Sept. 2, 1967

Project Blue Book
AFOIN
Washington, D. C. 20330

Dear Sirs;

I would like some information on unidentified flying objects. Also, while I was on my vacation, I had a picture taken of myself in which the image of an object was captured. The symmetry is good and clear. The shape and location are out of proportion, as the sun was shining from the right side of the pic.

Not trees or other objects were high enough to reflect any glare from the sun.

Location - west end, Lake Huron. Route #75. Time - approx. 3:00 P.M., Date: Aug. 19, '67. Can you tell me what it was?

Sincerely yours,

[redacted]

PHOTO ANALYSIS REPORT

NR 67-77

PAGE 1 OF 1 PAGES

DATE OF REPORT 30 Oct 67

SUBJECT Unidentified Flying Object

LOCATION West End of Lake Huron DATE 19 Aug 67

PHOTOGRAPHY

AF _____ IR _____ QUALITY _____

P NRS One Polaroid print

1. PURPOSE: This report is written to fulfill a request, Work Order Number 67-122, submitted by Major Quintanilla, TDET, to determine, if possible, the cause for the image in the upper left corner of the attached photo.

2. Lack of image definition precludes identification of this image as an actual object.

3. ANALYSIS: Examination of the print reveals that the upper left corner is not sharply defined like the other three corners. The pattern at this corner indicates a possible irregularity in the processing of the print in this area and could cause the yellow "image" seen on this print.

[redacted]
Beaumont, Texas 77704

1. This replies to your letter of September 2, 1967 in which you inclosed a photograph of an unidentified object. Your photograph has been analyzed by photo experts at Wright-Patterson AFB, Ohio with the following results:

a. Lack of image definition precludes identification of this image as an actual object.

b. Examination of the print reveals that the upper left corner is not sharply defined like the other three corners. The pattern at this corner indicates a possible irregularity in the processing of the print in this area and could cause the yellow "image" seen on this print.

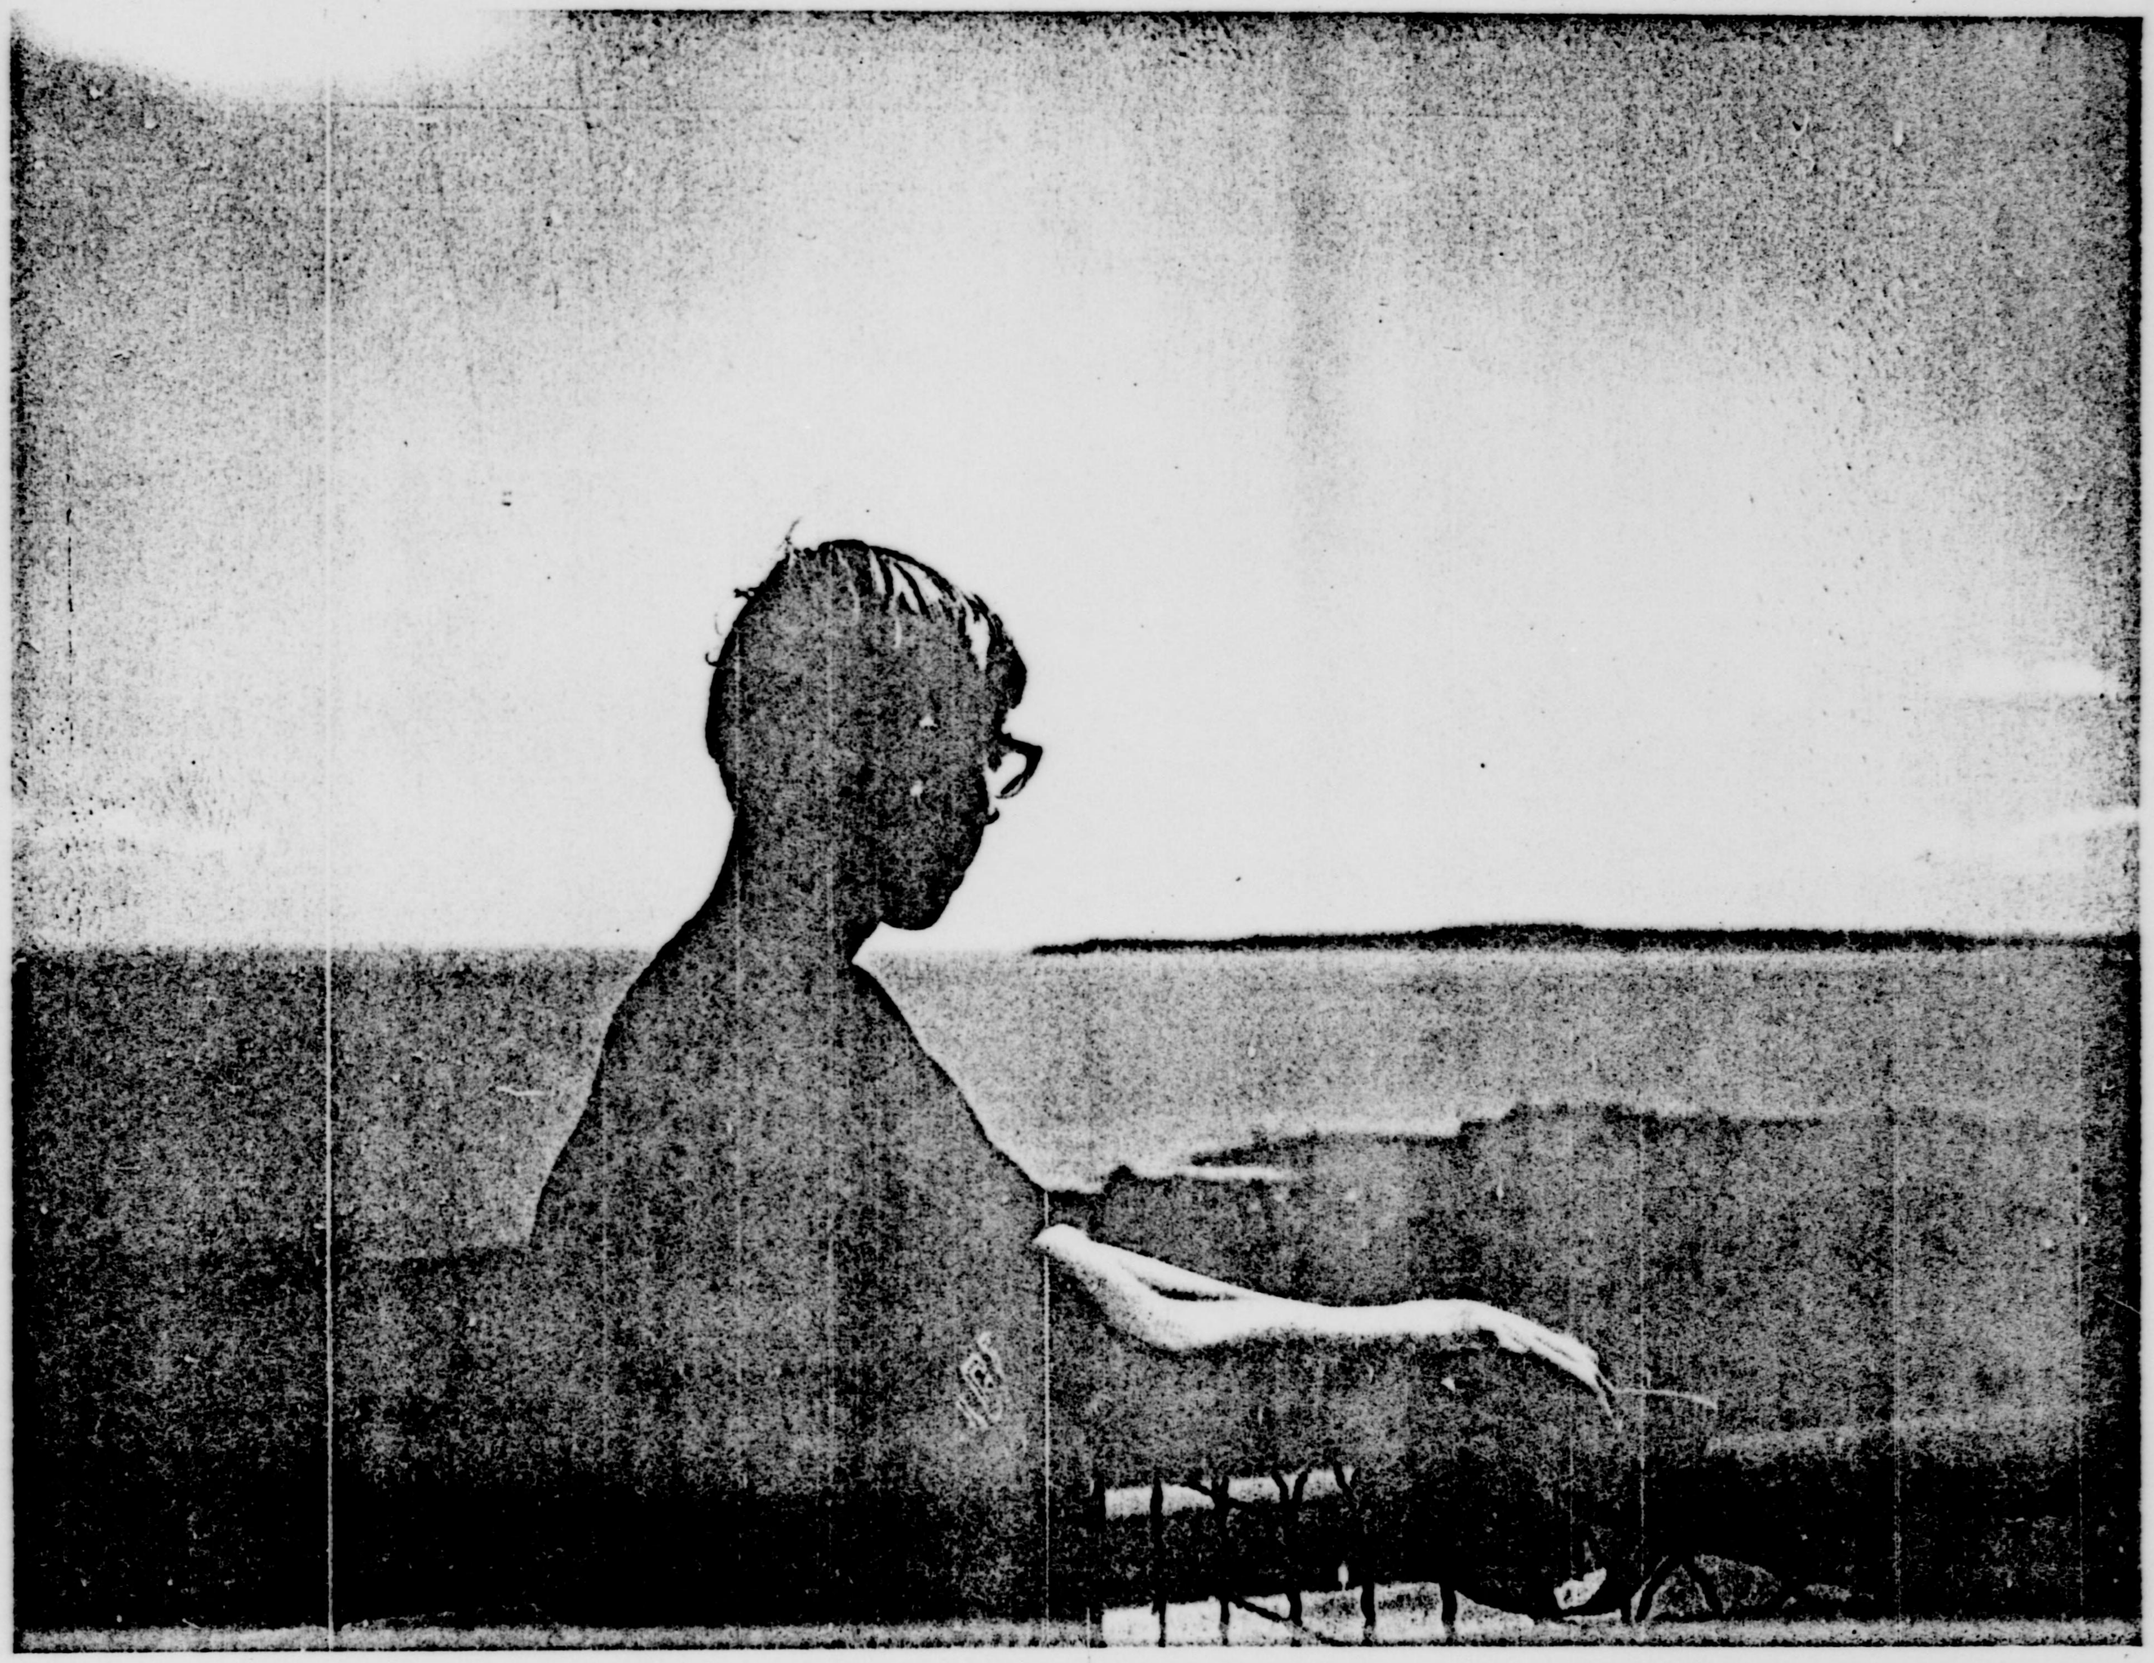

2. No further analysis will be attempted since you did not observe an object.

3. The inclosed information on the Air Force project on UFOs may be of interest to you. Your photograph with one enlargement is inclosed. Thank you for sending your photograph to the Air Force for analysis.

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

? (Day) Aug (Month) 1967 (Year)

2. Time of day: 10 (Hour) 45 (Minutes)

(Circle One): A.M. or (P.M.)

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. (Pacific)
e. Other _____

(Circle One): a. (Daylight Saving)
b. Standard

4. Where were you when you saw the object?

Mayflower Lot. canal (Nearest Postal Address) Brawley (City or Town) Calif (State or County)

5. How long was object in sight? (Total Duration) _____ (Hours) _____ (Minutes) about 30 (Seconds)

a. Certain
b. (Fairly certain)
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes ✓ No ____

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a (Bright)
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

Reproduced by Library of Congress, Legislative Reference Service
May 1966

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
b. A few
c. (Many)
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. (No moonlight – pitch dark)
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. (Clear sky)
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. (Dry)
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. Solid
b. Transparent
c. Vapor
d. (As a light)
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. (About the same)
d. Don't know

11.1 Compare brightness to some common object:

_____

12. The edges of the object were:

(Circle One): a. (Fuzzy or blurred)
b. Like a bright star
c. Sharply outlined
d. Don't remember

e. Other It appeared as a reddish-brange and oval shaped light

13. Did the object:

	(Circle One for each question)		
a. Appear to stand still at any time?	Yes	(No)	Don't know
b. Suddenly speed up and rush away at any time?	Yes	(No)	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	Yes	No	Don't know
f. Change shape?	Yes	No	Don't know
g. Flash or flicker?	Yes	No	Don't know
h. Disappear and reappear?	Yes	No	Don't know

14. Did the object disappear while you were watching it? If so, how?

I was watching the object for about 15 sec then it just disapeared.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: ___

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: ___

17. Tell in a few words the following things about the object:

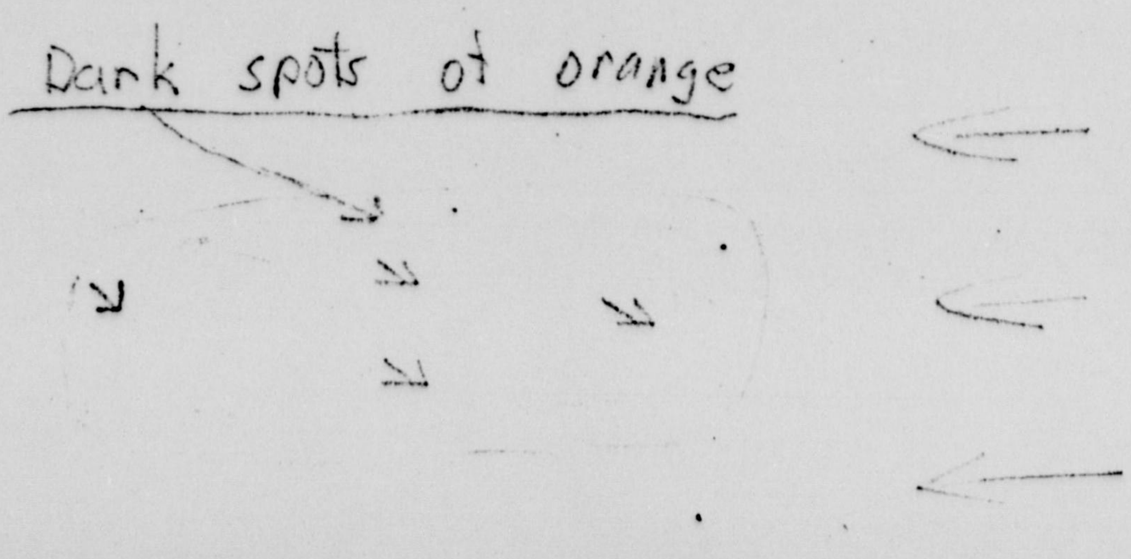

a. Sound None

b. Color Bright reddish-orange color

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

It was fairly far away and if I did hold up a match it would cover it would. It was oval.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

Not Certain

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? about 10 miles

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
c. (Outdoors)
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
c. (In open countryside?)
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
e. South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

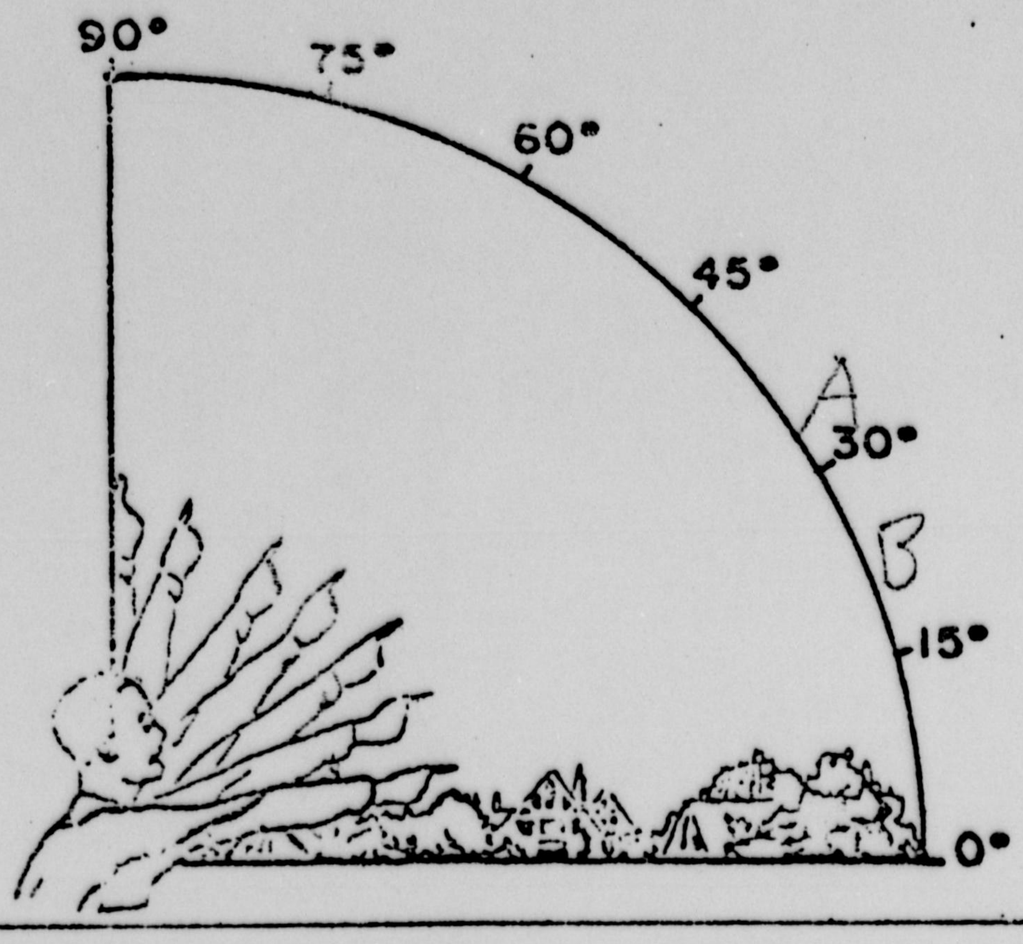

25. Did you observe the object through any of the following?

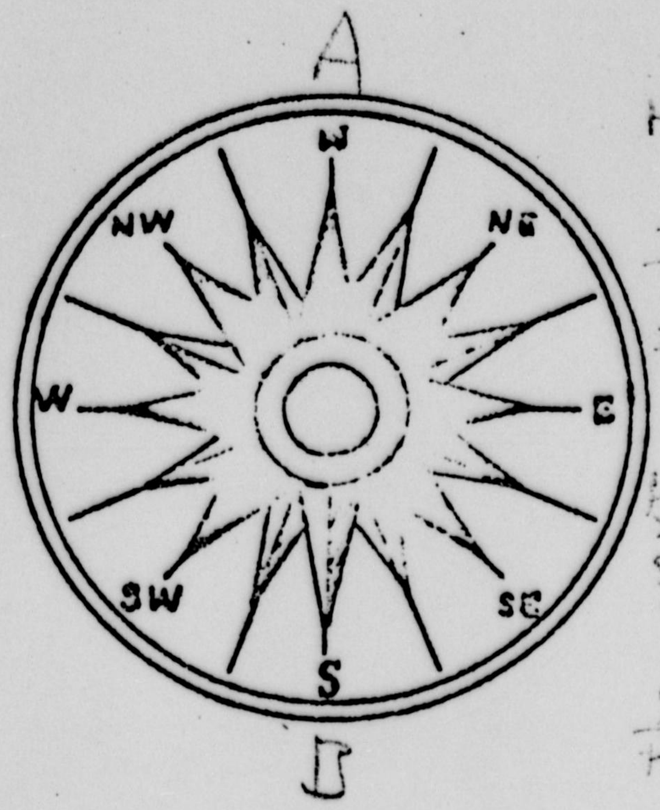

a. Eyeglasses	Yes	(No)	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	Yes	(No)	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

That is very difficult to do, but I guess it would look sort of like a red light bulb

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

Height I saw the thing, the same as in the opposite direction

the next time going

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

North
A

South
B

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

31.2 Please list their names and addresses:

[redacted] (My Stepbrothen)

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted] (Street) Brawley (City) ___ (Zone) Calif (State) -92227-

TELEPHONE NUMBER [redacted] AGE 15 SEX M

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I'm getting a "B" average in school
(I didn't make this up and I'm NOT a "crack pot")

33. When and to whom did you report that you had seen the object?

___ (Day) ___ (Month) ___ (Year)

I didn't Report this.

34. Date you completed this questionnaire: 26 (Day) July (Month) 1968 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Well, my stepbrother and I were outside between 10:30 and 11:00, talking about stars and UFOs. I turned to one side and saw this object that I have described. I got my stepbrothers attention and we both saw it move from north to south. From the distance away I was, It looked rather big and moved very fast. I guess it moved about 20 or 30 miles in about 15 sec. then disappeared.

The next night we went out about the same time and saw the same object, the same distance above the earth moving in the opposite direction, South to North.

Make of it what you like, but you have to admitt it is very strange.

The only people I told this to were a couple of my friends.

NICAP MASSACHUSETTS INVESTIGATING SUBCOMMITTEE

13 Friend Court
Wenham, Massachusetts

SUBJECT: UFO Sighting - Cape Ann, Massachusetts - 8/2/67 - 9:30PM E/T

DATE: 15 August 1967

FROM: Raymond E. Fowler
Chairman: NICAP MASS SUBCOM

TO: NICAP, Washington, D.C.

SIGHTING BACKGROUND:

The initial input to NICAP MASS SUBCOM was a telephone call from Mr. William Cooper, "Gloucester Times" reporter, on the evening of 4 August 1967. A check with the "Sky-Lite" advertising company revealed that illuminated aircraft was in a holding pattern over Fenway Park in Boston during the sighting period and came nowhere near the sighting area. After initiating our investigation and concluding that the sighting was significant, I phoned the University of Colorado UFO Project via the "Early Warning Coordinator" procedure. The call was made on 7 August 1967 and the recipient of the data was Mr. James Wanderwerth. On August 8th I received two calls from Colorado from Dr. Norman LeVine pertaining to further enquiry and then the decision for Dr. LeVine and Dr. Roy Craig to fly out to investigate. They attended a coordination-dinner meeting at my home at 1:00 PM on August 9th during which I briefed them on the sightings called in and supplied carbon copies of a witness roster which included Sighting Location, time, direction and elevation-angle for each of the 12 groups of witnesses. Our full cooperation and support was made available to them as required during their visit from 8/8 - 8/13. Some of their time was spent re-checking older sightings investigated by our Subcommittee. I believe that the first NICAP MASS SUBCOM/Colorado Team joint effort proved to be practical as well as enjoyable.

SIGHTING ACCOUNT:

Due to the fact that so many witnesses were involved in this sighting, I have decided to present the sighting account in a summarized fashion by Groups. The summary includes witness data, location, a copy of their sketch and a brief narrative based upon their filled-in questionnaires and other information gathered during an interview. The summarized Sighting Account is to be used with the enclosed map which lists and locates the witness groups by alphabetical designation. Detailed signed questionnaires, narratives, sketches, and larger scale maps are included in the full report to NICAP and in the NICAP MASS SUBCOM File. Due to the great number of sheets involved it would be impractical to include xerox copies to all recipients of this report.

NOTE:

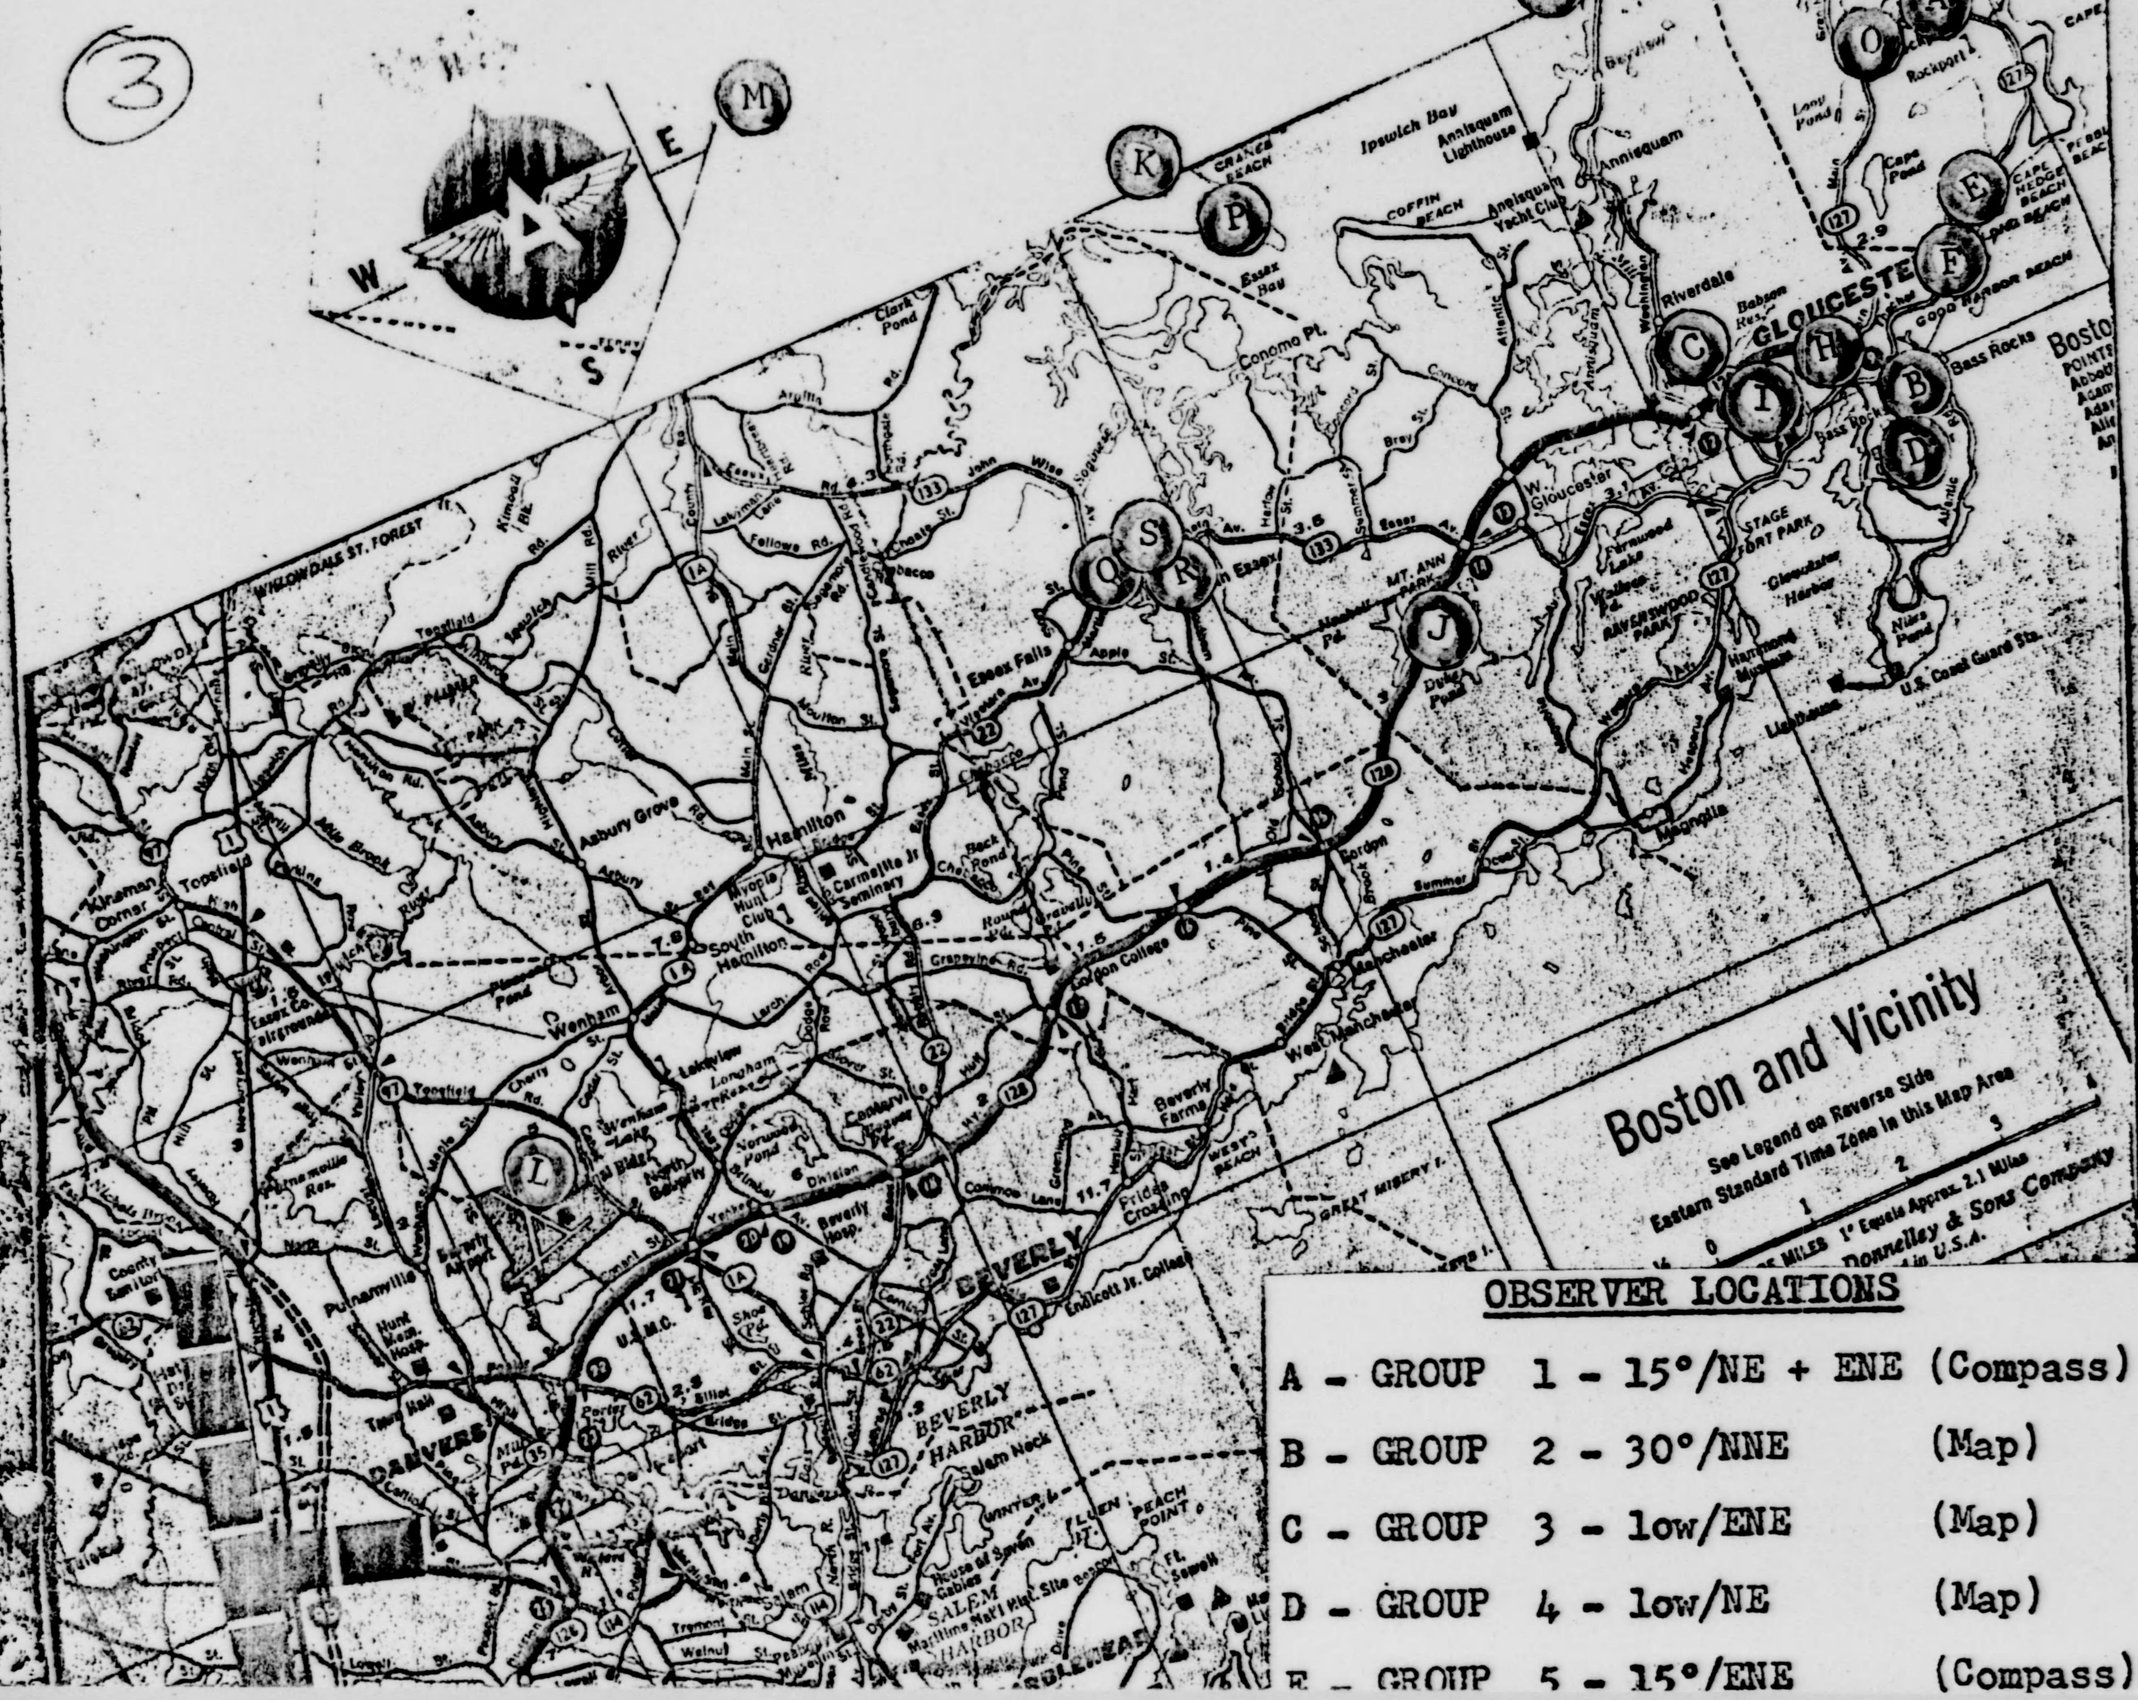

Credit should also be given to NICAP Associate Member Henry Witham who was "Group 1". Henry, a native of Gloucester acted as our guide several times thus helping us to move quickly from one location to another.

The Gloucester Times also proved to be a great help both to NICAP MASS SUBCOM and to the Colorado Team in printing names of witnesses and sighting details. It was this newspaper through reporter William Cooper that notified me of the initial sighting details.

NARRATIVES: (Cape Ann, Mass. 8/2/7) SELECTED

GROUP # 1 (Old Garden Beach Parking Lot, Rockport)

(Henry Witham): "I was parked at the Old Garden Beach Parking Lot when I saw the object. I was facing the girl I was with when I looked up and noticed the lights. I made an exclamation such as "look, a Flying Saucer"! She looked and saw lights which appeared blurry but bright to her. She has poor vision but was still able to see the lights. She wasn't able to see stars without her glasses. She got her glasses while I rolled down the window. I started to open the door but she wouldn't let me. It came in closer to us, then stopped, then went back towards its earlier position, only higher. Then it blinked out in two steps. It appeared that either 9 of the twelve or all twelve blinked out. It remained in our sight about 20-25 seconds between the blinking-out phases. The lights were of a yellowish color. When and after we saw it we were startled and felt that the object was looking or watching us. There were no other cars in the area and the houses were about 70 yards away in back of us. We were facing the object and first saw it through the front windshield.

CAR

NARRATIVES(contined
NARRATIVES(continued) (Cape Ann, Mass. 8/2/67)

Group # 2

(Mrs. Cyrus((Constance)) Brewer): "I was driving along in my car at 9:30 on August 2, 1967 along Bass Avenue going towards Good Harbor Beach. All of a sudden my eyes were attracted by a very unusual sight coming into my sight through the left hand side of my windshield. I was shocked. I was interested. I stared at it as much as I could. I was driving very slowly so that I really saw the goutline very well and I know that there was a band of lights in the middle. I know that the corners were a curve not pointed. I know the lights were yellowish orange (like fog lights). I admired its large, beautiful, structure. I did not stop my car. I do not enjoy night driving and would not be apt to stop and look at anything at night. Suddenly I realized the trees on the left-hand side of the street obstructed my vision. I felt I wanted to see it again so I tried to go faster. When I came to the next clearing the flying object had gone. Oh! When I did see it, it seemed to be hovering or suspended in mid-air. I could not find the lights anywhere. It scared me too!

"It was a wonderful clear night. The stars were very visible. I know the area well. The object was over the marshes behind the beach. I saw the outline clearly. The lights intrigued me. There was a yellow glow on the other side (of the object). I believe it (the object) was metal reflecting (the lights).

Personal Date-Mrs. Cyrus Brewer:

She was born in Brookline, Massachusetts and educated at the Brimmer School and at Garlund Junior College in Boston. She is the wife of Cyrus Brewer, an insurance executive and graduate of the United States Naval Academy. They have four daughters and six grand-daughters. Mrs. Brewer is chairman of anti-litter projects and board member of the Garden Club Federation of Massachusetts as Litter Prevention, Junior Gardeners and Roadside Beautification, Chairman. She is also a member of the Mayflower Society, the National Society of Colonial Dames, the Junior League of Boston and the Izaak Walton League of America. She lives in Chestnut Hill and has her summer home in Gloucester, Massachusetts.

Mrs. Brewer appears to be a class A citizen heavily involved in civic affairs. She had always regarded "flying saucers" as nonsense prior to her sighting. I interviewed her in the presence of her husband and one of her daughters in a very fine home they occupy in the summers. I was impressed with her sincerity and have no doubts as regarding the authenticity of her experience. Her sighting and those at Good Harbor Beach corroborate each other and are supported by the "lights" sightings throughout the Cape Ann Area.

NARRATIVES(continued)(Cape Ann, Mass. 8/2/7) SHEFFIELD

Group # 6 (Good Harbor Beach Parking Lot, Gloucester)

(Carol Chisholm): "We were all at the Good Harbor Parking Lot. There were six of us talking. All of a sudden Dana Knowlton said, "What's in the sky?" We all looked. It seemed to be a plane crashing because there were two bright lights but it seemed to stop and almost revolve and we saw about six or seven of the same lights. I can remember Nancy and Paula screaming but I wanted to find out exactly what it was. I was running towards it with the boys but the two boys and I stopped. To this day I don't know why I stopped but the object remained the same. The object stayed up there when we stopped about ten seconds. One by one the lights seemed to go out. We kept looking in the sky and it seemed that there was a blank spot in the sky (without stars). We realized it was not coming back, but we (the two girls and I) rode down to "Surf Side Softee" and came back to the beach and we left about 10:30 PM."

(Paula Scola): "The object was solid. It had two discs with six or seven yellow/orange lights between the two. It moved at a tremendous speed and made no noise at all. There was a group of six of us (3 boys and 3 girls). We were outside of our cars talking and Dana pointed out the object. We all panicked at first - then we realized what it was and started to really observe it. It was in view for 45-60 seconds and then disappeared. As it disappeared the lights vanished one-by-one as though they blinked off. It headed in the direction of Rockport. Harold had tried to get the girls to keep quiet and to safety but I just kept screaming until I realized it wasn't going to harm us. That's when Carol tried to move towards it. It disappeared about 15 seconds after we quieted down.

Group # 9 (Railroad Avenue, Gloucester)

(Robert A. Bosselman, Jr.): "I first noticed the lights while driving along. Just as I turned into Railroad Avenue from Washington Street, they (the lights) were in the upper left hand corner of the windshield. I pulled to the side of the road as quickly as I could and rolled down the side window observing the lights for about 4-5 seconds. There were six lights in the formation drawn below (see sketch elsewhere). They remained stationary relative to each other and the group itself appeared to be stationery in the air. All the lights dimmed in brightness by about one-half and then went out.

Group # 11 (Cranes Beach, Ipswich)

(Winthrop Ashworth): The four of us were walking down the beach towards the point in Essex when we noticed between six and twelve lights in the sky about where Cassiopia's Chair is. The lights were arranged in a pattern as though it were a helicopter with lights from one end to the other. The lights appeared about the intensity of fireworks yet it rose only slightly on the horizon and disappeared without descending. The lights went out on the left and right sides of the object as we faced it, came back on, then faded quickly as a light loses intensity when it is turned off. The group was not upset, scared, or otherwise emotional. We discussed various possibilities for a logical explanation an a natural phenomenon. We recognized it as nothing like we had ever seen.

NARRATIVES(continued) (Cape Ann, Mass. 8/2/67) SELECTED

Group # 11 (continued)

(Paul Dunn): "While walking along the beach in a southerly direction I noticed a bright object in the sky. The object appeared to consist of six orange-yellow lights in a horizontal plane. They were to the right of and brighter than the constellation Cassiopia. The lights appeared suddenly as headlights being turned on. They were in a line and the two on the left end seemed to become dull as the four to the right brightened. After approximately 20-30 seconds they faded rapidly away as if they had been shut off. My first impression was that they were fireworks, but they did not explode and remained visible for too long. The second thing that came to my mind was a meteorite shower, but I dismissed this thought because of the straight-line formation. I also dismissed the possibility of a conventional aircraft because of the color and number of the lights. I could not see a reflection in the water because any reflection would have been obscured by the beam from the Gloucester coast.

Group # 15

(Stephen Aro): "While getting out of my car at T-Wharf, my attention was brought to several lights in the sky over Rockport Harbor. The lights lit from left-right in a slight arc (curve at bottom). The entire sequence lasted approximately 6 sedonds. The light appeared to be attached to an object which was not visible. There was no sound, position lights, rotating beacon or odor. The lights were approximately the size of car headlights 100 yards away and were yellowish-white in color. My estimation is that the object was approximately the size of a 727 Boeing and at an elevation of 700 feet. The lights went out in a left-to-right sequence after which there was no visible trace of the object. (Mr. Aro believed the object to be intelligently-controlled as the lights lit at even intervals in a left-to-right pattern and went out in the sane manner. He is acquainted with conventional aircraft and is very familiar with the "Sky-Lite" craft as it was hangered at Beverly Airport for several years. What he saw was unusual and not conventional he insisted.)

Group # 16

(William Carroll): "On August 2, 1967 at approximately 10:00 PM at the film location for the movie "Crown Caper", a female companion and myself were keeping guard of the movie site. Prior to the sighting we were sitting in a jeep located beside the movie site. I don't know if the lights themselves caught my eye or just a chance glance but there appeared 4 white lights over the ocean. Approximately 4 more white lights then joined the originals forming a "T" shape. These last 4 lights did not come from an direction but appeared to have been there and then turned on. Each light began to fade and finally disappear not together but starting with the lower part of the "T" and working up to the top of the "T". I did not notice any change in brightness of these lights and did not take notice as to whether they were moving or not. This episode took approximately 8-10 seconds".

EVALUATION DATA: (Cape Ann 8/2/7) Mass.)

I. ASTRONOMICAL

A. A possible "meteor-train" was ruled out after discussing details with NICAP Special Advisor Walter N. Webb, Chief Lecturer in Astronomy at Hayden Planetarium and checking fire-ball activity through the office of Mr. James Cornell, Public Information Officer, Smithsonian Astrophysical Observatory.

B. No known Astronomical phenomena applicable.

C. General statements by witnesses pertaining to Astronomical data during the sighting date, location and time were not contrary-to-fact.

II. MAN-MADE

A. BALLOONS (Information from Cambridge Research Labs three-fold:

1. Weather Balloons - This type 5-6 feet in diameter and carry no running lights. 3 set aloft daily from CRI, in AM, Noon and PM. This type of balloon would not account for description of UFO.

2. Research Balloons. No large research balloons are being used in this area at the present time and no known research balloon would carry strings of yellow-orange lights as described by UFO witnesses.

3. CRL statement: "We can say categorically that what was described was not one of our experiments"

4. Change of direction at variance with wind.

B. SATELLITE(s):

1. Smithsonian Astrophysical Observatory stated that only the PAGEOS satellite was transiting the Boston area near the UFO sighting time. However, it resembles a faint star and moves slowly for 45 minutes across the sky. Its description does not fit that of UFO.

2. PAGEOS DATA - Transit Time: 9:25 PM EDT

Elevation: 35° NE

Azimuth: SE to NW

EVALUATION DATA(Cape Ann, Mass. 8/2/7) - continued

C. AIRCRAFT

1. Advertising Plane - "Sky-Lite" Company only operator of night-flying illuminated aircraft. Its one Cub-Pacer Club with 4 white panels was over Fenway Park, Boston during the sighting time. Manager Joseph Bodina gave me his flight path information which is plotted on a map elsewhere in this report.

2. I checked the following local Civilian and Government installations and no one knew of an airplane or helicopter in the sighting area carrying bright yellow-orange lights as described.

a. Beverly A/P - Major Ward, UFO Officer, had not received any UFO reports for that date and know of no aircraft with unconventional lights in the area except the "Sky-Lite" Cub which was in Boston at that time and which did not go near the sighting area.

b. Other Airports - Beverly Airport, Beverly; Robbins Field, Danvers; and Plum Island Airport - All negative

c. Coast Guard Installations -

(1) SALEM - The Watch remembered seeing the advertising plane over Lynn Beach, 7 miles SW of Salem but its conventional running lights were easily visible. Received no UFO calls.

(2) GLOUCESTER - Know of no aircraft in the sighting area but received two phone calls and a personal report from an Airline Pilot who saw the UFO.

(3) THATCHERS ISLAND, ROCKPORT - Negative

(4) ANNISQUAM HARBOR LIGHT HOUSE - Negative

(5) EASTERN POINT LIGHT HOUSE - Negative

III. WEATHER (U.S. Weather Bureau, Logan Airport, Boston, Mass.)

DATE:	2 August 1967	WIND SPEED:	10 Knots
TIME:	9:30 PM EDT	CEILING:	25,000 (High thin clouds)
TEMP:	67°	VISIBILITY:	15 Miles
WIND:	140°(about SE)		

CHAIRMAN'S EVALUATION (Cape Ann, Mass. 8/2/67)

This object was viewed under excellent weather conditions by at least 250 people according to a statistical statement by the University of Colorado UFO Project Investigating Team.

The similarity of descriptions given by many people independently viewing the UFO from different locations leaves no doubt in my mind that they were observing the same object. Some of the witnesses (Airline, Commercial and Private pilots) are considered trained observers and each were personally convinced that they were looking at an unconventional object. A conventional object has been ruled out for the following reasons in addition to those listed under EVALUATION DATA:(Aircraft):

1. The actual object carrying the lights was seen by witnesses in the Good Harbor Beach, Gloucester area (Groups 2 and 6) and bore no resemblance to any conventional operational aircraft. (see sketches)

2. No one saw conventional aircraft identification lights which all aircraft must carry.

3. The lights that were seen were not conventional either in color, behaviour(steady) or configuration. The crescent and oval configurations gave the observers the impression that they were affixed to a curved surface thus supporting the "object" sightings of Group 2 and Group 6.

4. No engine or other sound was heard from the UFO even at close range.

5. Its maneuvers, hovering, rapid direction-reversal without curve radius and seemingly low-level flight were unconventional and dangerous.

6. There were no aircraft in the area carrying such unconventional lights according to sources already noted under EVALUATION DATA.

7. Both Henry Withem (Group 1) and Stephen Aro (Group 15) are familiar with the "Sky-Lite" -type advertising plane and stated it bore no resemblance. There is only one such plane operating in this area and, as noted elsewhere, it was over Fenway Park, Boston during the sighting period.

The possibility of blimps and balloons were ruled out as already noted under EVALUATION DATA.

There has been other UFO activity in the Eastern, Massachusetts and Eastern, N.H. areas. They have received little publicity.

EVALUATION (continued-Cape Ann, Mass. 8/2/67)

The object exhibited characteristics typical of other UFO sightings from all over the world. For example:

1. The inverted saucer on upright saucer configuration with lights or ports around the connecting circumference.

2. The description of a string of yellow-orange/red lights.

3. The straight to flat VEE to crescent to circular light patterns noted by observers from different angles.

4. The ability to hover and dart away.

5. The ability to perform direction reversals seemingly without a curve-radius.

6. Complete lack-of-sound and visible means of propulsion.

7. The sequential appearance and disappearance of the string of lights. (cf. Exeter, N.H. 9/3/65 and Newton, N.H. 7/26-27/67 among others).

It is therefore my conclusion that the Cape Ann Area, Massachusetts sighting of 2 August 1967 definitely falls into the category of an UNKNOWN.

CHAIRMAN'S COMMENTS

It is interesting to note that on-the-surface, the witnesses represent people from a broad cross-section of society differing in interests, occupation and financial status. Most of them had given little previous thought to the UFO Problem. It serves to help demonstrate that 1) many types of people see UFOs and 2) that the observations made by un-trained casual observers were essentially the same when compared with the data obtained by trained observers who were witnesses to the same incident.

The fact that the UFO was seen over a fairly-large area would indicate either it was extremely large with exceptionally bright lights at a greater altitude than supposed or that it darted about from one area to another within a very short space of time. It was interesting to note that a similar sighting took place during the same evening from Hermit Island, Casco Bay, Maine. One wonders how many others from other areas sighted the object.

Respectfully Submitted,

Raymond E. Fowler

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

4 (Day) 8 (Month) 61 (Year)

2. Time of day: 9 (Hour) 25 (Minutes)

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): ~~a.~~ Eastern X
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Emaus Avenue (Nearest Postal Address) | Allentown (City or Town) | Pennsylvania (State or County)

5. How long was object in sight? (Total Duration) _____ (Hours) _____ (Minutes) 40 (Seconds)

(a.) Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? counting 1-100; 2-100

5.2 Was object in sight continuously? Yes X No _____

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
(a.) Bright after thundershowers
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, Jul 61, which is obsolete.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. None
(b) A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. No moonlight – pitch dark
(d) Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

(a) Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds

WEATHER *(Circle One)*:

(a) Dry after thundershowers
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

(a) Solid with lights
b. Transparent
c. Vapor
d. As a light
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. Brighter
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
(c) Sharply outlined
d. Don't remember

e. Other _____

13. Did the object: *(Circle One for each question)*

a. Appear to stand still at any time?	Yes	(No)	Don't know
b. Suddenly speed up and rush away at any time?	Yes	(No)	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	(Yes)	No	Don't know
f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker? the lights blinked	(Yes)	No	Don't know
h. Disappear and reappear?	Yes	(No)	Don't know

14. Did the object disappear while you were watching it? If so, how?

" Like turning off a light"

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound " Faint buzzing sound"

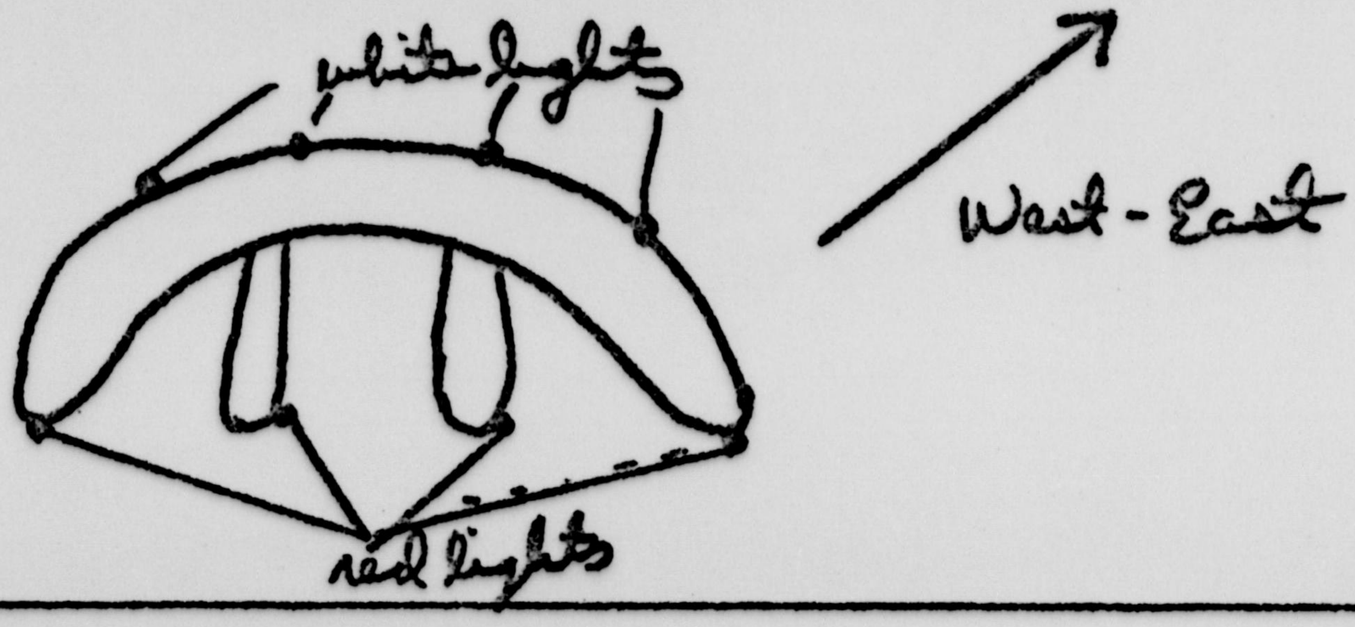

b. Color silver grayish object, with red, white lights

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

"It would have covered only one of the lights."

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? approx. 50' above them

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
(b) In a car
c. Outdoors
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
(c) In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North
b. Northeast
c. East
d. Southeast
(e) South
f. Southwest
g. West
h. Northwest

24.2 How fast were you moving? 0-10 miles per hour. slowed down to observe

24.3 Did you stop at any time while you were looking at the object?

(Circle One) (Yes) No

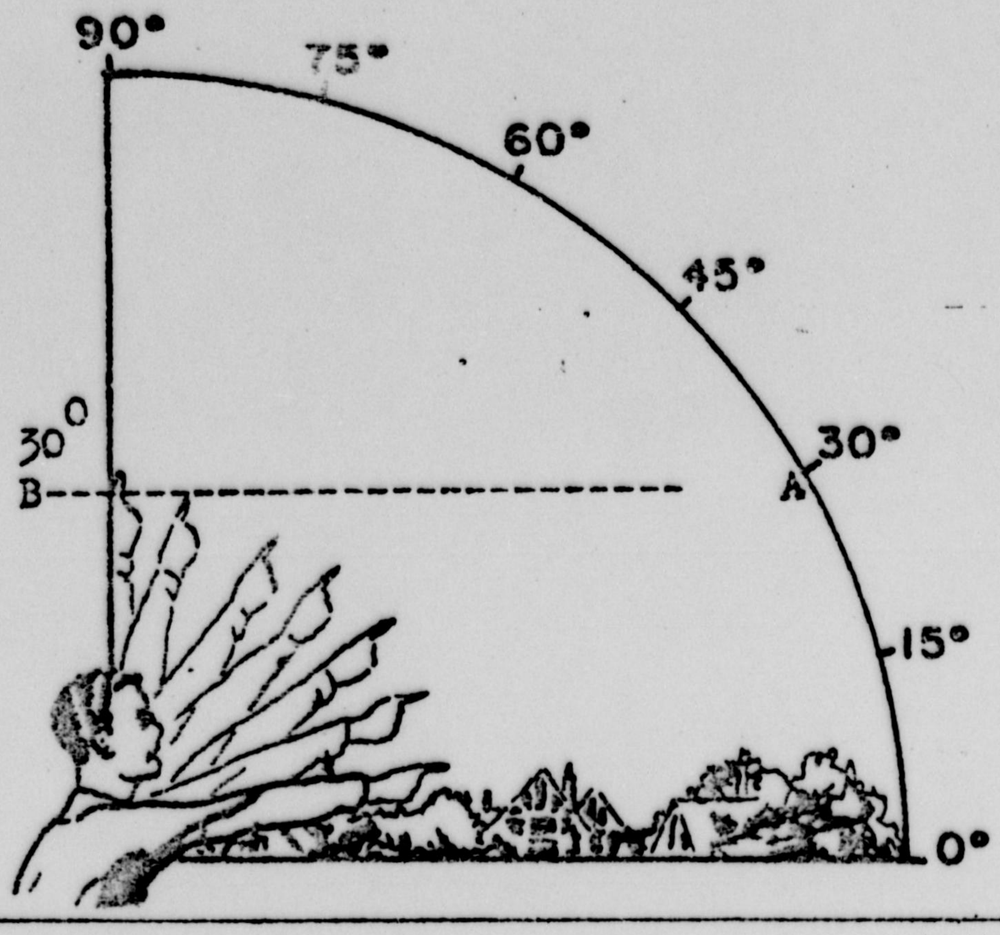

25. Did you observe the object through any of the following? ROLLED DOWN CAR WINDOW TO OBSERVE LATER

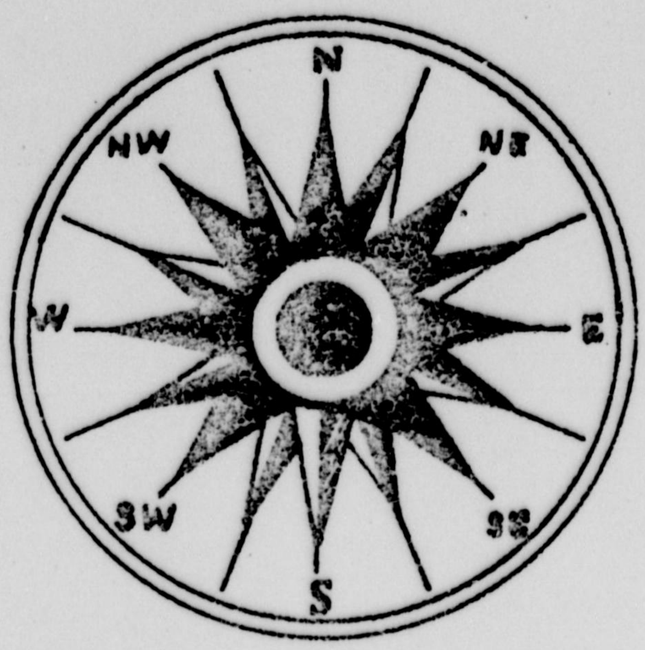

a. Eyeglasses	(Yes)	No	e. Binoculars	Yes	(No)
b. Sun glasses	Yes	(No)	f. Telescope	Yes	(No)
c. Windshield	(Yes)	No	g. Theodolite	Yes	(No)
d. Window glass	Yes	(No)	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

Large boomerang with protrusions

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

no

31. Was anyone else with you at the time you saw the object? *(Circle One)* (Yes) No

31.1 IF you answered YES, did they see the object too? *(Circle One)* (Yes) No

31.2 Please list their names and addresses:

1. [redacted] --- Allentown, Pa.
2. [redacted] th Street Allentown, Pa.

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS [redacted] (Street) Allentown (City) ____ (Zone) Pennsylvania (State)

TELEPHONE NUMBER [redacted] AGE 52 SEX F

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

9 (Day) 8 (Month) 61 (Year) [redacted] Jr.

34. Date you completed this questionnaire: 9 (Day) 8 (Month) 61 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

OFFICIAL U.S. AIR

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will *not* be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

10 (Day) 8 (Month) 67 (Year)

2. Time of day: 10 (Hours) 05 (Minutes)

(Circle One): A.M. or (P.M)

3. Time Zone:

(Circle One): a. (Eastern)
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. (Standard)

4. Where were you when you saw the object?

_____ (Nearest Postal Address) NEWARK (City or Town) ESSEX COUNTY (State or County) NEW JERSEY

5. How long was object in sight? (Total Duration) _____ (Hours) 10 (Minutes) _____ (Seconds)

a. (Certain)
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? BY WITNESSES WATCH

5.2 Was object in sight continuously? Yes X No _____

6. What was the condition of the sky?

DAY	NIGHT
a. Bright	a. (Bright)
b. Cloudy	b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

FORM FTD OCT 62 164 This form supersedes FTD 164, jul 61, which is obsolete.

FORCE UFO FORM

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS *(Circle One)*:

a. (None)
b. A few
c. Many
d. Don't remember

8.2 MOON *(Circle One)*:

a. Bright moonlight
b. Dull moonlight
c. (No moonlight—pitch dark)
d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS *(Circle One)*:

a. Clear sky
b. Hazy
c. (Scattered clouds)
d. Thick or heavy clouds

WEATHER *(Circle One)*:

a. (Dry)
b. Fog, mist, or light rain
c. Moderate or heavy rain
d. Snow
e. Don't remember

10. The object appeared: *(Circle One)*:

a. (Solid) AT ONE TIME
b. Transparent
c. Vapor
d. (As a light)
e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? *(Circle One)*:

a. (Brighter)
b. Dimmer
c. About the same
d. Don't know

11.1 Compare brightness to some common object:

BRIGHTER THAN NORTH STAR

12. The edges of the object were:

(Circle One):
a. Fuzzy or blurred
b. Like a bright star
c. (Sharply outlined)
d. Don't remember
e. Other_____

13. Did the object:

(Circle One for each question)

a. Appear to stand still at any time?	Yes	(No)	Don't know
b. Suddenly speed up and rush away at any time?	(Yes)	No	Don't know
c. Break up into parts or explode?	Yes	(No)	Don't know
d. Give off smoke?	Yes	(No)	Don't know
e. Change brightness?	(Yes)	No	Don't know
f. Change shape?	Yes	(No)	Don't know
g. Flash or flicker?	(Yes)	No	Don't know
h. Disappear and reappear?	Yes	(No)	Don't know

64

Official U.S. Air Force

14. Did the object disappear while you were watching it? If so, how? NO

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): (Yes) No Don't know. IF you answered YES, then tell what it moved behind: ~~A TREE~~ AFTER GOING A LONG DISTANCE IT DISAPPERAED BEHIND A TREE (BUT LIGHTS COULD STILL BE SEEN BLINKING)

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes (No) Don't know. IF you answered YES, then tell what in front of:

17. Tell in a few words the following things about the object:

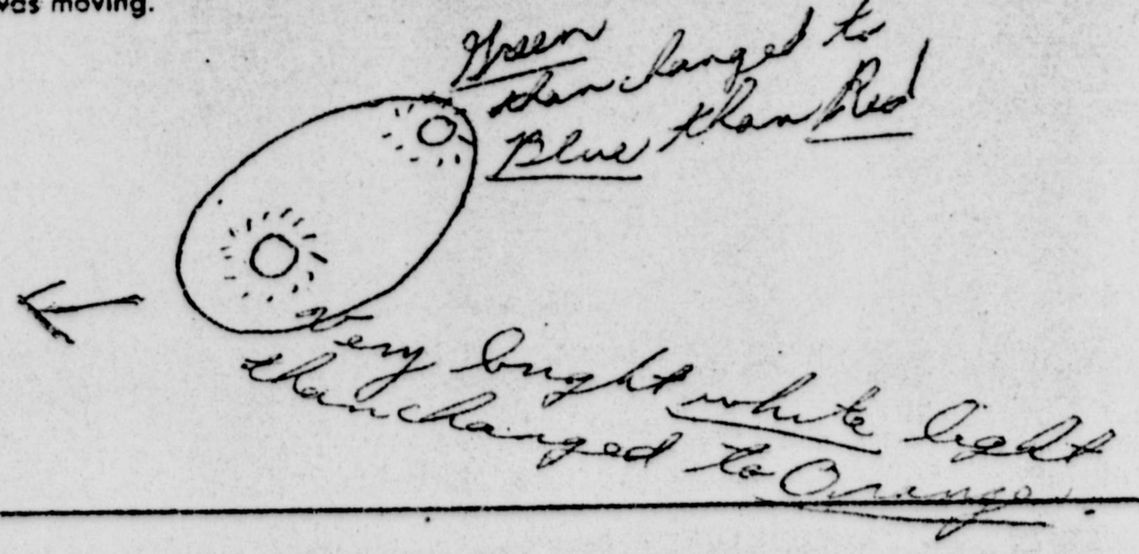

a. Sound NONE

b. Color WHITE, ORANGE, RED, BLUE, GREEN

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

ABOUT ONE QUARTER OF THE OBJECT WAS LEFT.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) (Yes) No

IF you answered YES, then what speed would you estimate? 40 MPH

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 450 FT.

22. Where were you located when you saw the object? (Circle One):

a. Inside a building
b. In a car
c. (Outdoors)
d. In an airplane (type)
e. At sea
f. Other _____

23. Were you (Circle One)

a. In the business section of a city?
b. (In the residential section of a city?)
c. In open countryside?
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

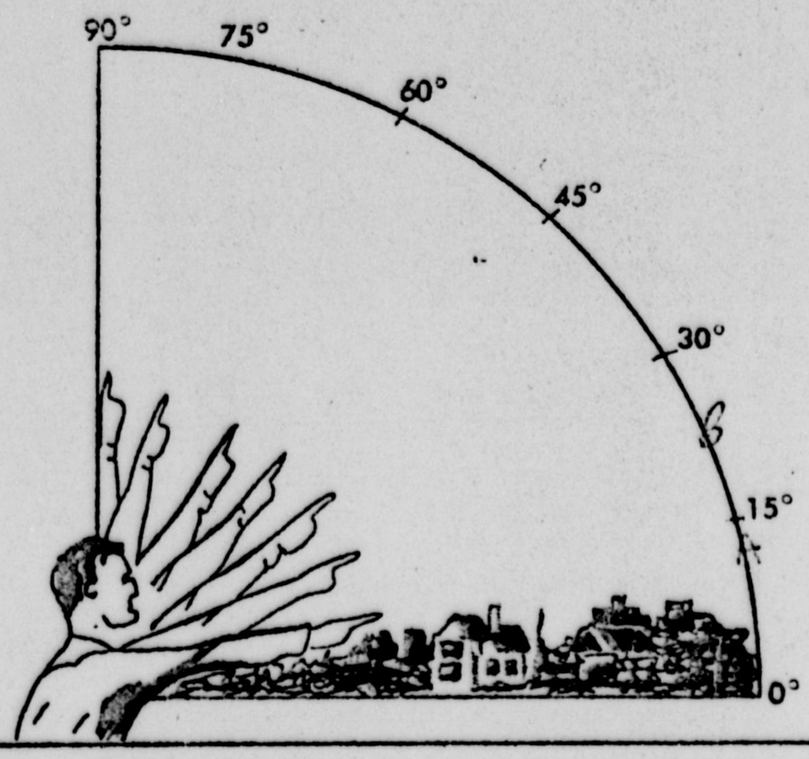

25. Did you observe the object through any of the following?

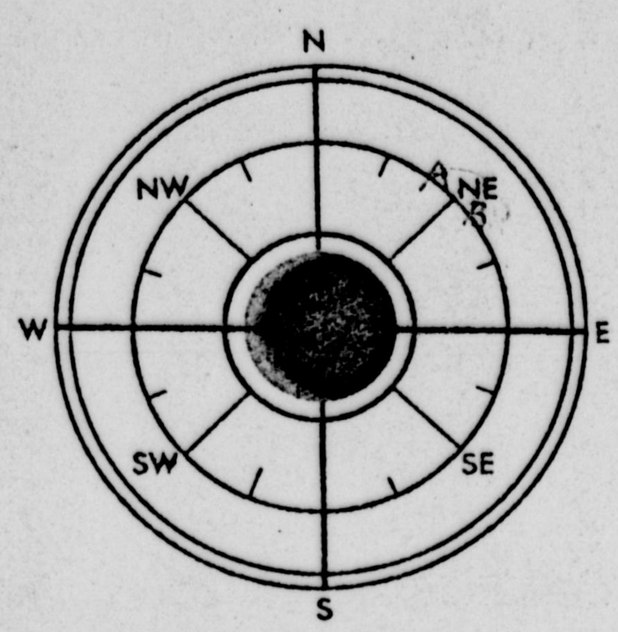

a. Eyeglasses	Yes	No	e. Binoculars	(Yes)	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other _____		

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

OVAL DISH

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

It WAS SWERVING Continuously

Aug. 12, 1967

Dear Lee:

This is in reference to a object which I have seen in the night sky for the past several nights. This object is seen every night at same time, speed, and course.

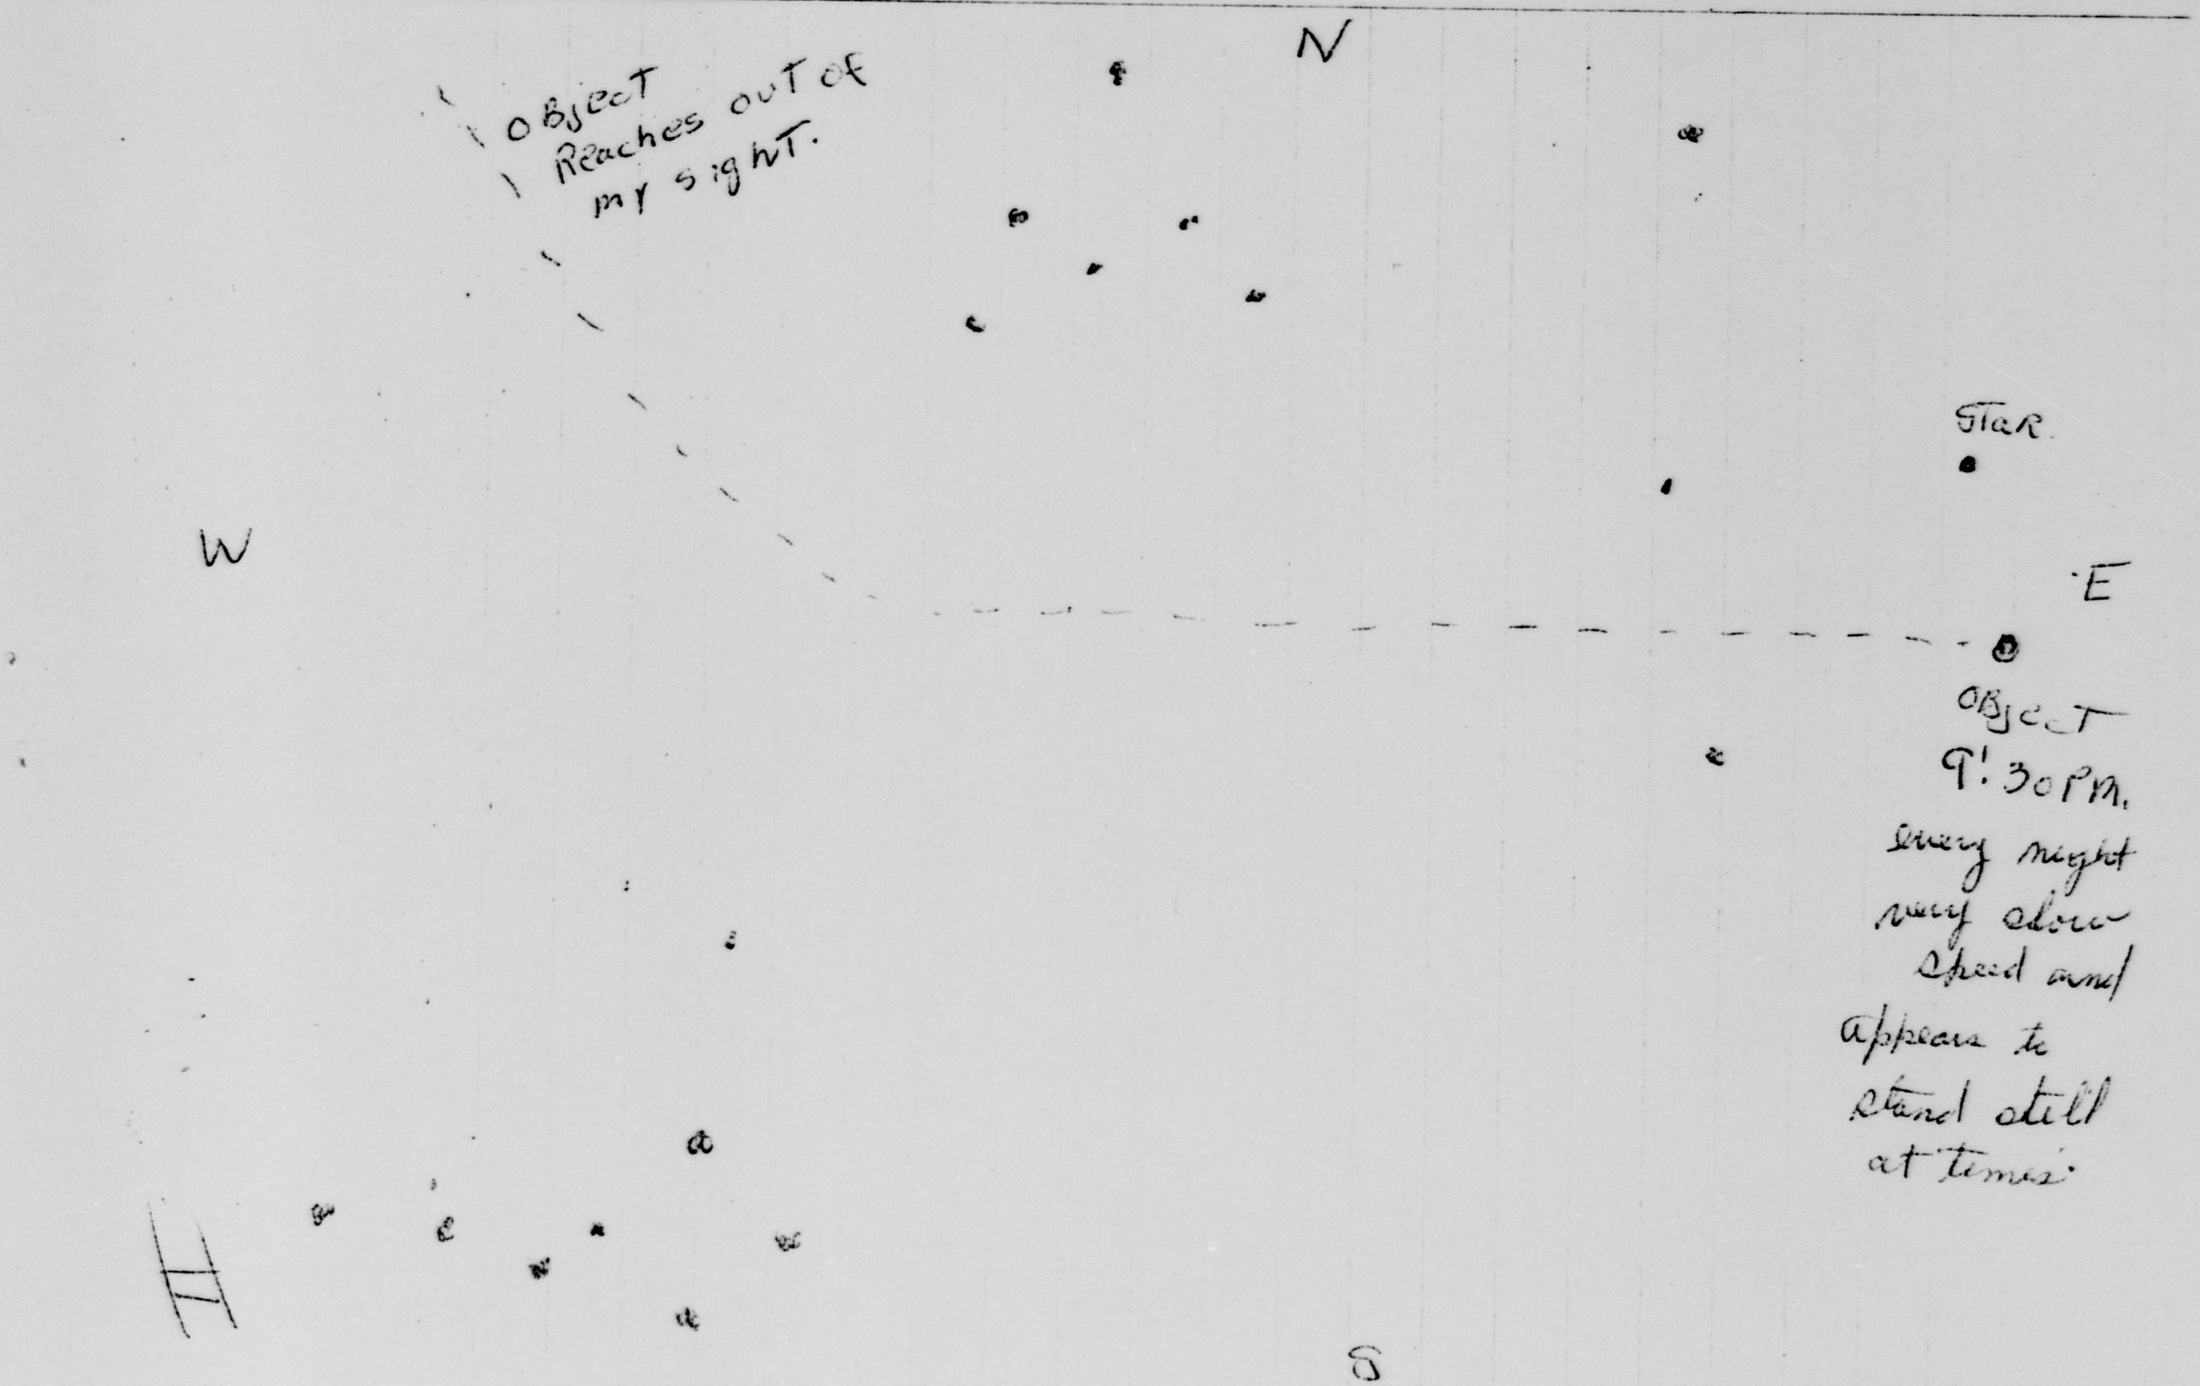

The time is at 9:30 P.M., course from the east to west, and duft off to north west, speed very slow, to it seems to stand still, size of a star.

It takes over an hour to get out of sight.

It is not a echo satellite or weather ballon, for echo takes only 10 minute to reach out of view, and a weather ballon would not appear same time, and same course every night. This is fifth night.

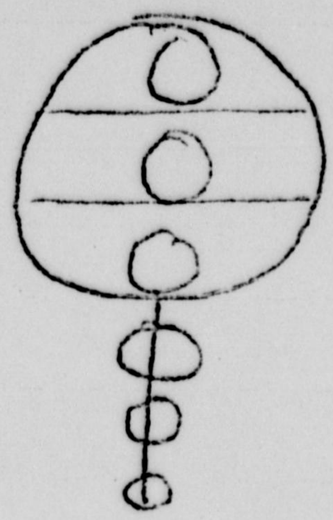

I would like to give my name and address, but people who report object are made fun at. But I hope the information I give may help you.

I will give as well on the next page. Also my location is [redacted], Fla. about 12 miles east of Gt. Sar. Airport.

Object
Reaches out of
my sight.
N
W
E
S
Star
Object
9:30 P.M.
Every night
very close
ahead and
appears to
stand still
at times.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

at times About 2/3 thirds, At others all of it. It depended on brightness.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

UFO form continued

20. Do you think you can estimate the speed of the object?

(Circle One) Yes (No)

IF you answered YES, then what speed would you estimate?_____

21. Do you think you can estimate how far away from you the object was?

(Circle One) (Yes) No

IF you answered YES, then how far away would you say it was? 30 miles

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building
b. In a car
(c. Outdoors)
d. In an airplane (type)
e. At sea
f. Other_____

23. Were you (Circle One)

a. In the business section of a city?
b. In the residential section of a city?
(c. In open countryside?)
d. Near an airfield?
e. Flying over a city?
f. Flying over open country?
g. Other_____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North c. East e. South g. West
b. Northeast d. Southeast f. Southwest h. Northwest

24.2 How fast were you moving?_____miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

25. Did you observe the object through any of the following?

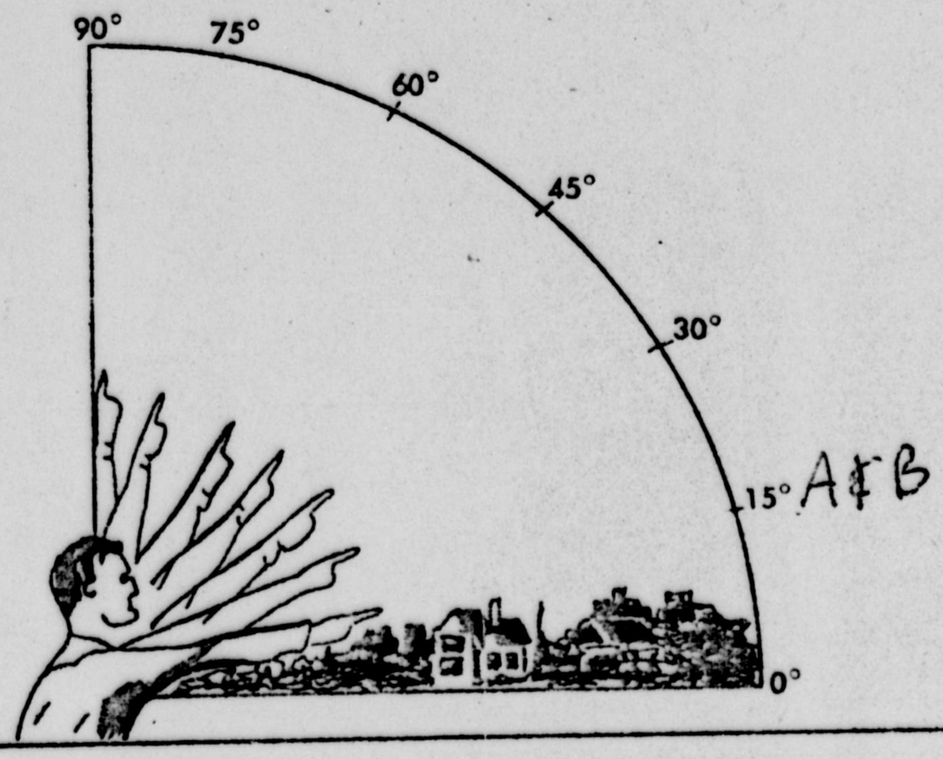

a. Eyeglasses	Yes	No	e. Binoculars	Yes	No
b. Sun glasses	Yes	No	f. Telescope	Yes	No
c. Windshield	Yes	No	g. Theodolite	Yes	No
d. Window glass	Yes	No	h. Other_____		

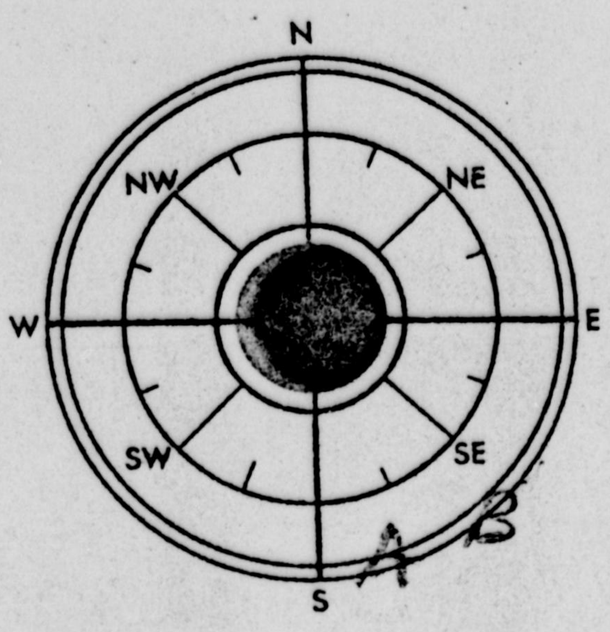

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

A Beacon
(But it wasn't because it
Didn't make a trail -

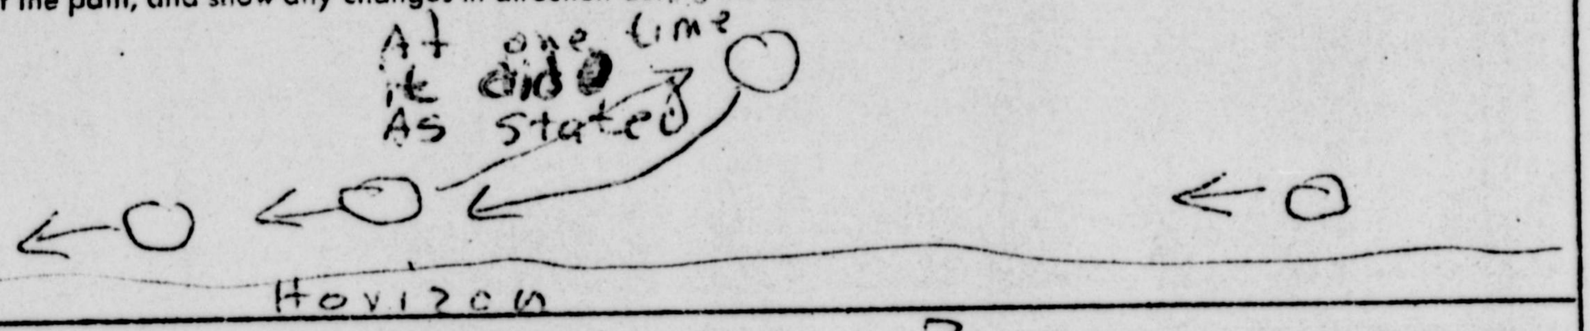

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

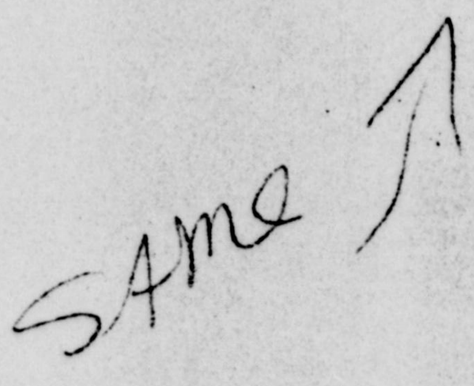

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? 3
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

UFO form continued

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO

31. Was anyone else with you at the time you saw the object? *(Circle One)* Yes (No)

31.1 IF you answered YES, did they see the object too? *(Circle One)* Yes No

31.2 Please list their names and addresses:

32. Please give the following information about yourself:

NAME [redacted] (Last Name) [redacted] (First Name) [redacted] (Middle Name)

ADDRESS _____ (Street) Endicott (City) ___ (Zone) Wash. (State)

TELEPHONE NUMBER [redacted] (Lacrosse) AGE 15 SEX M

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I'm A Normal boy of 15 who is An U.F.O. enthusiast and has read much info on them.

33. When and to whom did you report that you had seen the object?

14 (Day) Aug (Month) 67 (Year) Parents And Family

Official U.S. Air Force U

34. Date you completed this questionnaire: 14 (Day) Aug (Month) 1967 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

At first I saw only one and thought it was an airplane, so I shrudged it off. Later I looked back and saw two of them and were in same spot. So I continued to watch And I saw the third. then they proceeded to do the listed actions. Finally they faded from view.
