Major Hector Quintanilla
Project Blue Book

Dear Major Quintanilla,
I am writing to you concerning two U.F.O.s which I witnessed on the night of September 21, 1967. The objects were of orange color and glowed. They were about as large as a medium sized star. And were sighted in the southern skys just after dawn approximately 7:19 P.M.? One seemed to gain altitude and travel westerly. The other object seemed to lose altitude and it traveled easterly. The objects traveled at a very fast speed. The strange thing was they seemed to travel in a series of dips. But I guess the atmosphere made them do this for I have seen artifical satilites do almost the same. But I do know they weren't meteors aircraft or swamp gas!

Sincerely,
[redacted]

P.S. There were 5 other witnesses of these objects.
