, 17 May 1967, there has been no response from Selfridge Air Force Base and  directed me to send these items on to you.

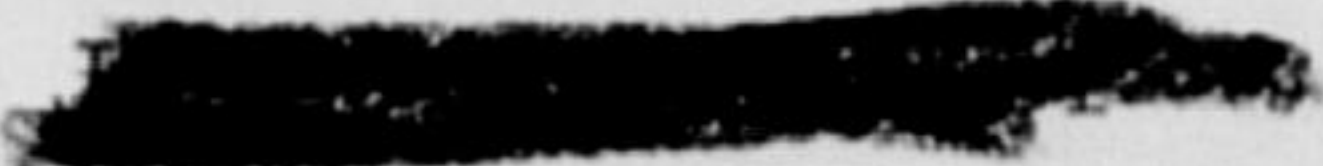

If we can be of further assistance, please contact the writer.

Sincerely,

Plant Protection, Safety and
Traffic Control

Peterson Field, Colorado, 13 May 1967

Dr Donald H Menzel
Harvard College Observatory
60 Garden Street
Cambridge, Massachusetts 02138

Dear Dr Menzel:

Reference the evaluation you made on a 13 May 1967 UFO report from Peterson Field, Colorado, which you forwarded to us in your letter of 8 November 1967. Since we received your letter we have looked through the files, at various times, to see if we could locate this case. We have finally come to the conclusion that we did not receive a copy; would it be possible for you to send us a copy of the sighting. Your letter of 8 November indicated that this might be possible.

Thank you for your assistance, it is sincerely appreciated.

Sincerely,

H

TDPT (UFO)

UFO Observation, May 13, 1967

Dr. Donald H. Menzel
Harvard College Observatory
60 Garden Street
Cambridge, Massachusetts 02138

Dear Dr. Menzel:

Thank you for your letter of November 8, 1967. Your explanation of the Peterson Field UFO report is certainly plausible. Once again, we are hampered by not being able to duplicate the exact conditions which prevailed at the time of the sighting. I agree with you that this is an excellent case and I also agree that the atmospheric conditions which prevailed at the time are the key to the UFO. It will probably be years before those atmospheric conditions duplicate themselves and then it will be our luck not to have an aircraft on the glide path coming-in for a landing.

We've really had very few good cases which can contribute to science this year. Maybe I'm becoming somewhat callous, but the cases which seem to excite some of the self-styled experts don't seem to excite me at all. The cases which do excite me are those cases where a Deputy Sheriff chases an alleged airborne object for twenty-five minutes. It seems to happen every year and I understand that it happened again this year down in Georgia.

I just skimmed through the article written by Dr. Hynek for Playboy Magazine and personally, I feel that the magazine deserved a better article. The inaccuracies in the article, I suspect, were intended in order to make his story more palatable. The exploitation of the masses continues and it gets pretty sickening.

With your permission, I would like to make your explanation of the Peterson Field UFO a part of the official file. I appreciate your professional evaluation on this case.

Sincerely,

HECTOR QUINTANILLA, Jr, Major, USAF

Dear Major Quintanilla:

I thought you might be interested in this particular radar analysis. It applies to the sighting on May 13, 1967, at Peterson Field at Colorado Springs. If you are interested in further details, I can probably get a copy and send it to you.

Do you have any more interesting sightings? I still have not started writing my new book, but I would like to have any new material that you can suggest.

Cordially yours,

Donald H. Menzel

November 8, 1967

Robert J. Low
University of Colorado
Department of Physics and Astrophysics
202 Woodbury Hall
Boulder, Colorado 80302

Dear Bob:

This is a very belated reply to your letter of June 14, with an interesting report from Peterson Field at Colorado Springs. With all my travelling I simply have not had time until this morning (Sunday) to go into the sighting and give it any serious consideration. I am not able to make a definitive analysis, but at least I have some ideas. I ran into a good many similar cases in World War II, some much more spectacular. One of them is discussed in some depth in my first book and you will find some of the basic theory in my textbook, Elements of Radio Propagation, which undoubtedly you can get from ESSA, if you do not have it in your own library.

It has all of the elements of multiple-hop or multiple-propagation. At first I tried to see whether some combination of reflections involving the two aircraft could produce a ghost image in the observed position. But in this I was unsuccessful.

If we assume that the ceiling was exactly 3,000 feet, the Brasiff plane could have produced a double echo as follows: The first would have been a direct reflection back to traffic control. The second would have been a reflection vertical to the ground, back to the plane, and thence to Traffic Control. This second reflection would produce a ghost image some 3,000 feet behind the plane. This figure does not correspond to the estimated two miles for the ghost target.

Robert J. Low
page two

November 8, 1967

My next suggestion is that, somewhere on the ground, approximately two miles in front of the plane was some object that could serve as a corner reflector for the radio waves. I strongly suspect that it probably was even closer than two miles from Traffic Control. If it were, for example, one mile from Traffic Control then the UFO, when first seen, would have appeared about three miles behind the Braniff plane. But as the plane approached both the target and the reflector, the unknown would have accelerated until it was almost even with the plane.

If we could know how far the plane was at ALS, with the UFO a quarter of a mile behind, we should be able to pin point the direction and location of the corner reflector.

My theory, however, does not account satisfactorily for the apparent change in direction as reported. I should like to know precisely what they mean by "pulled off to the right." The fact that the closest point to the tower was one to one and one-half miles is pretty consistent with my idea of the corner reflector at approximately that range.

As for the description of its course at an elevation of 200 feet and about 300 feet to the right of the runway, I judge they were estimating the position chiefly from the precision scope rather than on the azimuth scan. In other words, the two objects could have had the same azimuth but different distance and they would have thus judged that the UFO was pursuing a roughly parallel path, but at a greater distance. This would account, I think, for the description of maneuvers. It also accounts for the "perfect ILS approach." It was merely reflecting or imaging what Braniff had done, but at a slightly greater distance.

A temperature inversion or other atmospheric anomaly could have produced the effect. I suspect the presence of such an inversion from ~~the~~ observation that the Braniff plane had never been at the six-mile mark on the ILS scope. To me this means that the normal radar beam was simply not reaching the craft. Apparently, then, the UFO appeared almost at the same moment that the Braniff plane appeared. This indicates further the linkage between Braniff and the unknown.

November 8, 1967

Robert J. Low
page three

It would be interesting know the altitude of Continental throughout the flight. This possible solution, which sounds more and more reasonable to me as I follow through the detailed maneuvers again, also suggest the desirability of some experimental tests. Try to get as nearly corresponding atmospheric conditions as possible. Look for a corner reflector. I should expect to find one from one and one-half to two miles from Traffic Control, within fifteen or twenty degrees to the left or to the right of the azimuth of the Braniff plane. If none exists, put in a dump truck with a metal body. Anything that could act as a corner reflector that could have been in the area. Presumably it was not along the runway itself, so that it is necessary to check whether it could have been in one of the fields in that region.

The case is an excellent one and certainly deserves further attention and analysis.

I shall most certainly look forward to hearing from you further. And again I apologize for the long delay. But I think you could, using these clues, repeat the experiment and get substantially the same results. Is anything known concerning weather conditions? Temperature inversions? The existence of a sharp upper cloud layer sometimes indicates a temperature inversion below.

I want to emphasize again that I think you have a good case, with intelligent observers, and good witnesses. As for ~~the~~ record that, in twenty years time, he never saw an echo on radar that he could not explain, I think that record was just broken. In any event he must have been an exceptional person, because "angels" appear on most radar screens. And angels have often bothered observers. But this was not an angel in the general sense.

How is everything going with the investigation? I shall look forward to hearing more about your various adventures.

With best regards, I am,

Cordially yours,

Donald H. Menzel

Dear Don:

Enclosed is a puzzling report from Peterson Field at Colorado Springs. The peculiar thing is that, while radar sightings of UFOs have most interest when there are simultaneous radar and visual observations, in this case the interest is there because the object was in fact not seen, when all the evidence suggests it should have been.

Do you have any thoughts? I thought you would be interested in taking a look at this one.

Best personal greetings.

Cordially yours,

Bob

MEMORANDUM
SIGHTING REPORT

OBSERVER: [REDACTED]

INTERVIEWER: R. J. Low

TIME OF INTERVIEW: 2:00 p. m., Friday, May 26th, 1967

DATE OF SIGHTING: May 13, 1967

TIME OF SIGHTING: 1640 MDT

EXPERIENCE OF OBSERVER:

[REDACTED] has been traffic controller for twenty years. In that time, he has never seen an echo on radar that he was unable to explain.

FIRST OBSERVATION & INSTRUMENTATION

Object first observed on precision radar (frequency 9,000 mc/s), which gives range, azimuth, and elevation. Also located in IFR room are two surveillance radars (one approach and one departure) that give range and azimuth but not elevation. They have a range of 30 miles and a frequency of 2,500 mc/s. None of the instruments provides measurement of velocity.

WEATHER:

A ceiling of 800 to 900 feet which, one-half hour before sighting, lifted to approximately 3,000 feet. At time of sighting, ceiling 3,000 feet and visibility 25 to 30 miles. The field was VFR. The sun was not visible.

RADAR ROOM:

In radar room there are three scopes arranged, from left to right, precision radar (ILS and GCA), approach radar, and departure radar.

DESCRIPTION OF SIGHTING:

At the time of the sighting, the controllers were vectoring in a Braniff Boeing 720 to the ILS runway. Just at the time they got him on the proper azimuth and glide path, he broke out of the overcast and indicated, since he was in the clear and properly lined up for a landing, that he would come in on his own. At this point, the Braniff flight was out four miles, as indicated on the precision scope. There was nothing on the scope, which McCready was monitoring, until Braniff appeared there. At about the same time the Braniff plane appeared on the precision scope, however, McCready began vectoring in a Continental Viscount, which was five to six miles behind Braniff. At this time a "real faint target" appeared about two miles behind Braniff on the elevation scan. He increased (by better aiming of the azimuth and elevation beams) the sensitivity of the scope; the target then became visible on the azimuth scan.

Braniff traveled one mile before McCready said anything. He then asked the man on the azimuth scope if he had a target; he did, the same one. McCready, at that moment, reported the "traffic" to Continental (Braniff, since the object was directly behind, wouldn't have been expected to see it), but Continental was not able to see anything. Then he gave the report to the tower. There were three people in the tower (four in the IFR room) but the tower people could see nothing. At this point, the departure scope man and the arrival data

June 14, 1967

position man walked over to observe the precision scope. The target ~~was~~ showed up with equal clarity on both elevation and azimuth scans. As Braniff approached the runway, McCready reported that the object was overtaking Braniff. At the ALS (approach lighting system), it was only one-quarter mile behind Braniff. At that point, the object pulled off to the right and passed Braniff and continued on a parallel course at an elevation of 200 feet about 300 feet or less to the right of the runway, until it disappeared from the precision scope. The tower people, looking through binoculars, were at no time able to observe the object. The UFO maintained a constant air speed of between 200 and 250 knots. It flew a perfect ILS approach. The closest point of approach to the tower was one to one and one-half miles. Continental came in and made a normal landing and reported that it never saw the object.

McCready and his colleagues in the IFR room did not check to see if the object appeared on the departure scope. They never looked on that scope to see if it could be observed leaving the field.

McCready observed that the object followed what is correct procedure for an overtaking aircraft, for which a right turn is the appropriate evasive action. In addition, if a plane is practicing an ILS approach but is not actually touching down, then it is supposed to, as the object is reported to have done, level off and cross the field at an altitude of 200 feet. The object had all the flight characteristics of a Century series jet (the F100 and 104, etc.). The Century jets make much noise, and, if the object were such a jet, it should have been heard as it made its way across the field. Nothing was heard. The Boeing 720 makes less noise; in any event, it was on the ground at this time making its landing roll with no power.

McCready observed that the Braniff plane had never been at the 6-mile mark on the ILS scope, the position at which the UFO first appeared.

McCready reported that the target was weak when he first saw it at 6 miles. It was weaker than normal, but it looked like an aircraft. By the time it got close it was good and clear. It could, McCready said, have been a bird, but "we don't have 200-knot birds".

McCready discussed some of the effects that sometimes confuse radar observers. In particular he indicated that the inversion effect produces, most frequently, numerous targets close in - up to two or three miles. They characteristically move with the speed of the wind and the direction of the wind. (McCready did not know the wind direction at that time.)

The following persons were on duty at the time of the sighting:

In the IFR room:

Virgil Berridge (on the approach radar); in addition to McCready, the other two were Herbert Sellers and John Major.

In the tower:

Paul Van Houwelling, Ralph Pittman, and Richard Trout.

JUNE 14, 1967

McCready observed that the target could not be a double-echo return, because it showed up at the same range on both the precision and surveillance radars. The former has a pulse rate many times that of the latter.

The elevation beam of the ILS radar is an elliptical beam oriented horizontally and swept vertically. The azimuth beam is oriented vertically and swept horizontally. One increases the sensitivity of the radar by servoing the azimuth in elevation to get more directly on the target, and, similarly, servoing the elevation scan in azimuth.

END OF REPORT

f. Flying over open country?

g. Other

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

☐ Yes

☐ No

25. Did you observe the object through any of the following?

☒ a. Eyeglasses

Yes

No

e. Binoculars

Yes

No

☒ b. Sun glasses

Yes

No

f. Telescope

Yes

No

☒ c. Windshield

Yes

No

g. Theodolite

Yes

No

☒ d. Window glass

Yes

No

h. Other

a screen the windows were up and curtains covered them

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I know of nothing like it man made except it had a Bulliance such as the sun. But it was only lumenous and did not give off light.

Official U.S. Air Force

Page 3

14. Did the object disappear while you were watching it? If so, how?

NO
and when I went to get my wife to see it
only when it moved so far out you couldn't see

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

it moved behind:

except when it came up it came out
of the forest.

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

in front of:

17. Tell in a few words the following things about the object:

a. Sound

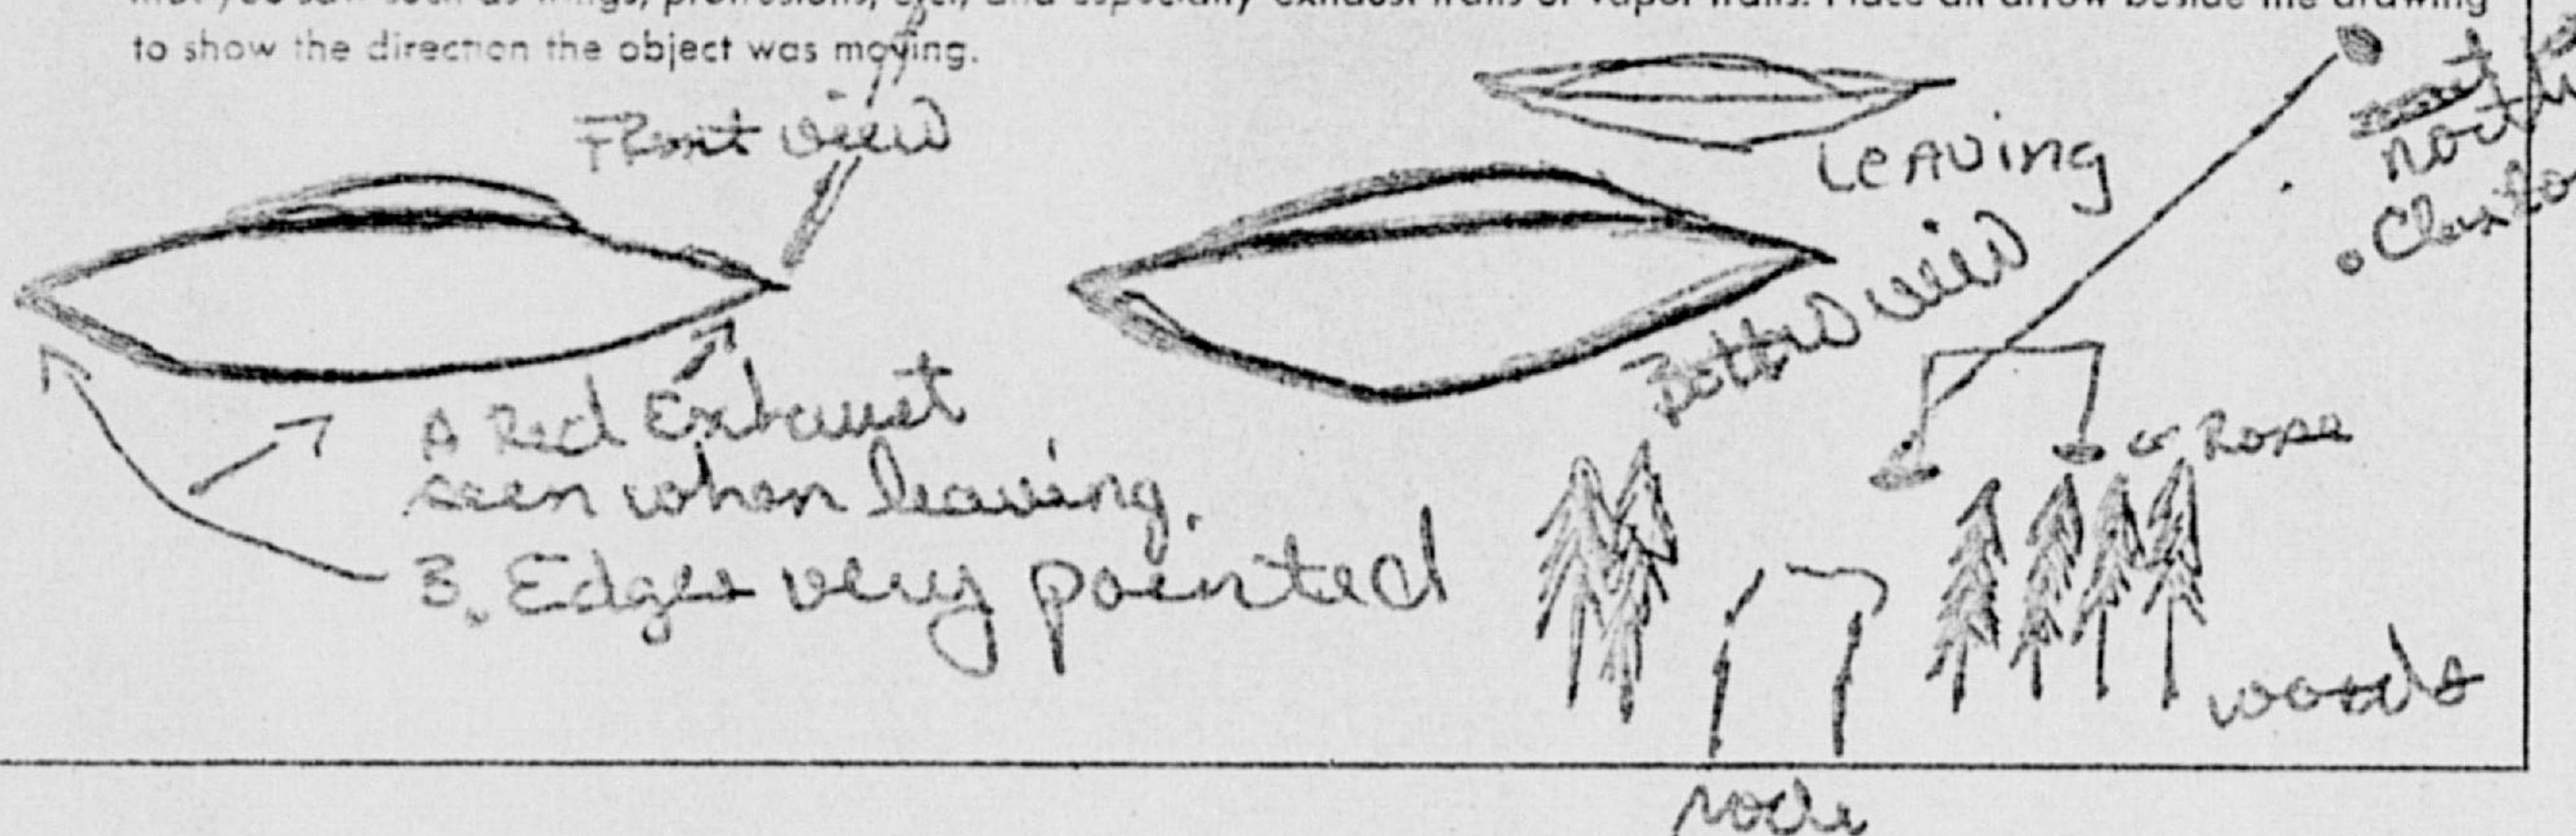

a low sound a faint whispering sound

b. Color

Bright Orange when it started to leave the
bottom turned red.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

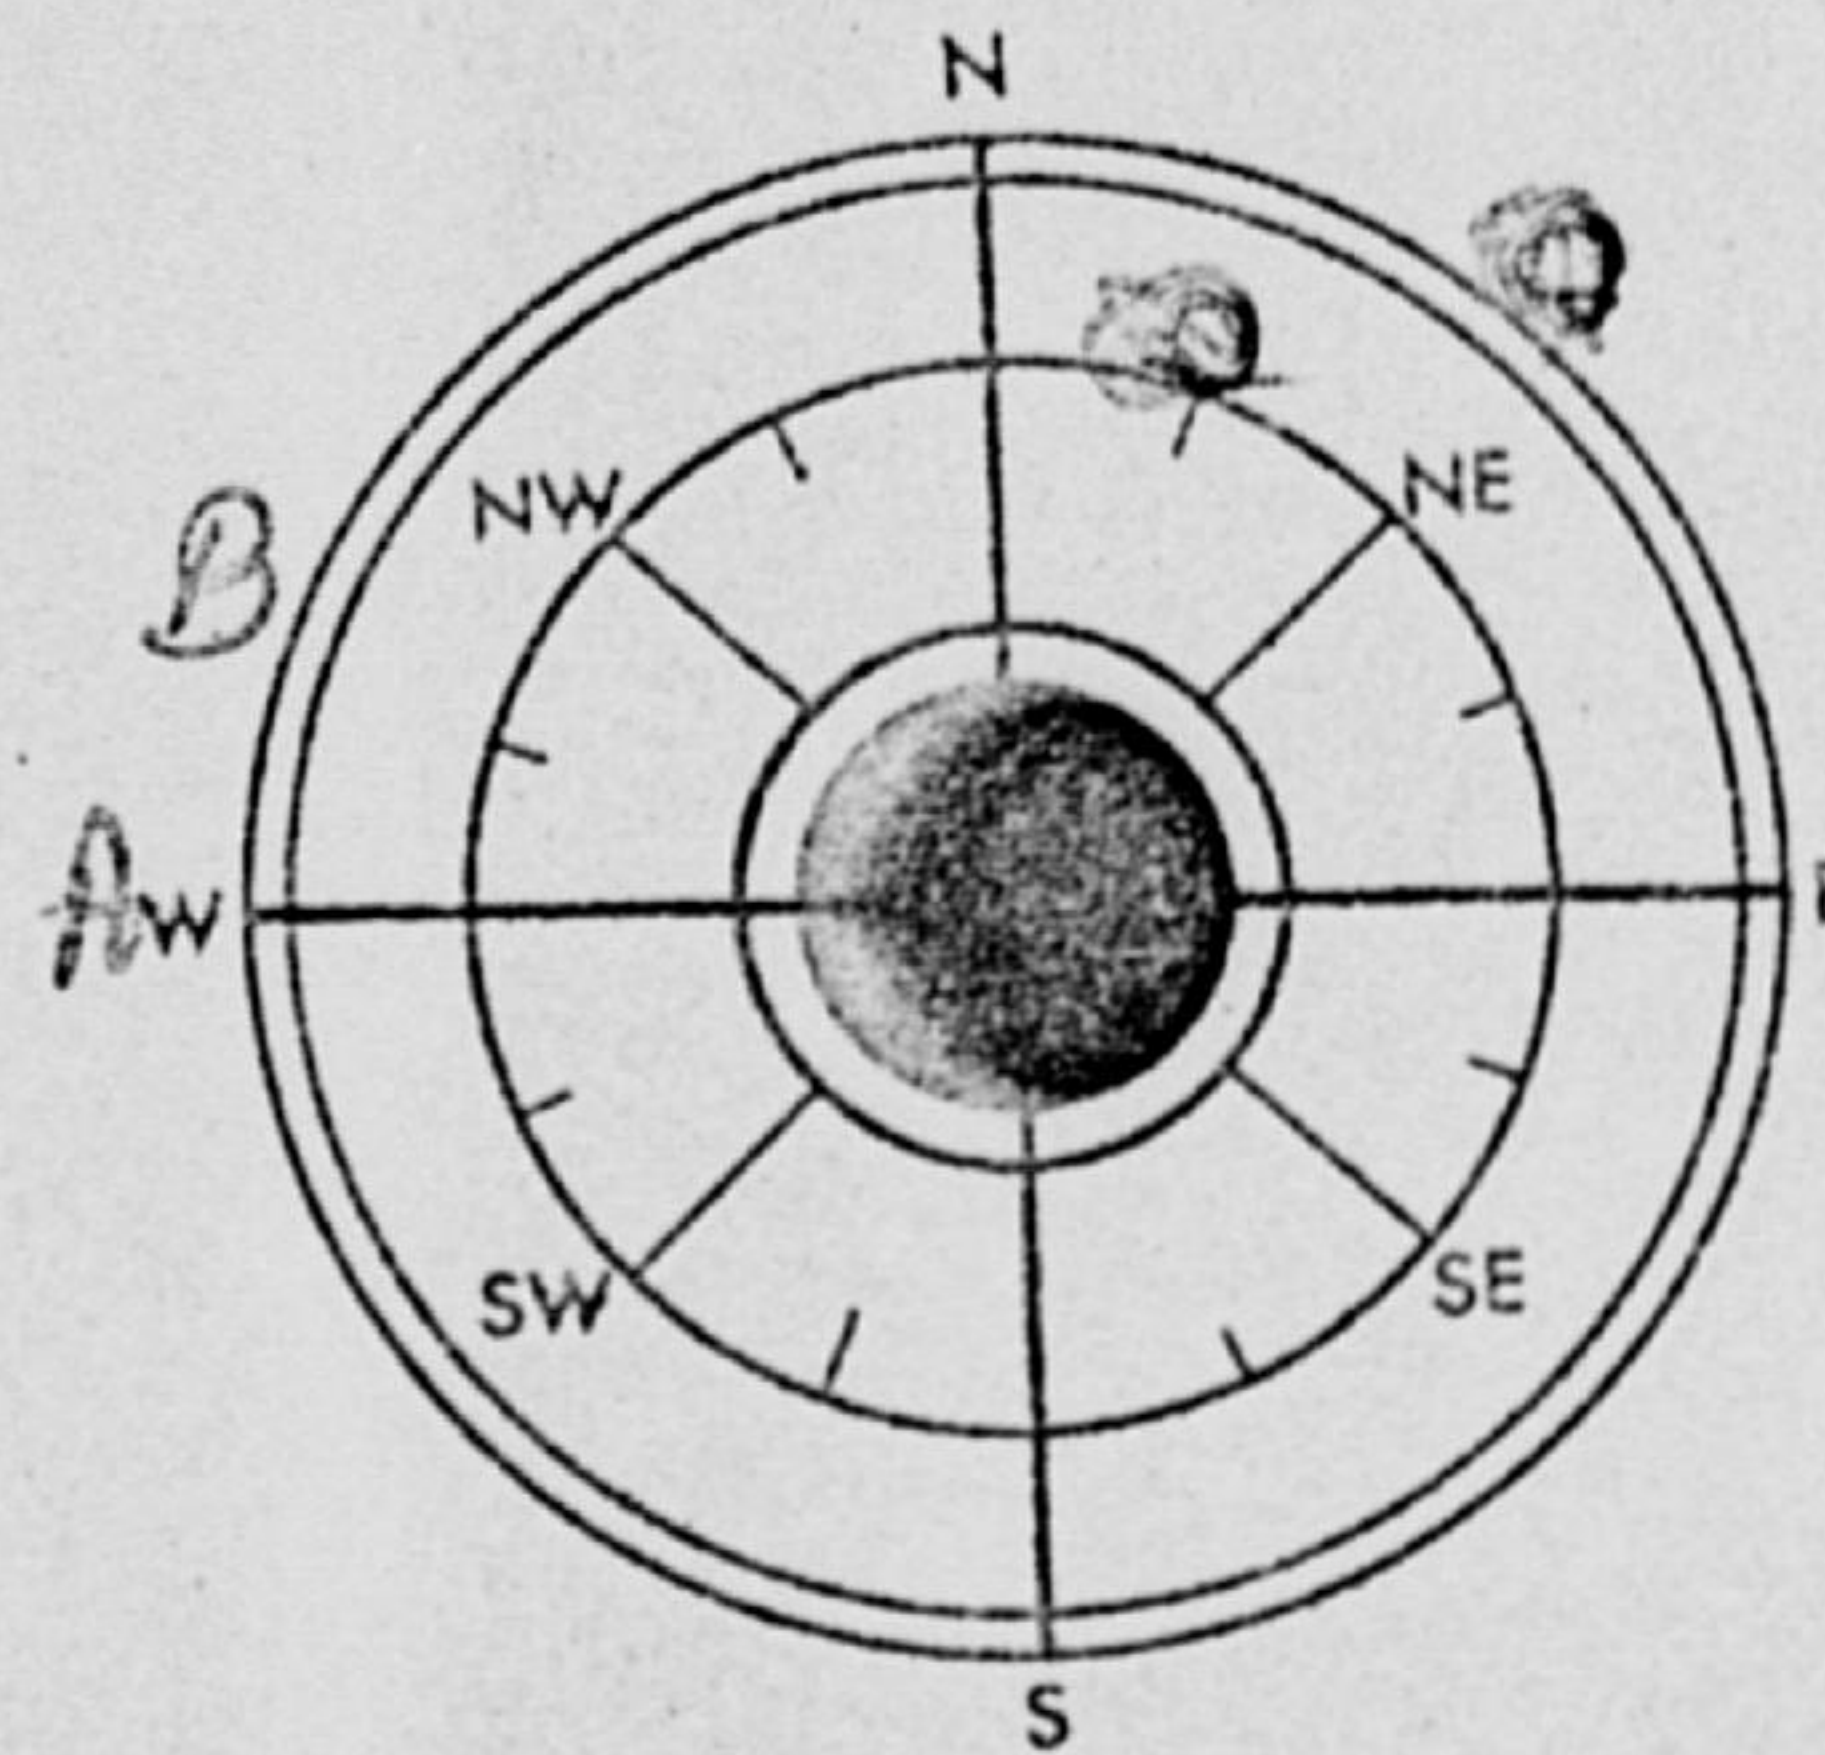

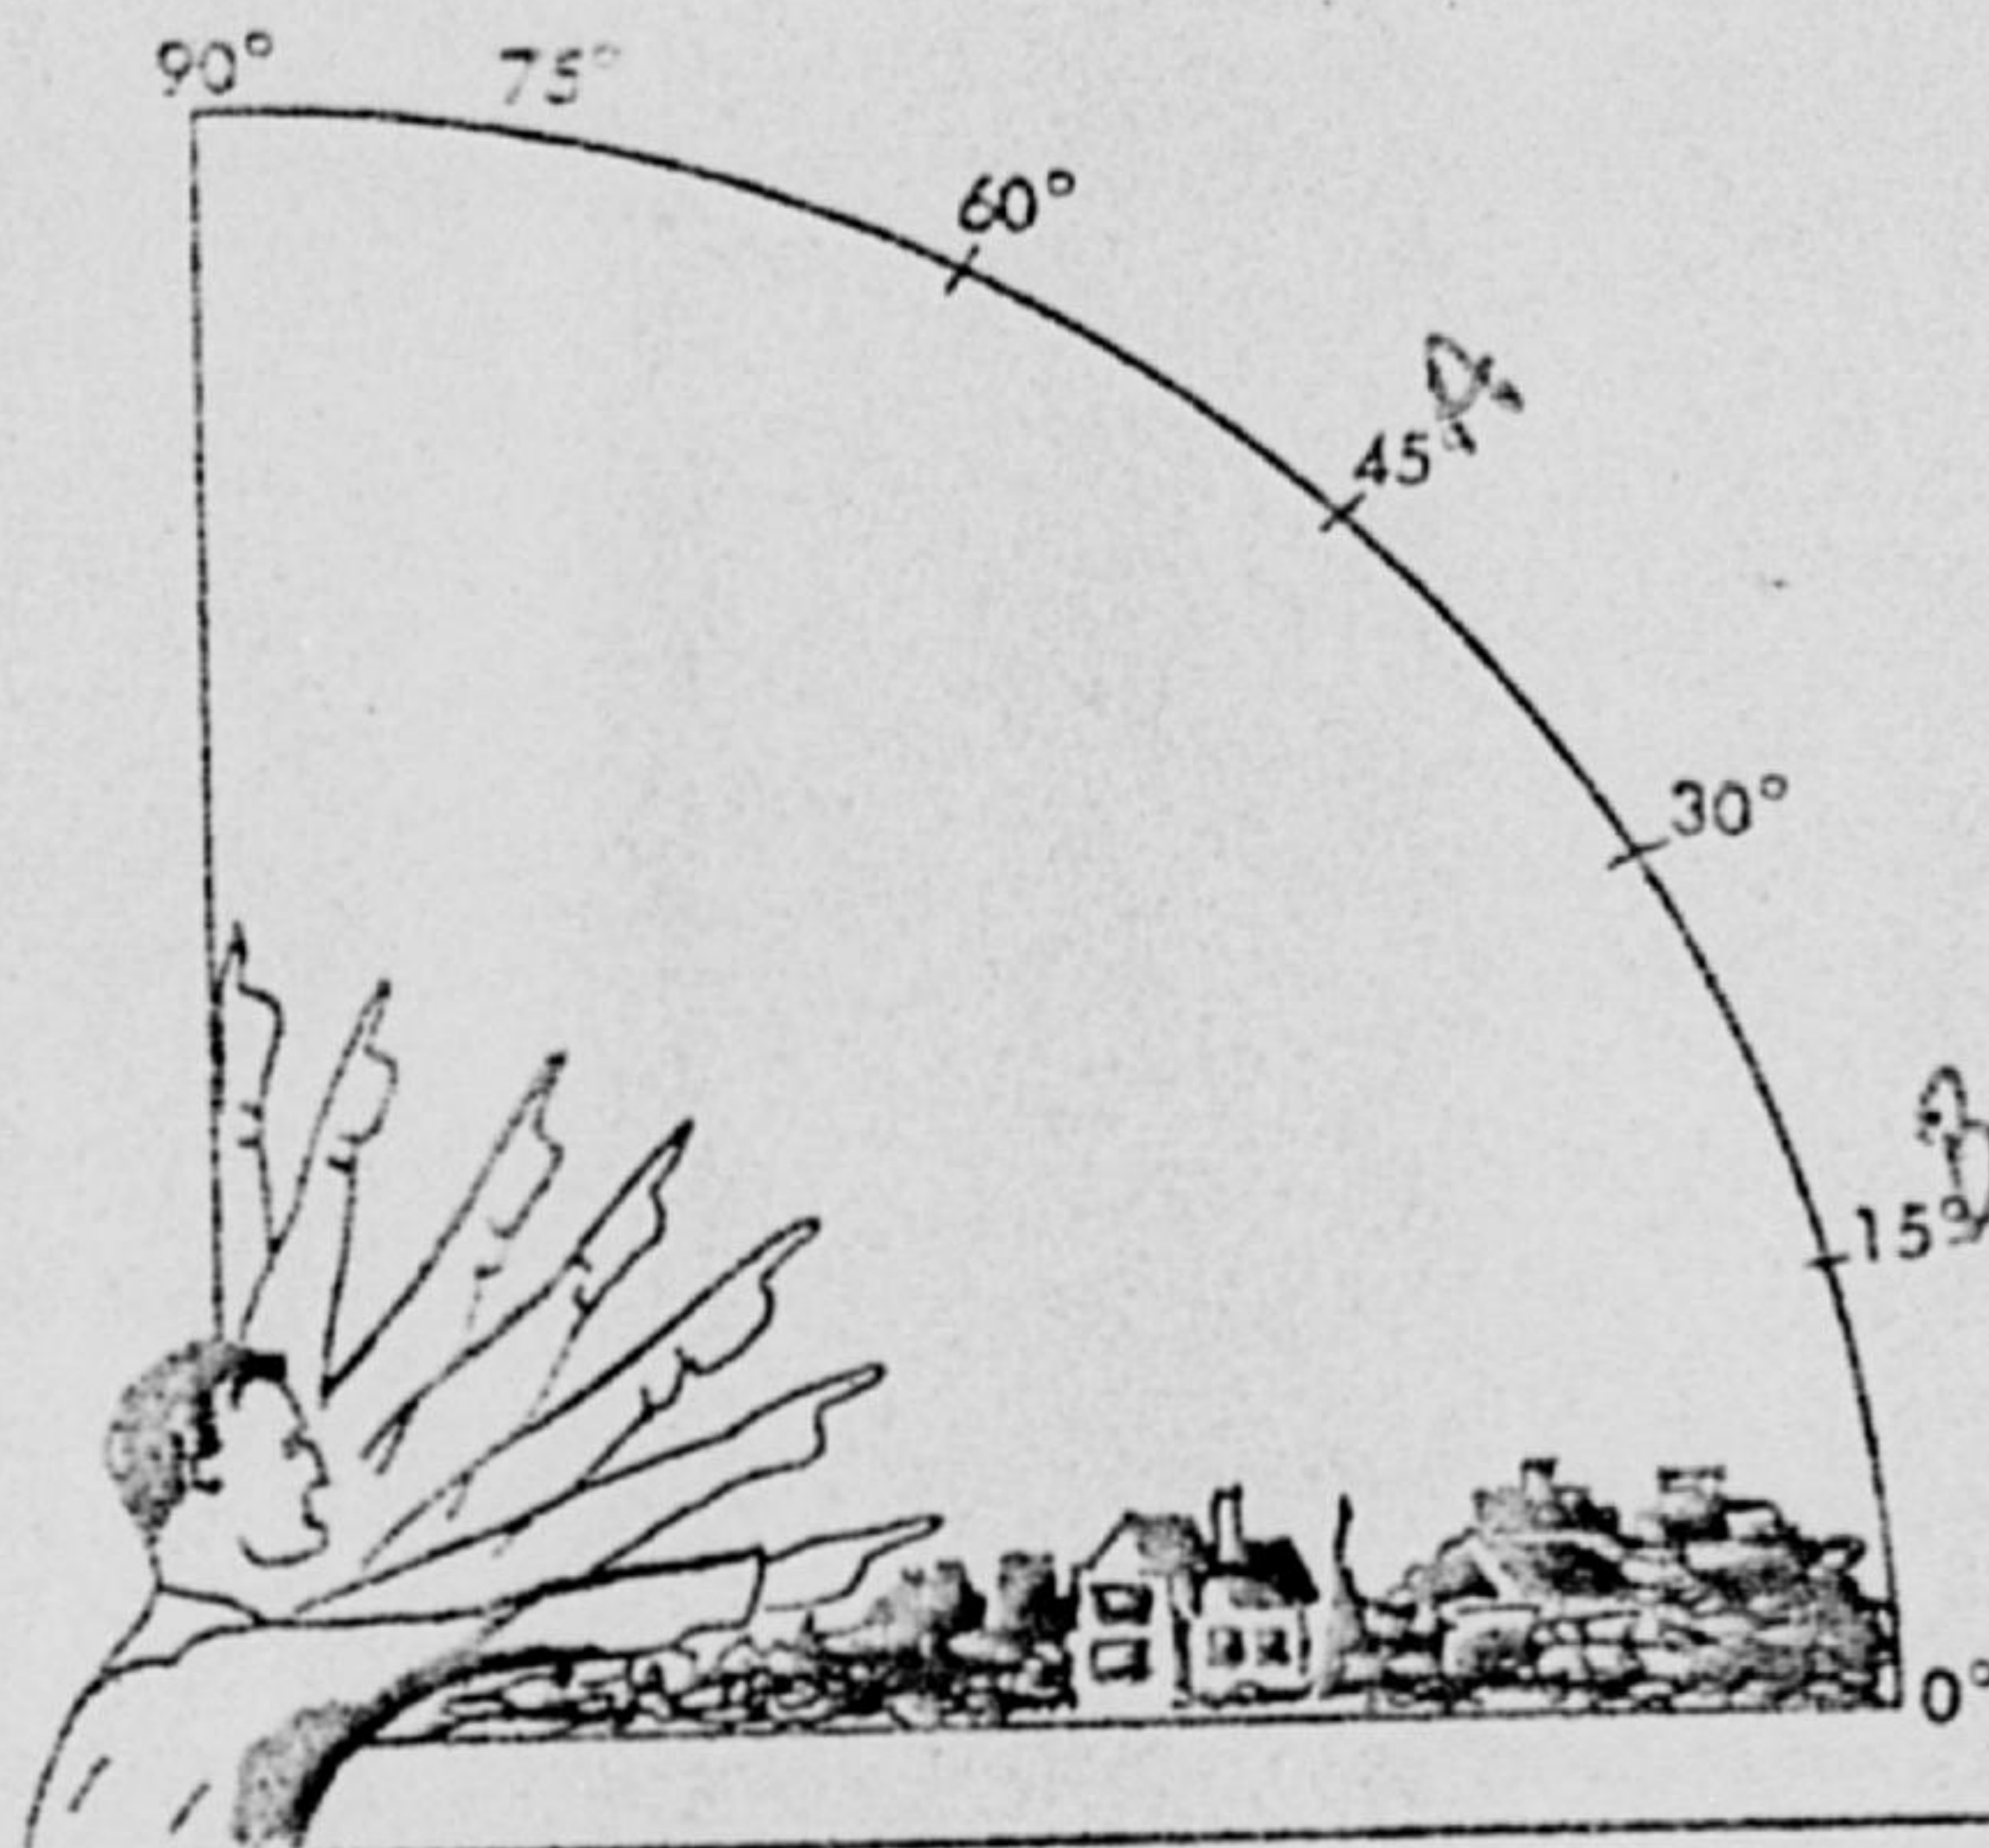

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

Official U.S. Air Force

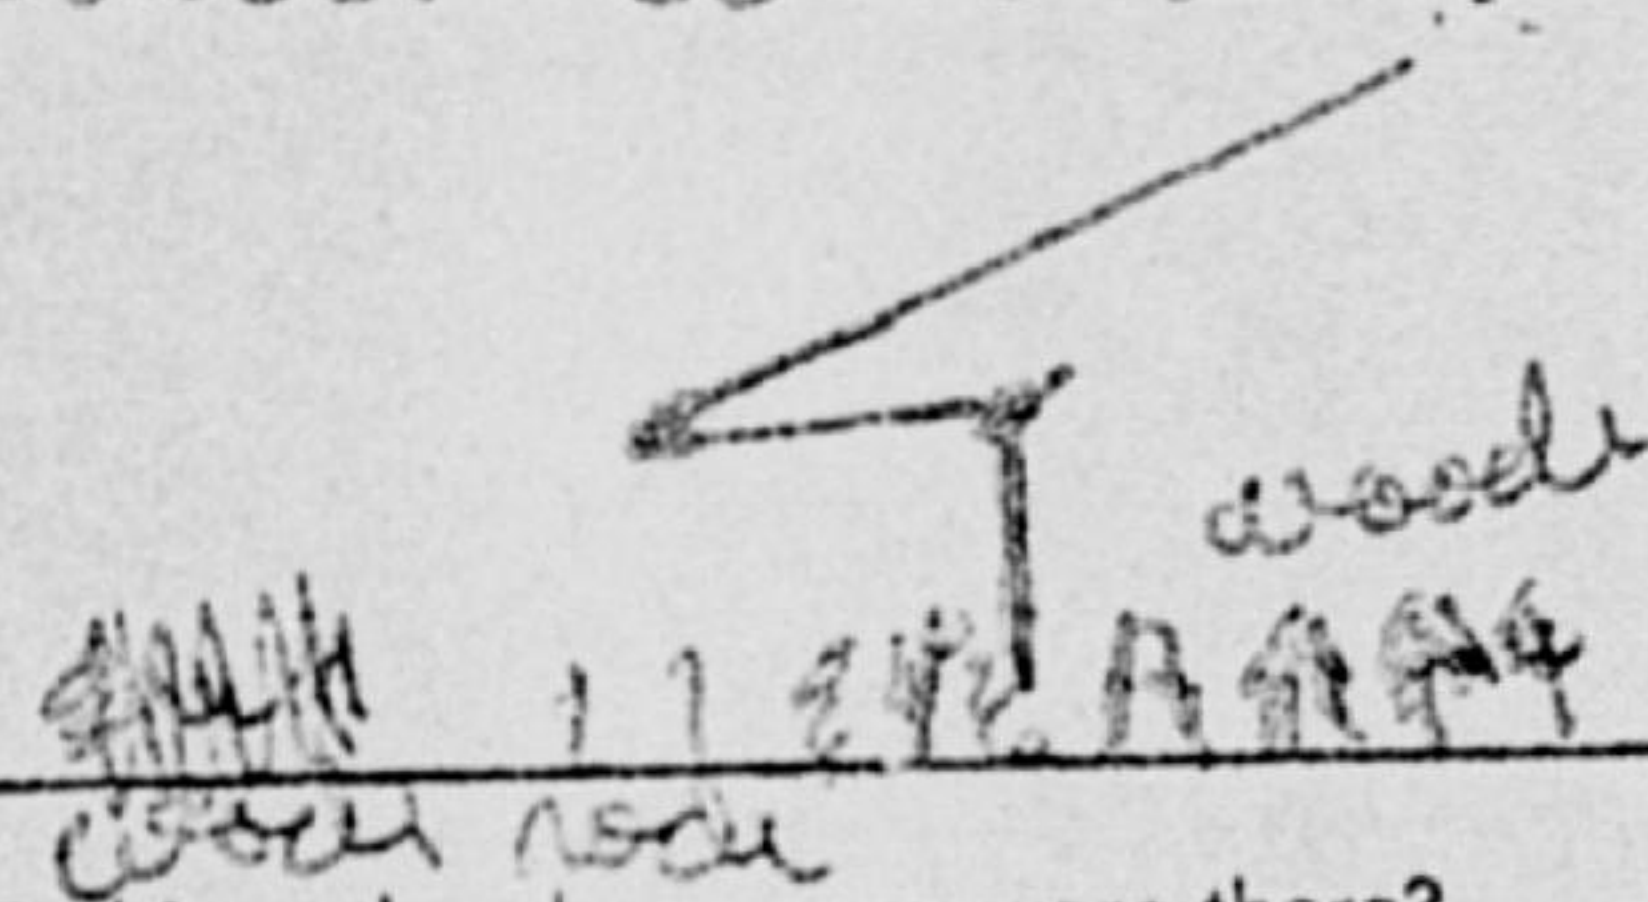

Page 5

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

it would square corners: such as this

a perfect balance motion.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

JFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO

31. Was anyone else with you at the time you saw the object? (Circle One) ☒ Yes ☐ No

31.1 IF you answered YES, did they see the object too? (Circle One) ☒ Yes ☐ No

31.2 Please list their names and addresses:

my family
Mr. [REDACTED]
Route 2
CLAXTON GA 30417

4 of us.
my two sons and
my wife and I.

32. Please give the following information about yourself:

NAME [REDACTED] First Name [REDACTED] Middle Name [REDACTED]

ADDRESS [REDACTED] CLAXTON GA
Street City Zone 5 State

TELEPHONE NUMBER [REDACTED] AGE 37 SEX Male

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I have been in the Air Force a number of years and have been experienced in seeing aircraft of all type. I am now in the Air Guard Reserve and have never seen a object like this before and also a forest Ranger for the US forestry service of the Vatinina fire tower.

33. When and to whom did you report that you had seen the object?

Day Month Year

Official U.S. Air Force UF

Page 7

34. Date you completed this questionnaire:

saw the 15
14 May 1967
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The object may disprove the theory of an anti gravity force to propel it. I saw a reddish hue under the craft and a flash of blood red color along its side. Such as a rockets thruster. It could square corners and could move dead still with no movement noticeable to the eye. When first seen it look like a orange yellow Ball it was very far off. I left to get someone else to see it then it disappear later to come from the forest.

Dear Sirs:

About one month ago (which is a very rough guess) I was just looking out my window at the stars. I don't know why but there was one star that I was attracted to. I was watching it for about three minutes when it started to move to the east. I will remind you again that this looked just like a bright star , a solid white. At first I had no idea what it was. It was not a plane or a helicopter because there was just one light. Suddenly, it stopped above some trees. It went down behind the trees and I could see a bit of it. It turned red, then back to white, and rose again. It repeated this action two or three more times. At that time it escaped from my vision behind some other trees. I watched for about five more minutes to see if it would rise again but to my knowledge it did not. Last night I noticed that the same 'star' had reappeared and did not move at all. Right now at about 9:30 P.M.(E.S.T.) I am looking the same window at approximately the same time and it has dissapeared again. I would really appriciate an answer to this letter and an explanation of what I saw because everyone I tell this story to does not believe me except a few people who think that they saw something also.

Sincerely Yours,

~~XXXXXXXXXXXXXXXXXXXX~~

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

Day Month Year
May 1961

2. Time of day:

Hour Minutes
8 30

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Nearest Postal Address

City or Town

State or County

5. How long was object in sight? (Total Duration)

Hours

Minutes

Seconds

a. Certain

b. Fairly certain

c. Not very sure

d. Just a guess

5.1 How was time in sight determined?

5.2 Was object in sight continuously?

Yes

No

6. What was the condition of the sky?

DAY

a. Bright

b. Cloudy

NIGHT

a. Bright

b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

street light

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

- | | | | |
|---|------------|----|------------|
| a. Appear to stand still at any time? | <u>Yes</u> | No | Don't know |
| b. Suddenly speed up and rush away at any time? | <u>Yes</u> | No | Don't know |
| c. Break up into parts or explode? | <u>Yes</u> | No | Don't know |
| d. Give off smoke? | <u>Yes</u> | No | Don't know |
| e. Change brightness? | <u>Yes</u> | No | Don't know |
| f. Change shape? | <u>Yes</u> | No | Don't know |
| g. Flash or flicker? | <u>Yes</u> | No | Don't know |
| h. Disappear and reappear? | <u>Yes</u> | No | Don't know |

14. Did the object disappear while you were watching it? If so, how?

It disappeared and reappeared.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): ☒ Yes ☐ No ☐ Don't Know. IF you answered YES, then tell what it moved behind: *clouds*

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): ☐ Yes ☒ No ☐ Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound *hiss*

b. Color *It changed colors, to red, blue, and white.*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Half of the match stick.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

o

20. Do you think you can estimate the speed of the object?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then what speed would you estimate? 1500 MPH

21. Do you think you can estimate how far away from you the object was?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then how far away would you say it was? 8 miles up

22. Where were you located when you saw the object?

(Circle One):

- a. Inside a building
- b. In a car
- c. ☒ Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other _____

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. ☒ In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

☐ Yes

☐ No

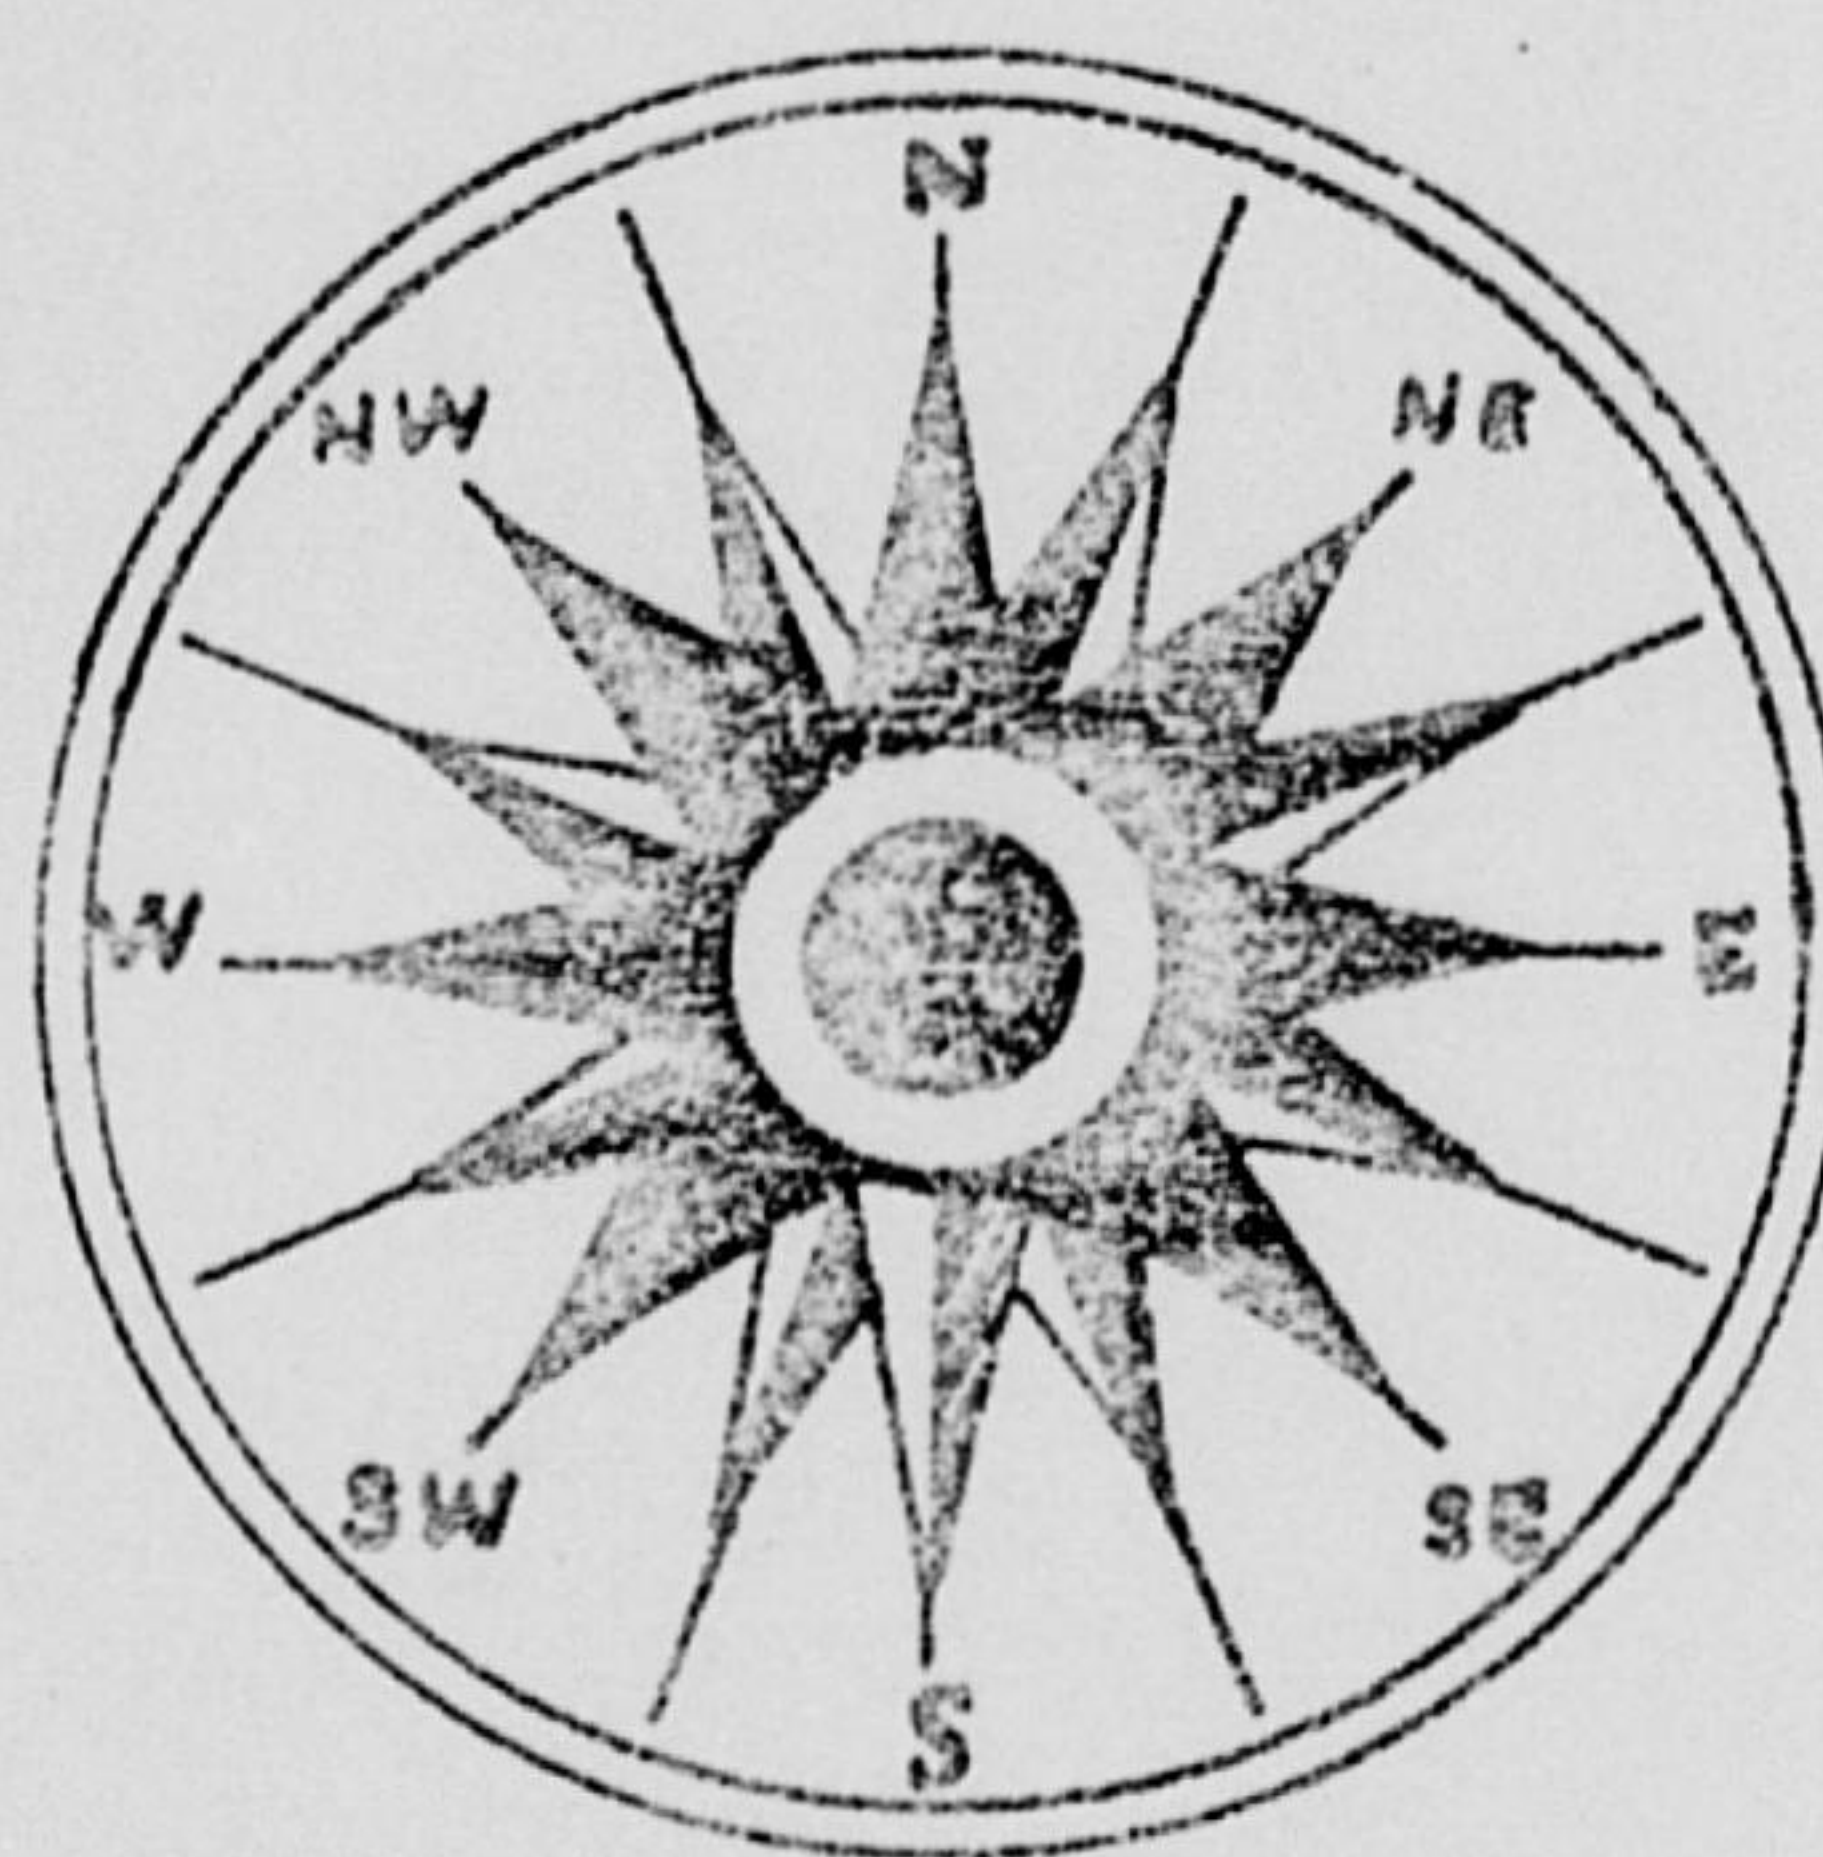

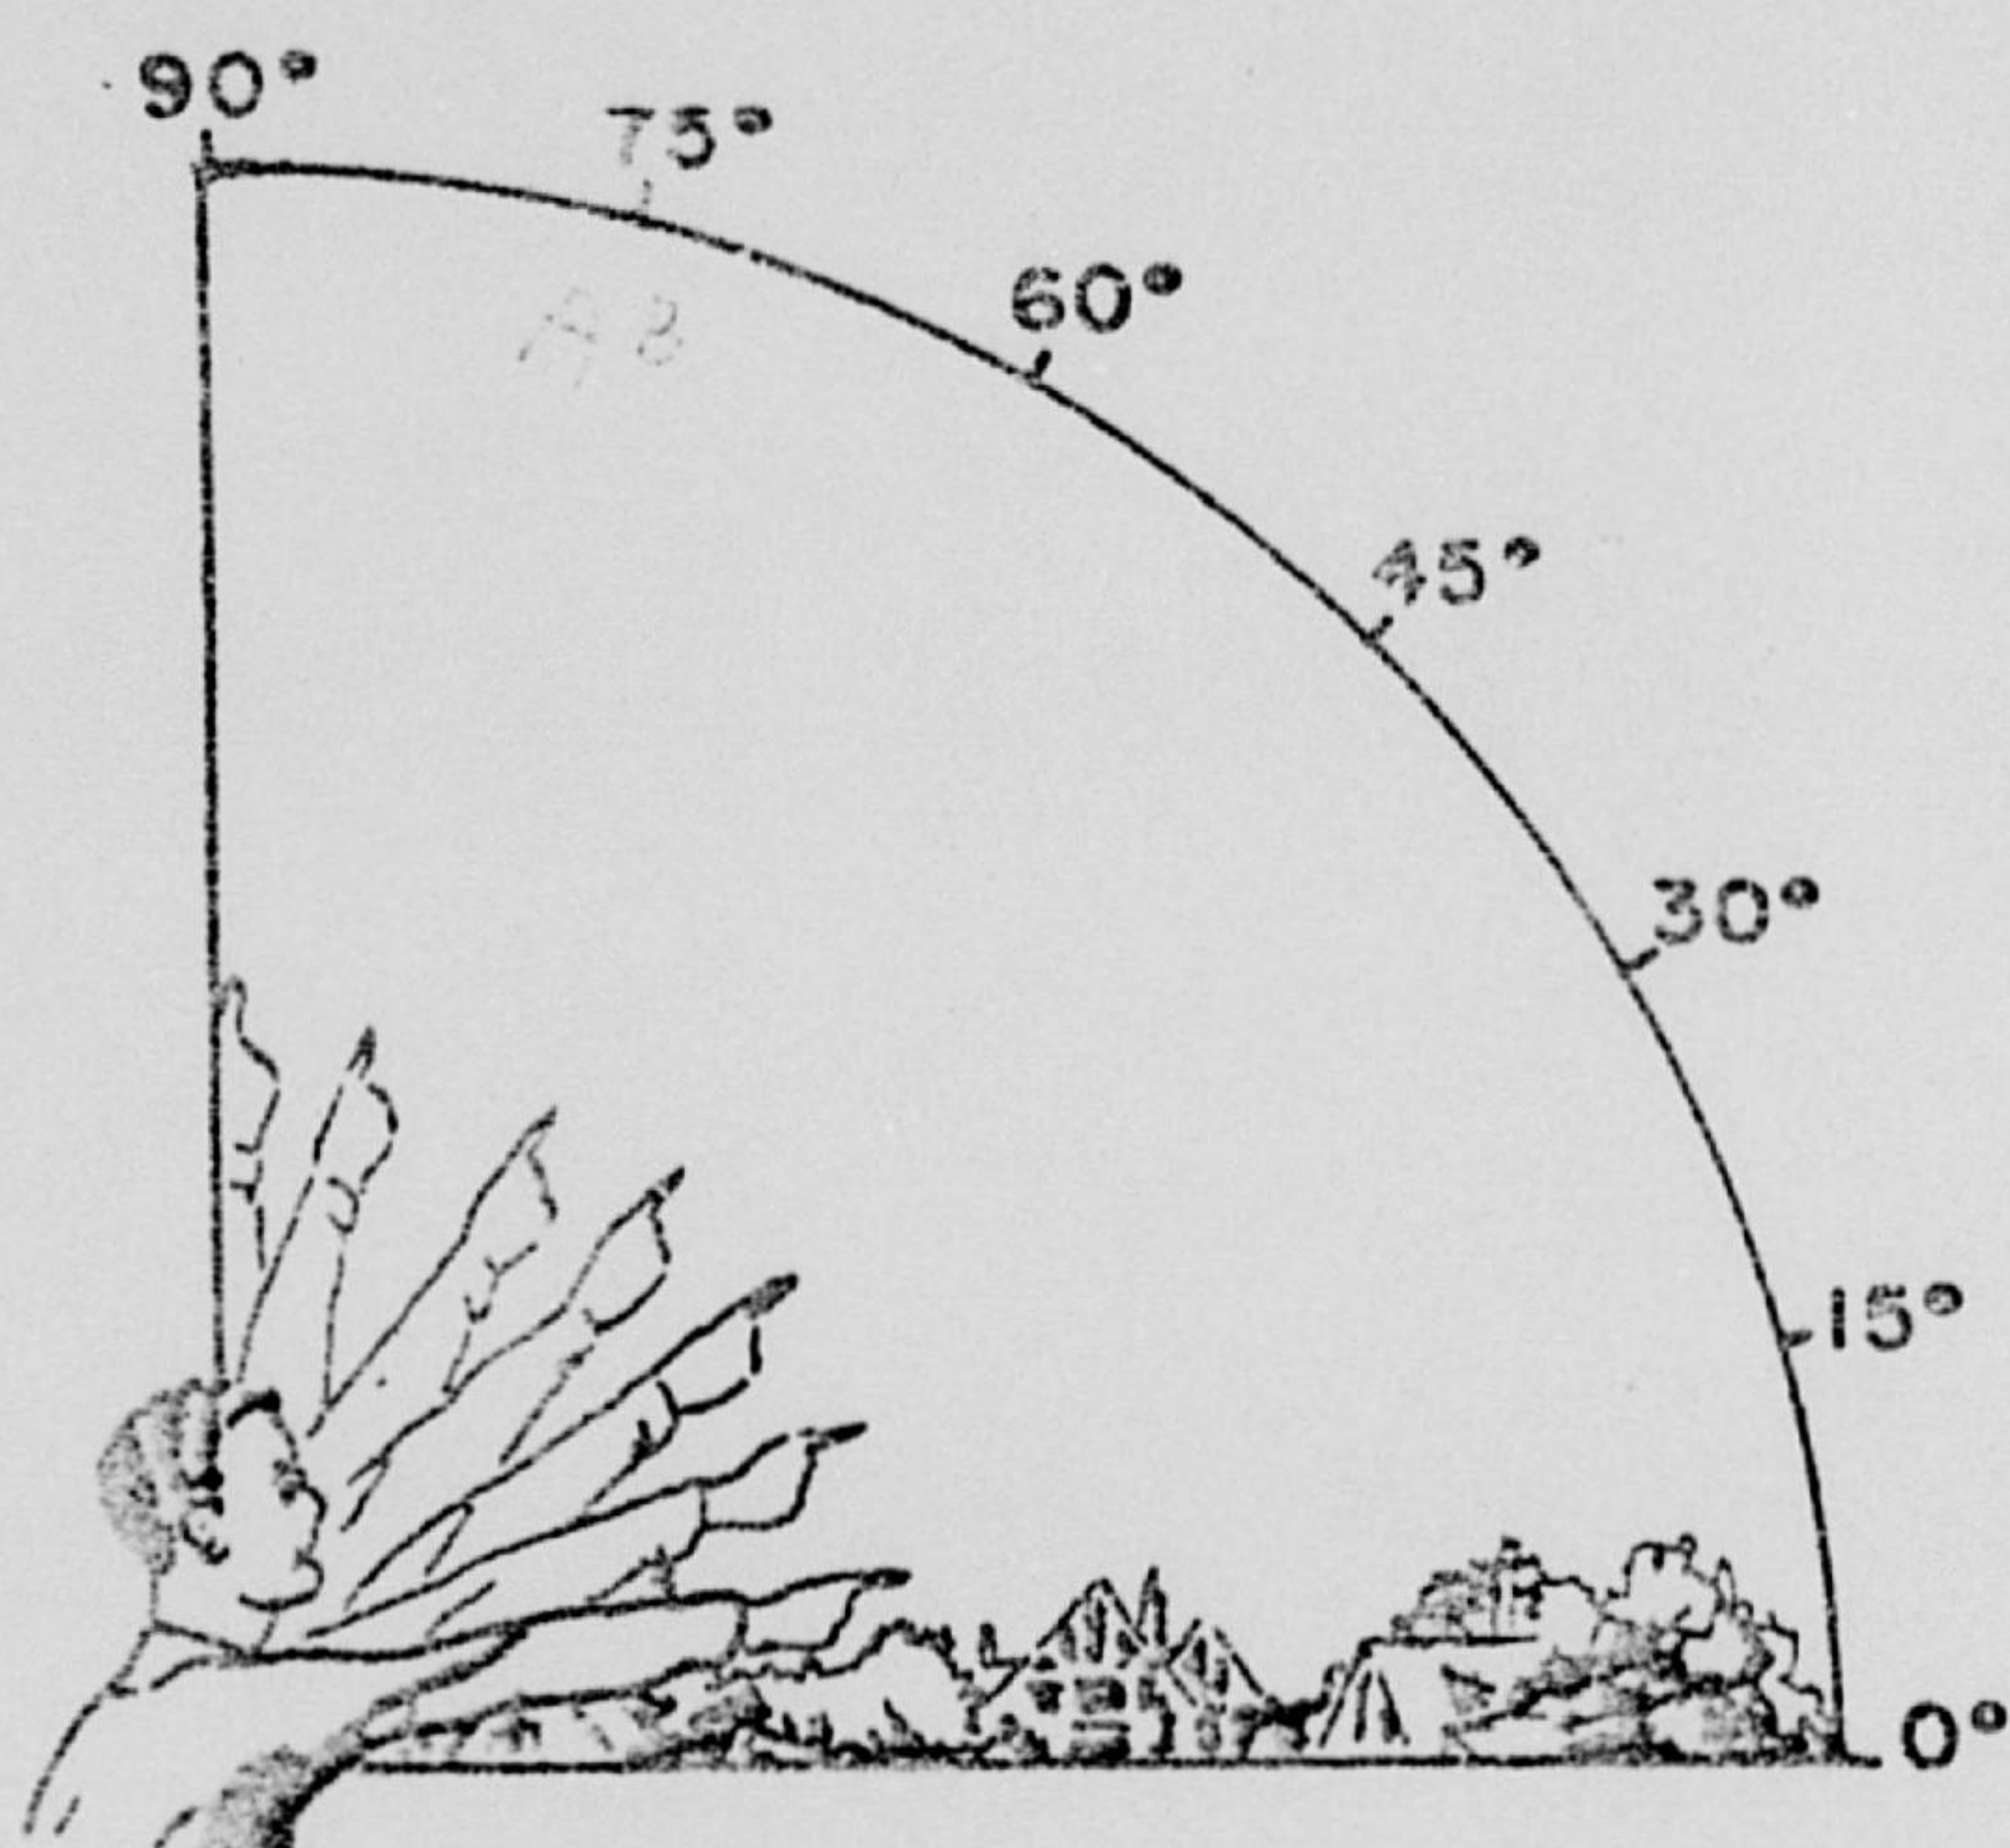

25. Did you observe the object through any of the following?

- a. Eyeglasses Yes No
- b. Sun glasses Yes No
- c. Windshield Yes No
- d. Window glass Yes No

- e. Binoculars ☒ Yes No
- f. Telescope ☒ Yes No
- g. Theodolite Yes No
- h. Other _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? Two
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? (Circle One) Yes No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

31.2 Please list their names and addresses:

[Redacted names and addresses]

32. Please give the following information about yourself:

NAME
 Last Name First Name Middle Name

ADDRESS
 Street City Zone State

TELEPHONE NUMBER AGE 11 SEX

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

Day

Month

Year

11-57

to mother

34. Date you completed this questionnaire:

16 04 19-67
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Col. James C. Marshall

Director of Technology & Subsystems

I am quite certain what the children saw was the "Fanning Star" or "Venus".

I am not much of an astronomer. The boys were insistent & therefore I permitted the boys to submit their information because they were extremely excited & certain that an extra-terrestrial invasion was imminent.

Thank you

[REDACTED]

1. DATE - TIME GROUP 25/0250Z	2. LOCATION Bridlewood, Colorado
3. SOURCE Civilian	10. CONCLUSION Balloon(hot air) <i>Poss. - but really unidentified in absence of definite information.</i>
4. NUMBER OF OBJECTS 1	11. BRIEF SUMMARY AND ANALYSIS Observer saw a cylindrical shaped object that appeared slowly in the western sky. The object's color was white and was said to be the size of a quarter held vertically length. During the period of the sighting students in the Denver area were releasing balloons with candles. A possible cause of this sighting would be a hot air balloon.
5. LENGTH OF OBSERVATION 15-20 minutes

LOWRY AIR FORCE BASE, COLORADO 80230

REPLY TO
ATTN OF: XP

2 AUG 1967

SUBJECT: UFO Observation, 25 May 1967

TO: FTD (TDET/UFO)

1. Reference your letters of 29 May 1967 and 20 July 1967 (unsigned), above subject.

2. Add paragraph k to LTTC message APCP 00180, 25 May 1967:

"k. During the period of this sighting students in the Denver area were releasing balloons with candles which resulted in a number of UFO reportings. Wind on this particular night was from the northeast at four knots. In view of the foregoing, possible cause of sighting was considered to be a balloon of a type released by students or a weather balloon. Any questions concerning this analysis should be referred to LTTC (XP), Colonel Clyde L. Harvey, Jr., Director of Plans/Operations, area code 303, office phone 394-3268, home phone 394-2914."

3. As written, AFR 80-17 requires submission of a UFO report when any unknown object is sighted by an observer (regardless of age, mentality, degree of intoxication, etc.). In view of this fact and other requirements imposed by the regulation, many - and perhaps most - bases are using their own judgment and not submitting reports in accordance with the strictest interpretation of the regulation. This fact was brought out at a UFO meeting held this year by Dr. Condon of the University of Colorado at Boulder. In view of the above, it is considered appropriate that AFR 80-17 be reviewed to determine whether a more practical, meaningful, and beneficial regulation can be devised.

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor

d. As a light

e. Don't remember

AT A DISTANCE YOU COULDN'T TELL
IT FROM A SATELLITE EXCEPT
WHEN MANEUVERING.

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

SATELLITE OR STAR.

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - ☒ b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other AT ONE TIME LOOKED FLAT
EDGES THINNER THAN
CENTER. CENTER RATHER
THICK.

13. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time?
- ☒ b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?
- d. Give off smoke?
- e. Change brightness?
- f. Change shape?
- g. Flash or flicker?
- h. Disappear and reappear?

☒ Yes	No	Don't know
☒ Yes	No	Don't know
Yes	☒ No	Don't know
Yes	☒ No	Don't know
Yes	☒ No	Don't know
Yes	☒ No	Don't know
Yes	☒ No	Don't know
☒ Yes	No	Don't know

ONLY AT END OF RUN WENT INTO OVERCAST WAY OUT.

14. Did the object disappear while you were watching it? If so, how? JUST ONE TIME WENT
IN TO OVERCAST AND JUST AS QUICKLY REAPPEARED.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what
it moved behind: OVERCAST JUST BEFORE STARTING TO RETURN.

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what
in front of: OVERCAST SO WE GOT A GOOD LOOK AT IT.
ALSO TWO STARS SOUTHEAST • STAR

• STAR.

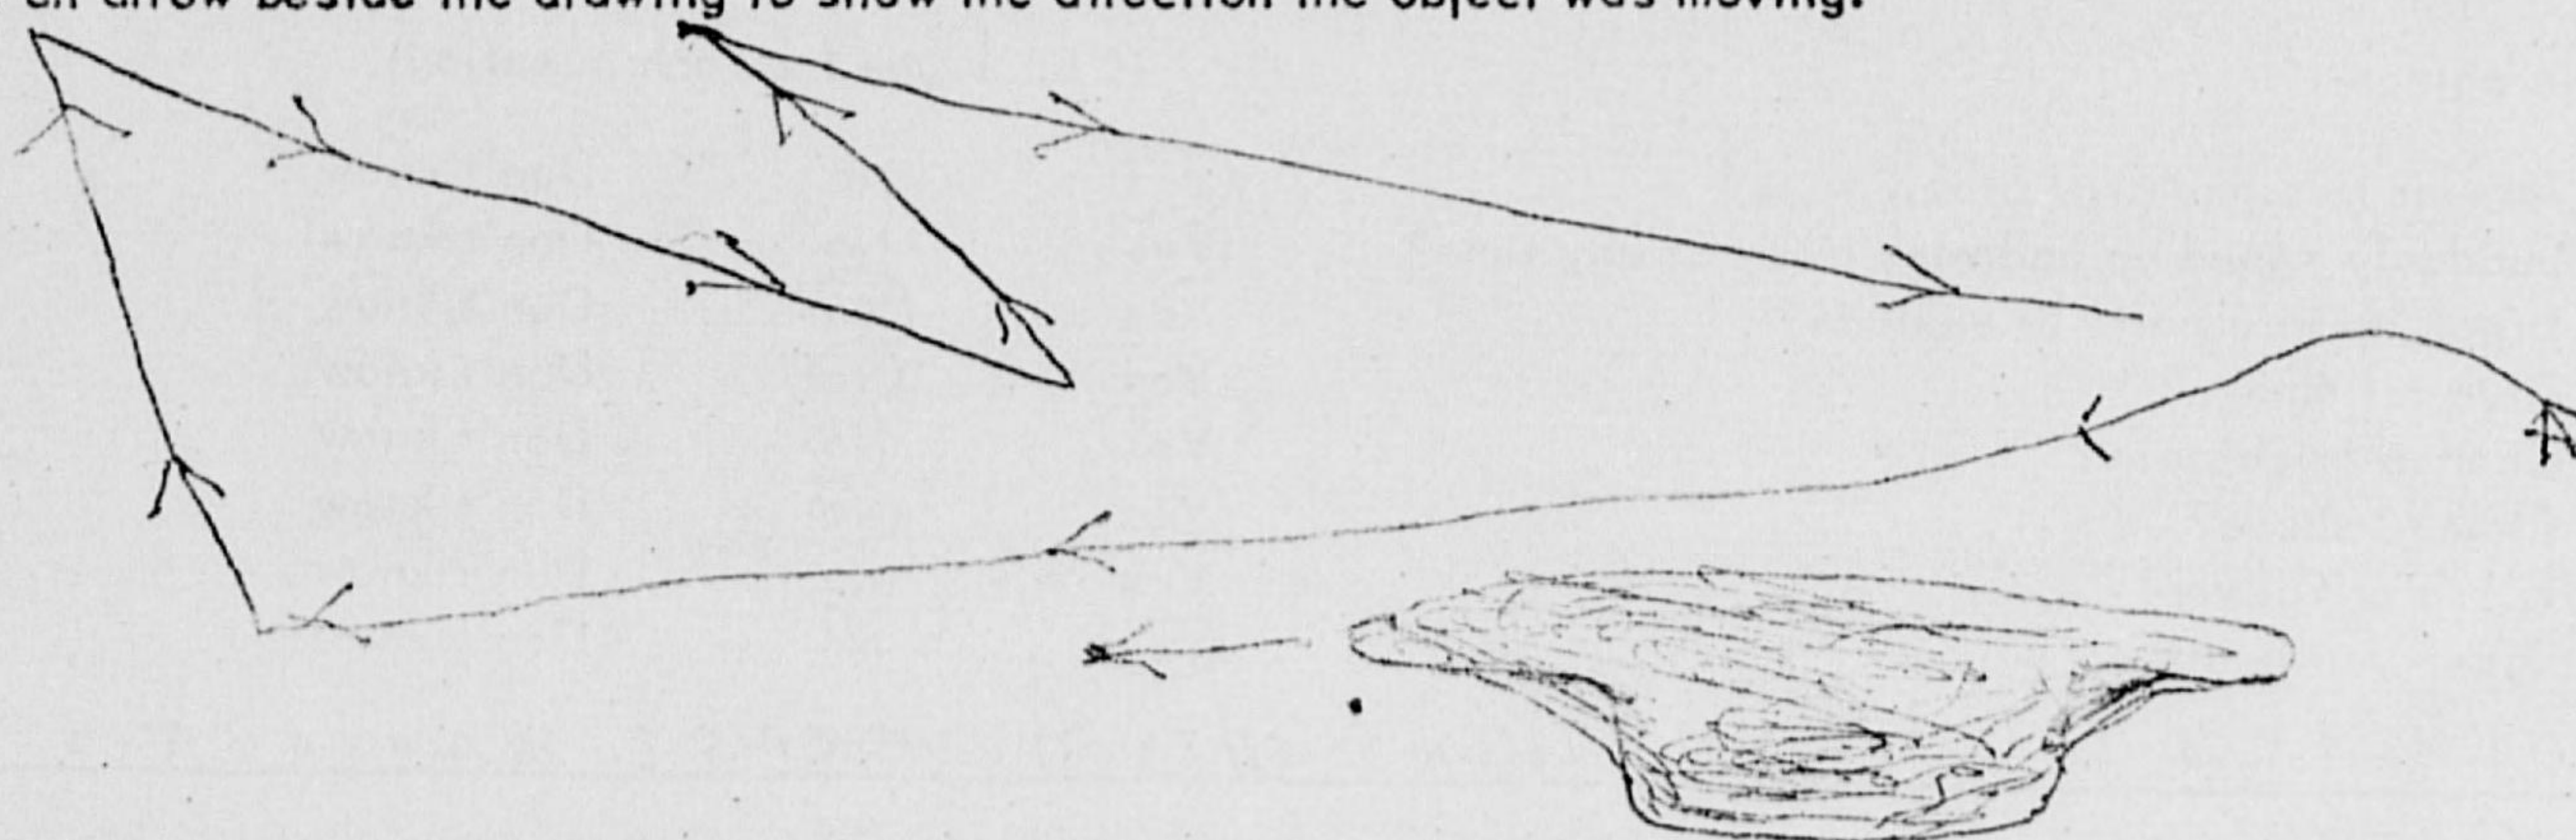

17. Tell in a few words the following things about the object:

a. Sound NOISE

b. Color SAME AS SATELLITE.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? 20,000 MILES PER HR.

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? 200,000 MILES

22. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other _____

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other BRICK YARD

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

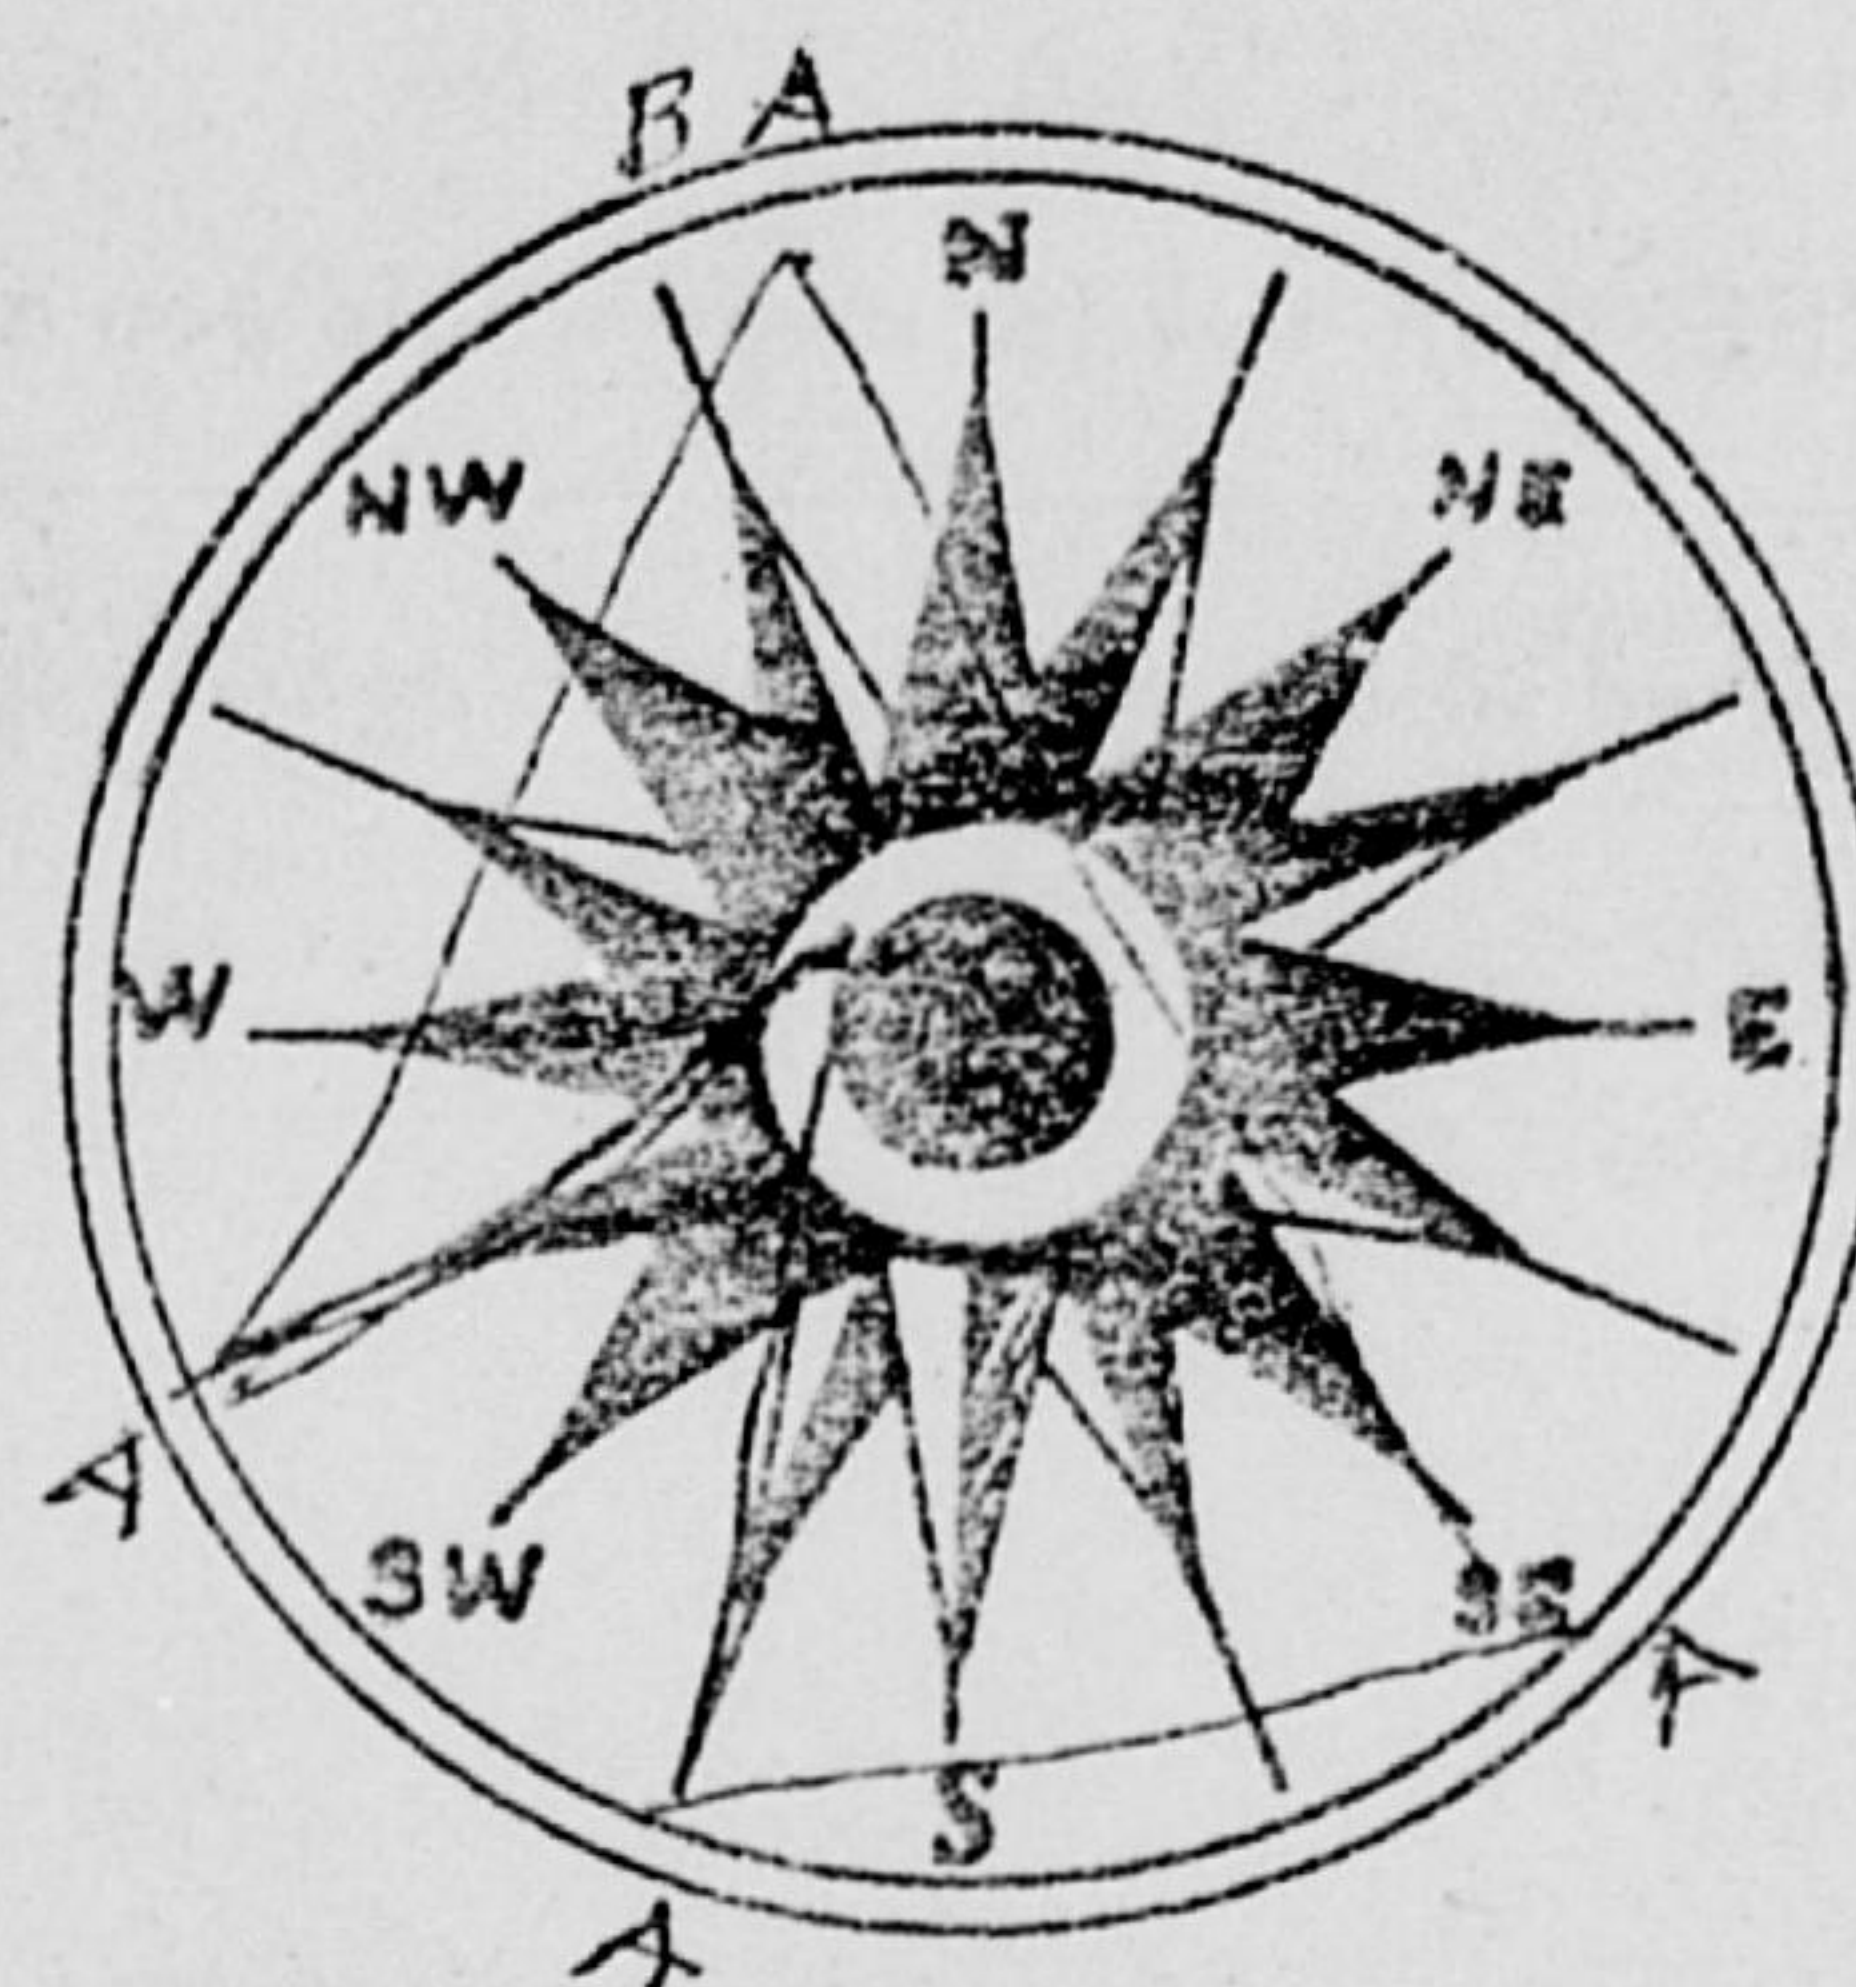

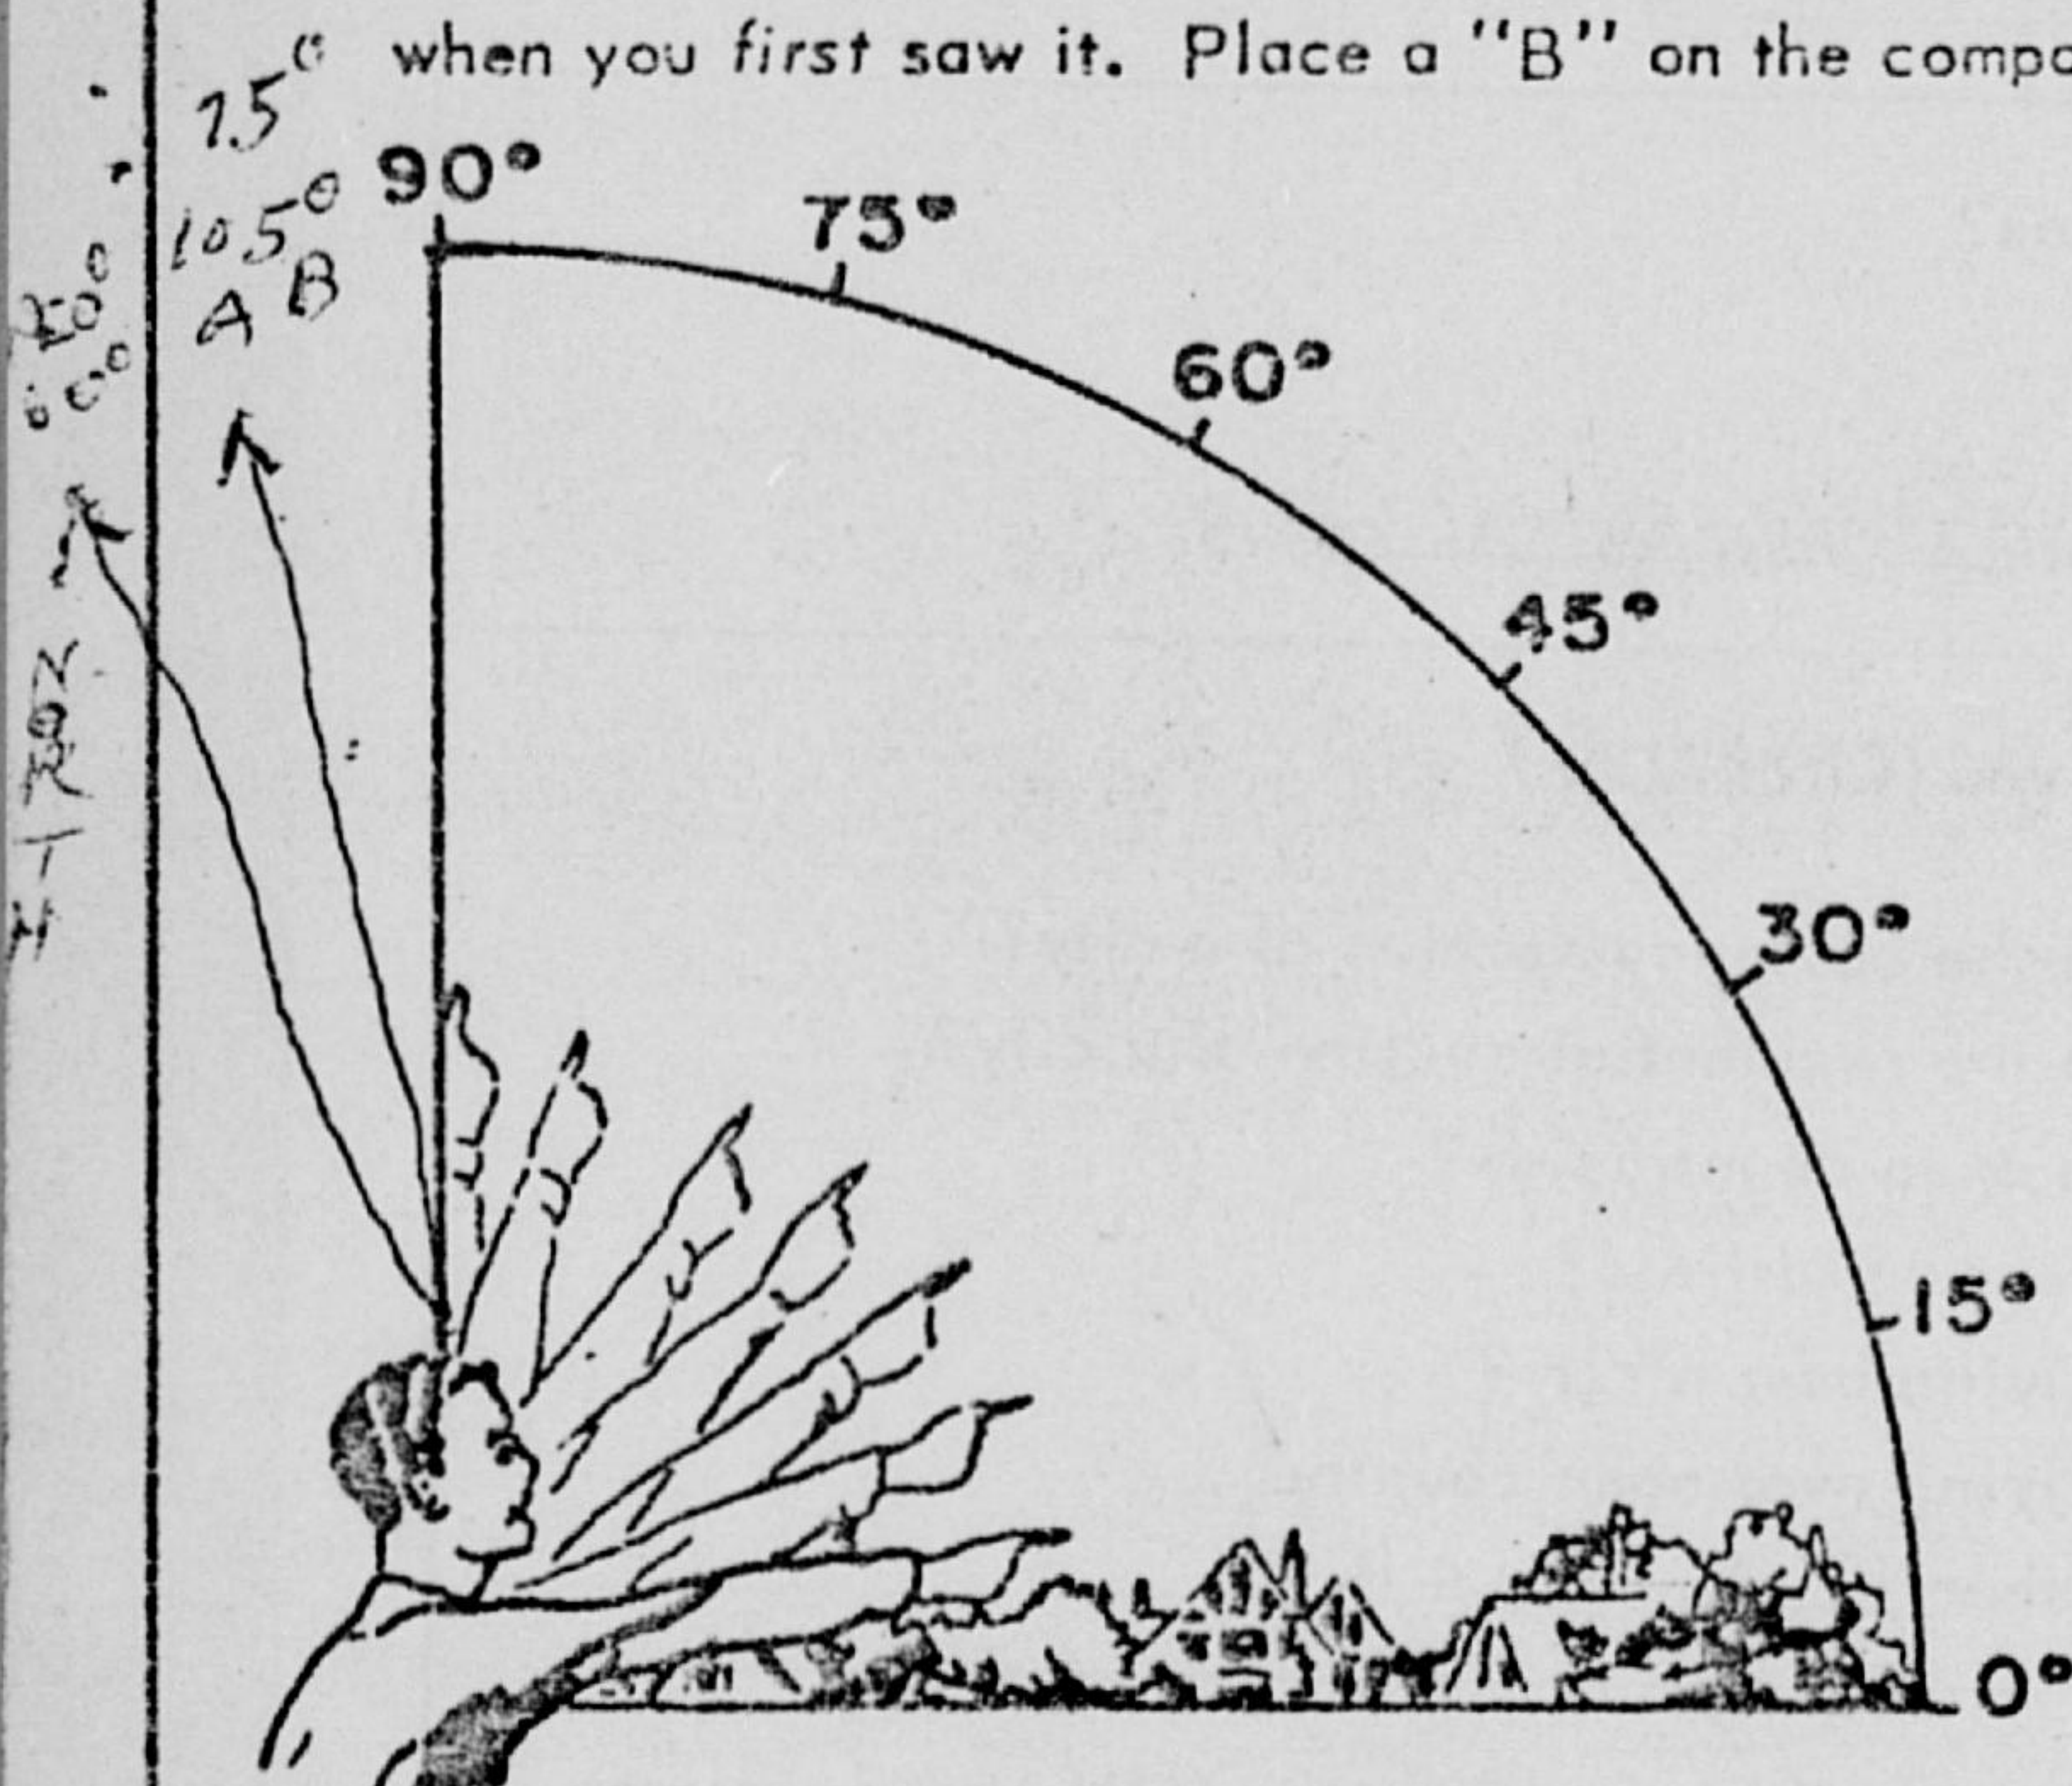

25. Did you observe the object through any of the following?

- | | | | | | |
|-----------------|-----|----|----------------------------|-----|----|
| a. Eyeglasses | Yes | No | e. Binoculars | Yes | No |
| b. Sun glasses | Yes | No | f. Telescope | Yes | No |
| c. Windshield | Yes | No | g. Theodolite | Yes | No |
| d. Window glass | Yes | No | h. Other <u>NAKED EYES</u> | | |

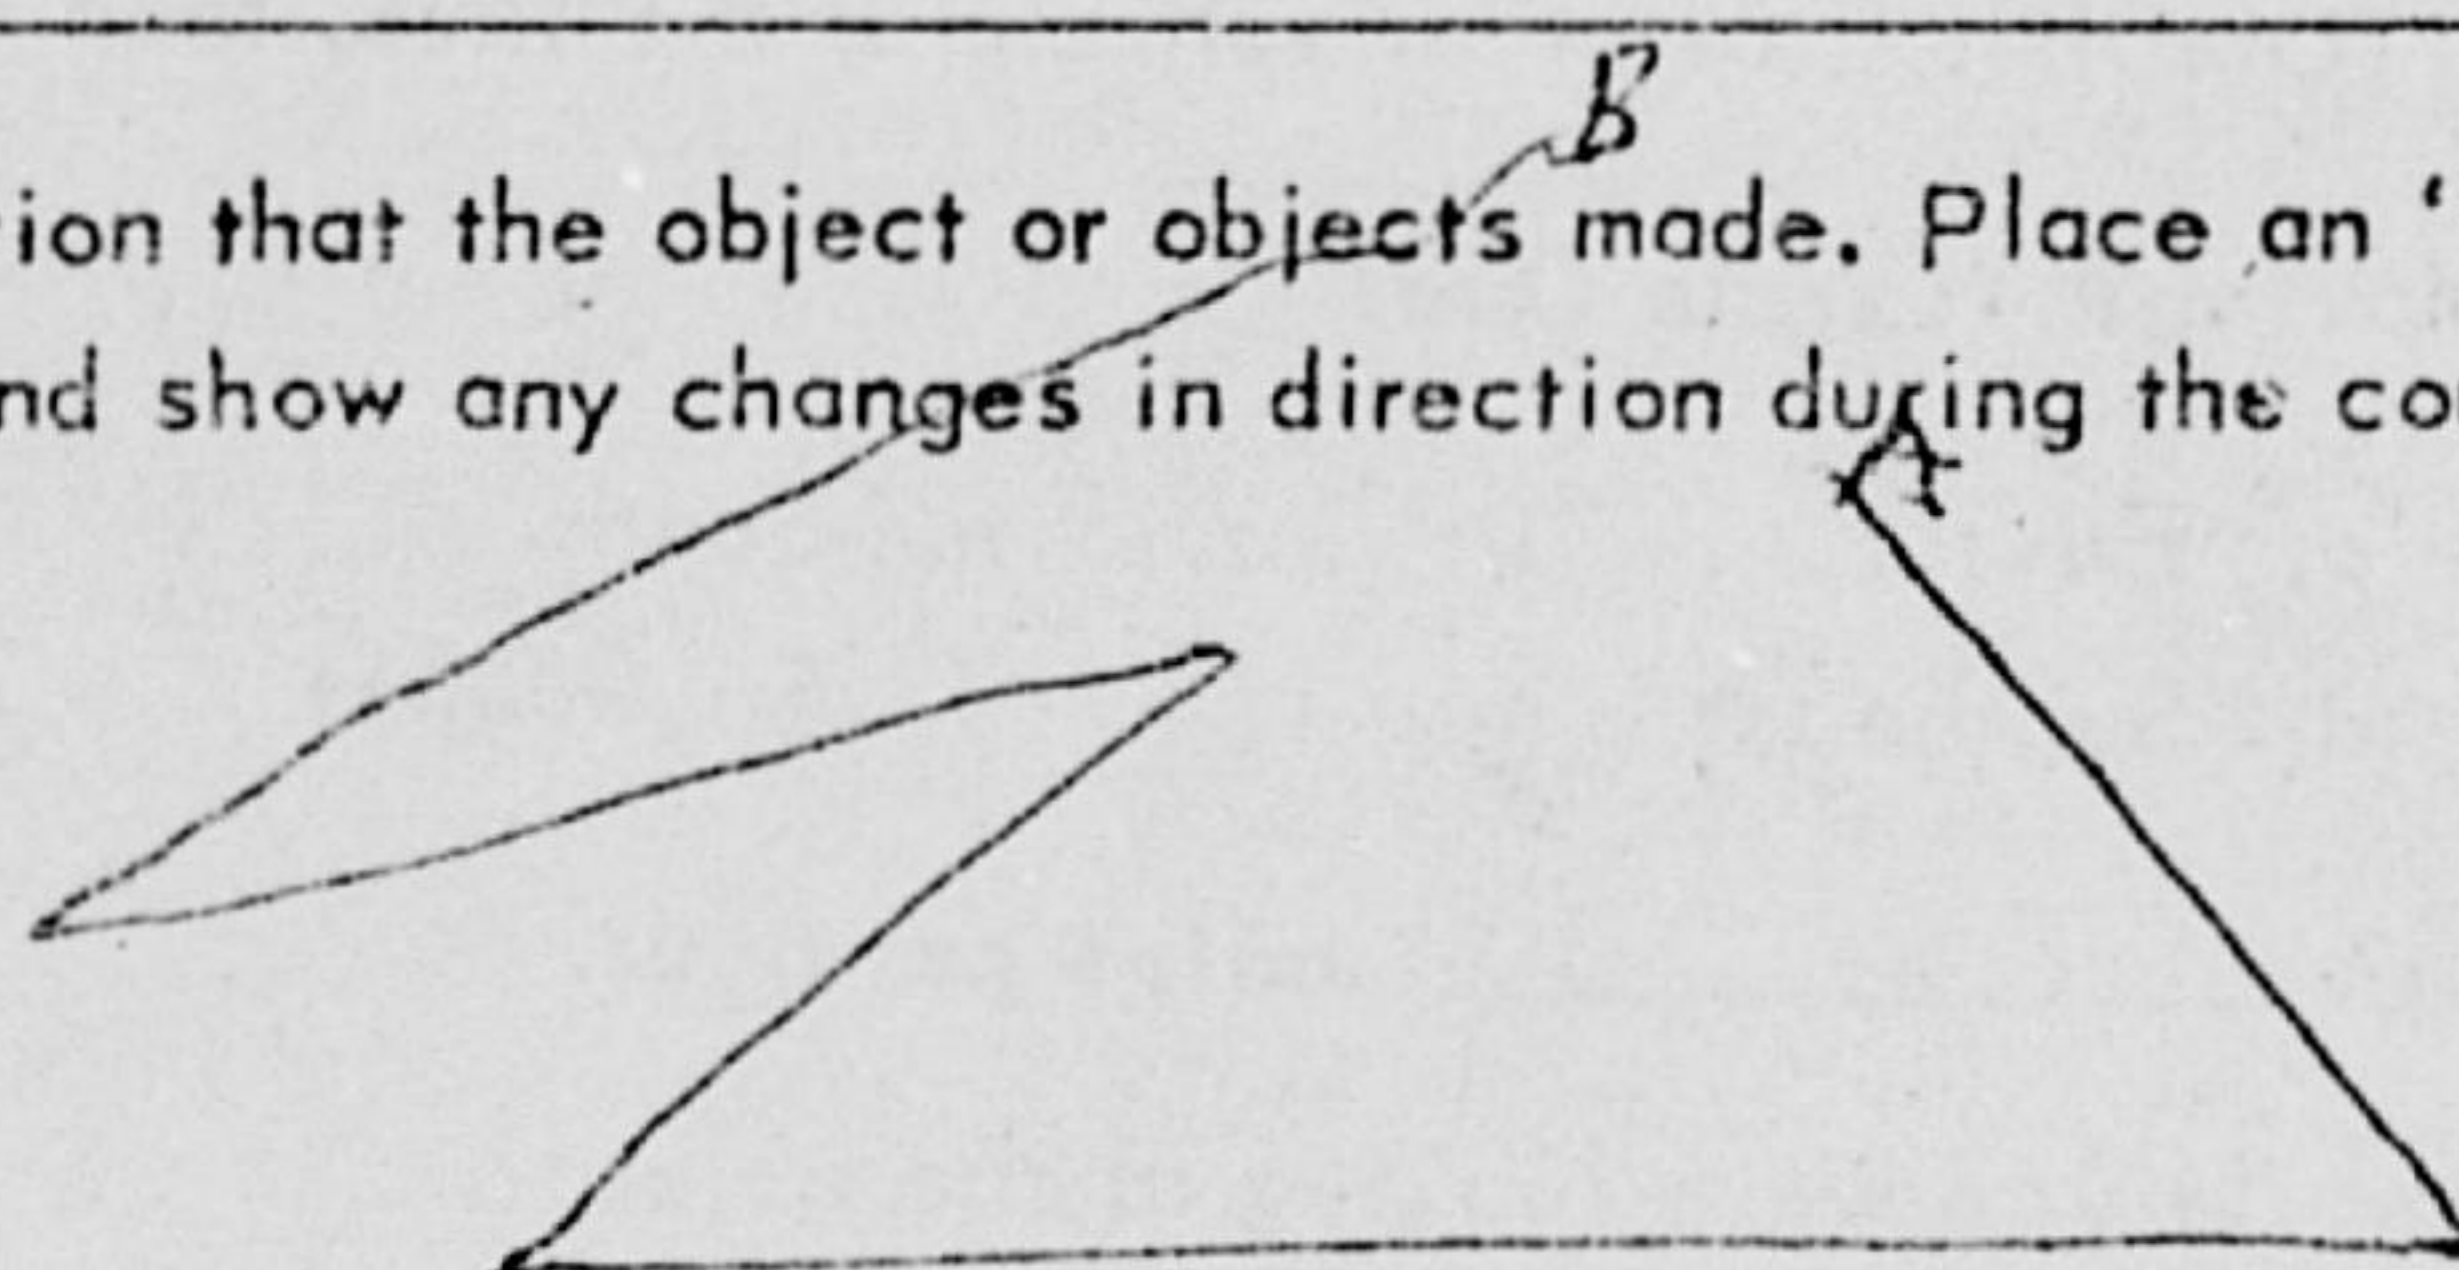

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

SATELLITE EXCEPT THIS ONE WENT TWICE AS FAST AND HAD MANUEVERABILITY. MY OPINION IS IT WAS DEFINITELY MANNED BY INTELLIGENT LIFE.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? JUST ONE OBJECT
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so, give date or dates and location.

FIRST TIME I EVER SEEN ANYTHING LIKE THIS EXCEPT
SAT ELLITES, BUT THIS ONE MANUEVERED,

31. Was anyone else with you at the time you saw the object? (Circle One) Yes No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

31.2 Please list their names and addresses:

[REDACTED] JR.
OSCEOLA MILLS,
PENNSYLVANIA.

32. Please give the following information about yourself:

NAME [REDACTED] [REDACTED] [REDACTED]
Last Name First Name Middle Name

ADDRESS [REDACTED] HOUTZDALE 3 PENNA.

checked Road map today to make sure of my bearings at ~~the~~ site where I saw object,

The sky was overcast at a very high altitude. When I first saw the object it came through a frame of three stars

shining brightly

and the other three stars were

so faint you could barely see them. It came through as an arc like it was gaining altitude then it leveled off. When I looked up it was I judge 105° at 20° angle but I don't know for sure just how or what stance my feet were in when I looked up.

It stopped quicker than a New York City subway train then it would dart to the right about $\frac{1}{3}$ (there third) the distance between the dipper part of the dipper stars while you could snap your finger then it would angle back within the general area I indicated on the map I sent you only it would gain more distance after it made the short run. It did this ten or twelve times until it got to the farthest point SE. (South East) then it headed in a straight line South west seeming to gain altitude. South East sighting would be about 30° South West sighting 75° angles from which we were watching as far as we could see then it went into the overcast a little farther then reappeared heading toward the same point or area where we first seen it and it seemed to be blunting downward in the

^{stopped}
 course, at about a 45° ^{righting} ^{about 15°} then he stopped seemed to
 tilt upward on his first stop, coming back and it went
 off at about a 45° angle again turned and chased again
^{about 75°}
 like he hadn't seen all he wanted to see like he was
 hunting for something and didn't find it and went back
 for another look or wanted to put in a reappearance
 from another direction then he really came back at
 a terrific speed and then slowed up again as I came out
 to tell the State Police where it was.

I haven't the slightest doubt it was a manned vehicle
 with intelligent beings and to stop and start like it
 did, my guess it is using magnetic forces, we heard
 no noise of motors or ^{seen} rockets flash. However a couple
 of times it looked round and flat with a little
 depth, it looked narrower on the edges than more
 body in the center. When I first saw it it looked
 like a satellite and way out it looked the same
 as a satellite also.

I thought to look at my watch during the excitement
 and it was 2:03 AM. I think it was about $\frac{1}{3}$ of the
 way out after we first seen it, my watch could be
 a few minutes one way or the other, when I finished
 calling the State Police I looked at my watch and it was

2:30 AM.

Where it went is a good question and that is the
 one thing I stressed to my fellow workman when we
 see another one to be sure and see if it goes close
 to a star or planet and you don't see it anymore
 it has landed. maybe they have an orbiting
 ring. It got out from under his eye somehow

possibly stopped and looked like any other star,

when it first saw the object I was facing East or a little south East then we walked about 30 (thirty) feet and sat down facing west then we turned and looked SE South East and we lay outstretched on our backs and watched for a while then we sat up and watched, I hurried in and called the Telephone Operator and asked her, "Who do you report these flying objects to and I know she thought it was some kind of a ^{with} (prank) and she said, 'I will connect you to the State Police'."

I know they thought the same thing and I told them, "I am not drunk either", He sent one State Policeman out to look and he came back and said he didn't see anything.

I told him I worked with Army intelligence and that they knew me at the Philadelphia Quartermaster Corp. He said, "I could call the Air Force". I told him he had better. "I figured you could throw your Radar in that vicinity or call some Planetariums and get their telescopes on it even after it got through the overcast."

I estimated my distance ^{QUESTION No 21} approximately as the distance to the moon is 186,000 miles however an overcast would hardly be that high so it could have been lower and looked like it came through the stars.

I know an Engineer in Clearfield who used to be one of your navigators I thought to go down and see him and show him the stars and directions where it went and have him draw you a map.

I have been watching on clear nights and

I saw one come from below the big dipper at 10:30 PM.
right on through up to another bright star and
just below the three stars I indicated in my
last map to you. Instead of going through the three
stars he went below the lowest star. We figured
this was a satellite.

I have been inquiring for a motion picture
camera and what type lens set. to use to catch
the next one if all.

I know nothing about cameras so I'll try it
on some satellite then run the film and see how
it comes out.

I hate to invest in a camera as this is the only
use I would have for it but I am digging for
information. If I can catch a satellite ^{in film} I can catch
this by the same method and since I know what
I saw I will recognize it also.

Last night I checked up on myself and came to the
conclusion that it came through three stars farther
^{north and higher} East of the big dipper than I walked west to other end
of back yard but the big dipper was not visible.

However other nights we had to look for the comet
from the west end of the back yard at about a 75°
(seventy five degree angle) to see the big dipper.

I won't hold up this much of the information and I'll
try to get that navigator to draw you a map. He
seemed like a nice gentleman if he hasn't moved
out of the area. I'll try and get him to come up the
backyard some night and point the stars out to him.

getting camera with 50 magnification telephoto lens
fixing 1000 mm lens which will take pictures of
stars and will take pictures of stars that will look
like they are 100 feet away.

50 mm lens will make a dime look like the size
of an automobile inner tube or so it was described
to me.

If I can take pictures of satellites and stars
I should get a picture worth while of such an object
if I see it again.

I hope this letter don't seem too long to you but I
always figured this way that it takes a lot longer to
write a letter than it does to read it.

Do you know if there is any infrared film available
for a 35 mm camera like you use in your satellites
some I read about it. That should be good for taking
pictures after night.

Yours Truly,

QUESTIONS NO. 1 AND 33. ~~James~~ element. I called State Police at
Philipsburg while it was in action for more witnesses. If
you have the letter I sent to the United States Air Force in
Washington, D.C. that was the previous Saturday so you
can tell by date on letter.

I have made two trips down to State Police barracks below
Philipsburg to establish closer cooperation next time
I call in. They had no time on their report but they no
doubt would have the date.

U.S. Air Force
Washington, D.C.

Sirs:

This is my story and I am stuck with it also a
few of my thoughts.

On Thursday ~~we~~ we are go to work ~~Thursday~~ and work
Friday morning, 1200 midnight to 8:00 AM. Friday morning

my buddy came around the Kilm which we were firing and
says, "There goes one of your satellites Ralph."

I looked up and said and says I don't see any. I looked up
again and saw what I believed to be a moving satellite. I got
my eye on another star of differ and watched it pull away fast
and I said, "Yes there is one coming this way?" my buddy said,
"There must be two or the one I saw was going the other
way!" He had come around the Kilm to keep his eye on it.

We both followed it across the sky and immediately I
saw it wasn't a satellite. It would stop and hover
shoot quickly to the right then hover again and
shoot quickly to the left on its way across then it
swung to the west almost out of sight. I called the tower
as it went and my partner said yes and I was sure
we were following the same one. I said now it is
coming back and you never saw such speed in
your life then it made about a 90 degree turn and went
west again then it finished its trip with terrific

speed.

During or at sometime during this maneuvering I decided to call someone for more witnesses and called the Operator and told my partner to keep his eye on it.

The Operator connected me with the State Police at Phillipsburg. One went out and looked but couldn't see anything. I filled the other Policeman in more on the details that at present it was up by the dipper he went out but couldn't see anything not even the dipper. I told him I would call him back. When I called back I got in on a three way conversation as he had called the Police barracks at Bellefonte. He was really on the ball. He said, "He could call the Air Force" I told him, "He had better call them."

They tried to get the meteorologist at Penn State. He told me the meteorologist would call me the next morning but he didn't.

I took the map I had drawn down to the State Police the next day and explained to them what I had seen and he said he would turn it into the H & C or something like that.

One man standing there said the F & C had been getting all kinds of reports from the Harrisburg area the last couple of days but they were coming in low and they could see the lights in the windows.

Here is my thinking did they know it was going to be overcast and use it as a cover above them or were they just flying around.

Did the one my buddy seen land on a planet or did he make a quick turn just at the moment ~~we~~ we

38.
were looking or did the one he saw land and the
other one take off.

Or do the Russians have such a machine. I doubt
it very much.

Would it be worth a fly by mission to find out?
Or have you ever tried the star or planets this side
the dipper or others farther past the dipper.

It definitely had tremendous power and speed
and maneuverability.

Was I lucky enough to find out where they were
coming from and where they were landing.

Please keep your eye on that area I think we will
be able to find out. It would be worth a big try
in my opinion.

I have tracked satellites from west to east twice
once by myself and once several of us watched
one go over the south side of the bridgeyard.
I really got a thrill of a lifetime.

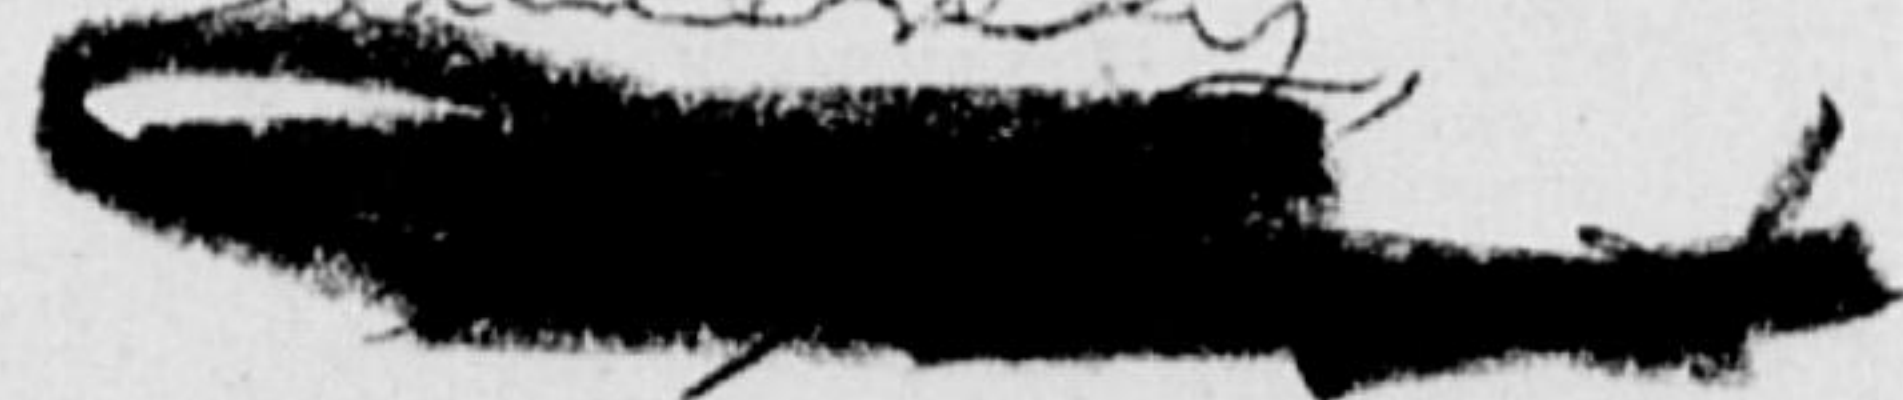

But coming out of the north no I had never seen
a satellite and this definitely was not a satellite.

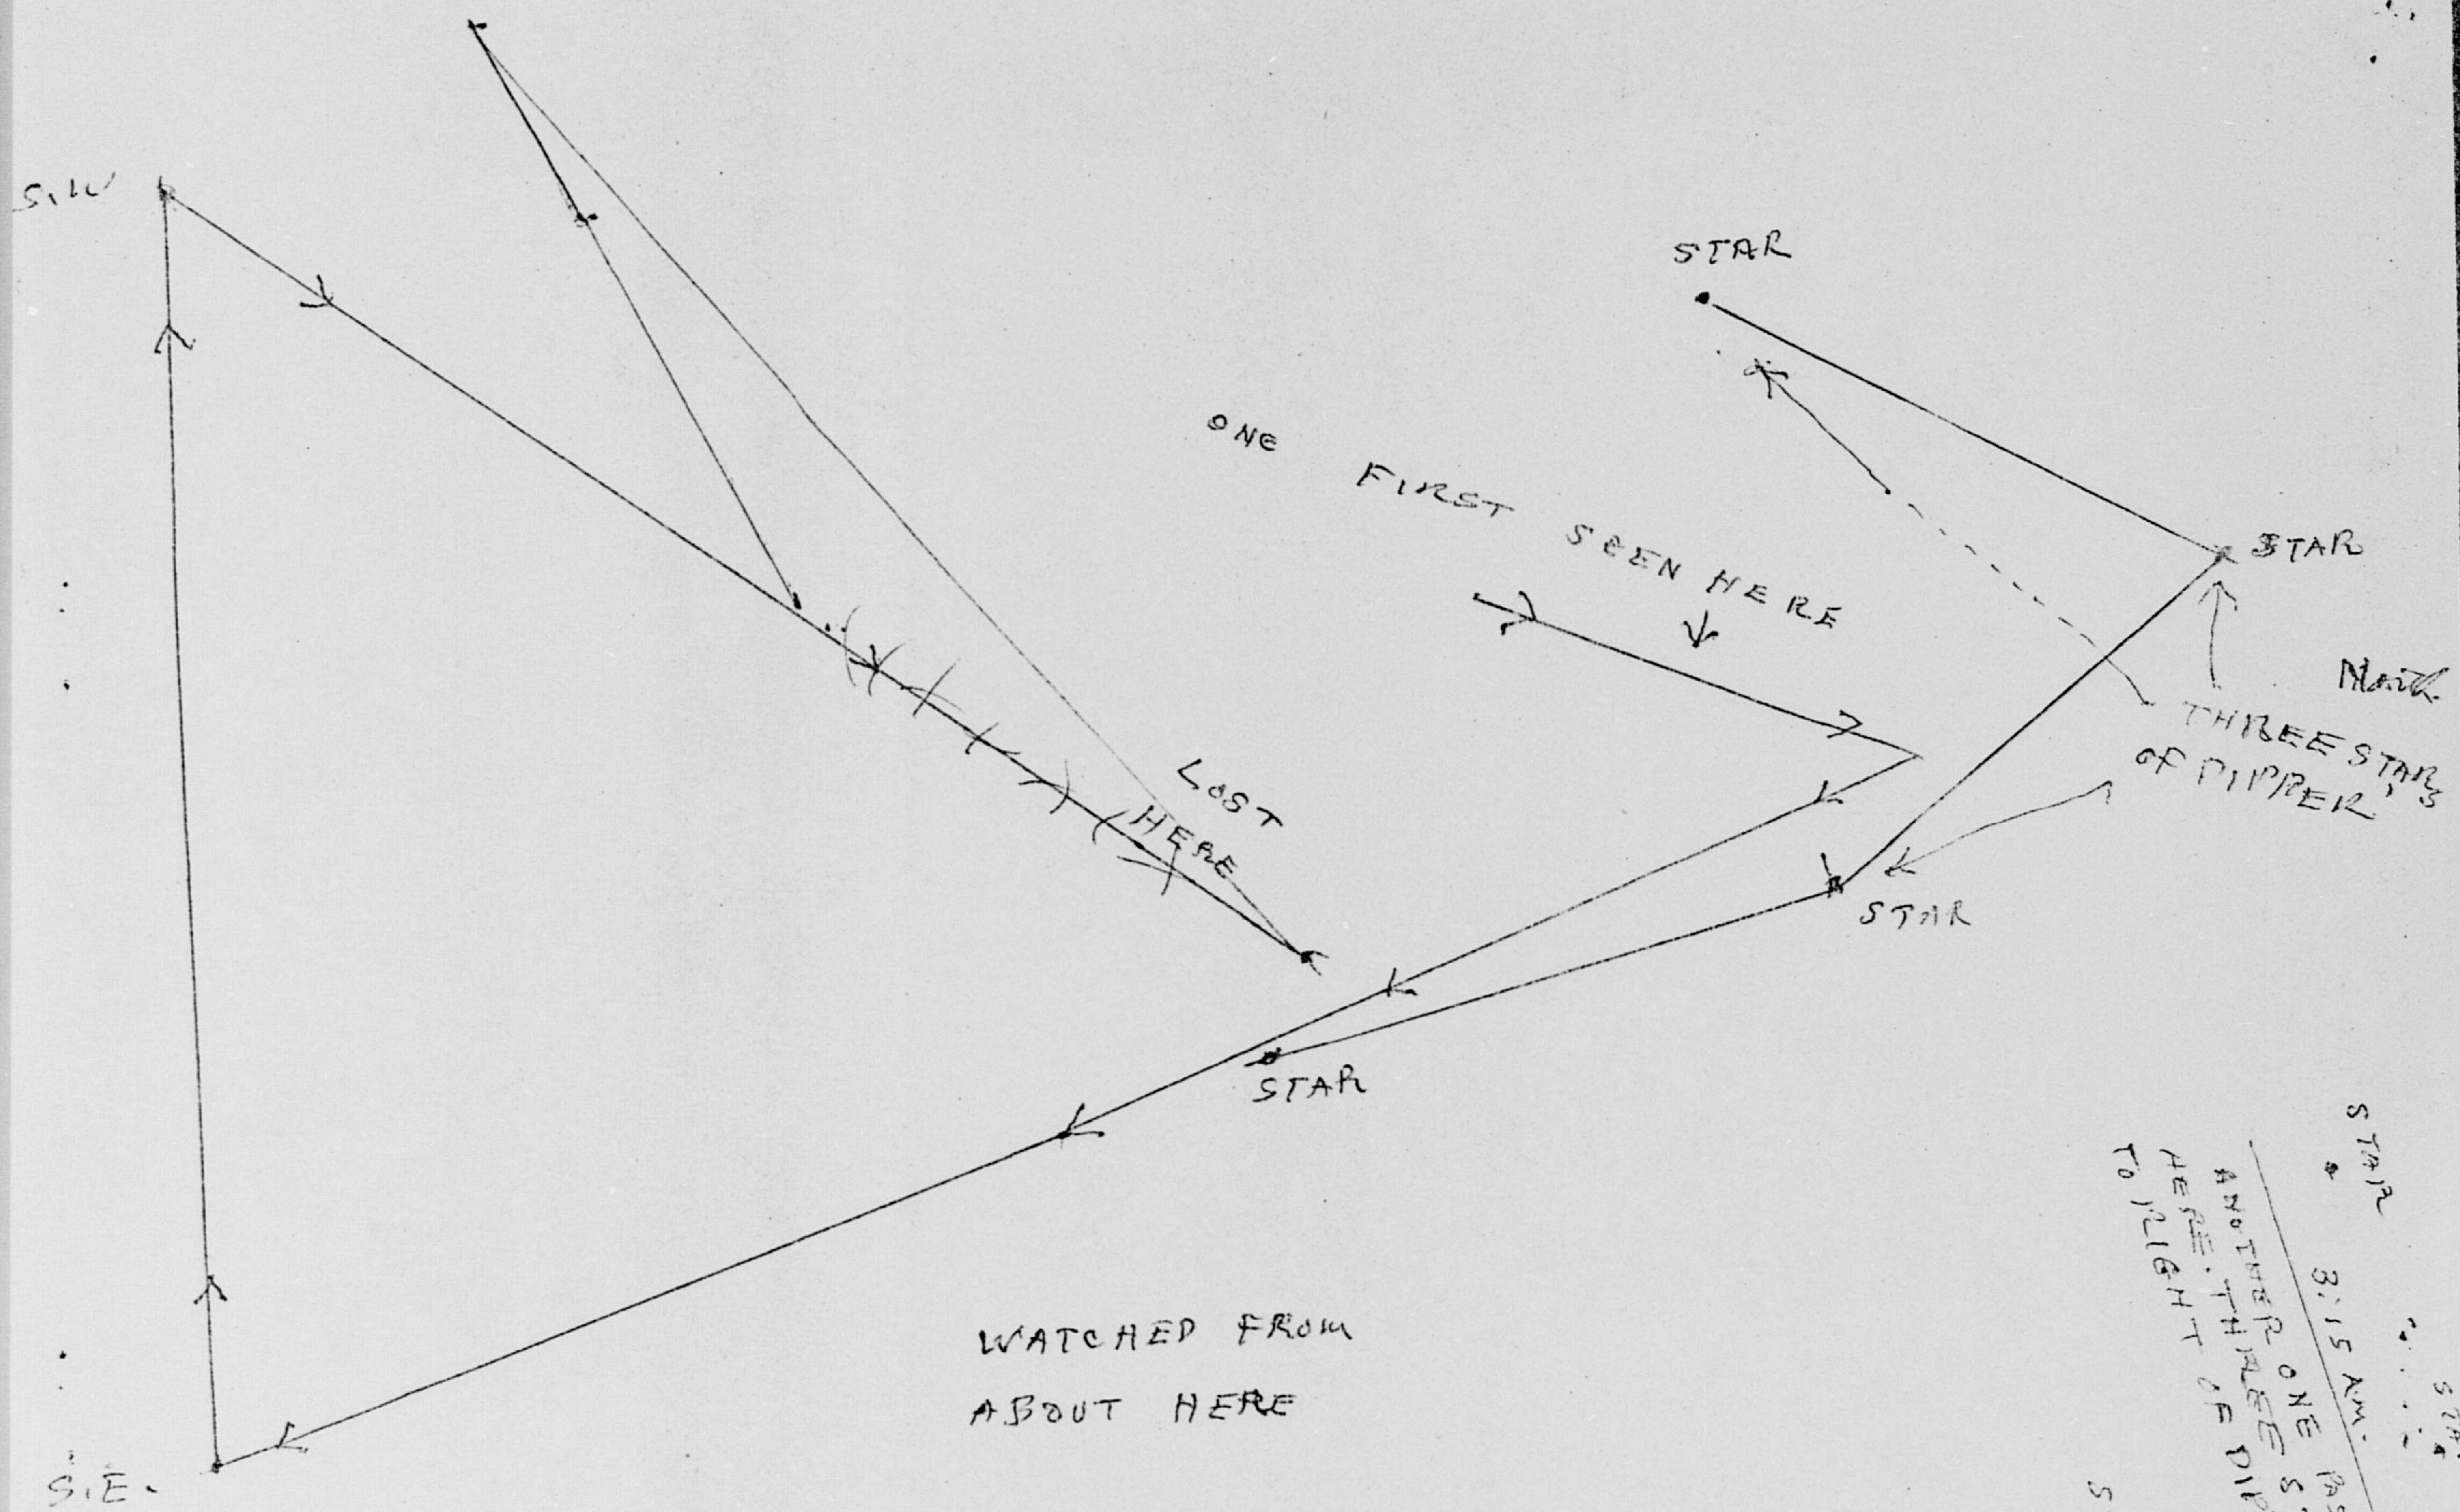

Maybe they don't even know we exist on this planet
and again maybe they do.

Can we find out on which planet they landed. The
speed they went they could come from almost anywhere.

Did our recent fly by on its way to Venus make
them curious?

June 8, 1967

Dear Sir

I would like to report on aerial object which I could not explain to myself. On Monday June 5, 1967 I, 15 years old, and my 6 year old brother were playing in the alleyway in back of my house when, on throwing a baseball into the air, I noticed a silvery cigar shaped object travelling from East to West in a straight line. It was approximately between 5:30 PM + 6:45 PM with the sun still shining brightly. In my best guess, the object was in sight for about 2 minutes at the most, during which it was in sight continuously. The sky was cloudy with intermittent openings of blue sky. As I saw the object, the sun was to the west and I first noticed the

object ~~was~~ which was then vertically
over my head, the sun was on
the side of me. As far as I could
determine the object was solid and
possibly metallic. The weather
was dry and clear vision was possible.
The edges were outlined since it
was silvery metallic against
blue sky & scattered clouds. The
object was continuously in sight and
did not leave smoke or speed up
or flicker etc. as given in question
#13 in the Airforce Questionnaire form.
As the object moved westward
it was lost to my sight at
about 45° on the western sky in
the direction of New York City. The
glare from the sun impeded my
further vision. The object did not
move near any clouds or anything
else. The object was outlined
against the clouds intermittently.

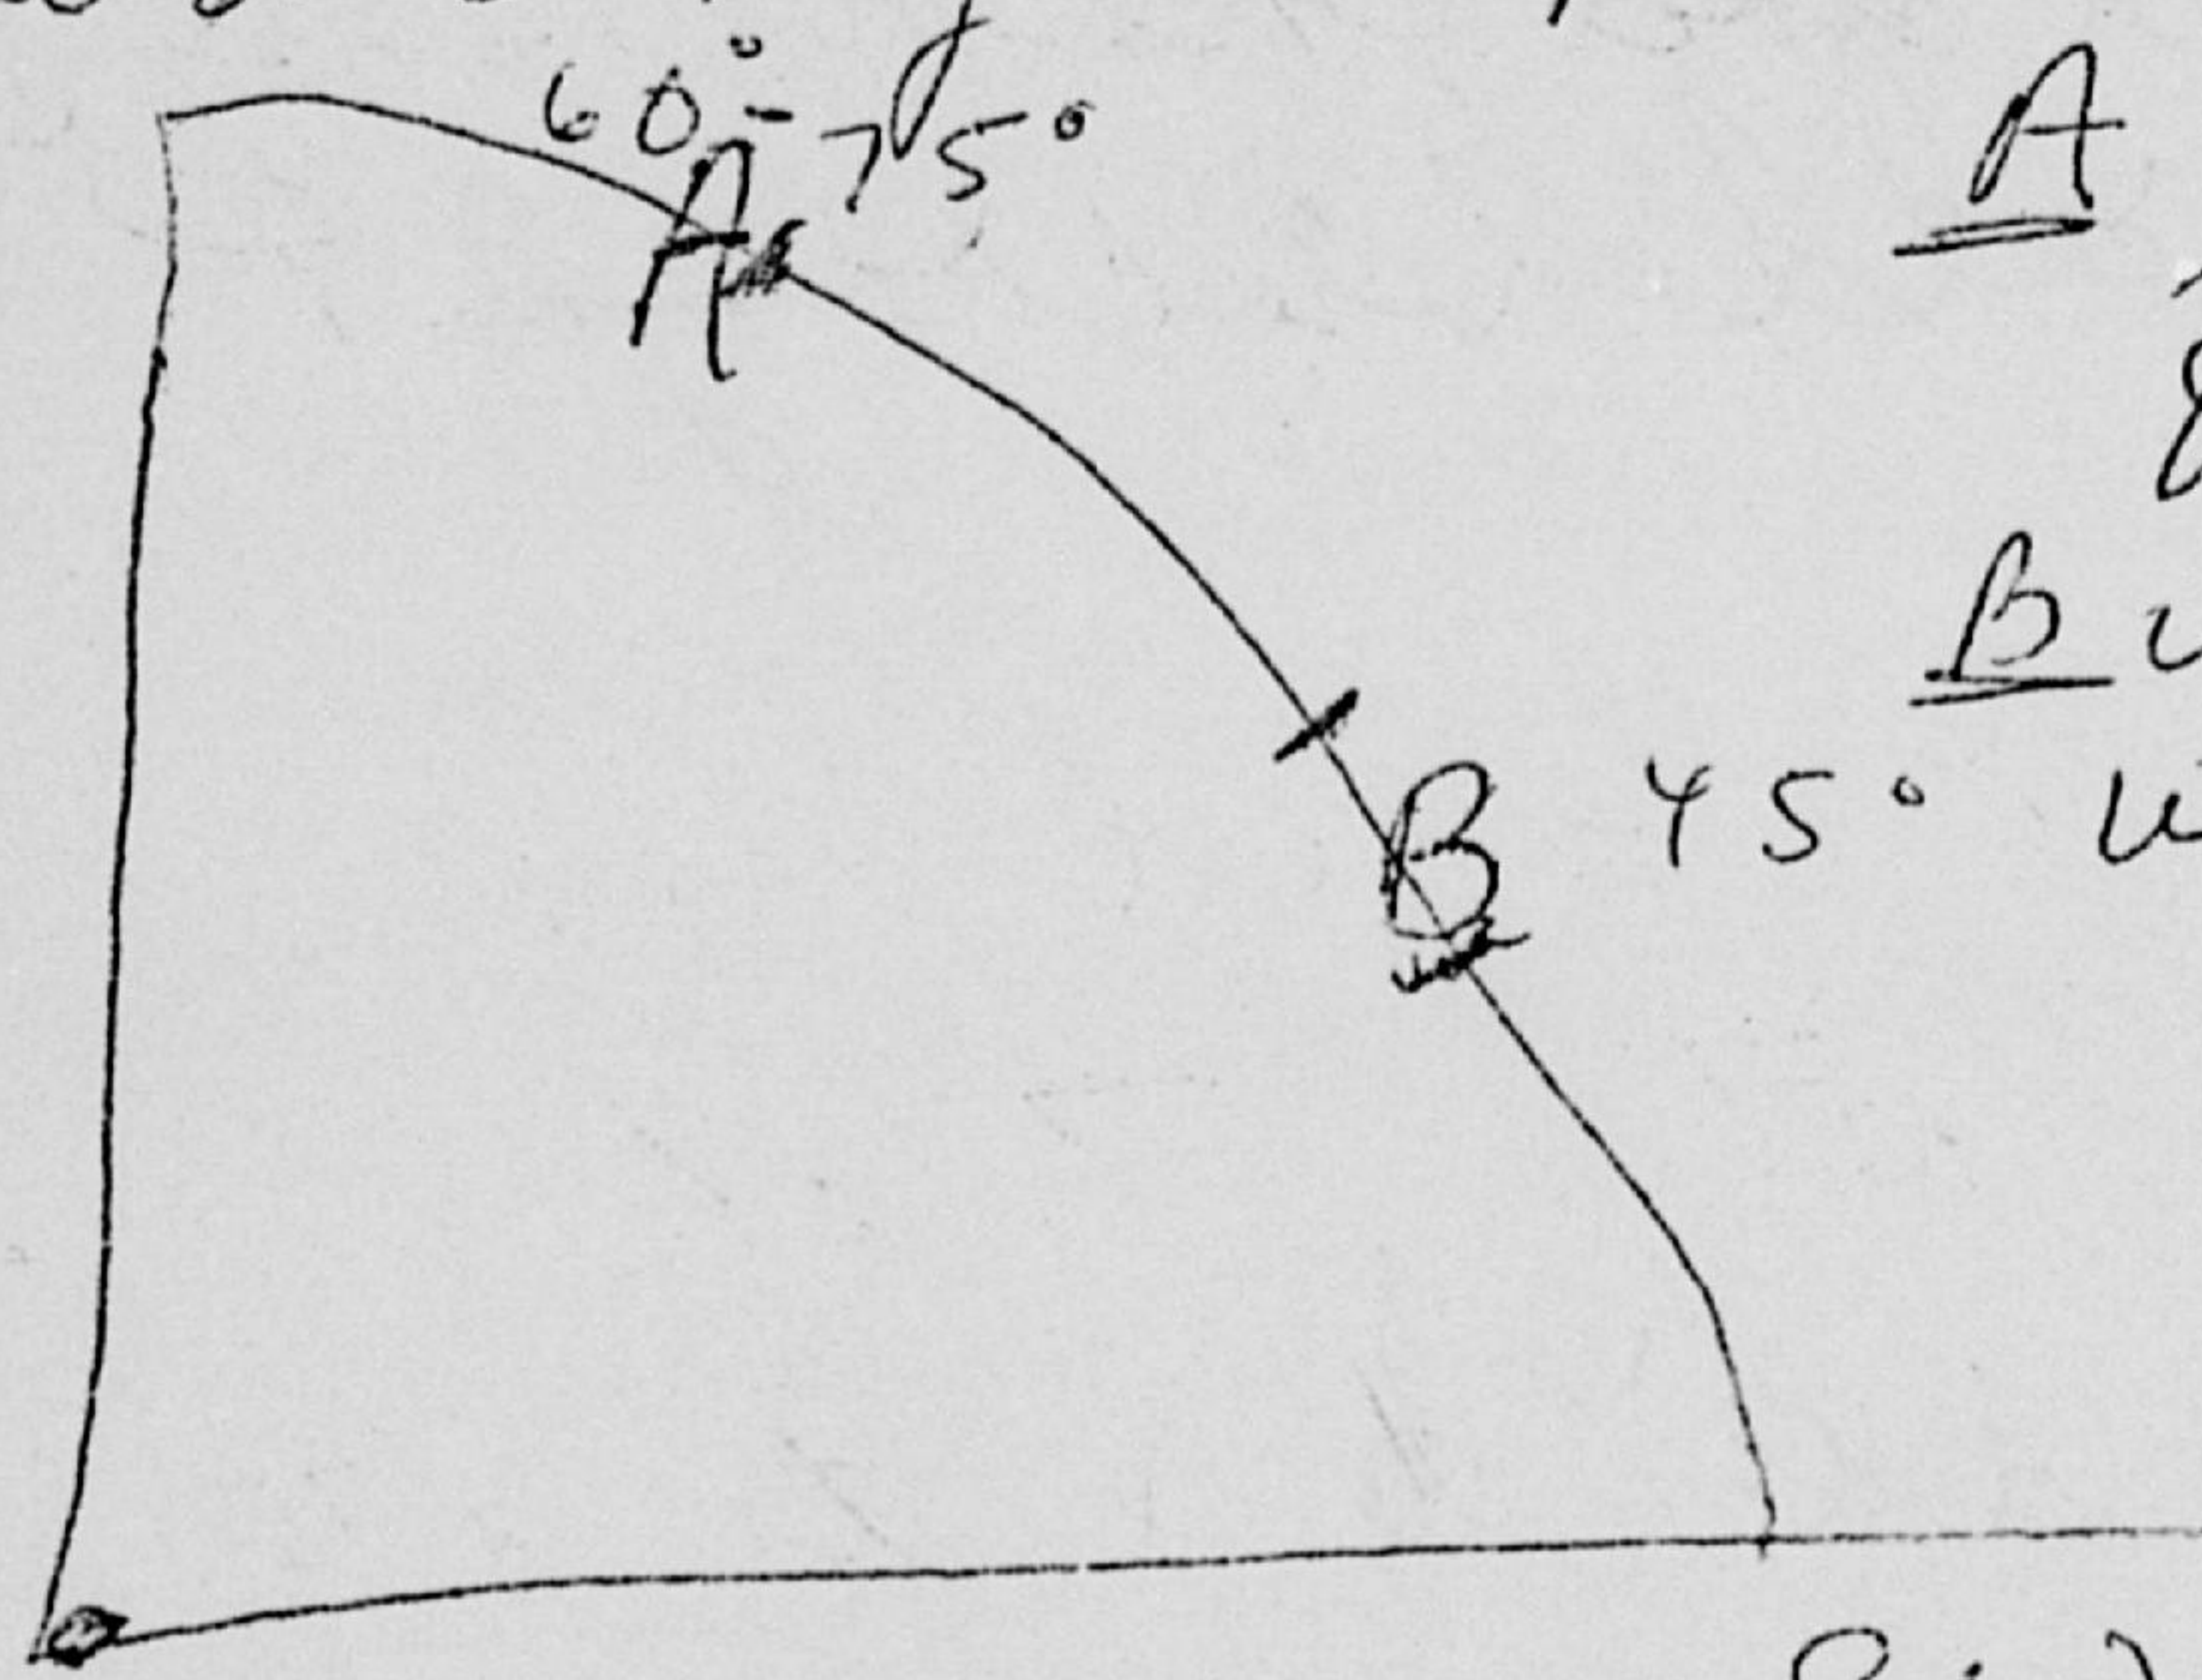

There was no sound connected with the object, as far as I could determine, it seemed kind of high in the sky so even if it was making a slight noise it couldn't be heard. The color of the object ~~was~~ remained a silvery reflective color and did not change at all. It did not reflect but more like a shine.

Most of the object would have been covered by a match stick held at arm's length, but due to its cigar shape - some would still not be covered.

There were no details at all - & no vapor trail. I cannot myself estimate the speed, but the object covered $\frac{3}{5}$ of the horizon in about 1.45 seconds. It seemed high but I could not estimate the height. I was in an ally way in a

residential section of Queens N.Y. —
 Rego PARK. I wear glasses but
~~to~~ my brother does not. The only
 shape it resembled was a engine of
 a commercial airliner moving through
 the air by itself not too high (500ft)

A where object was
 first visible.

B where it was when it
 went.

It appeared S of
 me & disappeared
 SW of me - moving
 from East - West.

I have seen an almost identical
 object on June 3, Saturday from
 the same spot but it appeared in
 the NE travelling N with the same
 flight except that it disappeared
 behind clouds. It had the same
 color - no sound ~~etc~~ & shape etc.
 I did not report it. The fact

that I saw it 2 times made me
report it at all. Only my brother
(6 years old) was there, and even he was
fascinated over it. There was no one else
that I know of who saw it.

I do not want my name
to be used at all in any
manner.
