4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 2 Minutes	11. BRIEF SUMMARY AND ANALYSIS The observer sighted an object that at a distance looked similar to the landing lights of an airplane, when closer however the object appeared roughly elliptical and had what appeared as windows along the side. The object had a steady floating motion and appeared yellow in color. The observer said he thought the object passed closer than permissible to an eastbound transport.
6. TYPE OF OBSERVATION	
7. COURSE	
8. PHOTOS ☐ Yes ☐ No	COMMENTS: The description of the object is similar to that of a garment bag hot air balloon. However the wind was probably blowing toward the south during the sighting, not west. The duration and description could also be of satellite decay. Object #2961 decayed at 1200 [±] plus or minus 12 hrs on 6 Oct. However it would not have been traveling westerly in its de-orbit. Since the object passed so close to the transport, one would expect the pilot to have seen the object. However nothing was reported to the Volunteer Office Flight Network. Another possible explanation could be that of a westbound plane with both its landing

lights and cabin lights on. The sudden disappearance of the object could also be explained by the pilot switching off his lights.

① No impression of "SAUCER SHAPE"

② No impression of POWER such as a plane conveys.

③ Steady floating motion; like satellite, or second hand of a large clock.

④ I feel if these were "from outer space" we would have found ONE wrecked by now.

⑤ I feel these "PHENOMENA" have ALWAYS been here. We are only recently ASSOCIATING them with planes or rockets.

Dear Major Quintanilla:

I am writing in reply to your letters of May 6th and May 7th.

In checking the VFON pilot report files I find no report for August 20th 1967 between the hours of 2300Z and 2330Z.

There is likewise no report for October 6th, 1967 anywhere near the Northeast area of the U.S.A.

A continuous check of the March files still show no report for March 24th, 1968 between the hours of 0103Z to 0115Z.

I am very sorry that I have been unable to help you with any of the above requests. Please be sure to write if there is anything further that I might be able to help you with.

Sincerely Yours

Investigations —

Dear Sir:

At about 4 am this morning, on going to the bath-room, I looked out of the window to observe the two Planets (2) now so clear in the morning sky.

As I looked, I observed a very bright light behind nearby trees, at least as bright as a plane's landing lights, and wondered why a WESTBOUND plane (Apparently,

~~31~~
~~11/11/67~~, 11 J.

(2)

out of Newark or Kennedy) would have landing lights on. As I watched, I was amazed to note that the entire "object" was aglow, and seemed to "float" or glide rather than be powered.

As it came closer, I got this view, (next page) of the entire object —
— Very clearly.

Entire object aglow
Bright on approach, but not when in
line with vision — Then, about bright
as full moon. NO EXHAUST SEEN.

The motion was similar to a satellite - but of course, too close, plus faster (to eye)

(VIEW #1)

BRILLIANT
(BEHIND TREE)

VIEW #2

(ELONGATING)

VIEW #3 (As sketched.)

At no time did it appear
as a CIRCLE OR SAUCER
I did not feel the squares

NOTES

DIRECTION — EAST TO WEST

SIZE — (DIFFICULT TO DETERMINE)

ALTITUDE — (EST.) 1500 FT.

SPEED — SAME AS SLOW
PLANE.

FLIGHT — STEADY, EVEN.

NOISE — NONE

The sky was unusually light
with a slight haze, and
IF it were a plane, I
would have seen this:
(SILHOUETTE)

on the sides were possibly
windows.

Other factors;

① An Eastbound Transport
was going over at a greater
altitude, and seemed closer
to the UFO than permissible.
Its marker lights were flash-
ing, and its motors could
have killed any sound from
the UFO - No - No clouds,
reflection is out - Plus, only
marker lights on Transport.

Respectfully -

Submitted,
