DAY 12 MONTH Oct YEAR 1968

While traveling by pickup truck from Teller, Alaska, we observed a light of an unidentified flying object, UFO, at 10:05 pm.

We were on a flat tire and were stranded since the gas station was closed. We were stranded for the night with no traffic after 7:30 pm. We were at mile 12 from Teller. The evening was dark with hardly any moon. Later clouds covered what moon there had been and rain fell.

About 10:05 we heard what we thought was a car approaching from the rear. We both got into the pickup and turned on the lights but no car came.

Since we couldn't see the car we turned our lights ^{out} to see better and saw flashes of light to the rear. We thought the approaching car must have gone off the road.

For a short time we didn't see the flashes, then Mrs. ~~Blodgett~~ saw a bright light in front and to the right and ~~away~~ ^{to the right}.

"There's a light! We'll get help after all."

"But there is no road over there," replied Mrs. Blodgett who had traveled this way many times before.

Nothing ever came from the rear and now our attention was given to the reddish-orange light in front and to the right at a distance.

The terrain hereabouts is a flat tundra, meadow with hills in the far distance to the left or right which also is in the direction of the Bering Sea.

The light to the front seemed like a ball of fire and seemed to rise up at an angle of 45 degrees and seemed to come toward us. It was a most eerie feeling. We consulted with each other as to what we saw and timed it so that all in all we observed it from 10:05 to 11:20 pm. *a period of 1 hour and 15 minutes*

The light seemed to move back and forth in the air probably several hundred feet or more above the ground. We wondered if it had gone over us. It moved up and down some but mostly back and forth as though hovering looking or observing. The light was in one mass. At times flashes of blue light were given off from the sides and down but also some from the top up. It seemed to flash as though it were signalling. It looked light a football but more rounded on the ends. At one time it appeared to have a tail.

We watched it through the open door of the pickup as well as through the windshield. It moved gradually toward the coast of Alaska to the right although it did

20 feet and farther. The object started to revolve above sometimes the lights seemed nearer and sometimes farther away.

A shower of light was given off at one time and we especially noticed a blue light that seemed to shoot upwards at one time.

Finally about 11:20 it continued to the right along the horizon and in the direction of the Bering Sea and disappeared from view behind the hills.

"It must have been about the size of a small room about 9 feet by 12 feet," said Mrs. Saucerman.

Mrs. [redacted] said, "I think it was about five or six miles away after it was up in the sky."

Late - just before 7 AM. Bluff: flew over the area to have any recording of it, however from my house but it appeared as recorded photo.

Just what are these unidentified flying objects?

Also, the women involved were stranded and alone. Fear could have been a contributing factor. This report is submitted two weeks after the incident because of the difficulty in establishing communications with this remote Alaskan area.
