Dear Sirs:

I am a very firm believer in U. F. O. One night before I fell asleep I looked out the window looking at the constellations & one of the stars started to move. It (~~turned~~) turned direction on a 90° angle turn. It then zigzagged, stopped, & then started off again & then disappeared. This was the night of September 10, 1967 at approximately 10:07. The reason I wrote this letter is because just the other night Nov. 10, 1967 at about 6:30 P.M. I not only saw it but I had my brother & three good friends to observe it. It was the same description as before - it looked like a star. One of my friends didn't believe it but now he is thoroughly convinced. My age is 13 & my friend is 12. We both have read a number of books pertaining to U. F. O. I've read "Letters to Project Blue Book" edited by Bill Adler, & "Flying Saucers - Serious Business" edited by Frank Edwards, & numerous magazines that come out at least once a month. I have no theory of where they come from (over)

But I believe they are extraterrestrial. If you have additional information that you can afford to give me please send it immediately.

Sincerely Yours,

We then watched the VFO (star-like object) for 15 minutes before it disappeared behind trees.

If possible would you send me any information & pictures of UFO's & some information on Project Blue Book.
