6. IMAGINE YOU ARE AT THE POINT SHOWN IN THE SKETCH, PLACE AN "A" ON THE CURVED LINE TO SHOW HOW HIGH THE PHENOMENON WAS ABOVE THE HORIZON, OR SKYLINE. WHEN FIRST SEEN. PLACE A "B" ON THE SAME CURVED LINE TO SHOW HOW HIGH ABOVE THE HORIZON THE PHENOMENON WAS WHEN LAST SEEN.

6A. NOW IMAGINE YOU ARE AT THE CENTER OF THE COMPASS ROSE. PLACE AN "A" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN FIRST SEEN. PLACE A "B" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN LAST SEEN.

7. IN THE SKETCH BELOW, PLACE AN "A" AT THE POSITION OF THE PHENOMENON WHEN FIRST SEEN, AND A "B" AT THE POSITION OF THE PHENOMENON WHEN LAST SEEN. CONNECT THE "A" AND "B" WITH A LINE TO APPROXIMATE THE MOVEMENT OF THE PHENOMENON BETWEEN "A" AND "B". THAT IS, SCHEMATICALLY SHOW WHETHER THE MOVEMENT APPEARED TO BE STRAIGHT, CURVED OR ZIG-ZAG. WAS THE PHENOMENON IN SIGHT CONTINUOUSLY? ☐ YES ☒ NO. IF "NO," INDICATE WHETHER THIS IS DUE TO YOUR MOVEMENT OR THE BEHAVIOR OF THE PHENOMENON, AND DESCRIBE SUCH MOVEMENT OR BEHAVIOR. INDICATE DISAPPEARANCES ON PREVIOUS SKETCHES. It first came as a small bright star behind a pink trail of mist about one inch wide. Then, the top point of a star rose over the pink trail, followed by the left side point of the star. Then, the whole of the much bigger star shot up above the pink mist trail. The light from the star magnified the pink mist. It now appeared to be about five times, times as wide. To my surprise, I saw the texture of the pink mist and the opening where the tiny star had shown thru. The opening was not round. I knew it was in the distance, but what I saw was in perfect focus. After the object was gone, I looked for the pink mist which I now know was formed by the sun. It had floated south. It had broken the mist ribbon and was wider. Also the sky was perfectly clear, when before it had appeared as dark sky. I had stood rooted to the spot as I had decided to do a long time ago, if — I ever saw something good.			

10. IF THERE WERE MORE THAN ONE PHENOMENON, HOW MANY WERE THERE? DRAW A PICTURE TO SHOW HOW THEY WERE ARRANGED. DID THIS ARRANGEMENT CHANGE DURING THE SIGHTING?

12. GIVE A BRIEF DESCRIPTION OF THE PHENOMENON, INDICATING WHETHER IT APPEARED DARK OR LIGHT, WHETHER IT REFLECTED LIGHT OR WAS SELF-LUMINOUS AND WHAT COLORS YOU NOTICED. DESCRIBE YOUR IMPRESSION OF WHETHER IT WAS SOLID OR TRANSPARENT, WHETHER EDGES WERE SHARP OR FUZZY. DESCRIBE THE SHAPE OR INDICATE IF IT APPEARED AS A POINT OF LIGHT. INDICATE COMPARISONS WITH OTHER OBSERVED OBJECTS, LIKE STARS, A LIGHT OR OTHER OBJECT IN YOUR FIELD OF VIEW.

Always it looked like a solid self luminous object. IF FIRST appeared as a tiny bright star, then as a huge brilliant star. Then it hung in space as a round white Christmas tree ornament. As it rolled towards earth it was not white, but a dirty color. I saw what looked like seams. Then it stood up and was white again. It disappeared and then I saw it again not near, grey color, moving away fast. It then occurred to me to count and I was able to count to 20 as it turned black and sped at an angle out to the star, blinking all the way. All this I do not quite understand, but I wanted to give you the facts. I do not understand how I could so clearly see the gap close in between the star and

the object which did not look far away, yet I realize how far away stars are. I do believe that the light on that craft penetrated many miles to earth and into space.

14. WHAT DREW YOUR ATTENTION TO THE PHENOMENON?

The tiny bright star peeking thru the pink globes,
Also, because I had seen the sky like
this once before.

A. HOW DID IT FINALLY DISAPPEAR?

As three star colored flashes at a star which
had a peak in the back and sort of a plateau in front.
It had moved towards the star at a fast left
angle on my left.

B. DID THE PHENOMENON MOVE BEHIND OR IN FRONT OF SOMETHING, LIKE A CLOUD, TREE, OR BUILDING AT ANY TIME?

☒ YES ☐ NO. IF "YES," DESCRIBE.

It moved in front of a star. A bright one. I purchased a
book to find the star. It might have been the brightest star
in the Boote's group. After the object disappeared, I kept watch-
ing and I saw the star dim its light. It was as if
someone had turned down a lamp up there. I wish I could
have stayed to see it the star grew bright again but the
car came and I had to go to work.

15. DRAW A PICTURE THAT WILL SHOW THE SHAPE OF THE PHENOMENON. INCLUDE AND LABEL ANY DETAILS THAT MIGHT HAVE APPEARED AS WINGS OR PROTRUSIONS, AND INDICATE EXHAUST OR VAPOR TRAILS. INDICATE BY AN ARROW THE DIRECTION THE PHENOMENON WAS MOVING.

16. WHAT WAS THE ANGULAR SIZE? HOLD A MATCH AT ARM'S LENGTH IN FRONT OF A KNOWN OBJECT, SUCH AS A STREET LAMP OR THE MOON. NOTE HOW MUCH OF THE OBJECT IS COVERED BY THE HEAD OF THE MATCH. NOW IF YOU HAD BEEN ABLE TO PERFORM THIS EXPERIMENT AT THE TIME OF THE SIGHTING, ESTIMATE WHAT FRACTION OF THE PHENOMENON WOULD HAVE BEEN COVERED BY THE MATCH HEAD.

The head of a household size match would have covered the tiny star and the fleeing black globe. Most of the big star and white globe would have remained in sight.

DESCRIBE SIMILARITIES AND DIFFERENCES BETWEEN THE COMMON OBJECT AND WHAT YOU SAW.	
<i>A small gold colored button shape - rounded top - small plume</i> <i>On my other paper I described the fleeing object as a small plume. But the fleeing oval shape did not seem round on the top. It appeared to be like this . I think it should have looked like this . But it looked like the shape was not rounded on the top - like it had a piece missing on the top. It looked like a black sail boat sailing on a black sea. The round under side looked as tho it had been outlined with black India ink. It looked like it was sliding on a black track but it was only a deep outline of the bottom of the object.</i>

27. INFORMATION WHICH YOU FEEL IS PERTINENT BUT WHICH IS NOT ADEQUATELY COVERED IN THIS QUESTIONNAIRE, ALTERNATIVELY PROVIDE A NARRATIVE EXPLANATION OF THE SIGHTING.

Even with the ever bright star flashing a blinding light in my face, I kept looking and then saw a blurred, white object coming right at me. I was coming very fast, slightly turned to my right. It looked all white and like this:

This object had a white round knob on the top of it in the center. Both the round knob on the top and the entire front of the object seemed to be lit up very brightly. I think unlimited white lights would look like that. I think as it came right at me, I saw what could have been openings or something else. I could not make out if these were round or square marks, because the object was going too fast and getting very blurred. It threw down a pure white shadow of itself. It was a long shadow of a round Christmas tree glass ornament with a round knob on top. The shadow was pure white elongated and did not seem to touch the black tar road. I thought it was coming down and even before I got my arm up to protect my eyes from its brightness, its great white shadow touched my coat as it flew over my head without a sound. I do not drink or smoke, but I know that there are such things as U.F.O., because I saw one.

About two years ago, I saw this same pink ribbon in the sky. I had been told that a foreign plane had been given permission to fly. If I am not mistaken it was a Russian MIG. I am sure the sun had formed a pink mist that day. Now I am wondering why they really wanted the permission that day. This was why I got confused by the pink trail. I thought the foreign plane made it. I have dated cash register slips to prove the U.F.O. books I now own were all purchased after this sighting. Many things

flash thru your mind at a strange sight like this.

PINK VAPOR STREAK DRIFTED SOUTH

years ago, I flew over the city of Haverhill on a similar night. The man at the controls at that time owned the city's private airport. The plane was a PIPER CUB. So, I would say flying conditions were ideal on DEC. 14, 1967.

Have just started from a member of this air force. In my letter you said the vapor trail appeared to be left by a jet. Since we have no information that is not correct.

This replies to your recent letter concerning the observation of an unidentified flying object (UFO).

Without essential information, such as detailed flight characteristics, angular velocities, or weather information, we are unable to undertake a scientific investigation. Had you contacted the UFO investigator at your nearest Air Force base immediately, an on-the-spot investigation would have been possible.

of a slightly globe with a flashing light
behind it.

The bottom of the globe appeared
darkly outlined. The center seemed light.
The globe appeared to be about two inches
high and three inches across the round side
facing me. It seemed to roll twice as
the top appeared to be warped and
uneven.

Then it sped across the sky flash-
ing all the way - a black object
getting smaller until only the flash
was visible and the fixed star grew dim.

While in High School, I received
A-1 and B-1 in my science class. Then
too, I saw the Sputnik I. But it did
not look like this and the Echo
satellite did not either.

At this writing, I do not know
if you take data on U. F. A.
However, it was suggested that

I send this letter.

Sincerely yours,

Gentlemen;

On Dec. 14, 1967, I observed
a dark squatty object speed across the
sky. It was flashing a bright white light.
I saw the space between the black flying
object and a fixed star grow smaller and
smaller. Then I only saw the flashes, a
the dark object seemed to have gone right
into the fixed star.

When, I first saw this object it came towards me above a pink trail left by a jet following the course of the Merrimack River. But it crossed the trail, turned at an angle and seemed disappear, although only a second ago it was a very bright star.
