SUBJECT: UFO 20 Oct 1967, Location Unknown

ANALYST: SGT Jones

PI: Capt Benson

DATE: 23 Jun 1969

1. The following analysis resulted from examination of a single color print and the corresponding original negative by TDDPP personnel.
2. The dark spot on the print results from the presence of foreign material on the film prior to exposure. There is no density in the spot area on the negative and the very irregular edges are much sharper than the actual imagery.

Gentlemen:

On October 2, 1968 I sent a photograph and negative of a UFO, which was taken at Saint Thomas Island in October of 1967, to the following address.

FTD (TD- PT (UFO))

Wright -Patterson AFB, Ohio 45433

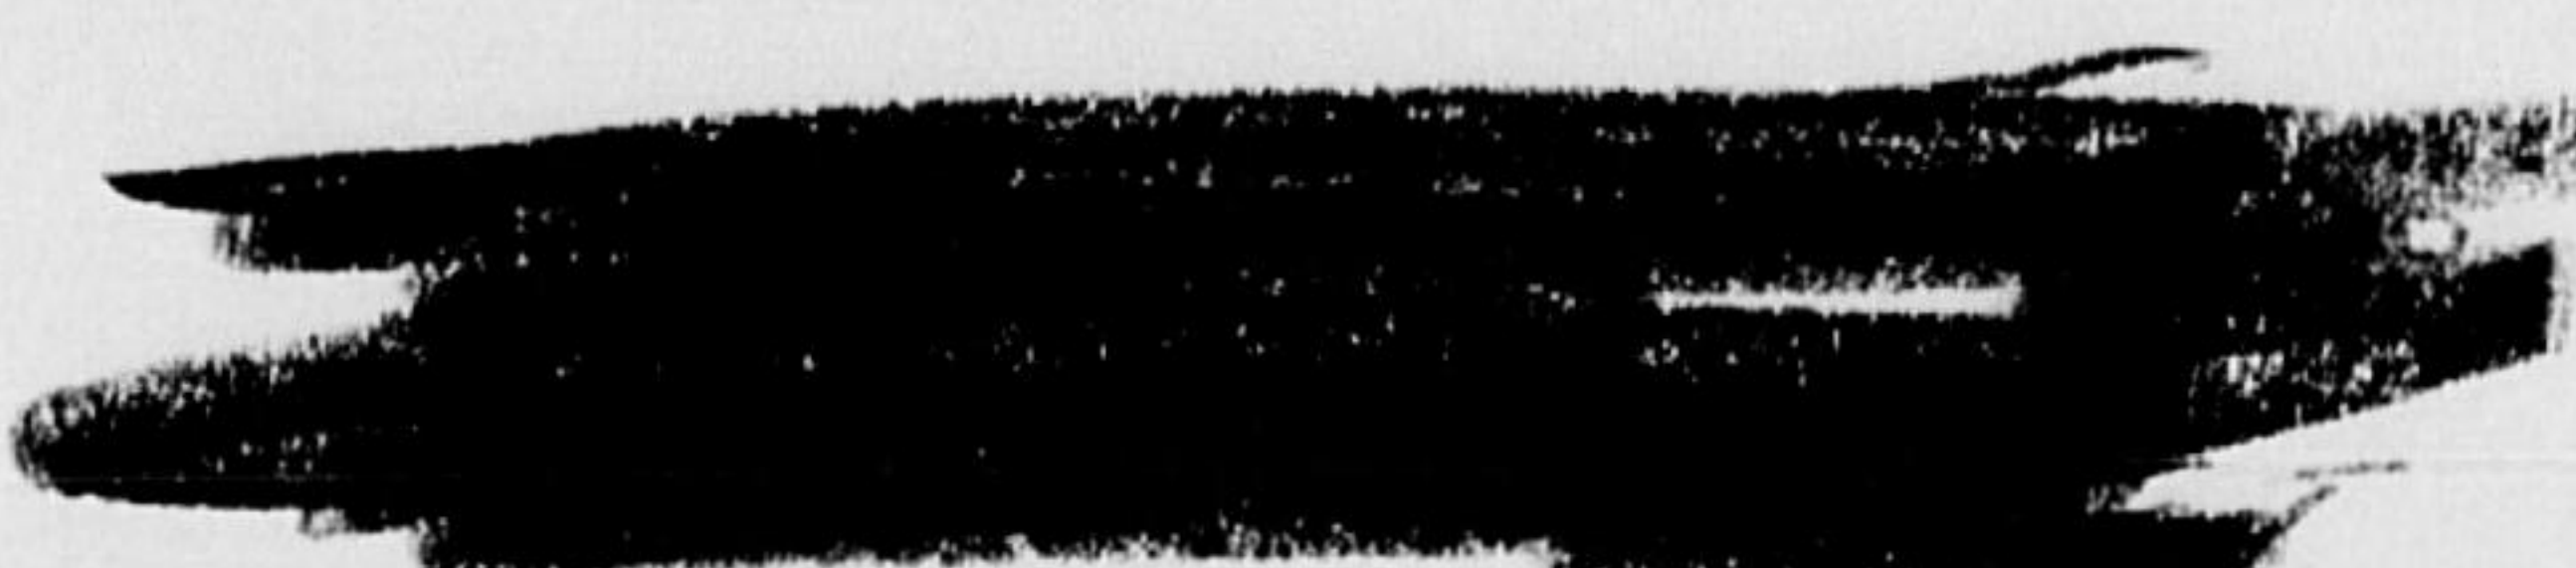

On October 22, 1968 I sent a letter to the same address to remind them of the fact that they have my photo. I have not received a letter from them yet.

Please conduct an investigation and let me know as soon as you find out anything.

I hope I do not have to write to someone higher than yourselves.

Yours truly

Gentlemen:

Enclosed please find a photograph and negative of a UFO. The photo was taken at Saint Thomas.

My parents went on a vacation to Puerto Rico on Oct. 18, 1967. On Oct. 20 they went to Saint Thomas for a day, this is when the picture (PHOTO) was taken.

I tried every way I knew to find out what the image was. I could not come to any identification so I am sending it to you.

Please send the picture back with the results as soon as possible.

Yours Truly

P.S. The UFO is circled. It is in the top middle of the photo.

Gentlemen:-

I am very interested in the subject of UFO's. I have studied on them for several years. I do believe that they are real. Enclosed are two (2) photo-stats of pictures taken of a UFO. These pictures were taken on October of 1968 in Puerto Rico.

By my study I found that a photograph was taken of a "satellite", a yellow-white egg-shaped object of unknown type and origin which circled Astronauts White and McDivitt, on the 20th revolution of their four-day space flight on June 4, 1965. McDivitt was over Hawaii when he sighted the object. He was using 16mm Eastman color film operating at six frames per second. The camera was equipped with a 5mm, 150-degree field of view lens.

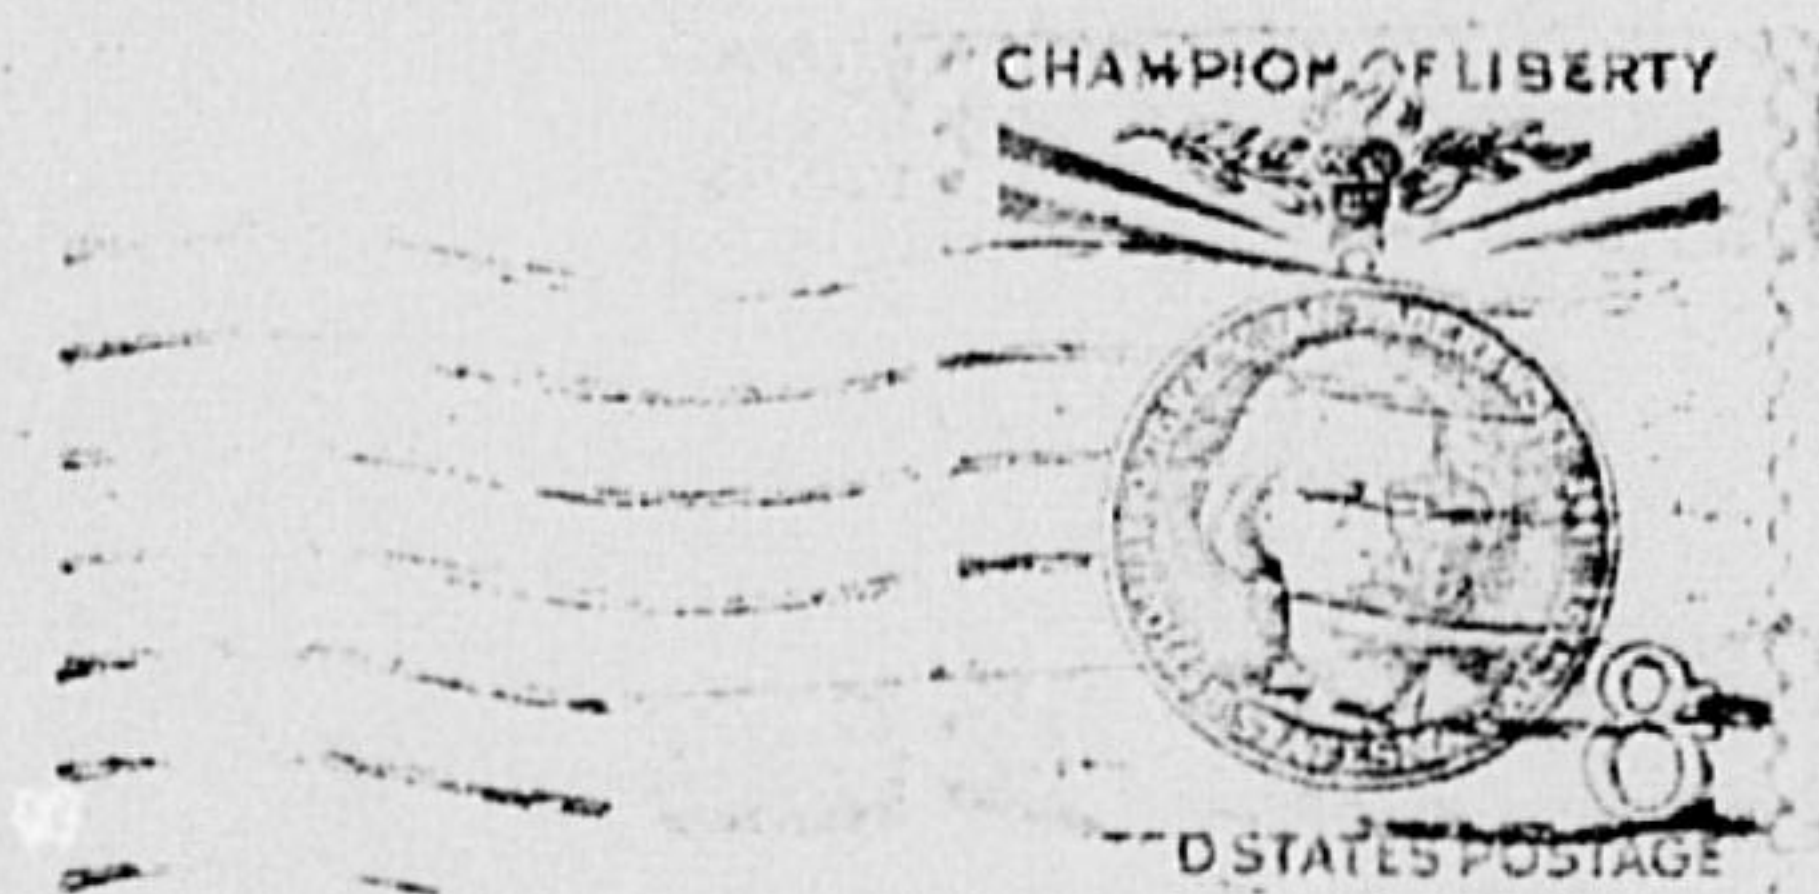

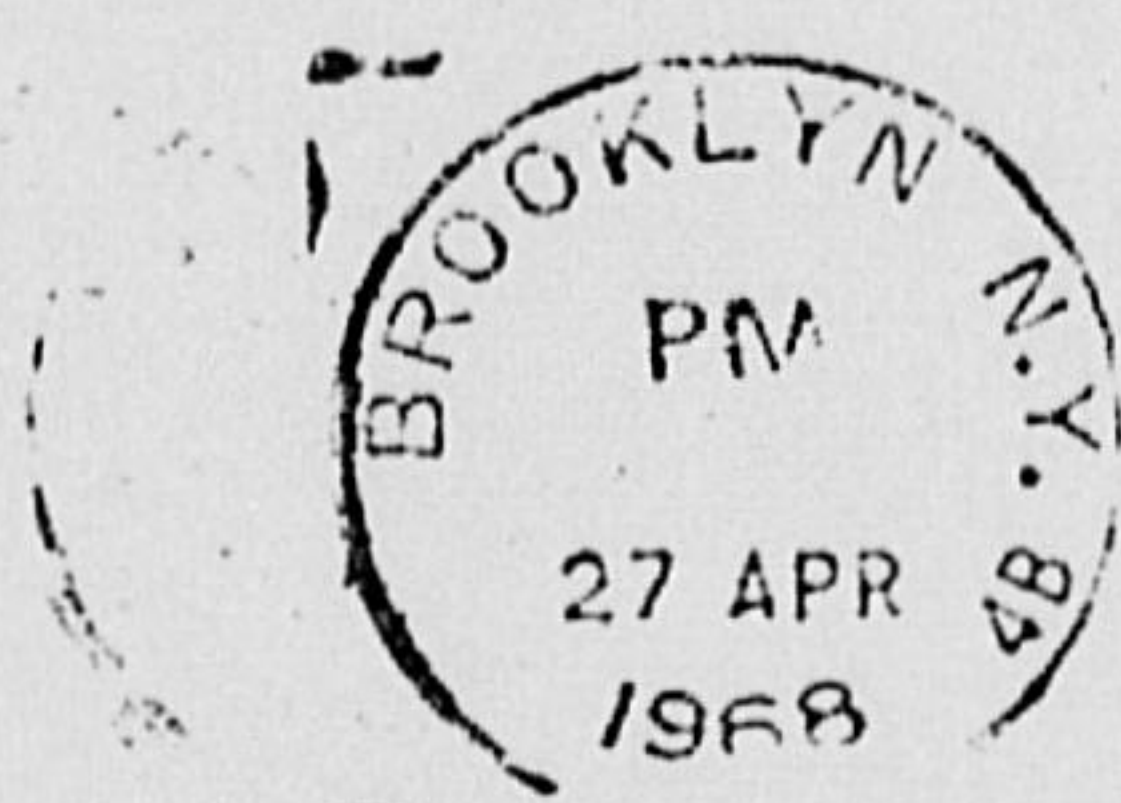

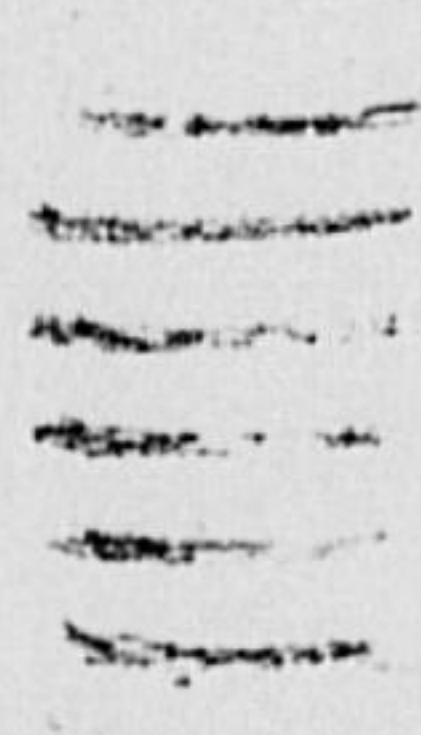

Please send me any free information you have on this event, and of any other happening you have information about. If you have no information and know where I can get it please give me the address. THANK YOU

Yours Truly,

SUBJECT: SAINT THOMAS UFO

PI: Benson/Tuttle DATE: 21 August 1968

It is difficult to identify the image that is considered to be a UFO. However, there are three small dark dotlike images appearing on the negative and the print. If these are what the submitter is referring to, they appear to be caused by particles of foreign matter on the film during exposure or processing.

Gentlemen:

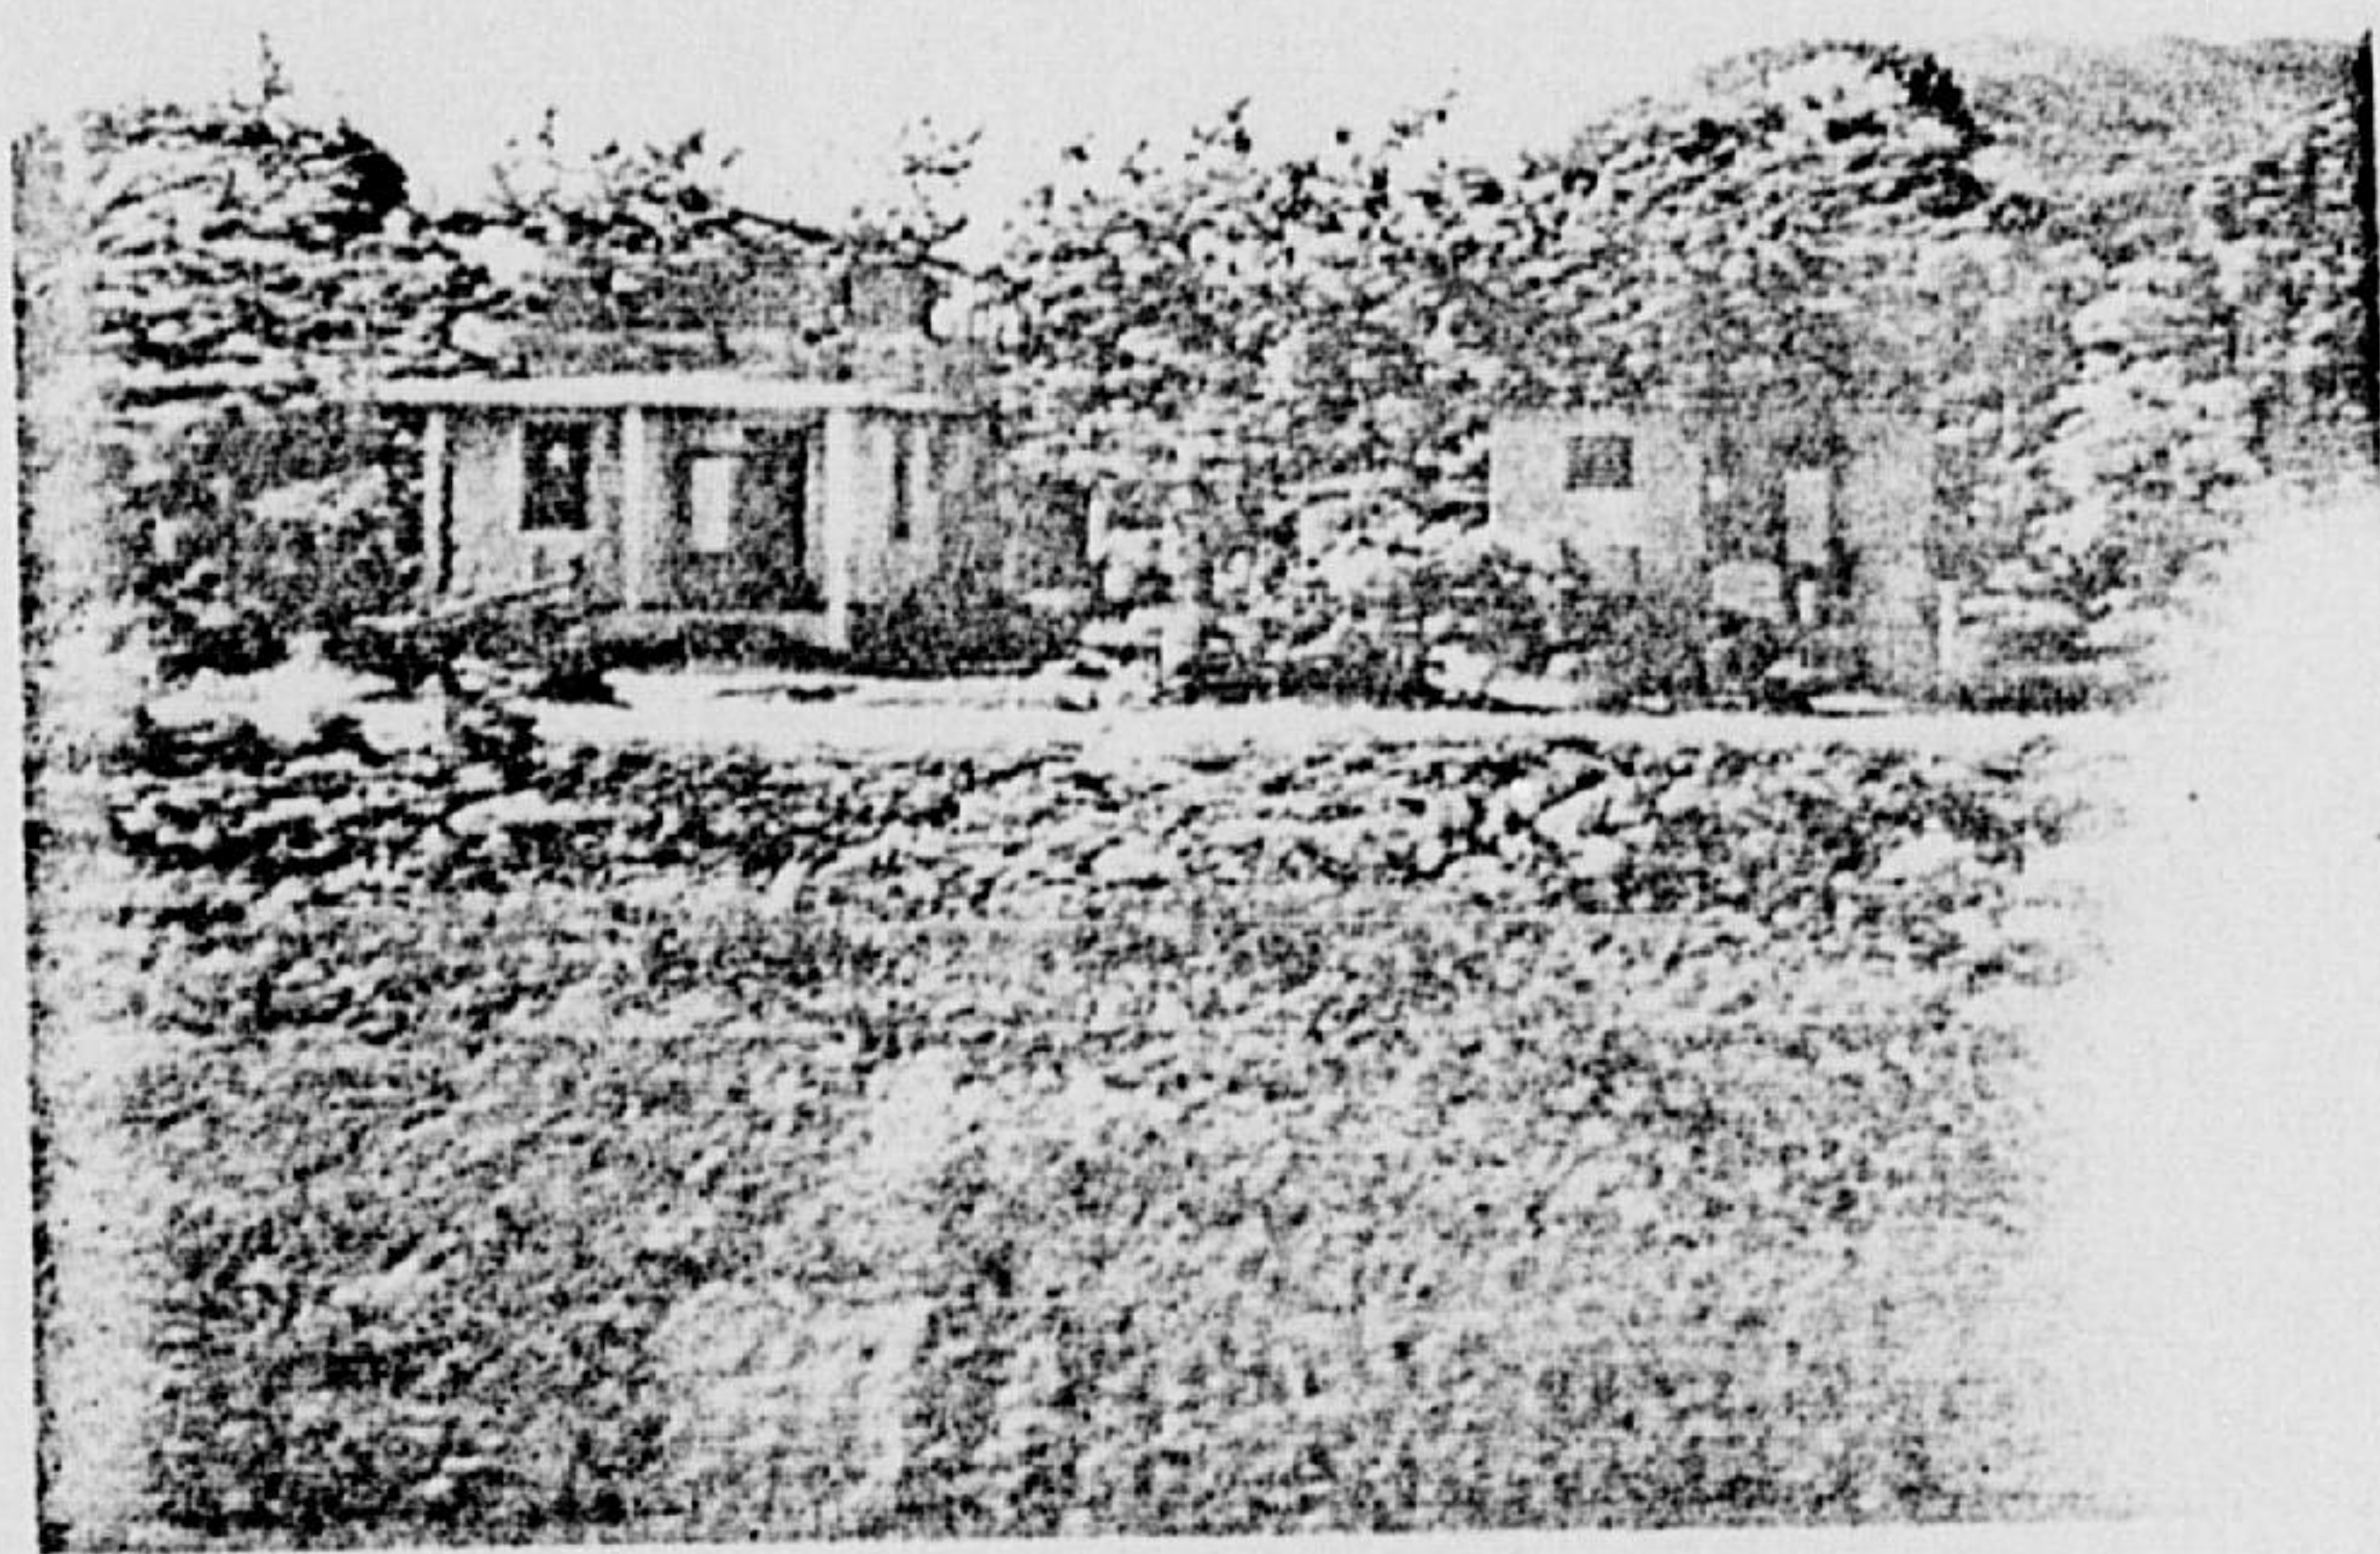

Enclosed please find a picture and an negative of an Unidentified Flying Object. The picture was taken over Saint Thomas on October 20, 1967. We did not see the object until it turned up in the print. I have used every method I knew possible to identify the object, but could not come to a conclusion. Please anilize the photo and send it back with the results.

Yours truly,

[REDACTED]

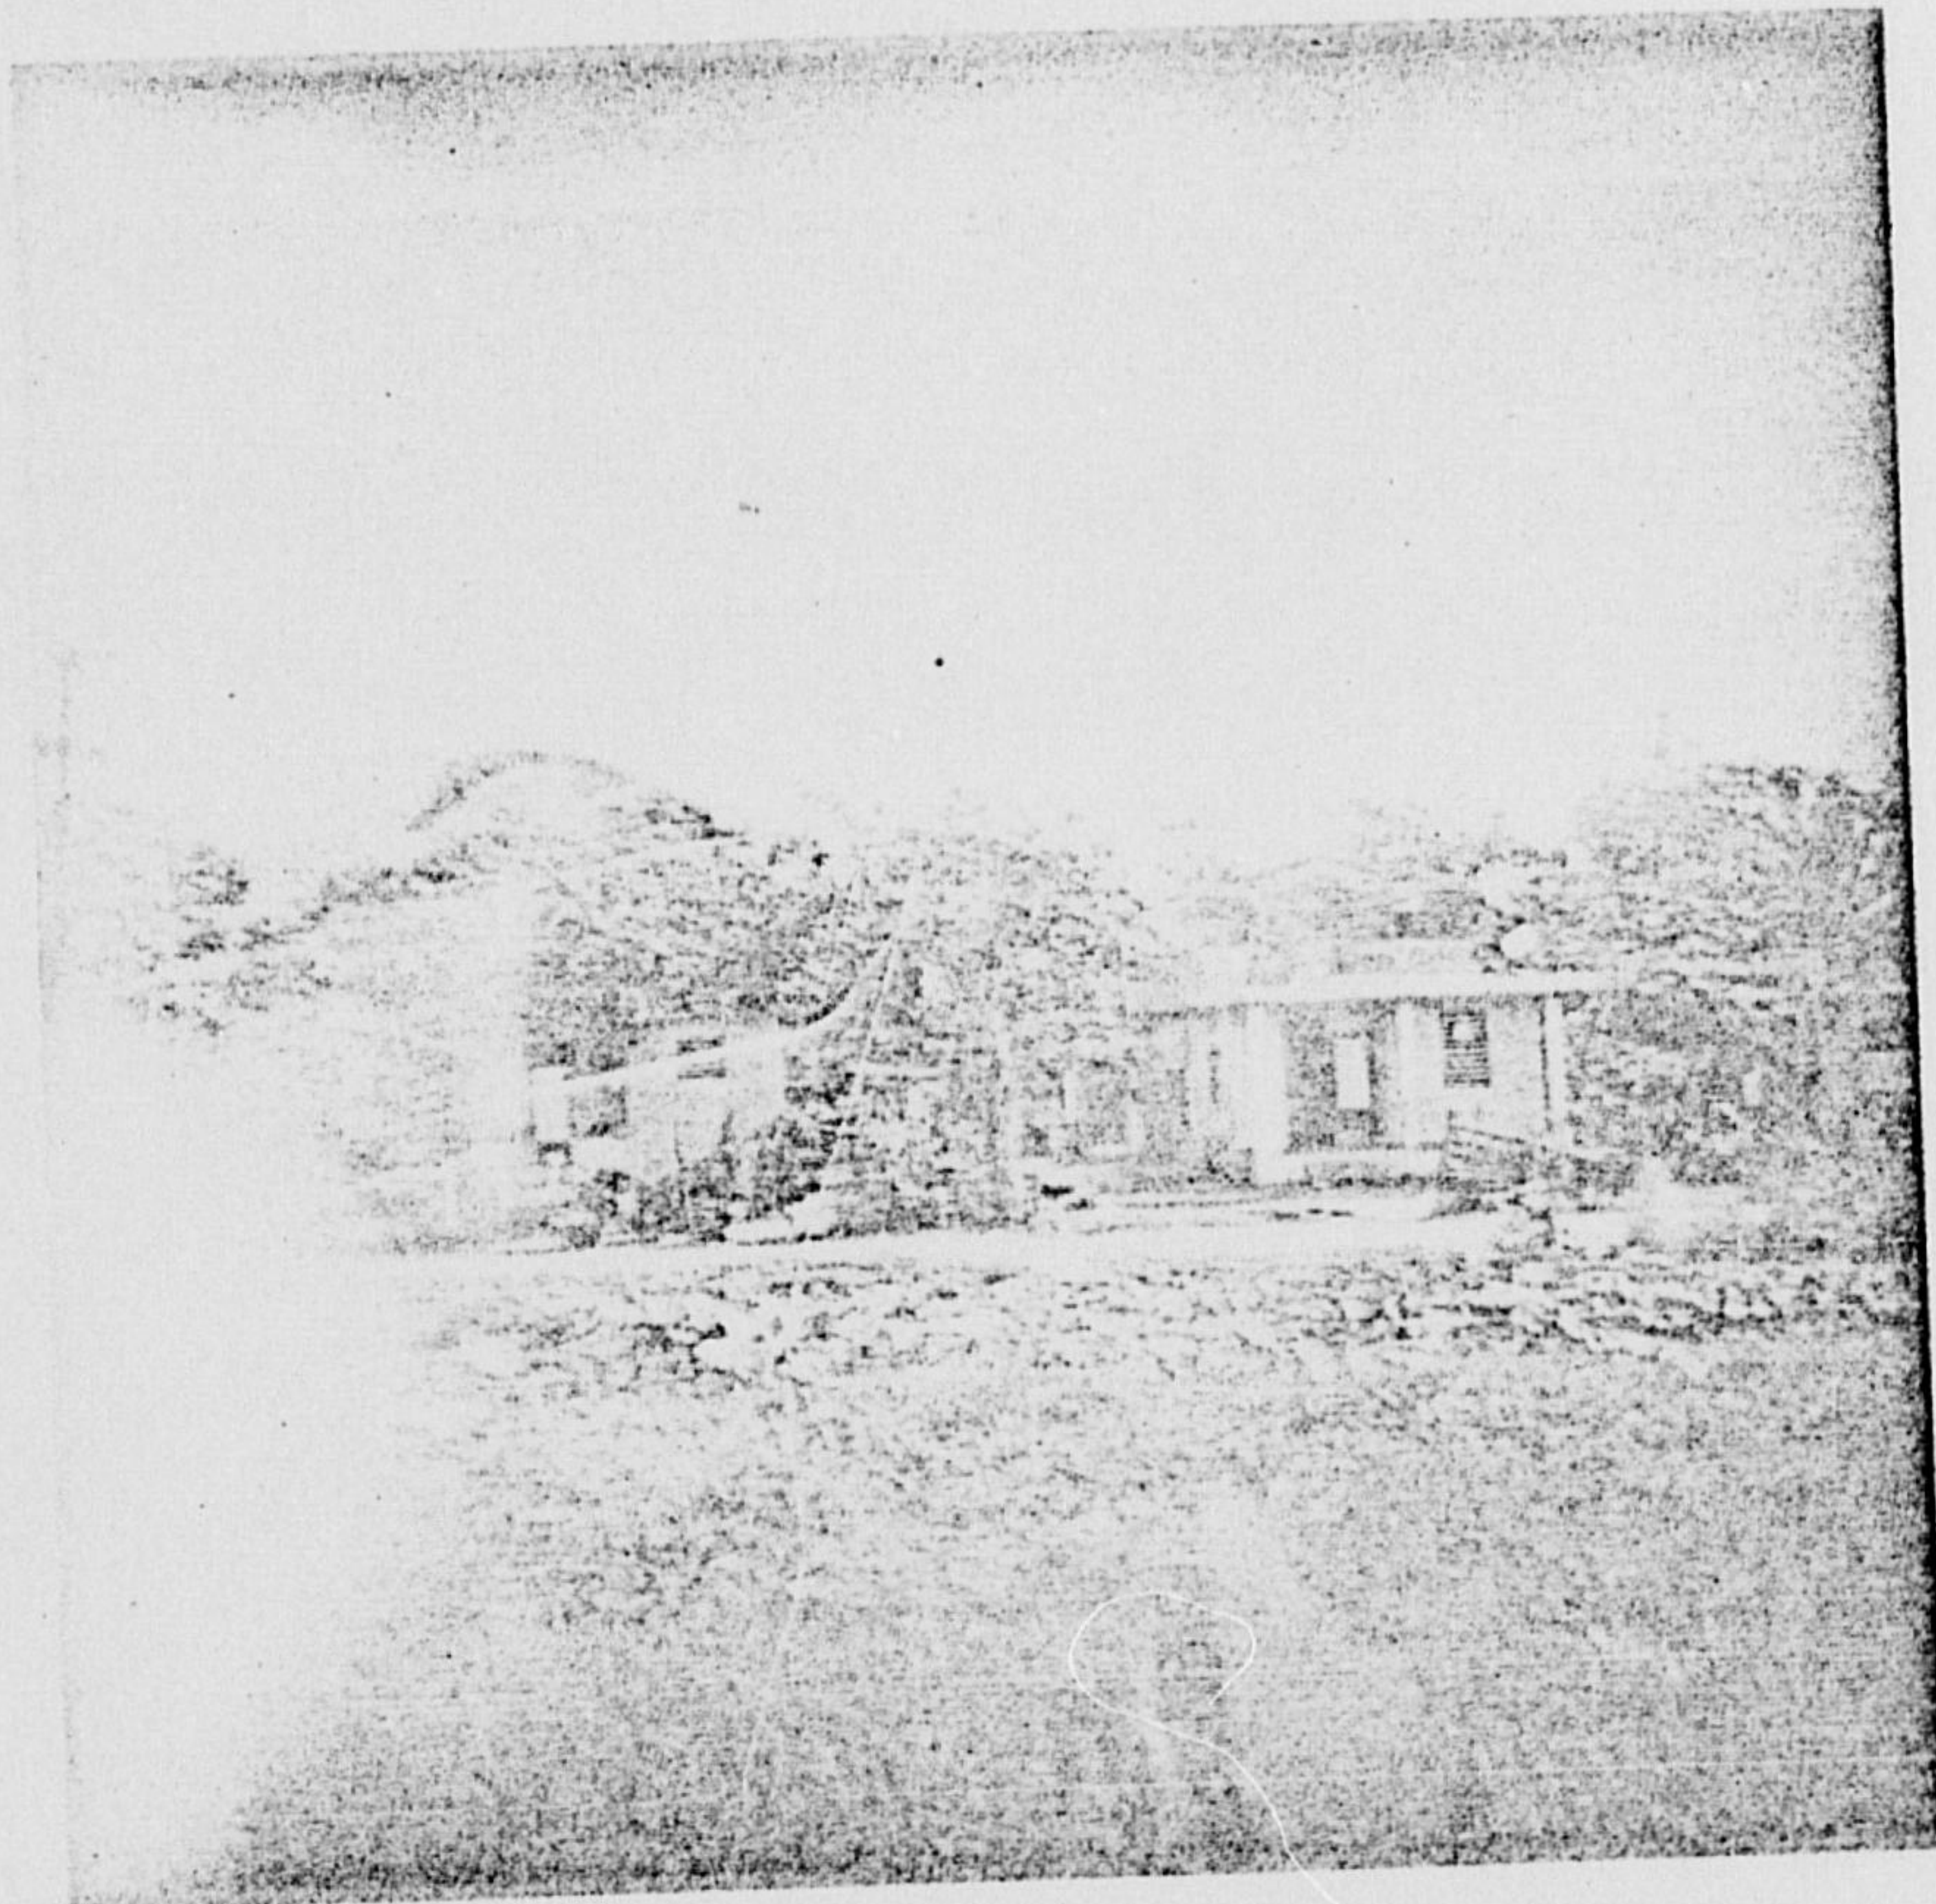

P.S. I have another picture of the same object but did not send it because this one might have got lost in the mail.

This case contains 8,
