Gentleman:

On the night of ^{approx.} 10:55
PM.

July 19, 1968. I was
viewing a movie
at the Gloria
Drive-in located
north-east of the
immediate Lima,
Ohio area, when
out of heard one
I gazed out
the window. What
I saw was - I
thought a falling
star - but the
object moved on
in a consistent
pattern - back &
forth across the
sky. I didn't think
too much of it - but
I mentioned it to
my friend who

was was in fact
he was unable to
find it finally giving
up on trying
to show him the
location. ~~I thought~~
of the object. I
resumed watching
the movie - a
short time later
about 10 min I
looked up in the
sky and the small
object I had seen
before now seemed
larger and was
moving in a
south west direction
toward the
city of Lima. As my
friend and two
other people watched
the object - it
came closer and
began to take a
shape of a huge
tram engine. It

had many windows
in it and had
also a orangeish
amber light which
would dim and
the light to
great intensities
it made at high
speed.

COLORED

It also seemed
as though it
were spinning
around. It was
approx - 1,000 - 2,000,
ft above the
ground. The fact
of us watching it

It was out
of sight and dis-
covered several
minutes
of what it might
be. There was
no sound only
a slight "chirp"
so we saw
it was not a plane.

It was not
until 11:00 AM that
I looked in the
N.E. direction again
and there was
another object
of the same kind
moving back
and forth in the
sky - also with
the idemming
and lighted
lights and of the
same color. With
I left - it was

in its back and
fourth pattern.
I haven't had
too much of UFO,
only the back

1. The Aerial Phenomena Office is in receipt of an unidentified flying object (UFO) report from Lima, Ohio which occurred on 19 July 1968 from 10:25 pm to 11:00 pm.
2. The observer sighted an object that had numerous orangish-amber lights around it which seemed to be spinning. The object was first seen in the distance and seemed to be going back and forth over the area. Later, the object passed overhead and the observer stated that she heard a slight whirr.
3. The description is very similar to that of an aircraft with an electrical advertising sign, however, we do not know of any in your area. Do you have records that would indicate if any aerial advertiser was operating in the area that night.
4. Thank you for your assistance on this matter.

6A. NOW IMAGINE YOU ARE AT THE CENTER OF THE COMPASS ROSE. PLACE AN "A" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN FIRST SEEN. PLACE A "B" ON THE COMPASS TO INDICATE THE DIRECTION TO THE PHENOMENON WHEN LAST SEEN.

7. IN THE SKETCH BELOW, PLACE AN "A" AT THE POSITION OF THE PHENOMENON WHEN FIRST SEEN, AND A "B" AT THE POSITION OF THE PHENOMENON WHEN LAST SEEN. CONNECT THE "A" AND "B" WITH A LINE TO APPROXIMATE THE MOVEMENT OF THE PHENOMENON BETWEEN "A" AND "B". THAT IS, SCHEMATICALLY SHOW WHETHER THE MOVEMENT APPEARED TO BE STRAIGHT, CURVED OR ZIG-ZAG. REFER TO SMALLER SKETCH AS AN EXAMPLE OF HOW TO COMPLETE THE LARGER SKETCH.
