Dear Sir,

Monday night, March 25 at 6:50 P.M. a U.F.O. was sighted in the area of Jackson's Gap, Alabama by [redacted]

The object was bright lights changing in color from green, to red, to white. When it streaked through the sky it left a red tail behind it.

We [redacted] went to the area it was spotted in and we found broken bushes and wettish spots that smelt like chemicals.

Please send information of what you think about it.

The U.F.O. was spoted again the next night in the northeast.

P.S. Please send information to [redacted]
