INDICATE COMPARISONS WITH OTHER OBSERVED OBJECTS, LIKE STARS, A LIGHT OR OTHER OBJECT IN YOUR FIELD OF VIEW.

at first I thought it was a "shooting star". I jumped out of the car ran up the street to keep it in view realizing it was not what I had thought. Bright, long tail of light (like fire) nothing uncommon as I recall about the color, reddish blue I believe, very long. As it went directly past me it became longer the smaller as it went away from me (due to angle of sight) I could not make out the object making the light only that it was something there, my attention was drawn to the light itself. The object appeared to be dark to me, I could see no illumination of the object itself.

DESCRIBE SIMILARITIES AND DIFFERENCES BETWEEN THE COMMON OBJECT AND WHAT YOU SAW.

The only thing that would come close as for appearance is a comet is a meteorite, except its line of flight was to flat (not vertical enough), also it lasted much longer than a meteorite would without burning out, also the size, shape and length of the "tail" or flame changed as it went past.

It was similar to a jet with afterburner on continuously except the flame was much longer than any I have ever seen and it made absolutely no sound at all.

DAY 10 MONTH FEB YEAR 68

27. INFORMATION WHICH YOU FEEL IS PERTINENT BUT WHICH IS NOT ADEQUATELY COVERED IN THIS QUESTIONNAIRE, ALTERNATIVELY PROVIDE A NARRATIVE EXPLANATION OF THE SIGHTING.

It was 20 minutes until 5 A.M. I had just sit down in the car, OLD'S 442 HARDTOP 67 MODEL, started the engine pulled on the park light then turned to the right to look before backing out of the drive way. As I turned I saw it thru the right rear glass, I turned off the lights, turned off the engine got out and watched until I had to run down or up the street (east) to keep it in view. It was so low that it was about to go behind a story and a half home ($1\frac{1}{2}$ frame) across the street from me.

I watched it until it dropped over the terrain from me, in my judgement in the direction of Cincinnati.

Later I checked a map and it would seem to me that this object would have been traveling in the same direction as IR 71 and I believe about that distance from me, something like Springfield, O to Cincinnati, O.

I am sure that if you could find some one that was traveling south west on IR 71 and both 4:40 AM they should be able to give you a good and lengthy description of it perhaps a Highway Patrol car, although I reported this to the Dayton Post and the Toll me there had been no other sightings, my reporting was done within $\frac{1}{2}$ hour of the sightings.

Memo for the Record

Sighting of 27 Jan 68

Telephone conversation of 13 Feb 68

Wallops Island Station

Mr. [REDACTED] may have gotten photos of the obj. At first Mr. [REDACTED] thought the photos were the result of static electricity. However because of the coincidence that the plates are for the correct time period; That static usually occurs on more than just two plates; and that there was a bright obj. that was sighted by two of the gaurds , he is no longer sure that the plates are of static. The biggest reason that Mr. [REDACTED] thought the plates were of static is that the two diff. plates should overlay if the photos are of meteor or of a satalite re-entry. Mr. [REDACTED] said that he would give us a written statement of the occurrende if we requested it. He also said he would give the two gaurds, [REDACTED] and [REDACTED] a 177 if we sent them to him.

The photos have been forwarded to Dr. McCrosky at the smithsonian but Mr. [REDACTED] will have copies sent to us.

MEMO FOR THE RECORD

6 Feb. 1960

Talked to Mr. Hurst of the Smithsonian. Mr. Hurst stated that the obj. is not a correlated satellite re-entry but that the obj. could be a meteor.

Also talked to Mr. Wadsworth of the Univ. of Colo. The direction of the obj. was roughly toward the SW and has a duration of approx. one min. Wallops Island Meteorological station has a photo and a spectrum of the obj. There were reports from Raleigh N. C.

Knoxville Tenn. (New Sentinel--talk to Mike Butler)

Called Wallops Island Meteorology station, and talked to Mr. Chamberland. He stated that Claude Lipton who works for the Smithsonian took the pictures.

Called Charleston, Huntington, and Clarksburg West Va. police depts. None of these cities received UFO reports on the 27th.

Talked to Lt. Stubbs at ADC, an analyst for SPADATS. He will return the call if he is interested.
