6. TYPE OF OBSERVATION ground visual	COMMENTS: Handwriting of "witness" appears to be the same as the observer's. In the original letter, the observer stated that "it almost looked like a plane coming in for a landing." Since the observation is of only a point source of light and with the information given may be of a satellite, an aircraft or (if it crossed a large arc of sky) a meteor. For this reason, it is being evaluated as Other (POINT SOURCE OF LIGHT).

Saw a strange object in the sky. It was to high up
tell the shape of the object. It was going to fast
to be a plane or a jet. But this object was to high
to be a jet plane. It came out of the east and went
to the west. When we were watching this object it
would slow down to a stop and then it would go much
faster then before. When It got toward the west it
but on more speed. And then we could not even find
the object. Also this object had a big bright light
on it. It all most looked like a plane coming in for
a landing. But this object was very big and very
