Brooklyn, New York 11229

1. This replies to your letter concerning your observation of an unidentified flying object.

2. While reviewing our correspondence files we found your letter in which you reported seeing an unidentified object on 17 June 1967. Because of an error, your sighting was not investigated at that time. We handle over 10,000 letters and investigate approximately 1,000 UFO sightings a year; once in a while an error is made. We regret that this has kept us from investigating your observation. However, if you would complete the inclosed AF Form 117 we will investigate your sighting in an attempt to determine the stimulus for your observation.

WRONG DATE

3. Thank you for reporting your observation to the Air Force, once again, please excuse us for not responding to your correspondence earlier.

HECTOR QUINTANILLA, Jr, Major, USAF
Chief, Aerial Phenomena Office
Aerospace Technologies Division
Production Directorate

Dear [redacted]

This replies to your letter of August 29 concerning your observation of an unidentified flying object (UFO).

Without essential information, such as detailed flight characteristics, angular velocities, weather information, or the precise date, we are unable to undertake a scientific investigation. Had you contacted the UFO investigator at your nearest Air Force installation, an on-the-spot investigation would have been possible. Your information will be added to our present data base.

We hope the inclosed Project Blue Book report will be of help to you in identifying the object you saw.

Thank you for reporting your observation to the Air Force.

Sincerely,

BARNETT B. YOUNG
Lt Colonel, USAF
Chief, Civil Branch
Community Relations Division
Office of Information

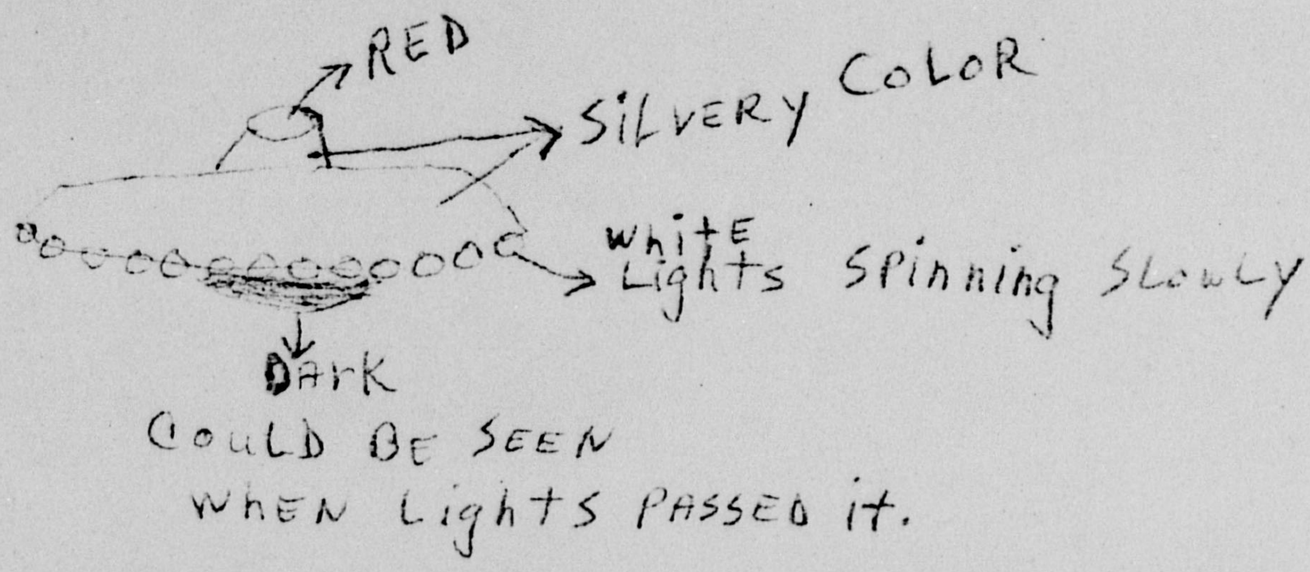
Gentlemen:

Following is a drawing of an object I saw in the sky about the middle of July.

It could be seen from about 8:50 P.M. until 9:45 P.M. I could see it very well through powerful binoculars. It seemed to be about four or five miles away.

When I saw this object I was standing on the corner of [redacted]ue in Brooklyn.



I would appreciate your contacting me, at your earliest convenience, with regard to the above matter.

Yours truly,

[redacted]

[redacted] Street,
Brooklyn, N.Y.,
11220
July 7, 1967

Air Technical Intelligence
Center, Wright-Patterson Air
Force Base, Dayton, Ohio

Dear Sirs:

I have written
this to make you aware of a
physical phenomenon, quite similar to
my sightings of the 11th and 17th of
December, 1966.

On the morning of July 6, 1967,
at exactly 12:18 A.M., I saw two flashes,
one much fainter then the second, which was
blush-white and followed the preceding
one by about one second. This one
widened from a narrow vortex and extended
about 30° above the northeast horizon
(indicated on diagram). Both were silent
and did not interfere with radio reception.

The flashes apparently emanated from a site extremely far away. It was a clear night, although it had rained the night of the day before (that is, night of the 4th). It was cool that night, with a slight breeze and temperature between 55-65 degrees. If there would be another occurence of this phenomenon, I would repot it to you. I noted.

The morning of July 7, 1967 was almost a perject match of the preceding one, excellant for veiwing. At 12:04 A.M., two whitish-blue, extremely bright strokes of light were noticed, their point of origin apparently a large ball (apparently, it had 3 dimensions). Again, there was no sound and no interference with radio reception.

I sincerely hope this information can be of help to you; toward a full understanding of this wonderful world.

Yours truly,

[redacted]

1st July 6, 1967

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

6 and 7 (Day) July (Month) 1967 (Year)

2. Time of day: 12 (Hour) 18 (Minutes) (and 12:04)

(Circle One): (A.M.) or P.M.

3. Time Zone:

(Circle One): a. (Eastern)
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): (a. Daylight Saving)
b. Standard

4. Where were you when you saw the object?

[redacted] (Nearest Postal Address) Brooklyn (City or Town) New York (State or County)

5. How long was object in sight? (Total Duration) _____ (Hours) _____ (Minutes) 1 (Seconds)

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? it was momentary in duration.

5.2 Was object in sight continuously? Yes ✓ No _____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. Bright
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM
ETD OCT 63 164

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (*Circle One*):

a. None
b. A few
c. Many
d. Don't remember

8.2 MOON (*Circle One*):

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (*Circle One*):

a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER (*Circle One*):

a. Dry
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: (*Circle One*):

a. Solid
b. Transparent
c. Vapor
d. As a light – somewhat like appearance of lightning; sharply defined and bright
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (*Circle One*):

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

about the brilliance of a bright streak of lightning at night

12. The edges of the object were:

(*Circle One*): a. Fuzzy or blurred
b. Like a bright star
c. Sharply outlined
d. Don't remember
e. Other It was apparently not a solid object. They were brilliant, sharply outlined flashes, but unlike any usual lightning disturbance

13. Did the object:

	(Circle One for each question)		
a. Appear to stand still at any time?	Yes	No	Don't know
b. Suddenly speed up and rush away at any time?	Yes	No	Don't know
c. Break up into parts or explode?	Yes	No	Don't know
d. Give off smoke?	Yes	No	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

14. Did the object disappear while you were watching it? If so, how?

It appeared at the times mentioned suddenly, and then, as it had came, would disappear suddenly.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

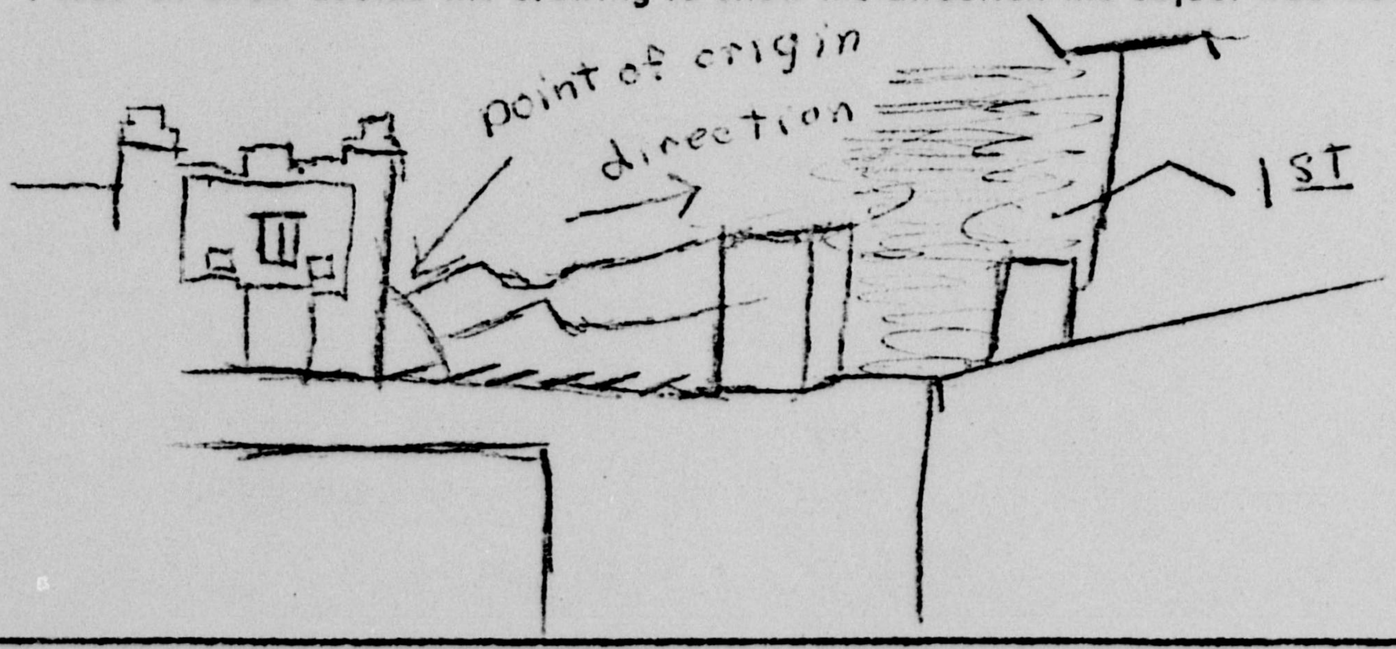
a. Sound no sound.

b. Color - a bluish-white, with blue predominant in the first sighting.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? -- about ½ of second (Circular) manifestation would be covered. Cannot give for 1st, which was seen on July 6. Second on July 7.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.



20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes (No)

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other at home, looking out window

23. Were you (Circle One)

a. In the business section of a city?
(b. In the residential section of a city?)
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

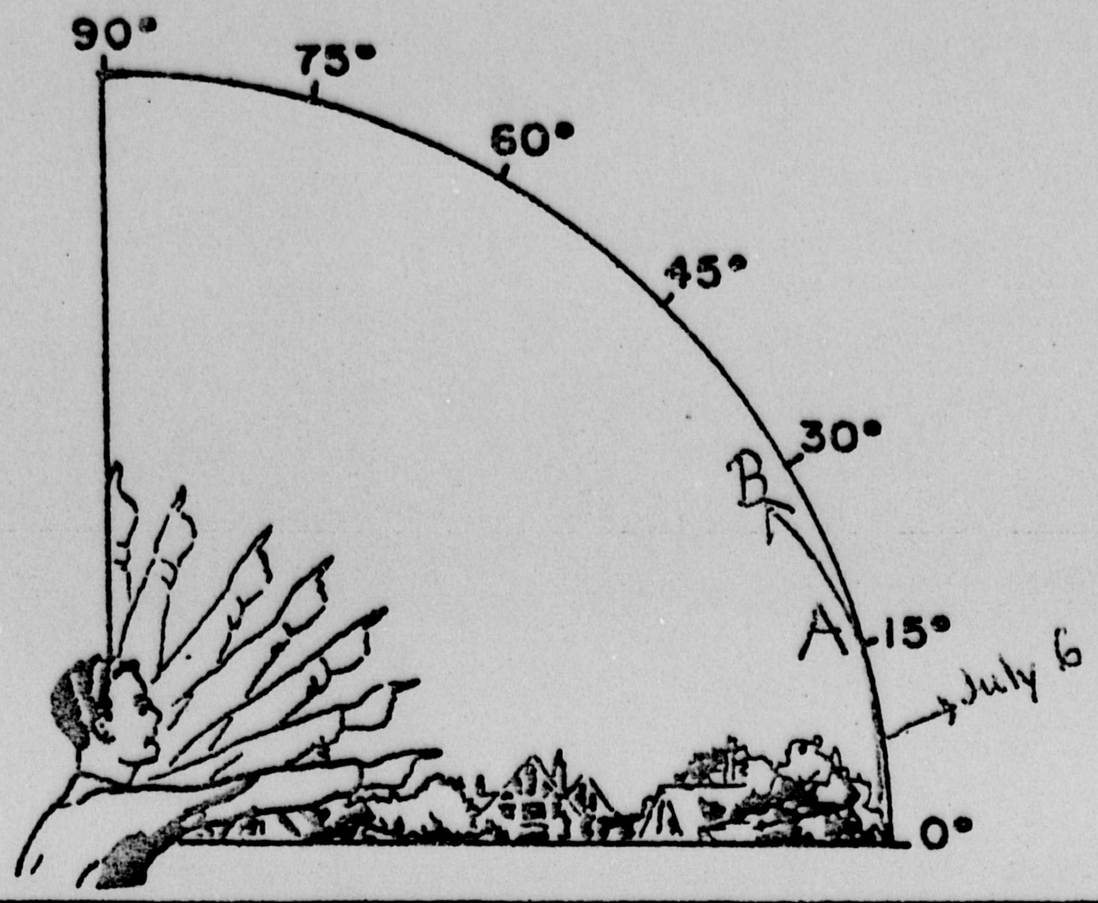
(Circle One) Yes No

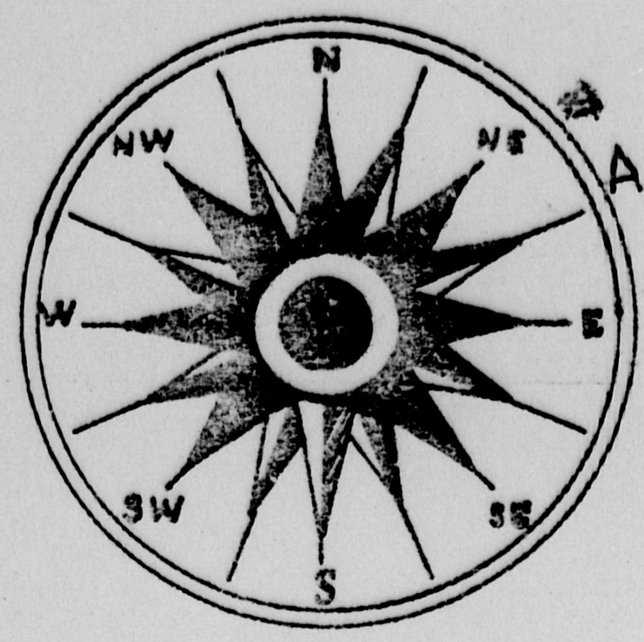
25. Did you observe the object through any of the following?

a. Eyeglasses	(Yes)	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	(Yes)	No	h. Other ~~[illegible]~~		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.





28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

Yes: December 11 and 17, 1966, at same location (home).

31. Was anyone else with you at the time you saw the object? (Circle One) Yes (No)

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME [redacted] (Last Name) (First Name) _____ (Middle Name)

ADDRESS [redacted] (Street) Brooklyn (N.Y.C.) (City) ___ (Zone) New York (State)

TELEPHONE NUMBER [redacted] AGE 13 SEX Male

Indicate any additional information about yourself, including any special experience, which might be pertinent.

My interest in these appearances first started in December (1966), when while looking for meteors of the Geminid shower. It is unfortunate for me, though, that New York is a poor site for my observations.

33. When and to whom did you report that you had seen the object?

_____ (Day) _____ (Month) _____ (Year)

34. Date you completed this questionnaire: 15 (Day) July (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

First of all, I would like to make a distinction. The sightings tooks place on July 6 and 7, and are the two mentioned, while both were accompanied by a secondary, less brilliant flash. It is the very qualities of the seen objects that merit my calling them to your attention. I am not ready, as some would, to dismiss them as lightning, because, as you well know, lightning is an electrical phenomenon and interfers with A.M. reception, which it did not. Though I do not hesitate to say that they were definately not solid, natural objects, I would say that the shape, size, weather condtions and its non-interference distinguish it from the usual.

6 & 7 July
